Which companies will hire after TCS NQT ?

Wipro NLTH, IBM, Capgemini these are the companies which are expected to conduct their national level hiring test next month.

We recommend that immediately after your TCS NQT test, start preparing from them.

How to get to know about when other off campuses will be there?

We'll just follow Preplnsta on our telegram/Instagram/WhatsApp we will post

Important Information

Disclaimer:

The questions showcased in this document have been recreated through memory, thanks to test-takers who recalled the questions post their test. Please use this document as an indicative preparation tool, rather than an exact replica of questions that appeared in the TCS NQT.

1. Please do not download this PDF as we will keep on **updating the same PDF once we get new questions**, from newer slots.
2. For discouraging malpractice, we will only add questions here. Once the previous slot has completed.
3. Answers/Explanations will be slowly added, our team is working on the same.
4. This PDF will contain all questions from all slots for 24th, 25th and 26th.
5. Keep Refreshing (CTRL + R) this document every 5 mins for newer questions

24th October Slot 1

Numerical Ability

Question 1- What is the sum (in RS) which when divided among X Y Z in the proportion 3:5:7 provides rupees 8000 more to Z then what it would have done to him when the proportion is 11 : 15 : 19?

- a. 180000
- b. 120000
- c. 175000
- d. 135000

Answer 1:

X:Y:Z X:Y:Z

3: 5: 7 11: 15:19

$Z = 7a/15$ $Z = 19a/45$

So as per Question $(7a/15) - (19a/45) = 8000$

$\Rightarrow 2a/45 = 8000$

$a = 18000$.

Question 2- If the positive square root of $(\sqrt{90} + \sqrt{80})$ is multiplied by $(\sqrt{2} - 1)$ and the product is raised to the power of four, the result would be

- a. 100
- b. 1600
- c. 11520000
- d. 10

Answer 2: 10 (**Hack:** Use the TCS calculator directly to find the answer of this question)

Question 3- A man has to travel 50 km in 2 hours. He could cover 20 km in one hour, and then had to stop for 10 minutes for refueling. By What factor should he increase his speed with reference to that during the first hour so as to be able to complete the journey as per schedule?

- a. 1.5
- b. 1.8
- c. 1.2
- d. 2.4

Answer 3: Total time he has = 2 hrs
total distance he has to covered = 50 km
in first 1 hr he completed 20 km
so $S_1 = 20$ km/hr
so remaining distance = $50 - 20 = 30$ Km
and remaining time = 1 hr
now he spent 10 minutes for refueling
so total remaining time he has = $60 - 10 = 50$ minutes
he has to complete 30 km in this time
speed = $30 / (10/60)$ km/hr
speed = 36 km/hr
for making a factor of initial speed as 20 km/hr
multiply 36 with $20/20$
speed = $36 \times (20/20)$
 $= (1.8 \times S_1)$ km/hr
 $= 1.8$ km/hr ---- Ans (As S_1 is 20km/hr)

= If you see this text anywhere in this doc, know that this is the hard work of PrepInsta Team which is copied by another company.

Question 4- X is four times as efficient as Y in respect of doing a particular work. Working together they complete the work in 16 days. In how many days y working alone will be able to half the work?

- a. 80
- b. 20
- c. 40
- d. 60

Answer 4: Efficiency of X = $4a$

Efficiency of Y = a

Time taken by both to complete a work = 16 days

$$\frac{1}{4a} + \frac{1}{a} = \frac{1}{16}$$

PrepInsta Royal Pass

10% Discount
Coupon Code:
YouTube

Royal Pass

[Join Now](#)

$$\frac{1 + 4}{4a} = \frac{1}{16}$$

$$\frac{5}{4a} = \frac{1}{16}$$

$$a = 20$$

Hence X will do the work in 20 days

And Y will do the work in 80 days

Thus Y will do half of work in 40 days

Note -

Efficiency and time taken are inversely proportional

So, if $a = 20$

then efficiency of X is 4 times of Y

So Y will do the task in 80 days and will complete half of the task in 40 days

Question 5- If $5^X 3^Y = 225 \times 405$, find the value of X^{2Y-3X}

- a. 27
- b. 81
- c. 125
- d. 25

Answer 5: Prime Factorization of $225 = 5 \times 5 \times 3 \times 3$

Prime Factorization of $405 = 3 \times 3 \times 3 \times 3 \times 5$

$$5^3 3^6 = 5X3Y$$

So $X = 3$ and $Y = 6$

Now, $X^{2Y-3X} = 3^{12-9} = 3^3$

$$3^3 = 27$$

Question 6- The collection of numbers which comprise the data given below is arranged in ascending order.

(3,7,9, N - 1,15,18,19,20)

If the median of the data is 12.5, what is the value of N?

- a. 10.5
- b. 11.5
- c. 11
- d. 12

Answer 6: 11

Median of the even data = (sum of middle terms) / 2
 $= [(N - 1) + 15] / 2 = 12.5$

Question 7 - How much percentage is (0.025% of 240% of 1.5) of 0.9?

- a. 10
- b. 0.01
- c. 0.1
- d. 1

Answer 7: 0.01%

0.025% of 240% of 1.5 = 0.0009

0.01 % of 9 = 0.0009

Question 8 - After purchasing two copies of the same book, X sold them respectively at 0.8 and 1.4 times their cost prices. What was the percentage gain earned or loss incurred by X?

- a. 10% loss
- b. 5% gain
- c. 10% gain
- d. 5% loss

Answer 8: 10% gain

Let the C.P of each copy be Rs 100

ATQ one copy is sold at $0.8 \times 100 = 80$

One copy is sold at $1.4 \times 100 = 140$

Total money spent in buying the copies = Rs 200

Total money earned after selling the copies = Rs $(80 + 140) = \text{Rs } 220$

Total gain of Rs 20. Therefore gain% = 10%.

Credits given to Preplnsta

Question 9: A file of cadets consisting of ten rows and five columns measures 420 m in length along the direction of their marching. How much time (in hours and minutes) would it take to march for a stretch of 3 km, if the stride of each cadet is 80 cm and he takes 57 strides per minute?

- a. 1 hr 10 min
- b. 1 hr 20 min
- c. 1 hr 24 min
- d. 1 hr 15 min

Answer 9:

So total distance need to be covered by last cadet

$$\Rightarrow D = 420$$

$$\text{Speed} = \frac{80}{100} \times 5.7 \times \frac{1}{60} \text{ per sec}$$

$$= \frac{76}{100} m/sec$$

$$\Rightarrow T = \frac{D}{S} = \frac{3420 \times 100}{76} = 4500 sec$$

$$= 75 \text{ min} = 1 \text{ hr } 15 \text{ min}$$

Question 10: Two vessels X and Y of capacities one and two litres respectively are completely filled with mixtures of two chemicals A and B. The ratio by volume of the chemicals A and B in X and Y are 3:2 and 4:5 respectively. The contents of A and B are mixed and the combination is kept in a vessel C of capacity of four litres. How many litres of Chemical A should be added to the combination so as to make the ratio of A to B equal to 1:1?

14

Preplnsta Royal Pass

YouTube

Royal Pass

Join Now

- a. $\frac{1}{270}$
b. $\frac{67}{1}$
c. $\frac{68}{1}$
d. $\frac{1}{135}$

Answer 10:

In X

A:B

$$\frac{600}{1000} : \frac{400}{1000}$$

In Y

A:B

$$\frac{8}{9} : \frac{10}{9}$$

$$\left(\frac{6}{10}; \frac{4}{10} \right)_{\text{X}} Lt + \left(\frac{8}{9}; \frac{10}{9} \right)_{\text{Y}} Lt$$

$$A = \frac{6}{10} + \frac{8}{9}; B = \frac{4}{10} + \frac{10}{9}$$

$$A : B = \frac{54 + 80}{90} : \frac{36 + 100}{90}$$

$$= 134 : 136$$

$$= 67 : 68$$

$$\frac{67}{68} : 1$$

$$= \frac{67}{68} + \frac{1}{68} : 1$$

$\frac{1}{68}$
= We will get 1:1 $\Rightarrow \frac{1}{68}$

Question 11 -The diameter of a pizza is 30 cm.What is the area(in cm^2)of the upper surface of a sector of the pizza whose arc length is 8 cm?

- 120
- 120π
- 60π
- 60

Answer 11: Area of sector when arc is given = $(L \times r)/2$

Where L = length of arc and r = radius of the circle

Original hardwork is done by PrepInsta, Sorry but we have copied their content

Here L = 8 cm and r = 15 cm

$$\frac{8 \times 15}{2}$$

Therefore, Area = $\frac{8 \times 15}{2} = 60cm^2$

Question 12- In a competitive exam, 5 marks are awarded for every correct answer and for every wrong answer, 2 marks are deducted. Sathwik scores 32 marks in the examination. If 4 marks had been awarded for each correct answer and 1 mark had been deducted for each incorrect answer, Sathwik would have scored 34 marks. If Sathwik attempted all the questions, how many questions were there in the test ?

- 14
- 12
- 20
- 26

Answer 12: 26 Answer

In given Question:-

Correct answer =5x and wrong answer=2y

Correct answer =4x and wrong answer= 1y

PrepInsta Royal Pass

10% Discount
Coupon Code:
YouTube

Royal Pass

Join Now

So,
 $5x - 2y = 32$
 $4x - 2y = 34$ ----- *2
Now
 $5x - 2y = 32$
 $8x - 4y = 68$
By solving
 $3x = 36$
 $x = 12$

Now to find 'y'
 $5 \cdot 12 - 2y = 32$
 $60 - 2y = 32$
 $y = 14$

By adding x+y
 $12 + 14 = 26$
Questions in the test = 26

Question 13- An item was sold at a profit of 12% after giving a discount of 12.5% on the list price. What would be the gain or loss percentage if a discount of 25% is given on the list price ?

1. 2.5% gain
2. 2.5% loss
3. 4% loss
4. 4% gain

Answer 13:

Cp -----> 100%
Sp -----> 112% (12% profit)
But Sp is 12.5% of M.P => 12.5% discount
=> 87.5% of M.P = 112
=> list price = 128
25% discount on M.P = 25% of 128 = 32
=> $128 - 32 = 96 = S.P$

Preplnsta Royal Pass

10% Discount
Coupon Code:
YouTube

Royal Pass

Join Now

C.P = 100 $\Rightarrow$ SP = 96 $\Rightarrow$ 4% loss

Question 14- The mean of a set of data is 5. What will be the mean if ten is subtracted from each data ?

1. -5
2. 5
3. 10
4. -15

Answer 14: -5

let the number of data be n

so sum of data = mean * number of data

= $5n$

This task was done by Preplnsta, we have stolen this from them

now 10 is subtracted to each data

so now sum becomes = $5n - 10n = -5n$

mean = sum of data / no. of data

= $-5n/n = -5$

so new mean becomes -5

Question 15- If $(x+10)\%$ of 240 is 60% more than $x\%$ of 180, then 15% of $(x+20)$ is what percent less than 25% of x ?

1. 15
2. $19\frac{1}{21}$
3. 16
4. $15\frac{1}{2}$

Answer 15:

$(x + 10)\%$ of 240 = $x\%$ of 180 + 60% of 180

Preplnsta Royal Pass

10% Discount
Coupon Code:
YouTube

Royal Pass

Join Now

if you solve this expression x value = 50

15% of $x+20$ is 10.5

25% of x is 12.5

so how much less = $2/12.5 * 100 = 16$

Questions 16- What is the diameter (in cm) of a solid right circular cylinder whose height is 6 cm and the area of the curved surface is five times the combined area of the two flat surfaces

1. 2.4
2. 0.9
3. 1.2
4. 3

Answer 16: 1.2

Here $h = 6$ cm

C.S.A = $2\pi rh$

$2\pi rh = 5(2\pi r^2)$

$2 \times \pi \times r \times 6 = 10 \times \pi \times r^2$

$12 \times \pi \times r = 10 \times \pi \times r^2$

$12 = 10r$

$1.2 = r$

Then diameter is 2.4

Questions 17- A sum invested on simple interest grows to Rs 22500/- and Rs 25500/- is seven and nine years respectively. What is the rate percentage of the interest ?

1. 7.5
2. 9.6
3. 12.5
4. 13.5

Answer 17: Total Interest of two years = $25500 - 22500 = 3000$

Interest of one year = $3000/2 = 1500$

Total Interest = $9 * 1500 = 13500$

Principle = $25500 - 13500 = 12000$

$R = I * 100/P * t$

= $13500 * 100/1200 * 9 = 12.5$

Question 18- What is the value of $(0.0000128)^{\frac{1}{7}}$?

1. 0.5
2. 5
3. 0.2

4. 2

Answer : Option 3

Solution :- $\frac{1}{5} = 0.2$

Question 19 - The variation in temperatures throughout the day in a desert town was studied on the basis of the record of minimum and maximum temperatures which were 8 and 36 degrees centigrade respectively. What was the standard deviation in degree centigrade?

- a. 12
- b. 22
- c. 14
- d. 28

Answer 19: min ---> 8 degrees

Max -----> 36 degrees

$$\frac{8 + 36}{2} = 22$$

$$S.D = \sqrt{\frac{\sum (x_i - \mu)^2}{N}} = \sqrt{\frac{(8 - 22)^2 + (36 - 22)^2}{2}}$$

$$= \sqrt{\frac{(14)^2 + (14)^2}{2}} = \sqrt{\frac{2 \times (14)^2}{2}} = 14$$

Question 20 - A sum of Rs. 30000 invested in a scheme where the interest gets compounded annually and grows to Rs. 51840 in three years. How much interest in Rs. would have got accrued in six months in the same scheme had the interest been compounded quarterly?

- a. 3075
- b. 2975
- c. 3024
- d. 3126

Preplnsta Royal Pass

Coupon Code:
YouTube

Royal Pass

Join Now

Preplnsta Royal Pass

10% Discount
Coupon Code:
YouTube

Royal Pass

Join Now

Answer 20:

$$51840 = 30000 \times \left(1 + \frac{r}{100}\right)^3$$

$$\frac{51840}{30000} = \left(1 + \frac{r}{100}\right)^3$$

$$\Rightarrow 1 + \frac{r}{100} = \sqrt[3]{1.728}$$

$$\Rightarrow 1 + \frac{r}{100} = 1.2$$

$$\Rightarrow \frac{r}{100} = 0.2 \Rightarrow r = 20\%$$

$$\frac{r}{4} = 5\%$$

Rate of interest CI per quarterly = 5%

=> for 6 months => 5% of 30000 = 1500 (1st quarter)

5% of 30000 + 5% of 1500 = 1500 + 75 (2nd quarter)

=> total of 6 months = 3075.

Question 21- 96 men were engaged for a project of constructing a railway track of the length of 18 km in four weeks. After one week it was observed that the work of 4 km was completed. How many additional men should be engaged for timely completion of the project?

- a. 16
- b. 14
- c. 15
- d. 12

Answer:

4 km was completed by 96 men

Remaining work is 14km in three weeks so per week 14/3

For 4km----- 96men

For 14/3 km ----- ?

= 14/3 x 96 x 1/4 = 112 so additionally 16 men needed

Question 22- If n is an integer such that 1nn352 is a six-digit number exactly divided by 24, what will be the sum of the possible value of n?

- a. 21

- b. 27
- c. 9
- d. 15

Answer 22: 15

Possible values of n are 2, 5 and 8 so sum of all possible values is $2 + 5 + 8 = 15$

Question 23. What is the mean deviation of the data 8,9,12,15,16,20,24,30,32,34?

- A.10.2
- B.8
- C.0
- D.9.6

Answer:

Step 1

Find the mean

$$8+9+12+15+16+20+24+30+32+34/10$$

$$=200/10$$

$$=20$$

Find the distance of each value from that mean

Value	Distance from 20
8	12
9	11
12	8
15	5
10	4
20	0
24	4
30	10
32	12

34

14

Step 3:- Find the mean of those distances

$$12+11+8+5+4+0+4+10+12+14/10$$

$$80/10=8$$

Question 24 - The marks scored by a student out of 100 in English and Mathematics at four consecutive monthly tests held in 2019 are presented through a Bar Graph shown below. In each case the marks are a multiple of five.

In which month is the difference of marks scored in the two subjects the highest ?

1. Jan
2. Mar
3. Apr
4. Feb

Answer 24: Feb (it is clear from the graph itself.)

Question 25-

The temperature (in° F) of a patient was recorded (using a clinical thermometer with smallest division equal to 1° F) during 6 AM to 8PM on four consecutive days,A,B,C,D at intervals of two hours and the results are presented in a tabular form given below.The reading at a particular time provides the average body temperature (ABT) of the patient for the previous one hour.He is supposed to be given temperature controlling medicine (TCM) at the bedtime if the total duration of his ABT remaining above 99° F during the 14 hour period of record is four hours or more.on which day,TCM was required?

Day/Time	0600	0800	1000	1200	1400	1600	1800	2000
A	101	100	99	98	99	98	100	100
B	98	99	100	100	99	99	100	102
C	98	99	99	101	100	99	99	100
D	98	98	99	99	99	98	98	99

- A
- D
- B
- C

Question 26: What is the mean proportional (MP) between the MPs of

$$\left(\frac{2}{7} \& \frac{32}{343}\right) \text{ and } \left(2 \& \frac{1}{5000}\right)$$

- $\frac{2}{35}$
- A. $\frac{175}{3}$
- B. $\frac{35}{4}$
- C. $\frac{35}{2}$
- D. $\frac{2}{35}$

Answer: $\sqrt{\sqrt{\frac{2}{7} \times \frac{32}{343}} \times \sqrt{2 \times \frac{1}{5000}}}$

$$4\sqrt{\frac{2}{7} \times \frac{22}{343} \times \frac{2}{5000}}$$

$$4\sqrt{\frac{2^4}{7^4} \times \frac{8}{5000}}$$

$$4\sqrt{\frac{2^4}{7^4} \times \frac{1}{5^4}}$$

$$\frac{2}{35}$$

Verbal Ability

Question 1 - For the four sentences S1 to S4 paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose appropriate sentences for the following.

S1- Gandhi does not reject machinery as such

S2-

S3-

S4 what he objects to is the craze for machinery, not machinery as such.

P: He says that today, machinery merely helps a few to ride on the back of millions.

Q: And adds that the spinning wheel is a machinery, a little toothpick is a machine.

R: He observes “How can I be against machinery when I know that even this body is a most delicate piece of machinery”

- a. QR
- b. RQ
- c. PQ
- d. QP

Answer: Option B

RQ

Question 2 : Government have been promising the eradication of child labour in high-risk industries in India for many years. However, almost 100 million children are still not able to go to school, and around 10 million are working in (1) _____ industries. India has the biggest child population of 380 million in the world _____ number of children who are forced to earn a living.

Blank 1

A. honorary B.hazardous C.handicraft D.hardware

Blank 2.

A. largest B. lowest C. latest D. loudest

Options:

- a. C , B
- b. D, C
- c. **B, A**
- d. A, D

Answer - B , A - Hazardous industries, and largest number of children.

Question 3: Read the passage given below and answer the questions

It used to be the American shopper that exemplified the state of the world economy. The focus now should be on the person on the other side of the till. America's retail industry is huge; it employs 15.9 million workers who represent one in nine American jobs. It is also undergoing a wrenching change, as E-Commerce is into sales. There is no more pressing test of society's ability to walk with technology's impact on work.

That impact is already visible. For all the benefits that online retailing brings to consumers, it is causing immense pain to offline rivals. Last year 4000 American stores closed; this year more than twice the number main shutter standard and poor's a rating agency, expects retail defaults there to outnumber those in 2009. at the height of the global recession. some formats-----discount stores groceries, high end mails----- will continue to thrive. But many will shrink. The industry has shed 50,000 net jobs since January. Department stores may need to close more than 800 stores to reach the productivity levels of 2006. Many outlets are looking for ways to cut labour costs by embracing automation

The passage is mainly about-----

- a. those who cannot afford to buy anything in large retailer shops
- b. those who regularly do their shopping online
- c. those who run large business and retail stores
- d. those who run smaller retailer shops

Answer: D

Question 4- Read the passage given below and answer the questions

It used to be the American shopper that exemplified the state of the world economy. The focus now should be on the person on the other side of the till. America's retail industry is huge; it employs 15.9 million workers who represent one in nine American jobs. It is also undergoing a wrenching change, as E-Commerce is into sales. There is no more pressing test of society's ability to walk with technology's impact on work. If by chance you are reading this text, please appreciate the hardwork done by PrepInsta Team, we have just Copied their work.

That impact is already visible. For all the benefits that online retailing brings to consumers, it is causing immense pain to offline rivals. Last year 4000 American stores closed; this year more than twice the number main shutter standard and poor's a rating agency, expects retails defaults there to outnumber those in 2009. at the height of the global recession. some formats-----discount stores groceries, high end mails----- will continue to thrive. But many will shrink. The industry has shed 50,000 net jobs since January. Department stores may need to close more than 800 stores to reach the productivity levels of 2006. Many outlets are looking for ways to cut labour costs by embracing automation

What is the significant measures that stores are trying to adapt

- a. Automation**

Answer - Automation. (A)

The answer is clearly stated in the last line of the passage.

Question 5- Read the passage given below and answer the questions

It used to be the American shopper that exemplified the state of the world economy. The focus now should be on the person on the other side of the till. America's retail industry is huge; it employs 15.9 million workers who represent one in nine American jobs. It is also undergoing a wrenching change, as E-Commerce is into sales. There is no more pressing test of society's ability to walk with technology's impact on work.

That impact is already visible. For all the benefits that online retailing brings to consumers, it is causing immense pain to offline rivals. Last year 4000 American stores closed; this year more than twice the number main shutter standard and poor's a rating agency, expects retails defaults there to outnumber those in 2009. at the height of the global recession. some formats-----discount stores groceries, high end mails----- will continue to thrive. But many will shrink. The industry has shed 50,000 net jobs since January. Department stores may need to close more than 800 stores to reach the productivity levels of 2006. Many outlets are looking for ways to cut labour costs by embracing automation

Which businesses will NOT continue to productivity levels of 2006

- a. Grocery Stores
- b. High end mails
- c. Discount stores
- d. Department Stores

Answer: Department Stores

Department stores may need to close more than 800 stores to reach the productivity levels of 2006.

Question 6- Read the passage given below and answer the questions

It used to be the American shopper that exemplified the state of the world economy. The focus now should be on the person on the other side of the till. America's retail industry is huge; it employs 15.9 million workers who represent one in nine American jobs. It is also undergoing a wrenching change, as E-Commerce is into sales. There is no more pressing test of society's ability to walk with technology's impact on work.

That impact is already visible. For all the benefits that online retailing brings to consumers, it is causing immense pain to offline rivals. Last year 4000 American stores closed; this year more than twice the number main shutter standard and poor's a rating agency, expects retails defaults there to outnumber those in 2009. at the height of the global recession. some formats-----discount stores groceries, high end mails----- will continue to thrive. But many will shrink. The industry has shed 50,000 net jobs since January. Department stores may need to close more than 800 stores to reach the productivity levels of 2006. Many outlets are looking for ways to cut labour costs by embracing automation

Why does the writer consider it important to discuss the plight of those on the other side of the till

- a. they need to be trained to deal with pandemic related protocols
- b. they have to take greater safety precautions at the workplace
- c. they know they now have less work to do but are great getting paid well
- d. there are a very large group of workers whose jobs are threatened

Answer: Option D

there are a very large group of workers whose jobs are threatened

Question 7: One the part of the sentence below may contain an error identify the part if there is no error choose “No error”

The state government has proposed to put on place the new portal to promote transparency and simplification

- a. The state government has proposed
- b. **to put on place the new portal**
- c. No Error
- d. to promote transparency and simplification

Answer - B

Put in place will be the right preposition.

Question 8 : Read the passage given below and answer the questions

Twinkling lights are just visible behind screens where staff are putting the finishing touches of this year's Christmas displays, but in other parts of the shop, the lights are still off. John lewis, flagship store in Oxford Street, Central London, is bearing the scars of the pandemic.

A restaurant and cafe are closed as there is more stuff than customers on the furnishings floors. The fashion floor is also a depressing sight, with tags flagging big discounts on racks of unwanted dresses and office wear. Last week it emerged that, John Lewis had applied for planning permission to convert entire floors of the shop into office space, it's not hard to see why ,

John Lewis, with its employee ownership and reputation for stealing customer service, still holds a special place in shoppers' hearts. But while sister chain Waitrose along with

31

other supermarkets, has thrived in the pandemic results published last week show the department store chain is in trouble.

Huge changes in shopper behaviour, which have been accelerated by coronavirus mean the John Lewis website is now responsible for 60% of the chain sales ----- up from 30 % pre-covid. This tilt towards the web means the department stores, as properties, and now deemed to be worth nearly Euro 500Mn and less than before ----- a reassessment in last week's results that sent the group crashing Euro 635 Mn into the red in the first half of its financial year.

Which one of the following is not a scar of the pandemic ?

- a. more floors converted to office space
- b. putting finishing touches to festival decorations**
- c. Lights off in parts of the shop
- d. Fewer customers and more staff

Answer - B

putting finishing touches to festival decorations is not a scar of the pandemic as stated in the first line of passage.

Question 9 : Which of the following sentences does NOT use informal language?

- a. Did you locate our office quite easily?
- b. You will be working with different managers during your training
- c. We shall endeavour to inform you of the position in two weeks time**
- d. Is there anything else you want to ask?

Answer - C.. Use of endeavour is formal. Informal would be ‘try’.

Question: 10- One part of the sentence below may contain an error. Identify the part. If there is no error, choose 'No Error'

Everyday life have become more complicated with the advancement in mobile technology.

- a. Everyday life have become
- b. No error
- c. advancement in mobile technology
- d. more complicated with the

Answer - A . everyday life has become (life is singular)

Question 11: The following three sentences can be revised into one better sentence. Choose the sentence that is the best revision:

I was at the fair. I got lost. I got scared

- a. I am scared after I am lost at the fair
- b. I went to the fair and got scared as i was lost
- c. I am lost the fair so i am too scared
- d. **I got lost at the fair and was scared**

Answer - D

This sentence combines all the elements of the 3 sentences with a proper use of conjunction and tenses.

Question 12 : Henry looks carefully into the telescope which lets him see far, far away, as far as the distant nebulae on the far edges of the Milky Way. Henry is an _____. He looks at the sky and stars in particular. Even though he spends much of his time looking at detailed computer reports, which are just lists and lists of numbers. His _____ thing

about his job is looking through the telescope. And today he is very excited. He isn't sure yet, but he thinks he has seen a dense cloud which might be the beginning of a new star.

Blank 1 - A. astrologer B - astrologist C -astronomer D - Astronaut

Blank 2 - A. favoring B - pleasant C - pleasing D - favourite.

- a. D , B
- b. C , D
- c. A , A
- d. B , C

Answer - B (C , D)

Henry is an **astronomer** (who studies the stars and planets) and his **favourite** thing is to look at the sky.

Question 13: Fill in the blanks with the most appropriate set of words from the options given below.

What did the painter do _____ himself from falling?

When he felt the ladder _____ he grabbed the gutter to save himself from falling.

- a. To save / began slipping
- b. To save / beginning to slip
- c. To save / begin to slip
- d. For saving / began to slip

Answer - D

Question 14: You are going to read a text about an artist. Some sentences are missing from the text. Choose from the list. (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

Kahini held her first solo show in 1998, the entire proceeds of which went to the Helen Keller institute for the Deaf and Blind in Mumbai. _____ Encountering the pathless terrain of inner landscape, the artist engages in a restless re-examination of idea and image. _____ She has also taken part in several art camps.

- A. In her fifth solo show with acrylic and oil-on-canvas paintings in the series titled 'Metamorphosis' held recently at the Mumbai's Jehangir Art Gallery. She showed for the first time her abstract work as well.
- B. Her work has been acquired by corporate houses and also forms part of private collections.
- C. She has participated in a group show along with 50 women artists to celebrate International Women's Day

- a. A , C
- b. C , B
- c. A, B
- d. B , A

Answer: B, A

Question 15: Aisha had been very successful managing her team in Edinburgh and was asked by the company to lead a remote team for an important two- year project. Keen to demonstrate her leadership abilities to the head office. Aisha got her team members together for a remote meeting. But right from that first meeting , she realized that this was going to be a different challenge. We have copied this from Prep Insta, forgive us for that

1. _____ Lucia kept asking about really specific details while Aisha was hoping to use the meeting to get to know the team members and identify priorities. Archies and Lucia kept accidentally talking at the same time, and when they didn't speak, there was an uncomfortable silence. Valentina hardly said a word.

_____ Without these visual clues, Aisha had no idea whether people were interested, lost, confused or bored.

- A. No one had their cameras on, so there was none of the usual communication through body language and facial expressions.
- B. Compared to a face-to-face meeting the remote team is not preferred by all the managers
- C. For a start, Archie was late for the meeting by about 15 minutes because of the 'technical problems'.

- a. A , C
- b. B , A
- c. A , B
- d. C , A

Answer - C, A

C starts with (for a start) hence this will be the beginning.

A talks about lack of visual clues which satisfies the sentence following the blank.

Question: 16 - Select the most appropriate option to fill in the blank

The final report on the project was _____ into three parts

- a. Broken out
- b. Broken off
- c. Broken up
- d. Broke away

Answer: Option C

Broken Up

Question: 17- The lady _____ purse was lost lodged a complaint at the police station

- a. Whom
- b. Who
- c. Whose
- d. Which

Answer : Whose. (C)

Whose is a relative pronoun that takes the place of a noun, pertaining to relate with a person.

Question: 18- One part of the sentence below may contain errors.

Identify the part if there is no error choose “No error”.

The board announced that the decision to reduce the syllabus is yet to be approved by the competent authority.

- a. No error
- b. the decision to reduce the syllabus
- c. The board announced that
- d. is yet to be approved by the competent authority.

Answer - No error (A)

Question 19- For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the P, Q, R, choose the correct sequence.

S1- Once upon a time an ambassador came to see the king of Sparta on some official business.

S2-

S3-

S4 - But he found Nothing of the kind.

P - The ambassador knew that the king of Sparta was also really the ruler of the entire Greece and so he expected to see the massive

Q - You are looking at the walls - ten thousand men and every man is a brick

R- After their work was over the King took his visitor on a sightseeing tour of the capital city.

- a. RP
- b. RQ
- c. PQ
- d. QP

Answer: Option a.

RP

Question: 20- For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the P, Q, R, choose the correct sequence.

S1 - The question has often been asked why the Wright Brothers were able to succeed in an effort in which so many others had failed.

S4 - Both men worked well together, read the same books, located and shared information, talked incessantly about the possibility of manned flight, and served as a consistent source of inspiration and encouragement to each other.

P - First, they were a team.

Q - Many explanations have been mentioned, but three reasons are most often cited

R - Each aircraft was slightly better than the last, incorporating in it the knowledge that they had gained from previous failures.

- a. PR
- b. QP**
- c. RQ
- d. PQ

Answer: QP

Question: 21- You are going to read a text about a man in a photograph. Some sentences are missing out from the text. Choose from the list (A to C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use

It was the first photograph that I had ever seen, and it fascinated me. I still remember holding it at every angle in order to catch the flickering light from the (1)_____ I never met him but I felt that I knew him. (2) _____ I moved the photograph so the shadow lay perfectly around his hollow cheeks. How differently his chin looks.

- a. The man in the photograph was Unsmiling but his eyes were kind.
- b. I would tell him how wonderful he looked with the the shadow that I had seen across his photograph, and I would most carefully suggests that he grew with
- c. One evening when I was looking at the photograph, as I always did before I went to sleep, I noticed a shadow across the man's thin face.

- A. 1- C 2- A
- B. 1- C 2- B
- C. 1- B 2- A
- D. 1- A 2- C**

Answer: Option D (1- A 2-C)

Question: 22

Governments have been promising the eradication of child labour in high risk Industries in India for many years. However almost 100 million children are still at work instead of going to school, and around 10 million are working in (1)_____ Industries. India has the biggest child population of 380million in the world; plus the (2)_____ number of children who are forced to earn a living.

Blank 1. A) honorary B)hazardous C)handicraft D)hardware

Blank 2. A)largest B) lowest C)latest D)loudest

1 - D, 2 - C

1 - B, 2 - A

1 - A, 2 - D

1 - C, 2 - B

Answer: 1 - B, 2 - A

Question: 23

Twinkling lights are just visible behind screens where staff are putting the finishing touches to this year's Christmas displays, but in other parts of the shop, the lights are still off. John Lewis's flagship store in Oxford Street, central London, is bearing the scars of the pandemic.

A restaurant and cafe are closed and there are more staff than customers on the furnishings floor. The fashion floor is also a depressing sight, with tags flagging big discounts on racks of unwanted dresses and office wear. Last week it emerged John Lewis had applied for planning permission to convert entire floors of this shop into office space. It's not hard to see why.

John Lewis, with its employee ownership and reputation for stellar customer service, still holds a special place in shoppers' hearts. tilt towards the web means the department stores, as properties, are now deemed to be worth nearly £500 Mn less than before – a reassessment in last week's results that sent the group crashing £635 Mn into the red in the first half of its financial year.

Question: 23

Which business will NOT continue to prosper?

- A. Department stores
- B. Discount stores
- C. High-end Malls
- D. Grocery Stores

Answer: Option A

Question: 24

. What unpleasant announcement will the chairman have to make to the employees?

- A. That they will have a pay cut
- B. That they will not get their annual bonus
- C. That they will not get their salaries
- D. That they will lose their job

Answer: B

Question: 25. How do we know that John Lewis had been in prosperous business prior to the COVID pandemic?

- A. Their website now handles 60% of their business
- B. They paid an annual bonus for sixty-seven years
- C. They have a new Lady Chairman
- D. They were known for their customer services

Answer: Option B

Question: 26.

Which one of the following expressions from the passage means losing money?

- A. Tilt towards
- B. On racks
- C. Sent crashing
- D. In the red

Answer: Option D

Logical Ability

Question 1: In the following diagram, the triangle stands for “males”, the circle stands for “doctors”, the rectangle stands for “government employed”, the hexagon stands for “corona warriors”. The numbers in different segments show the number of persons for that segment.

How many government-employed doctors are corona warriors but are not males?

- A. 14
- B. 23
- C. 16
- D. 17

Solution:

Question 2: In the following diagram, the rectangle stands for tennis fans, the circle stands for athletes, and the triangle stands for students, and the square stands for hockey players. The number in different segments show the number of persons.

How many athletes playing hockey are either students or tennis fans but not both

- A. 18
- B. 15
- C. 14
- D. 3

Solution:

Questions3 : In a certain code A%B means A is the brother of B, A&B means A is the mother of B, A@B means A is the daughter of B, A\$B means A is the father of B, A#B means A is the sister of B.

If K \$ Z % U & H # N @ T, how T is related to U?

- A. Sister
- B. Brother
- C. Husband
- D. Wife

Answer 3: K \$ Z = K is the father of Z (1)

Z % U = Z is the brother of U (2)

U & H = U is the mother of H (3)

H # N = H is the sister of N (4)

N @ T = N is the daughter of T (5)

From statement 3, 4, and 5

As U is the mother of H, H is the sister of N and N is the daughter of T complies that U and T are sisters

Question 4s: Four friends A, B, C, and D have one of the four professions i.e., Doctor, architect, engineer, and lawyer. Each friend belongs to one of the four different cities, Chandigarh, Indore, Lucknow, and Pune. A is not a lawyer or engineer. The doctor is from Lucknow, D is an architect. The lawyer is from Pune. The engineer is neither from Chandigarh nor Pune. D is not from Pune. C is from Indore. Which of the following statement is correct about B?

- A. B is the lawyer and belongs to Chandigarh
- B. B is Doctor and belongs to Pune
- C. B is a doctor and belongs to Chandigarh
- D. B is a lawyer and belongs to Pune

Answer 4:

- A is not a lawyer or engineer
- The doctor is from Lucknow
- D is an architect
- The lawyer is from Pune
- The engineer is neither from Chandigarh nor Pune
- D is not from Pune
- C is from Indore

From the above statements, we can draw a table

People	Profession	Cities
--------	------------	--------

A	Doctor	Lucknow
B	Lawyer	Pune
C	Engineer	Indore
D	Architect	Chandigarh

Questions 5: Nehal, Iqbal, Ronit, Malini, and Harbajan, in any one of the 5 activities, i.e., quiz, singing, dance, debate, and mimicry. Ronit participate in singing, Harbajan does not participate in debate or mimicry, Malini does not participate in Mimicry. Iqbal participates in Quiz. Who participates in the debate?

- A. Nehal or Malini
- B. Can not be determined
- C. Malini
- D. Nehal

Answer 5:

- Ronit participate in singing
- Harbajan does not participate in debate or mimicry
- Malini does not participate in Mimicry
- Iqbal participates in Quiz

From the above statements, we can draw a table

Person	Activities
Nehal	Mimicry
Iqbal	Quiz
Ronit	Singing
Malini	Debate

Question 6: Five teachers P, Q, R, S, and T teach a group of students in a sequence between 9 a.m. and 2 p.m. Each teacher teaches for one hour Q takes the first class, S teaches just after T. R teaches before P and T. Who takes the second class from 10 am to 11 am?

- A. P
- B. T
- C. R
- D. S

ANswer 6:

- Q takes the first class
- S teaches just after T
- R teaches before P and T

As Q is taking the first class (10 - 11 am) and R teaches before P and T, also S is teaching after T.

Hence R is taking the second class.

Question 7: Each of the five pairs of letters clusters, the letter in the second term is a rearranged, transformed form of the letters to the first term in a particular pattern. In which two pairs has the transformation been done the same?

- A. MASON: AMNOS
- B. PARTY: APRYT
- C. FAULT: AFTLU
- D. LODGE: DOLEG
- E. CARGO: ACOGS

- D and E
- A and C
- B and C

- A and E

Answer 7:

A : MASON: AMNOS

M and A are interchanged and S and N are interchanged keeping O at its original position

Similarly

C: FAULT: AFTLU

F and A are interchanged and U and T are interchanged keeping L at its original position.

Question 8: Which of the following patterns of the boxes can be formed when the sheet given below is folded? (the letters are shown to indicate the sides only)

A. Only 1, 2, and 4

B. Only 2

C. Only 2 and 3

D. Only 1 and 2

Answer 8: Only 2

Question 9: Given below is a question followed by two statements. I and II, each containing some information. Decode which of the statements are sufficient to answer?

How many Rs would Shalini need to spend to buy 11 pencils and 14 pens?

I. Shalini spent an amount of Rs 201 to buy 15 pencils and 12 pens

II. Shalini spent an amount of Rs 121 to buy 7 pencils and 9 pens

A. Statement II alone is sufficient

B. The combination of both statements I and II are necessary

C. The combination of both the statements are not sufficient

D. Statement I alone is sufficient

Answer 9:

The combination of both statements I and II are necessary

Question 10:

The fig marked X is folded to form a box. Four possible boxes A, B, C, and D are given below, some of which can be formed and some cannot be formed. Choose from the alternatives, the boxes that can be formed.

A. A and B only

B. B and C only

C. B and D only

Answer 10: B and C only

Question 11: The number of employees working in six different departments in two companies A and B are given below. Study the given data and answer the questions that follow.

Company A

Departement	No of Employees
Marketing	256
HR	72
Production	504
Accounts	68
Operations	256
Planning	46
Total	1202

Company B

Departement	No of Employees
Marketing	524
HR	108
Production	736
Accounts	122
Operations	146
Planning	58
Total	1694

What is the percentage difference between the employees working in the production department of company A and B.

- a. 3.21%
- b. 2.27%
- c. 1.52%
- d. 1.15%

Answer 11:

Question 12 - If both company A and B merge together to form company C, then what is the percentage of marketing and accounting employees in total employees of company C?

- a. 33.49%
- b. 37.59
- c. 29.52%
- d. 41.24%

Answer 12 : Total no of employees in marketing in both the companies = $256 + 524 = 780$
Total no of employees in accounting in both the companies = $68 + 122 = 190$

Total number of employees in marketing and accounting in both A and B = $(780 + 190) = 970$.

And the total no of employees in both the companies = $1202 + 1694 = 2896$.

Hence, percentage of employees in marketing and accounting in total employees in company

$$C = \frac{970}{2896} \times 100$$
$$= 33.49\%$$

Question 13: A statement is followed by two assumptions numbered I and II. Consider the statement and decide which of the given assumption(s) is/are implicit in the statement.

Statement-

Various governments across the world have issued strict guidelines for the public to wear masks and wash hands regularly to safeguard their health during covid-19 pandemic.

Assumptions-

- I. Covid-19 Pandemic is a serious health issue.
- II. There are ways by which people can save themselves from Covid-19 pandemic.

Options-

- a. Neither I nor II is implicit
- b. Both I and II are implicit
- c. Only II is implicit
- d. Only I is implicit

Answer 13 -Both I and II are implicit.

Question 14: Five Friends A,B,C,D,E are sitting in a line facing North.Who is sitting exactly in the middle?

- I. C is sitting between A and B.E is at the fourth place to the left of B.
- II. E is sitting to the immediate left of D.C is to the immediate left of B.

Options:

- Statement II alone is sufficient.
- The combination of both the statements I and II are not sufficient.
- The combination of both the statements I and II are necessary.
- Statement I alone is sufficient.

Answer 14: Statement I alone is sufficient

Question 15: What is the wrong number in the following series?

CMQ , FPT , JTX ,OYC , UFI

- a.OYC
- b.JTX
- c.FPT
- d.UFI

Answer 15 - UFI is the wrong number in the series.

Lets take CMQ

Difference between letter C and Letter M is 10 and difference between M and Q is 3

..same with OYC , JTX,FPT

But not with UFI

Question 16:- In a certain code , $K * N$ means K is the brother of N , $K + N$ means K is the husband of N, $K \times N$ means K is the mother of N and $K \div N$ means K is the sister of N , then which of the following expressions means C is the daughter of Y.?

- a. $Y + R \times C * H \div V$
- b. $Y + R \times H \div C * V$
- c. $Y + R \times H * C \div V$
- d. $Y \times R + H * C \div V$

Answer 16 - option c

$Y + R$ = Y is husband of R

$R \times H$ = R is mother of H

$H * C$ = H is brother of C

$C \div V$ = C is the sister of V

Question 17:- Given below is a question followed by two statements , I and II, each containing some information. Decide which of the statement(s) is/ are sufficient to answer the question.

How is A related to C?

Statements:-

- a. A is the wife of B and B is the brother of C.
- b. C is the son of D

- 1. Statement I alone is sufficient.
- 2. Statement II is sufficient.
- 3. Both I and II together are sufficient

4. Both I and II together are not sufficient.

Answer 17:- Statement I alone is sufficient

A is sister in law of C.

Question 18:- Four Statements are followed by four conclusion numbered conclusions(s) logically follows/follow from the statements.

Statements.

- A. All vegetables are fruit.
- B. No Carrot is fruit.
- C. Some roots are carrot
- D. All roots are eatables

Conclusion

- I. Some fruits are eatables.
- II. No root is vegetable
- III. Some eatables are carrot
- IV. Some roots are vegetables

- Only III and IV follow.
- Only I and either II or IV follow
- Only III and either II or IV follow
- Only II , III and IV follow

Answer 19- option c

Question 20:- The following are the criteria of Selecting a Software Engineer for an IT company.

The Candidate must

- Have completed B.C.A with more than 70 % marks.
- Be more than 25 years and less than 30 years of age as june 1 , 2020.
- Have secured more than 75 % in the interview and more than 60% marks in the written test.

However , if the candidate fulfills all the above criteria except

- At (b) , but has completed M.C.A with at least 75% of marks, his/her case is to be referred to the managing director.
- At (c) , but has secured more than 85% marks in B.C.A, his/her case is to be referred to the chief Executive officer.

Keith completed B.C.A and M.C.A with 76% and 72% marks respectively. He has completed 27 years of age in the year 2019. He has secured 65% marks in the written test and 78% in the interview . What decision would be taken in his case?

- a. His case is to be referred in the managing director
- b. He would be selected
- c. He would not be selected
- d. His case is to be referred to the chief executive officer.

Answer 20: b) He would be selected because all the conditions are fulfilled.

Question 21: There are five rods K, L, M, N and O. The weight of L is equal to the weight of K and M taken together. The weight of O is K and N taken together. The weight of M is twice the weight of K. The weight of N is the weight of M. If the weight of N is 90 kg. What will be the weight of O?

- A: 105 kg
- B: 60 kg
- C: 120 kg
- D: 90 kg

Question 22 -

Given below is a question followed by two statements, I and II, each containing some information. Decide which of the statements are sufficient to answer the question.

Five friends A, B, C, D, E are sitting in a line facing north. Who is sitting exactly in the middle?

I - C is sitting between A and B. E is at the fourth place to the left of B.

II - E is sitting between A and B. E is at the fourth place to the left of B.

- a. Statement I alone is sufficient.
- b. Statement II alone is sufficient.
- c. The combination of both the statements I and II are not sufficient.
- d. The combination of both the statement I and II are necessary.

Answer 22: Only Statement I is alone to answer the question

Question 23-

Two statements are given followed by three conclusions numbered I, II and III.
Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statements:

All animals are plants.

All plants are shrubs.

Conclusions.

- I. Some shrubs are plants
 - II. Some animals are not shrubs
 - III. All animals are shrubs
-
- a. None of the conclusions follow.
 - b. Only conclusion I and III follow
 - c. Only conclusion I and II follow
 - d. Only conclusion II and III follow. (not given)

Answer 23:

Only Conclusion I and II follows

Question 24 : A statement is followed by two assumptions numbered I and II. Consider the statement and decide which of the given assumption(s) is/are implicit in the statement.

Statement:

The sale of LED televisions has increased by 20% in this financial year.

Assumptions:

- I. There was hardly any sale of LED televisions in the previous years.
- II. LED televisions have been introduced this year.

Options-

- a. Neither I nor II is implicit
- b. Both I and II are implicit
- c. Only II is implicit
- d. Only I is implicit

Answer 24: Neither I nor II is implicit.

Questions 25:

Answer 25: Correct Answer is Option C

Question 26. A paper is folded and cut as shown below. How will it appear when unfolded?

1. A
2. B
3. C
4. D

Answer: Option D

Question 27. Select the figure that will replace the question mark in the following figure series.

A

B

C

D

Answer: Option C

Question 28. In a certain code, **A % B** means 'A is the brother of B', **A & B** means 'A is the mother of B', **A @ B** means 'A is the daughter of B', **A \$ B** means 'A is the father of B' and **A # B** means 'A is the sister of B'.

If **K \$ Z % U & H # N @ T**, how is T related to U?

- A. Sister
- B. Husband
- C. Wife
- D. Brother

Answer: Option B

Question 29. Choose the best option.

Statement: Air quality has been polluted due to the increasing number of two-wheelers and four-wheelers.

Courses of action:

- I. There should be a complete ban on the sale of two-wheelers at least for the next 5 years.
 - II. Monitoring should take place to ensure that the vehicle's owners get their vehicles checked and certified for pollution-control.
 - III. Four wheelers cause more pollution, hence four-wheelers alone can be banned from running on the roads.
-
- A. None of the options follow
 - B. Only II follows
 - C. Only III follows
 - D. Only I follows

Answer: Option B

Programming Logic

(Below question was repeated from Preplnsta quizzes, only name variable was changed by TCS)

Question 1- What will be the output

```
public class Main {  
    public static void main(String[] args)  
    {  
        int $ = 5;  
    }  
}
```

1. Nothing will print
2. Symbol not found Error.
3. Runtime Error
4. Compile time error

Answer- 1.Nothing will print

Question 2-

```
class Main  
{
```

```
public static void main(String args[])
{
    int i,j,x=0;
    for(i=0;i<5;i++)
        for (j=0;j<5;j++){
            x=(i+j-1);
            System.out.print(x);
            break;
        }
        System.out.print(x);
    }
}
```

What will be printed when the above sample code is executed.
Enter your answer ONLY as a NUMERAL, in the box.

Answer- -101233

Question 3- Which of the following options best suits for 'Memory Leak Occurred'

1. Resource allocation pending while debugging the code
2. Program releases resources allocated in the memory
3. Program does not free the memory which is allocated dynamically
4. Occurs due to address assignment failure.

Answer- Program does not free the memory which is allocated dynamically.

Question 4- What among the following is a server based paradigm

1. Request for Information(RFI)
2. Data Validation Routine
3. Cloud computing
4. Total cost of Ownership.

Answer- Cloud Computing

(Below question was repeated from Preplnsta quizzes, different way writing in english was changed)

Question 5- When we declare constant pointer to integer, we CANNOT change:

1. Value pointed by pointer
2. Either addressing pointer variable or value at that address
3. Changes are not permitted
4. Address in pointer variable.

Answer- Address in the pointer variable.

Question 6- Given here is a scenario. Consider the graph algorithm and answer the given question.

John wants to go to different locations of the city in which he is. He has listed all of them down.

However he wants to visit one location before visiting some other location. What application of graphs can he use to determine that location?

1. DFS
2. Dijkstra's
3. BFS
4. Topological Sorting

Answer- Dijkstra's

(Below question was repeated from Preplnsta quizzes, only name variable was changed by TCS)

Question 7 - Find Prefix and Postfix for the below Infix problem statement:

1. Prefix Expression: $11\ 20\ 5\ 20\ 15 - 6\ 5^{\wedge} * / +$
Postfix Expression: $+ 11 / 20 * 5^{\wedge} - 20\ 15\ 6\ 5$
2. Prefix Expression: $+ 11 / 20 * 5^{\wedge} - 20\ 15\ 6\ 5$
Postfix Expression: $11\ 20\ 5\ 20\ 15 - 6\ 5^{\wedge} * / +$
3. Prefix Expression: $11\ 20\ 15\ 20\ 5 - ^{\wedge} * 6\ 5 / +$
Postfix Expression: $+ 20 / 11 * 5 - 20^{\wedge}\ 15\ 6\ 5$
4. Prefix Expression: $11\ 20\ 5\ 20\ 15 - ^{\wedge} * / + 6\ 5$
Postfix Expression: $+ 11 / ^{\wedge} - 20 * 5\ 20\ 15\ 6\ 5$

Answer: Option D

Link to learn Infix postfix prefix calculation - <https://prepinsta.com/data-structures/stack-infix-and-prefix-conversion/>

(Below question was repeated from Preplnsta quizzes, only name variable was changed by TCS)

Question 8 - There are two integer numbers X and Y, and the value of X and Y is in between 0 to 25. User stores the value under a 5 bit number. How many minimum bit is required to store the result of the below expression?

$$\text{Res} = 3*(X-Y)$$

1. 7
2. 5
3. 8
4. 6

Answer- Option 3

To understand the solution we first have to understand why the user chose a 5 bit number. User said numbers lie between 0 to 25 in binary these values will range from 00000 to 11001

Why?

- 0 in binary is 00000
- 25 in binary is 11001

Now, it is clear that you need 5 bits to store such a number as the min bits required to store 25 is 5 (as 11001).

Formula for the max number that can be stored per bit is $2^x - 1$. Where x is the number of bits

The max number that 5 bits can store will be 31 as $11111 = 31$.

The range of $3*(X-Y)$ will be $[-75, 75]$

- -75 when $X = 0, Y = 25$
- 75 when $X = 25, Y = 0$

To store 75 in binary we need to calculate the nearest power 2 just greater than 75. Which is 128. Where power of 2 will be 7.

Since the number can also be negative so you need extra binary digital as MSB(Most significant Bit) for negative or positive sign.

So answer is $7 + 1 = 8$

Question 9- Write the name of library of functions which is used to perform arithmetic operations on BigInteger and BigDecimal

Answer- `import java.math.*;`

This question in TCS NQT was wrong. Incorrect options were given

Question 10 - Consider the following tree what will be the preorder traversal.

1. A B C D E F G H I
2. D H E B I F G C A
3. H I D E F G B C A
4. D H E B A F I G C

Answer- ABDEHCFIG

Coding

Coding Question 1 (Slot - 1)

There is a JAR full of candies for sale at a mall counter. JAR has the capacity N , that is JAR can contain maximum N candies when JAR is full. At any point of time. JAR can have M number of Candies where $M \leq N$. Candies are served to the customers. JAR never remains empty as when last k candies are left. JAR is refilled with new candies in such a way that JAR gets full. Write a code to implement the above scenario. Display JAR at the counter with an available number of candies. Input should be the number of candies one customer can order at a point of time. Update the JAR after each purchase and display JAR at Counter. Output should give the number of Candies sold and the updated number of Candies in JAR. If Input is more than candies in JAR, return: "INVALID INPUT"

Given,

$N=10$, where N is NUMBER OF CANDIES AVAILABLE

$K \leq 5$, where k is number of minimum candies that must be inside JAR ever.

Example 1: ($N = 10$, $k \leq 5$)

Input Value

3

Output Value

NUMBER OF CANDIES SOLD : 3

NUMBER OF CANDIES AVAILABLE : 7

Example : ($N=10$, $k \leq 5$)

Input Value

0

Output

Value

INVALID INPUT

NUMBER OF CANDIES LEFT : 10

Solution in C

```
#include <stdio.h>
int main()
{
```

70

```
int n=10, k=5;
int num;
scanf("%d",&num);
if(num>=1 && num<=5)
{
    printf("NUMBER OF CANDIES SOLD : %d\n",num);
    printf("NUMBER OF CANDIES LEFT : %d",n-num);
}
else
{
    printf("INVALID INPUT\n");
    printf("NUMBER OF CANDIES LEFT : %d",n);
}
return 0;
}
```

Solution in C++

```
#include <iostream>
using namespace std;
int main()
{
    int n=10, k=5;
    int num;
    cin>>num;
    if(num>=1 && num<=5)
    {
        cout<<"NUMBER OF CANDIES SOLD : "<<num<<"\n";
        cout<<"NUMBER OF CANDIES LEFT : "<<n-num;
    }
    else
    {
        cout<<"INVALID INPUT\n";
        cout<<"NUMBER OF CANDIES LEFT : "<<n;
    }
}
```

```
    return 0;
}
```

Solution in Java

```
import java.util.Scanner;

class Main{
    public static void main(String[] args) {
        int n = 10, k = 5;
        int num;
        Scanner sc = new Scanner(System.in);
        num = sc.nextInt();
        if(num >= 1 && num <= 5) {
            System.out.println("NUMBER OF CANDIES SOLD : " + num);
            System.out.print("NUMBER OF CANDIES LEFT : " + (n - num));
        } else {
            System.out.println("INVALID INPUT");
            System.out.print("NUMBER OF CANDIES LEFT : " + n);
        }
    }
}
```

Question 2

Selection of MPCS exams include a fitness test which is conducted on ground. There will be a batch of 3 trainees, appearing for running test in track for 3 rounds.

You need to record their oxygen level after every round. After trainee are finished with all rounds, calculate for each trainee his average oxygen level over the 3 rounds and select one with highest oxygen level as the most fit trainee. If more than one trainee attains the same highest average level, they all need to be selected.

Display the most fit trainee (or trainees) and the highest average oxygen level.

Note:

1. The oxygen value entered should not be accepted if it is not in the range between 1 and 100.
2. If the calculated maximum average oxygen value of trainees is below 70 then declare the trainees as unfit with meaningful message as “All trainees are unfit”
3. Average Oxygen Values should be rounded.

Example 1:

INPUT VALUES

95
92
95
92
90
92
90
92

90

OUTPUT VALUES

Trainee Number : 1

Trainee Number : 3

Note:

Input should be 9 integer values representing oxygen levels entered in order as

Round 1

Oxygen value of trainee 1

Oxygen value of trainee 2

Oxygen value of trainee 3

Round 2

Oxygen value of trainee 1

Oxygen value of trainee 2

Oxygen value of trainee 3

Round 3

Oxygen value of trainee 1

Oxygen value of trainee 2

Oxygen value of trainee 3

Output must be in the given format as in above example. For any wrong input final output should display “INVALID INPUT”

Solution in C

```
#include <stdio.h>
int main()
{
```

74

int trainee[3][3];
int average[3] = {0};
int i, j, max=0;
for(i=0; i<3; i++)
{
    for(j=0; j<3; j++)
    {
        scanf("%d", &trainee[i][j]);
        if(trainee[i][j]<1 || trainee[i][j]>100)
        {
            trainee[i][j] = 0;
        }
    }
}
for(i=0; i<3; i++)
{
    for(j=0; j<3; j++)
    {
        average[i] = average[i] + trainee[j][i];
    }
    average[i] = average[i] / 3;
}
for(i=0; i<3; i++)
{
    if(average[i]>max)
    {
        max = average[i];
    }
}
for(i=0; i<3; i++)
{
    if(average[i]==max)
    {
        printf("Trainee Number : %d\n",i+1);
    }
}
```

```
        if (average[i] <= 70)
        {
            printf("Trainee is Unfit");
        }
    }
    return 0;
}
```

Solution in C++:

```
#include <iostream>
using namespace std;
int main()
{
    int trainee[3][3];
    int average[3] = {0};
    int i, j, max=0;
    for(i=0; i<3; i++)
    {
        for(j=0; j<3; j++)
        {
            cin>>trainee[i][j];
            if(trainee[i][j]<1 || trainee[i][j]>100)
            {
                trainee[i][j] = 0;
            }
        }
    }
    for(i=0; i<3; i++)
    {
        for(j=0; j<3; j++)
        {
            average[i] = average[i] + trainee[j][i];
        }
        average[i] = average[i] / 3;
    }
}
```

```
for(i=0; i<3; i++)
{
    if(average[i]>max)
    {
        max = average[i];
    }
}
for(i=0; i<3; i++)
{
    if(average[i]==max)
    {
        cout<<"Trainee Number : "<<i+1<<"\n";
    }
    if(average[i]<=70)
    {
        cout<<"Trainee is Unfit";
    }
}
return 0;
}
```

Solution in Java:

```
import java.util.Scanner;

class Main {
    public static void main(String[] args) {
        int[][] trainee = new int[3][3];
        int[] average = new int[3];
        int max = 0;
        Scanner sc = new Scanner(System.in);

Numerical Ability

Question 1: What is the fourth proportional of 0.006, 1.2 and 6/25?

- A.4.8
- B.3.6
- C.36
- D.48

Solution 1:- Let the fourth proportional be 'x'.

So, $0.006 : 1.2 :: 6/25 : x$

When $a:b:c:d$ are in proportion then $a/b = c/d$

$$0.006/1.2 = 6/25 / x$$

$$x = 48$$

Option D

Question 2: A man who has to walk 11 km, finds that in 30 minutes he has travelled two-ninth of the remaining distance. What is his speed in km/hr?

- a. 4.2
- b. 4
- c. 4.5
- d. 4.8

Solution 2:- distance = 11km = $11 \times 2/9 = 22/9$

$$\text{Time} = 30 \text{ min} = 30/60 = \frac{1}{2} \text{ hr}$$

$$x = \text{distance} / \text{time}$$

$$x = 22/9 / \frac{1}{2}$$

$$x = 44/9$$

$$x = 4.8$$

Solution :- d

Question 3: Which one among the following has the least value?

- a. $\sqrt{77} - \sqrt{76}$
- b. $\sqrt{75} - \sqrt{74}$
- c. $\sqrt{76} - \sqrt{75}$

d. $\sqrt{74} - \sqrt{73}$

Solution 3:

Squaring all we get the equation in the form of $(a^2 - b^2) = (a + b)(a - b)$

Applying formula we get

$$(77+76)(77-76)=(153)(1)=153$$

$$(75+74)(75-74)=(149)(1)=149$$

$$(76+75)(76-75)=(151)(1)=151$$

$$(74+73)(74-73)=(147)(1)=147$$

Hence 147 is least among all

Hence the required answer will be $\sqrt{74} - \sqrt{73}$.

Question 4 :What is the simplified value of $(10/15*6)[22/2/5 \text{ of } [(64-2*8) +2]-\frac{2}{5}$?

- A. 6
- B. 4
- C. 5
- D. 2

Answer: Option B

Question 5 :A hollow cylinder of radius 5cm takes six turns about its axis on a horizontal plane, and thereby covers a distance which is 6π times its length. What is the area of the curved surface (in cm^2) of the cylinder?

- A. 100π
- B. 120π
- C. 80π
- D. 50π

Solution 5:

Distance covered ,
 $2\pi r \cdot 6 = 6\pi L$,

$$L = 2r$$

$$\text{Curved area} = 2\pi r \cdot L$$

$$= 2\pi r \cdot 2r$$

$$= 4\pi \cdot 5 \cdot 5$$

$$= 100\pi \text{ (answer)}$$

Question 6 : The Range and the standard deviation of a data are R & S respectively. With the shift of the origin of the data, change(s) occur in the value(s) of:

- Both R & S
- R only
- Neither R nor S
- S only

Solution 6: C. Neither R nor S

As a general rule, the median, mean, and quartiles will be changed by adding a constant to each value. However, the range, interquartile range, standard deviation and variance will remain the same

Question 7 : With what value should the highest quantity in the data 65,52,14,26,18,35,32,38 be replaced so that the mean and median become equal?

- a. 66
- b. 53
- c. 64
- d. 51

Solution 7: The highest quantity 65 will be replaced by 53 to make the mean and median equal.

Question 8: The index numbers of five commodities are 121,123,125,126,128 and the weight assigned to these are respectively 5,11,10,8,6. Then what is the weighted average index number?

- a. 123.8
- b. 125.2
- c. 124.6
- d. 124.2

Solution 8: Let the commodity be P.

And the weight be V.

Then,

$$\text{Commodity} * \text{Weight} = \text{dity} * \text{Weight} = \text{ty} * \text{Weight} = \text{Weight} = \text{ight} = \\ = 4984 = 498498498444\$$$

$$\text{Now, Total Weight (V)} = 5 + 11 + 10 + 8 + 6 = 40$$

$$\text{Therefore, Weighted Average} = \frac{PV}{V} \\ = \frac{4984}{40} \\ = 124.6$$

Question 9: The present ages of three brothers are in the proportion 12:14 :17. The difference between the ages of elder and the eldest is 6 years. What will be the proportion of their ages after 4 years?

- a. 40:46:55
- b. 14:16:19
- c. 42:41:15
- d. 14:16:18

Answer 9: Option b

Explanation

14 - 17 = 3 parts = 6 years
 = 1 part is 2 year
 24, 28, 34 = present
 28,32,38 = After 4 years
 14:16:19

Question 10: A sum was lent to X for three years by an organization, who fixed a yearly rate of 10% compound interest for repayment along with the condition of recovery in equal annual installments of Rs. 31944. What percentage (correct to 2 decimal places) above the borrowed amount had X to pay to the organization?

- a. 16.52
- b. 18.43
- c. 20.63
- d. 21.25

Answer 10: Option d

Explanation

$$= x \left[\frac{1}{\left(1 + \frac{r}{100}\right)^3} + \frac{1}{\left(1 + \frac{r}{100}\right)^2} + \frac{1}{\left(1 + \frac{r}{100}\right)} \right]$$

$$P = 31944 \left[\frac{1}{\left(1 + \frac{r}{10}\right)^3} + \frac{1}{\left(1 + \frac{r}{10}\right)^2} + \frac{1}{\left(1 + \frac{r}{10}\right)} \right]$$

$$= 31944 \left[\frac{10^3}{11^3} + \frac{10^2}{11^2} + \frac{10}{11} \right]$$

$$= 31944 \left[\frac{1000}{1331} + \frac{100}{121} + \frac{10}{11} \right]$$

$$= 31944[0.75 + 0.82 + 0.90]$$

$$= 31944[2.47]$$

$$P = 78901.68$$

$$\text{Interest} = 78901.68 - (3 \times 31944)$$

$$= 16930$$

$$\frac{16930}{78901} \times 100 = 21.4$$

Question 11: With what value should the highest quantity in the data : 65, 52, 14, 26, 18, 35, 32, 38 be replaced so that the mean and medium become equal?

- a. 51
- b. 53
- c. 66
- d. 64

Answer 11: Option b

Explanation

Let's sort the given data - 14, 18, 26, 32, 35, 38, 52, 65

mean = 35

$$\text{media} = \frac{32 + 35}{2} = 33.5$$

$$\text{Difference} = 35 - 33.5 = 1.5$$

$$\text{Value} = 1.5 \times 8 = 12$$

$$65 - 12 = 53$$

Question 12: The mean and the standard deviation of a data which is comprised of a set of ten positive numbers are 8 and 2 respectively. If the sum of squares of 9 among the 10 members is 599, what is the 10th number

- a. 9
- b. 8
- c. 7
- d. 11

Solution 12:

Let us assume that the 10th number is x .

we know that,

● standard deviation = $\sigma = \left[\sqrt{\frac{\sum (x_i - \mu)^2}{N}} \right]$

N = Number of terms.

Given that,

→ standard deviation = 2 .

→ Mean = 8 .

→ $N = 10$.

→ sum of square of 9 numbers = 599.

→ 10th number = x .

So,

→ sum of square of all 10 numbers =

sum of square of 9 numbers + 10th number² = $(599 + x^2)$

Putting all values now , we get :-

→ $2 = \sqrt{\left\{ \frac{(599 + x^2)}{10} \right\} - (8)^2}$

Squaring both sides , we get,

$$\rightarrow 4 = \{(599 + x^2)/10\} - (8)^2$$

$$\rightarrow 4 = \{(599 + x^2)/10\} - 64$$

$$\rightarrow 4 + 64 = (599 + x^2)/10$$

$$\rightarrow 68 * 10 = 599 + x^2$$

$$\rightarrow x^2 = 680 - 599$$

$$\rightarrow x^2 = 81$$

Square root both sides we get,

$$\rightarrow x = 9$$

Question 13: A work is assigned to 6 men and 12 women, they could complete it in 3 days. It was also observed that together they can do 7 times as much work a man and a woman can do. In how many days would 14 women have done the work?

- a. 6
- b. 12
- c. 9
- d. 10

Answer 13: Option C

Explanation

$$6m + 12w = 3 \text{ days} \quad \dots\dots\dots(1)$$

$$6m + 12w = 7(m + w)$$

$$6m + 12w = 7m + 7w$$

$$6m + 12w = 6m + 1m + 7w$$

$$6m + 5w + 7w = 6m + 1m + 7w$$

$$1 \text{ man} = 5 \text{ woman}$$

$$30w + 12w = 3 \text{ days}$$

$$42w = 3 \text{ day}$$

$$14 \text{ women} = \frac{42 \times 3}{4}$$

$$= 9 \text{ days}$$

In this question the options provided by TCS are wrong

Question 14: In what ratio should two varieties of tea priced at Rs. 240 and Rs 280 respectively. Be mixed so that the cost of the combination is Rs 254per kg?

- A. 3: 2
- B. 7: 6
- C. 13: 12
- D. 4: 3

Solution 14:

Hence the mixture will be in ratio 13: 7

Question 15: What is the real value of $(0.000314 + 0.000198)^{(1/3)}$

- A. 0.8
- B. 0.08
- C. 0.4
- D. 0.04

Solution 15:

$$\begin{aligned}
 0.000314 + 0.000198 &= 0.000512 \\
 (0.000512)^{1/3} \\
 (0.08)^{(3 \times 1/3)} \\
 0.08
 \end{aligned}$$

Question 16: The table below presents the percentage marks obtained by the three students X, Y, and Z in the four components of assessment A, B, C, D, of a paper whose respective weightages are 4, 3, 2, 1.

Students/Marks	A	B	C	D
X	78	85	72	76
Y	65	68	64	73
Z	82	76	81	75

What is the ratio of the average percentage of X in A, B to that of Y, Z combined in CD

- A. 28: 25
- B. 326: 293
- C. 342: 283
- D. 81:73

Solution 16:

Average Marks obtained by X in A and B = $(78 + 85)/2$

$$\frac{163}{2}$$

Average marks obtained by Y in C and D =

$$\frac{137}{2}$$

Average marks obtained by Z in C and D =

$$\frac{156}{2}$$

Average of X and Y combined

$$\frac{\frac{137}{2} + \frac{156}{2}}{2}$$

$$\frac{293}{4}$$

Ratio of X and Y, Z combined

X : (Y and Z)

$$\frac{163}{2} : \frac{293}{4}$$

$$326: 293$$

Question 17: A city water supply tank has two inlet pipes X, and Y which can fill it in 20 hrs and 30 hrs respectively, and an outlet pipe Z which can empty a full tank in 40 hrs. If the tank is empty and the taps are opened in succession for one hour each, and the process contains, in how many hours will the tank get filled?

Option:

- A. $49\frac{1}{4}$
- B. $51\frac{3}{7}$
- C. $49\frac{1}{2}$
- D. $49\frac{1}{7}$

Solution 17:

Question 18: Six square plots are connected end to end to obtain a rectangular plot of area 726 m^2 . If we take $\pi = 22/7$ by what factor is the perimeter of this plot more than that of circumference of a circle of radius 10 m?

- A. 1.45
- B. 2.8
- C. 2.1
- D. 2.45

Solution 18:

Area of Rectangle = 726 m^2

Rectangle is comprised of 6 square plots

$$A * A = 726/6 = 121$$

$$A = 11$$

Now length of the rectangle will be $6 * 11 = 66 \text{ m}$

$$\text{Perimeter of rectangle} = 2(11 + 66) = 154$$

$$\text{Perimeter of circle of radius } 10 \text{ m} = 2 \pi r = 2 * 22/7 * 10 = 440/7 = 62.85$$

$$\text{By factor the perimeter of Rectangular plot is more than circular plot} = 154/62.85 = 2.45$$

Question 19: A sum of Rs 12500 is invested on 1st January 2016 at 4% simple interest per annum. How much interest (in Rs) gets accrued on the end of the day on 1st July, 2016?

- A. 250
- B. 400
- C. 500
- D. 240

Solution:

$$SI = \text{Prt}/100$$

$$P = 12500$$

$$R = 4\%$$

$$t = 6 \text{ months} = 0.5 \text{ year}$$

$$SI = (12500 * 4 * 0.5) / 100$$

$$SI = 125 * 2 = 250$$

Question 20: Two ants of length 1 cm and 1.2 cm. Crawl in opposite directions with an average speed of 2 and 3 mm per second respectively. How many seconds will they take to cross each other?

- A. 2.8
- B. 4.4
- C. 0.4
- D. 1.5

Solution 20:

$$\text{Relative speed of ants} = 2 + 3 \text{ mm/s} = 5 \text{ mm/s}$$

$$\text{Effective distance} = 1 + 1.2 = 2.2 \text{ cm} = 22 \text{ mm}$$

$$\text{Time} = \text{distance/speed} = 22/5 = 4.4$$

Question 21: A retailer purchased 25 identical toys for a price Rs P and sold some of these for price Rs P. If he calculated his profit as 8% , with selling price as base instead of cost price then how many toys did he sell.

- A. 20
- B. 23
- C. 21
- D. 24

Solution 21:

25 identical toys are Rs.P.

one toy = Rs.P/25

profit % = (sp-cp)/cp

In question said to change the base from cp to sp

$8/100 = (p - xp/25) / p$

solve for x,

then x=23.

Question 22: In a competitive exam, 5 marks are awarded for every correct answer and for every wrong answer, 2 marks are deducted. Sathwik scores 32 marks in the examination. If 4 marks had been awarded for each correct answer and 1 mark had been deducted for each incorrect answer, Sathwik would have scored 34 marks. If Sathwik attempted all the questions, how many questions were there in the test ?

- A. 14
- B. 12
- C. 20
- D. 26

Answer 22: 26 Answer

In given Question:-

Correct answer =5x and wrong answer=2y

Correct answer =4x and wrong answer= 1y

So,

$$5x - 2y = 32$$

$$4x - 2y = 34 \text{-----} * 2$$

Now

$$5x - 2y = 32$$

$$8x - 4y = 68$$

By solving

$$3x = 36$$

$$x=12$$

Now to find 'y'

$$5*12 - 2y = 32$$

$$60 - 2y = 32$$

$$y=14$$

By adding x+y

$$12+14 = 26$$

Questions in the test = 26

Note: Options provided by TCS are wrong

Question 23- The List price of an item was kept 40% above what the shopkeeper had paid to the manufacturer. On selling the item a profit of 8.64% was earned allowing two successive discounts, the first one which was 20%. What was the percentage rate of the second discount.

- a. 3.84
- b. 3.6
- c. 3.25
- d. 3

Solution 23:

Answer:

let the CP be 100

then the MP will be 140

if he earns profit of 8.64 percent then SP = 108.64

so total discount will be $140 - 108.64 = 31.36$

discount percentage = $31.36 * 100 / 140 = 22.4$

1st discount = 20 %

2nd discount = $22.4 - 20 = 2.4$ %

Question 24:- The index number of five commodities are 121, 123, 125, 126, 128 and the weights assigned to these are respectively 5, 11, 10, 8, 6. Then, what is the assigned weighted average index number?

- A. 125.2
- B. 124.2
- C. 123.8
- D. 124.6

Solution 24:-

P = commodity

V = weight

$$PV = 121 \times 5 + 123 \times 11 + 125 \times 10 + 126 \times 8 + 128 \times 6$$

$$= 4984$$

$$P = 40$$

$$\text{weighted average} = PV / V$$

index number

$$= 4984 / 40$$

$$= 124.6$$

Question 25- The sales (in multiples of hundred) of three brands A, B, C of car from a showroom during four consecutive years, 2012-2015 have been presented through the bar graph given below:

In which year is the sale of A and B together is 125% of that of C ?

1. 2015
2. 2014
3. 2013
4. 2012

Solution 25:

Sale of A and B in 2012 = $20 + 30 = 50$

Sale of C in 2012 = 40

50 is what % of 40 = $50/40 = 125\%$

Hence as we got our answer in 2012 only. We don't need to find it for further years.

Question 26:- A sales representative commission is 6% on all sales upto 15000 and 5% on all sales exceeding this. He remits Rs. 47350 to his company after deducting his commission. What were the total sales.

- a. Rs 50000
- b. Rs 49000
- c. Rs 47500
- d. Rs 50500

Solution 26: $47350 = x - 6\% \text{ of } 15000 - 5\% \text{ of } (x - 15000)$

$$47350 = x - 900 - 5\% \text{ of } x - 5\% \text{ of } 15000$$

$$47350 + 900 - 750 = x - 5\% \text{ of } x$$

$$47500 = 95\% \text{ of } x$$

$$\Rightarrow x = 47500 \times 100/95$$

$$x = 50000$$

Rs. 50000

Verbal Ability

Question 1- One part of the sentence below may contain a grammatical error. Identify the part that contains the error, if there is no error in the sentence choose No Error

The college has circulated the examination schedule for its regular and supplementary examinations

- A. the college has circulated the examination schedule
- B. to be held next month
- C.No error
- D. for its regular and supplementary examinations

Answer: C

Question 2- Read the passage given below and answer questions

It's apparently the fate of humankind never to be free of writing the history of pandemics. No matter how often they occur----- and they do occur with great frequency----- we collectively refuse to think about them until circumstances demand it. Then, when the infection passes, we put it out of our minds as quickly as possible. And so we again are Unprepared when the next contagion----- and this causes COVID-19 bursts upon us. Richard conniff examines our long relationship with infectious disease----- from the hard lessons to us been forced to learn from the brave, and often difficult characters, who have asked their lives to save us. Forgive us for copying this whole content from prepinsta

Smallpox taught us that we could prevent disease through inoculation and, as the 1700's ended, vaccination. By the new 1800's cholera's lesson was about sanitation and the need for centralized water and sewer systems. About the same time, one man was all heard of, Louis Pasteur, and one many of us haven't. Robert Koch, became the co- fathers of germ theory. Tools they created are still used to identify and fight with what Conniff calls " an astonishing rogues' ' gallery of deadly pathogens.

And yet here we are, again fighting on two fronts: the first against a new coronavirus sweeping the planet to devastating effects, the second, with each other, over domestic and international politics and whether we are willing to pay the price for prevention.

It's an important question for our planet. while we debate, the next pandemic draws nearer.

Which statement is correct according to the passage

- a. pandemics keep coming periodically
- b. all pandemic are not to be feared
- c. there is no solution for pandemic
- d. research about vaccines is not reliable.

Answer: Option A

Pandemics keep coming periodically

Question 3- Read the passage given below and answer questions

It's apparently the fate of humankind never to be free of writing the history of pandemics. No matter how often they occur----- and they do occur with great frequency----- we collectively refuse to think about them until circumstances demand it. Then, when the infection passes, we put it out of our minds as quickly as possible. And so we again are Unprepared when the next contagion----- and this causes COVID-19 bursts upon us. Richard conniff examines our long relationship with infectious disease-----

from the hard lessons to us been forced to learn from the brave, and often difficult characters, who have asked their lives to save us.

Smallpox taught us that we could prevent disease through inoculation and, as the 1700's ended, vaccination. By the new 1800's cholera's lesson was about sanitation and the need for centralized water and sewer systems. About the same time, one man was all heard of, Louis Pasteur, and one many of us haven't. Robert Koch, became the co- fathers of germ theory. Tools they created are still used to identify and fight with what Conniff calls "an astonishing rogues' ' gallery of deadly pathogens.

And yet here we are, again fighting on two fronts: the first against a new coronavirus sweeping the planet to devastating effects, the second, with each other, over domestic and international politics and whether we are willing to pay the price for prevention.

it's an important question for our planet. while we debate, the next pandemic draws nearer. If you are reading this text, than please forgive us for copying this content from prep insta

In the third paragraph which pandemic is the author referring to-

- a. an astonishing rogues
- b. smallpox
- c. covid-19
- d. Cholera

Answer: Option C
COVID- 19

Question 4- For the four sentences S1 to S4 paragraph below sentences S1 and S4 are given. From the options P Q and R, choose appropriate sentences for s2 and s3 respectively.

S1: In today's marketplace the practice of innovation isn't just about creating new products.

S2 :

S3 :

S4 : There for the drive towards selecting and executing the right ideas and bringing them to market before your competitors take on an urgency that has been previously unknown

P: and in the age of internet comments the act of innovation becomes as an greater challenge “awash in a sea of new ideas”

Q: a perfect example can be seen in the process of mobile payment via smartphone

R. It is about discovering completely new markets that meets, previously unknown and therefore untapped customer needs

- a. PR
- b. RP**
- c. PQ
- d. QR

Answer - RP

Question 5 : Select the most appropriate option to complete the sentence.

It was _____ a new experience for me to attend a zoom meeting so I planned for it_____.

- a. surely gently
- b. quite carefully
- c. occasionally basically
- d. None of the above

Answer: Option B

Question 6: For the four- sentence (S1 to S4) paragraph below, sentences S1 and S4 are given.

S1- Eight months ago, it was business as usual at the cafe.

S2-

S3-

S4- I checked the Miniature Circuit breaker and realized it has tripped.

P. Around six in the evening there was fluctuation and the lights went off.

- Q. I pulled the Miniature Circuit breaker switch back and it was fine again.
R. The days were warm and so the air conditioners were in full force.

Answer: RP

Question 7: One part of the sentence below may contain a grammatical error. Identify the part.

A high-end machine was inaugurated at the city's Institute of Medical Sciences which will facilitate 3000 RT-PCR tests for Coronavirus in a day.

- a. At the city's Institute of Medical Sciences.
- b. For Coronavirus in a day
- c. A high-end machine was inaugurated.
- d. Which will facilitate 3000 RT-PCR tests.

Answer: D

Question 8: You are going to read a text about a scheme of the Government. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

Composed by Narayan Pandit, the Hitopadesha had its origin around a thousand years ago. In Indian Literature, the Hitopadesha is regarded as more or less similar to the Panchatantra. (1)_____ Hitopadesha tales are written in a reader-friendly style, which perhaps contributed to the success of this best seller. Sorry to disturb you in between your question, but please forgive us to copy this content from preplnsta. (2)_____ Since, its origin Hitopadesha has been translated into numerous languages to benefit the readers all over the world.

- a. It was next only after the 'Bhagwad Geeta' in popularity in India.
- b. In the vein of Panchatantra, the Hitopadesha was also written in Sanskrit and followed the pattern of prose and verse.
- c. The term 'Hitopadesha' is a combination of two terms, 'Hita' (welfare/benefit) and 'Upadesha' (advice/counsel).

- A. 1-C 2-B
- B. 1-A 2-C
- C. 1-B 2-A

D. 1-C 2- A

Answer: C

Question 9- The following sentence pair can be combined into a single sentence. Choose the sentence that best combines the two:

Nikhil researched the topic as well. He was able to do his viva voce well.

- a. Nikhil was able to do his Viva Voce well although he researched the topic well
- b. Nikhil researched the topic well therefore he was able to do his Viva Voce well.
- c. Nikhil researched the topic well unless he was able to do his Viva Voce well.
- d. Nikhil was able to do his Viva Voce well despite he researched the topic well.

Answer - B

Question 10- One part of the sentence may contain an error. Identify the part. If there's no error, choose 'No Error.'

Since sunrise to sunset / my grandmother would sit by her wheel / spinning and reciting prayers.

- a. spinning and reciting prayers.
- b. No error
- c. Since sunrise to sunset
- d. my grandmother would sit by her whee

Answer - C. (from instead of Since)

Question 11: As it was his first job, Abhishek threw himself _____ it _____ a lot of enthusiasm

- a. Across, in
- b. Over, from
- c. Into, with
- d. At, with

Answer - At , With

Question 12: Since the early 1900s, many glaciers around the world have been rapidly melting _____. Specifically, since the industrial revolution, carbon dioxide and other greenhouse gas emissions have raised the temperatures, even higher in the poles _____. Scientists project that if emissions continue to rise unchecked, the Arctic could be ice free in the summer as soon as the year 2040 as ocean and air temperatures continue to rise rapidly.

- A. More than a third of the remaining glaciers of the world would have melted by 2030.
- B. As a result, glaciers are rapidly melting, calving off into the sea and retreating on land.
- C. Human activities are at the root of this phenomenon.

- a. C , B
- b. B , C
- c. A , B
- d. C , A

Answer - Option A (C , B)

Question 13: From hairdressers to waiters, many professionals have taken to wear face shields amid the coronavirus pandemic. But a new study has _____ that these plastic shields don't work, and can actually allow airborne coronavirus droplets to escape. Researchers from the Riken Centre in Japan, have performed a simulation using Fugaku - the world's fastest supercomputer. The simulation found that almost 100% of airborne droplets of less than 5 micrometers in size _____ through plastic visor, while 50% of larger droplets found their way into the air.

Blank 1 - A. told B. informed C. warned D. sneaked

Blank 2 - A. escaped B. discharged C. vanished D. seeped

- a. D , B
- b. B , C
- c. C , A
- d. A , D

Answer - C , A.

Question 14: Seham Amer is a kickboxing pioneer in Yemen. Often considered the first of her kind, Amer trains girls in martial arts. While Amer and her students are often discouraged from participating in the “masculine” sport, she continues to challenge _____ of what Yemeni women can do. Amer told the Associated Press that her critics tell her “that the sport is masculine and that I have departed from feminine _____

Blank 1 - A. designs B. contours C. shapes D. notions

Blank 2 - A. background B. territory C. situation D. experiment

- a. B , C
- b. A , D
- c. D , B
- d. C , A

Answer - D , B.

Question 15 : The Rajasthan Royals had spirit, and took the challenge of the highest-ever IPL run chase head on to soar above Kings XI Punjab. Sanju Samson scored a 42-ball 85 studded with seven sixes and four boundaries. Rajasthan Royals recorded the highest run chase in IPL history to beat Kings XI Punjab by four wickets in a high-scoring encounter in Sharjah on Sunday. Put into bat, Mayank Agarwal smashed a 50-ball 106, while skipper KL Rahul cracked a 54-ball 69 as the duo stitched a 183-run opening stand off 99 balls to power Punjab to an imposing 223 for 2. Sanju Samson then put on a lion-hearted effort with a 42-ball 85 studded with seven sixes and four boundaries, while Steve Smith scored a 27-ball 50 to keep RR in the hunt. However, it was Rahul Tewatia, who turned hero when he smashed five sixes in the 18th over off Sheldon Cottrell to turn the match on its head. He scored a 31-ball 53 after struggling initially to take them to the brink of win.

In the passage, which expression means the same as create something through collective effort?

- a. Smashed
- b. Studded
- c. Stitched
- d. Cracked

Answer - Smashed

Question 16 : The Rajasthan Royals had spirit, and took the challenge of the highest-ever IPL run chase head on to soar above Kings XI Punjab. Sanju Samson scored a 42-ball 85 studded with seven sixes and four boundaries. Rajasthan Royals recorded the highest run chase in IPL history to beat Kings XI Punjab by four wickets in a high-scoring encounter in Sharjah on Sunday. Put into bat, Mayank Agarwal smashed a 50-ball 106, while skipper KL Rahul cracked a 54-ball 69 as the duo stitched a 183-run opening stand off 99 balls to power Punjab to an imposing 223 for 2. Sanju Samson then put on a lion-hearted effort with a 42-ball 85 studded with seven sixes and four boundaries, while Steve Smith scored a 27-ball 50 to keep RR in the hunt. However, it was Rahul Tewatia, who turned hero when he smashed five sixes in the 18th over off Sheldon Cottrell to turn the match on its head. He scored a 31-ball 53 after struggling initially to take them to the brink of win.

About whom does the writer use the expression that he made a ‘lion-hearted’ effort?

- a. Sheldon Cottrell
- b. Mayank Agarwal
- c. **Sanju Samson**
- d. Steve Smith

Answer - Sanju Samson (option C)

Question 17: The Rajasthan Royals had spirit, and took the challenge of the highest-ever IPL run chase head on to soar above Kings XI Punjab. Sanju Samson scored a 42-ball 85 studded with seven sixes and four boundaries. Rajasthan Royals recorded the highest run chase in IPL history to beat Kings XI Punjab by four wickets in a high-scoring encounter in Sharjah on Sunday. Put into bat, Mayank Agarwal smashed a 50-ball 106, while skipper KL Rahul cracked a 54-ball 69 as the duo stitched a 183-run opening stand off 99 balls to power Punjab to an imposing 223 for 2. Sanju Samson then put on a lion-hearted effort with a 42-ball 85 studded with seven sixes and four boundaries, while Steve Smith scored a 27-ball 50 to keep RR in the hunt. However, it was Rahul Tewatia, who turned hero when he smashed five sixes in the 18th over off Sheldon Cottrell to turn the match on its head. He scored a 31-ball 53 after struggling initially to take them to the brink of win.

How many runs did Mayank make?

- a. 69
- b. 85
- c. **106**

Question 1

Ques 1: A washing machine works on the principle of Fuzzy System, the weight of clothes put inside it for washing is uncertain But based on weight measured by sensors, it decides time and water level which can be changed by menus given on the machine control area.

For low level water, the time estimate is 25 minutes, where approximately weight is between 2000 grams or any nonzero positive number below that.

For medium level water, the time estimate is 35 minutes, where approximately weight is between 2001 grams and 4000 grams.

Royal Pass

Join Now

For high level water, the time estimate is 45 minutes, where approximately weight is above 4000 grams.

Assume the capacity of machine is maximum 7000 grams

Where approximately weight is zero, time estimate is 0 minutes.

Write a function which takes a numeric weight in the range [0,7000] as input and produces estimated time as output is: "OVERLOADED", and for all other inputs, the output statement is "INVALID INPUT".

Input should be in the form of integer value -
<Integer>

Output must have the following format -
Time Estimated: <Integer> Minutes

Example 1:

Input value

2000

Output value

Time Estimated: 25 minutes

Solution in C

```
#include <stdio.h>
void calculateTime(int n)
{
    if(n==0)
        printf("Time Estimated : 0 Minutes");
    else if(n>0 && n<=2000)
        printf("Time Estimated : 25 Minutes");
    else if(n>2000 && n<=4000)
        printf("Time Estimated : 35 Minutes");
    else if(n>4000 && n<=7000)
        printf("Time Estimated : 45 Minutes");
    else
        printf("INVALID INPUT");
}
int main()
{
```

```
int machineWeight;  
scanf("%d",&machineWeight);  
calculateTime(machineWeight);  
return 0;  
}
```

Solution in Python:

```
n = int(input())  
if n==0:  
    print("Time Estimated : 0 Minutes")  
elif n in range(1,2001):  
    print("Time Estimated : 25 Minutes")  
elif n in range(2001,4001):  
    print("Time Estimated : 35 Minutes")  
elif n in range(4001,7001):  
    print("Time Estimated : 45 Minutes")  
else:  
    print("INVALID INPUT")
```

Question 2

The Caesar cipher is a type of substitution cipher in which each alphabet in the plaintext or messages is shifted by a number of places down the alphabet.

For example, with a shift of 1, P would be replaced by Q, Q would become R, and so on.

To pass an encrypted message from one person to another, it is first necessary that both parties have the 'Key' for the cipher, so that the sender may encrypt and the receiver may decrypt it.

Key is the number of OFFSET to shift the cipher alphabet. Key can have basic shifts from 1 to 25 positions as there are 26 total alphabets.

As we are designing custom Caesar Cipher, in addition to alphabets, we are considering numeric digits from 0 to 9. Digits can also be shifted by key places.

For Example, if a given plain text contains any digit with values 5 and key = 2, then 5 will be replaced by 7, “-”(minus sign) will remain as it is. Key value less than 0 should result into “INVALID INPUT”

Example 1:

Enter your PlainText: All the best

Enter the Key: 1

The encrypted Text is: Bmm uif Cftu

Write a function CustomCaesarCipher(int key, String message) which will accept plaintext and key as input parameters and returns its cipher text as output.

Solution in C(Question-2):

```
#include <stdio.h>
int main()
{
    char str[100];
    int key, i=0, left;
    printf("Enter your plain text : ");
    scanf("%[^\n]s",str);
    printf("Enter the key : ");
    scanf("%d",&key);
    if(key==0)
    {
        printf("INVALID INPUT");
    }
    else
    {
        while(str[i]!='\0')
        {
```

```
//printf("%d\n", str[i]);
if(str[i]>=48 && str[i]<=57)
{
    if(str[i]+key<=57)
    {
        str[i] = str[i] + key;
    }
    else
    {
        left = (str[i] + key) - 57;
        str[i] = 47 + left;
    }
}
else if(str[i]>=65 && str[i]<=90)
{
    if(str[i]+key<=90)
    {
        str[i] = str[i] + key;
    }
    else
    {
        left = (str[i] + key) - 90;
        str[i] = 64 + left;
    }
}
else if(str[i]>=97 && str[i]<=122)
{
    if(str[i]+key<=122)
    {
        str[i] = str[i] + key;
    }
    else
    {
        left = (str[i] + key) - 122;
        str[i] = 96 + left;
    }
}
i++;
```

```
}  
printf("The encrypted text is : %s",str);  
}  
return 0;  
}
```

Solution in Python:

```
def ceaser(text,key):  
    result = ""  
    # transverse the plain text  
    for i in range(len(text)):  
        char = text[i]  
        # Encrypt uppercase characters in plain text  
        if (char.isupper()):  
            result += chr((ord(char) + key-65) % 26 + 65)  
        # Encrypt lowercase characters in plain text  
        elif (char.islower()):  
            result += chr((ord(char) + key - 97) % 26 + 97)  
        elif(char.isdigit()):  
            result += str(int(char) + key)  
        elif(char == '-'):  
            result += '-'  
        elif (char.isspace()):  
            result += " "  
    return result  
  
#check the above function  
text = input("Enter your plain text:")  
key = int(input("Enter the key:"))  
print(ceaser(text,key))
```

Question 1: In case of frequency distribution of ten continuous classes, the class width is 4 and the lower class limit of the lowest class is 8. What is the upper class limit for the highest class?

- A. S only
- B. R only
- C. Both R and S
- D. Neither R nor S

110

Solution :

Let x and y be the upper and lower class limit of frequency distribution.

Given, width of the class = 4

$$\Rightarrow x - y = 4$$

.....(i)

Also, given lower class (y) = 8

On putting $y = 8$ in Eq. (i), we get

$$x - 8 = 4 \Rightarrow x = 12$$

So, the upper class limit of the lowest class is 12.

Hence, the upper limit of the highest class

= (Number of continuous classes $\times$ Class width + Lower class limit of the lowest class)

$$= 10 \times 4 + 8 = 40 + 8 = 48$$

Hence, the upper class limit of the highest class is 48.

Note: Options provided for this question are wrong

Question 2: What is the simplified value of

$$\frac{1.728 + 1}{1.24} + \frac{1 - 0.343}{2.19}$$

- A. 0.04
- B. 0.08
- C. 0.4
- D. 0.8

Solution:

$$\frac{1.728 + 1}{1.24} + \frac{1 - 0.343}{2.19}$$

$$\frac{2.728}{1.24} + \frac{0.657}{2.19}$$

$$2.2 + 0.3 = 2.5$$

Question 3: A leak in the body of a ship which can admit 5 units of water in 16 minutes got detected when it was 40 km away from the shore. Entry of 60 units of water will cause the ship to sink which has a pump that can throw out 12 units of water in an hour. Aided by the pump, what should be the average speed (in Kmph) of the ship in order to reach the shore just before it starts sinking?

- A. 4
- B. 4.2
- C. 4.5
- D. 4.8

Note: Options provided for this question are wrong

Question 4: What is the fourth proportional of the mean proportionals between (4, 6.25): (0.0027, 300) :: $(1.2 \times 10^{-3}, 3) : ?$

- A. 3.6
- B. 48
- C. 4.8
- D. 36

Solution:

$$(4, 6.25) = a$$

$$(0.0027, 300) = b$$

$$(1.2 \times 10^{-3}, 3) = c$$

$$? = d$$

$$a : b :: c : d$$

$$\text{Mean Proportional of } a = \sqrt{4 \times 6.25} = 5$$

$$\text{Mean Proportional of } b = \sqrt{0.0027 \times 300} = 0.9$$

$$\text{Mean Proportional of } c = \sqrt{1.2 \times 10^{-3} \times 3} = 0.06$$

$$a/b = c/d$$

$$\frac{5}{0.9} = \frac{0.06}{d}$$

$$d = \frac{0.06 \times 0.9}{5}$$

$$D = 0.0108$$

Question 5: Instead of calculating the sum of a proper fraction, less than $\frac{1}{2}$, with its reciprocal, the difference was worked out, as a result of which there was an error of $121\frac{39}{41}\%$. What was the fraction?

- A. 17.5
- B. 14.5
- C. 16
- D. 19

Answer:

Question 6: A retailer purchases several pens of the same cost for Rs 384 and then sells some of them for Rs 114 at no loss or gain. What is the least possible number of pens that he will be left with?

- A. 7
- B. 3
- C. 9
- D. 8

Solution:-

Question 7: A sales representative commission is 6% on all sales up to Rs 15,000 and 5% on all the sales exceeding this. He remits Rs 47,350 to his company after deducting his commission. What was the total sale?

- A. 49000
- B. 50500
- C. 50000
- D. 47500

Solution:

$$47350 = x - 6\% \text{ of } 15000 - 5\% \text{ of } (x - 15000)$$

$$47350 = x - 900 - 5\% \text{ of } x - 5\% \text{ of } 15000$$

$$47350 + 900 - 750 = x - 5\% \text{ of } x$$

$$47500 = 95\% \text{ of } x$$

$$\Rightarrow x = 47500 \times \frac{100}{95}$$

$$x = 50000$$

$$\text{Rs. } 50000$$

Note: Options provided for this question are wrong

Question 8: The area of the sector with central angle 15° , of a circle is 231 sq cm. If $\pi = 22/7$, what is the circumference (in cm) of the circle?

- A. 2.8
- B. 2.45
- C. 2.1
- D. 1.45

Solution:

$$\text{Area of Sector} = \frac{\pi}{2} r^2 \left(\frac{\text{Sector Angle}}{360} \right) = 231$$

$$\frac{22}{7} * r^2 * \left(\frac{15}{360} \right) = 231$$

$$\frac{22}{7} * r^2 * \left(\frac{1}{24} \right) = 231$$

$$r^2 = \left(\frac{231 * 24 * 7}{22} \right)$$

$$r^2 = 21 * 12 * 7$$

$$r^2 = 1764$$

$$r = 42$$

$$\text{Circumference of circle} = 2\pi r$$

$$2 * \frac{22}{7} * 42$$

$$= 22 * 12$$

$$= 264 \text{ cm}$$

Question 9: In a competitive exam, 5 marks are awarded for every correct answer and for every wrong answer, 2 marks are deducted. Sathwik scores 32 marks in the examination. If 4 marks had been awarded for each correct answer and 1 mark had been deducted for each incorrect answer, Sathwik would have scored 34 marks. If Sathwik attempted all the questions, how many questions were there in the test ?

- A. 14
- B. 12
- C. 20
- D. 26

Answer: 26 Answer

In given Question:-

Correct answer = $5x$ and wrong answer = $2y$

Correct answer = $4x$ and wrong answer = $1y$

So,

$$5x - 2y = 32$$

$$4x - 2y = 34 \text{-----} * 2$$

Now

$$5x - 2y = 32$$

$$8x - 4y = 68$$

By solving

$$3x = 36$$

$$x = 12$$

Now to find 'y'

$$5 * 12 - 2y = 32$$

$$60 - 2y = 32$$

$$y = 14$$

By adding x+y

$$12 + 24 = 26$$

Questions in the test = 26

Note: Options provided for this question are wrong

Question 10: A takes 10 days less than B to complete a work, and together they do it in 12 days. In how many days can B alone do the work?

A. 12

B. 10

C. 9

D. 6

Solution:- Let B do the work independently in x no.s of days then

A.T.Q.

A will take (x - 10) no.s of day

Then in a unit day

A works $1/x$ part of work and B works $1/(x-10)$ part of work, as they both complete it in 12 days then

$$1/x + 1/(x-10) = 1/12 \text{ (portion of work in a day)}$$

$$x(x-10)/2x - 10 = 12$$

$$x^2 - 10x = 24x + 120$$

$$(x-30)(x-4)$$

Possible value is $x=30$

Hence B will do the work in 30 days

Question 11: A sum invested in compound interest (CI) at a certain rate for 3 years earns the same interest as it would earn by the way of an investment in Simple Interest (SI) at the rate of 18.2% for four years. How much more or less in the percentage rate in case of the CI than that in case of the SI?

- A. 16.52
- B. 20.63
- C. 18.43
- D. 21.25

Question 12: What is the simplified value of

$$\left(2\frac{3}{4} + 2\frac{1}{2} \text{ of } \frac{5}{2\frac{5}{7}} - \frac{1\frac{2}{3}}{2\frac{1}{2}}\right) \div \left(5\frac{1}{12} \times \frac{5}{19}\right)?$$

- A. 6
- B. 4
- C. 2
- D. 5

Solution:

$$\begin{aligned} & \left(2\frac{3}{4} + 2\frac{1}{2} \text{ of } \frac{5}{2\frac{5}{7}} - \frac{1\frac{2}{3}}{2\frac{1}{2}}\right) \div \left(5\frac{1}{12} \times \frac{5}{19}\right) \\ & \left(\frac{11}{4} + \frac{5}{2} \times \frac{35}{19} - \frac{2}{3}\right) \div \left(\frac{61}{12} \times \frac{5}{19}\right) \\ & \left(\frac{11}{4} + \frac{175}{38} - \frac{2}{3}\right) \div \left(\frac{61 \times 5}{12 \times 19}\right) \\ & \left(\frac{627 + 1050 - 152}{19 \times 4 \times 3}\right) \div \left(\frac{61 \times 5}{12 \times 19}\right) \\ & \left(\frac{1525}{19 \times 4 \times 3}\right) \times \left(\frac{12 \times 19}{61 \times 5}\right) \end{aligned}$$

=5

Note: Options provided for this question are wrong

Question 13: The total surface area of a solid hemisphere is 75 times the area of a circle whose diameter is 6 cm. What is the radius (in cm) of the hemisphere?

- A. 120□
- B. 100□
- C. 80□
- D. 50□

Solution :-area of circle = $\pi r^2 = \pi \times 3^2$
 $= 9\pi$

Total surface area of hemisphere = $75 \times 9\pi$

Now, $3\pi r^2 = 75 \times 9\pi$

$= r^2 = 75 \times 3 = 225$

$r = 15$ cm

Note: Options provided for this question are wrong

Question 14: $(0.0\overline{163} + 0.00\overline{1})$ lies between?

- A. $\sqrt{77} - \sqrt{76}$
- B. $\sqrt{75} - \sqrt{74}$
- C. $\sqrt{76} - \sqrt{75}$
- D. $\sqrt{74} - \sqrt{73}$

Answer 14: $0.0\overline{163} + 0.00\overline{1}$

$= 0.00163163163 + 0.001111111111 = 0.0174274274$

$= 0.01\overline{742}$

Which is not lying in between any of the options.

Question 15:- 10 men can complete a work in 8 days and 10 women take 12 days to complete the same work. How many days will 3 men and 6 women take to complete the same work?

- a. $9\frac{3}{7}$
- b. $10\frac{3}{7}$

c. $11\frac{3}{7}$

d. $12\frac{3}{7}$

Solution:- 1 men 1 day's work = $1/80$

1 men 1 day's work = $1/120$

(3 men + 6 women)'s day's work = $(1/80 + 1/120) = 7/80$

5 men and 10 women will complete the work in $80/7$ days. = $11\frac{3}{7}$ days

Option C answer

Question 16:- The ratio of the average speeds of two sprinters is 8:7. In a racing track if B starts at a distance of 2m ahead of A. At what distance (in metre) from the starting point of B would A catch up with B?

- a. 4.4
- b. 0.4
- c. 2.8
- d. 1.5

Question 17:- Raju lends Rs 3000 to Bharath and a certain sum to Charan at the same time of 6% per annum simple interest. If after 5 years, Raju altogether receives Rs 1650 as interest from Bharath and Charan, What is the sum lent to Charan?

- a. Rs 2500
- b. Rs 3300
- c. Rs 2750
- d. Rs 3250

Answer 17: For Bharath and Charan 6% for 5 year = 30% for each

30% for 3000 = 900

=> total interest - 900 = Charan

1650 - 900 = 30% of x (given to Charan)

30% of x = 750

X = Rs 2500 (option a is correct)

Question 18:- With Symbols having their usual meaning the mean of the data given is 39.2

x	36	40	35	44
f	10	13	12	

What is the missing frequency?

- A.124.6
- B.125.2
- C.123.8
- D.124.2

Question 19:- What is the difference between the Range and the Standard Deviation of all natural numbers between 81 and 90 , both inclusive?

- a. 7
- b. 11
- c. 8
- d. 9

Question 20:- The table below presents the data of atmospheric pressure (in mm of mercury) at a place at four different times of the day during four days P, Q,R,S,A steady rise in atmospheric pressure indicates a fair weather. On which of the given days was the weather fair ?

Time/Day	A	B	C	D
0600	742	765	754	761
1000	778	767	755	770
1400	762	745	757	775
1800	760	756	758	774
2200	768	752	760	762

- a. 324.283

- b. 81.73
- c. 326.293
- d. 28.25

Question 21: The value of 1 gm gold is 90 times that of 1 gm silver. If the weights of equal volumes of silver and gold are in the ratio 10:19, what is the value of a bar of silver that is equal in bulk to a bar of gold of value Rs 99180.

- a. 14: 16: 19
- b. 13: 15: 18
- c. 16: 18: 21
- d. 40: 46: 55

Question 22: When the list price (L.P) of an article is fixed at 30% above the cost price (C.P), and while selling the same it is subject to a discount of $x\%$, the profit percentage is 80% of that when the L.P is fixed at 25% above the C.P and the discount is 16%. What is the value of x ?

- a. 3.25
- b. 3.6
- c. 3
- d. 3.84

Question 23: A shopkeeper calculated his profit as 12% with the selling price of an article as the base. What would have been his actual profit percentage if the selling price was 20% more?

- a. 21
- b. 20
- c. 23
- d. 24

Solution:- Assume the cost price was 100

Then after 12% profit the selling price would have been $=100+12 = 112$

Now,

Profit at 20% would be $= 112 \times 20 / 100 = 22.5$

So answer is option C

Note: Graph and Options provided for this question are wrong

Question 24: The percentage marks scored by two students A and B at four consecutive monthly tests are depicted in the Bar Graph below. In which month is the percentage marks scored by B 40% more than that by A.

- a. 2015
- b. 2013
- c. 2014
- d. 2012

Note: Options provided for this question are wrong

Question 25: The sum of the ages of two friends is 74. After one year the ratio of their ages will be 9:10. What was the ratio of their ages nine years ago?

- a. 7:6
- b. 3:2
- c. 4:3
- d. 13:12

Answer 25:- $x + y = 74$

$$\frac{x+1}{y+1} = \frac{9}{10}$$

$$10x + 10 = 9y + 9$$

$$10x = 9y + 9 - 10$$

$$10x = 9y - 1$$

$$x = \frac{9y - 1}{10}$$

Now putting value of x in equation 1

$$\left(\frac{9y - 1}{10}\right) + y = 74$$

$$9y - 1 + 10y = 740$$

$$19y = 741$$

$$y = 741 / 19 = 39$$

$$\begin{aligned}\text{And } x &= 74 - y \\ &= 74 - 39 = 35\end{aligned}$$

$$\begin{aligned}\text{Ratio of ages nine years ago} &= 35-9 / 39-9 \\ &= 26/30 \\ &= 13:15\end{aligned}$$

Question 26: A city water supply tank has two inlet pipes X and Y, which can fill it in 20 and 30 hours respectively and an outlet pipe Z which can empty a full in 40 hours. If the tank is empty and the taps are opened in succession for one hour each, and the process continues in how many hours the tank gets filled?

- a. $49\frac{1}{7}$
- b. $49\frac{1}{2}$
- c. $51\frac{3}{7}$
- d. $49\frac{1}{4}$

Verbal Ability

Question 1: Select the most appropriate option to fill in the blank.

The exotic remedies for some illness have been _____ from generation to generation.

- A- handed in
- B- handed down**
- C- handed over
- D- handed out

Answer - Handed down

Handing down means passing on the legacy.

Question 2: Select the most appropriate option to complete the sentence.

While MSME's are waiting _____ the release _____ around Rs. five lakh crore pending payments, no major relief has come their way so far.

- A- to, with
- B- of, at
- C- for, of**
- D- from, on

Answer- C

For the release, of around.

Question 3: You are going to read a text about fighting pollution. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

A team of scientists at the University of Portsmouth of England has developed a new enzyme that has the ability to break down plastics up to six times faster than standard enzymes, according to CNN (1) _____. In reducing the amount of non-biodegradable plastic on Earth, enzymes have been used to help combat pollution by breaking down polyethylene terephthalate (PET) chain molecules, the most common thermoplastic that makes up everyday items like single-use bottles, clothing, and carpet. (2)_____ The first altered enzyme was called PETase, which will now be connected with MHETase to create the University's new enzyme protein. Between these two enzymes connecting, PET chains in plastic were found to break down twice as fast as PETase alone.

A- The researchers, who had earlier engineered an enzyme found within bacteria of a plastic bottle combined it with a second enzyme to accelerate the breakdown of plastics.

B- A tool called the Diamond Light Source was used to map the molecular structure of MHETase.

C- Enzymes, proteins that are key components in chemical reactions within the human body, act as catalysts that speed up the breakdown of substances.

- A- 1-B, 2-A
- B- 1-B, 2-C
- C- 1-A, 2-B
- D- 1 C, 2- A**

Answer - Option D (C, A)

Question 4: One part of the sentence below may contain an error. Identify the part. If there is no error, choose 'No error'

Whatever she said in her defence was not taken seriously by the investigating authorities.

A- No error

B- Whatever she said in her defence.

C- by the investigating authorities

D- was not taken seriously.

Answer - Option A. No error.

Question 5: Select the most appropriate option to fill in the blank.

The security guard _____ leave ended two days ago has not yet reported back to work.

A- whom

B- who

C- which

D- whose

Answer: D

Question 6: You are going to read a text. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

Disney is an international maze of parent companies and subsidiaries that leave few corners of the globe untouched, its vast holidays are maze of media networks, film studios, production companies, merchandising ventures, parks, resorts, distribution operations, Finance firms, gaming corporations, publishing companies, construction firms, vacation and cruise lines, music studios, and digital content providers. (1)_____ However, the company's reach spreads farther than many people might think- in movies, and television alone. (2)_____ Forbes ranks Disney- which employs more than 20,000 people ----- among top 10 most powerful brands in the world and values the company at more than \$238 billion.

A- it is common knowledge that Disney is behind classics like ‘Beauty and the Beast’ and ‘The Lion King’.

B- There is only a seemingly endless web of companies, properties, holdings, and franchises that don’t bear the Disney name yet serve as revenue streams for the corporate empire just the same.

C- Walt Disney World in Orlando, Florida re-opened the park in July with new safety precautions in place following months of being shut down amid the Coronavirus pandemic.

A- 1-C, 2-B

B- 1-C, 2-A

C- 1-A, 2-B

D- 1-A, 2-C

Answer - A , C

Question 7: One part of the sentence below may contain an error. Identify the part.

Something about the way he spoke stuck a bell in Lauren’s mind.

A- stuck in bell

B- in Lauren’s mind

C- way he spoke

D- Something about

Answer - Option A. (struck a bell)

Question 8: Complete the following sentence by, filling in the blanks (1 and 2) with the right word from the list given below.

Compared with conventional agriculture, organic farming uses fewer pesticides, reduces soil erosion, decreases nitrate leaching into groundwater and surface water and, _____ animal wastes into the farm. These benefits are _____ by higher food costs for consumers and generally lower yields.

1) A- recycling B- recycle C- recycles D-recycled

2) A- increased B- balanced C- counter-balanced D- encountered

A- 1-D, 2-A

B- 1-D, 2-B

C- 1-B, 2-D

D- 1-C, 2-C

Ans: D (C, C)

Question 9: Complete the following sentence by, filling in the blanks (1 and 2) with the right word from the list given below.

As we scrutinize our own faces for wrinkles and flaws, we can fail to notice what a marvelous organ the face is. Our faces are the most (1)_____ part of our visible body, a mysterious mosaic of the physical and psychical. Faces are the body's workaholics. They confer and confirm identity, express emotion, communicate meaning, perform, (2)_____ functions necessary for life, and enable us to experience the world through our senses.

Blank 1) A-distinctive B-typical C-average D-classic

Blank 2) A-plan B-Basic C-needed D-compulsory

A- 1-C, 2-B

B- 1-D, 2-C

C- 1-A, 2-B

D- 1-B, 2-A

Answer - Option C (A , B)

Question 10: One part of the sentence below may contain an error. Identify the part.

Either Rahul or Rohit accompany their grandmother and grandfather whenever they go to the hospital.

A- Either Rahul or Rohit accompany

B- No error

C- their grandmother and grandfather

D- whenever they go to the hospital.

Ans: A

Rohit accompanies

Question 11: Read the passage below and answer the question.

Archeology is based on the scientific method. Archeologists ask questions and develop hypotheses. They use evidence to choose a dig site, then use scientific sampling techniques to select where on the site to dig. They observe, record, categorize, and interpret what they find. Then they share their results with other scientists and the public.

Underwater archaeologists study materials at the bottom of lakes, rivers, and oceans. Underwater archaeology encompasses any prehistoric and historic periods, and almost all sub-disciplines as Archaeology. Artifacts and features are simply submerged.

Artifacts studied by underwater archaeologists could be the remains of a shipwreck. In 1985, National Geographic Explorer-in-Residence Dr. Robert Ballard helped locate the wreck of RMS Titanic, which sank in the North Atlantic Ocean in 1912, killing about 1,500 people. Ballard and other scientists used sonar to locate the wreck, which had been lost since the ocean liner sank. By exploring Titanic using remote-controlled cameras, Ballard and his crew discovered facts about the shipwreck (such as the fact the ship broke in two large pieces as it sank) as well as hundreds of artifacts, such as furniture, lighting fixtures, and children's toys.

Underwater archaeology includes more than just shipwrecks, however. Sites include hunt camps on the continental shelf of the Gulf of Mexico, and portions of the ancient city of Alexandria, Egypt, submerged due to earthquakes and sea level rise.

What significant information did Dr. Ballard discover about the RMS Titanic?

- A- That 1500 people were on board the liner.
- B- That the ship had sunk in the North Atlantic ocean.**
- C- That the liner had broken into two while sinking.
- D- That children's toys, furniture, and artifacts had also sunk with the ship.

Answer - B (3rd line of 3rd para)

Question 12: According to the passage, which was the research technology used by Underwater Archeologists to get the most effective visual feedback of the artifacts?

- A- Sonar technology
- B- Remote controlled cameras**
- C- Scuba Diving team with cameras
- D- Miniature submarines.

Answer - Option B. (5th line of third paragraph)

Question 13: Which option gives the correct order of the process followed by archeologists?

A- Categorize, develop hypotheses, apply evidence, ask questions, record, dig a site, interpret, observe, share.

B- Observe, apply evidence, record, dig a site, ask questions, interpret, share, categorize, develop hypotheses.

C- Dig a site, interpret, ask questions, observe, apply evidence, categorize, share, develop hypotheses, record.

D- Ask questions, develop hypotheses, apply evidence, dig a site, observe, record, categorize, interpret, share.

Answer - Option D. (First line of the passage)

Question 14: Which of the following are underwater archeologists most unlikely to find?

A- Artifacts and prehistoric features.

B- Portions of an ancient history.

C- Remains of a shipwreck

D- Evidence of previous excavations.

Answer - Option D (Mentioned in fragments)

Question: Read the passage below and answer the questions.

When behavioural ecologists, Liz Derryberry saw a news report of coyotes crossing the Golden Gate Bridge in March, she immediately thought of her birds. For over a decade, Derryberry has studied the white crowned sparrow and how urban noise has disrupted and degraded the species ability to communicate.

With most San Franciscans staying at home due to the coronavirus pandemic, she decided to seize an unprecedented opportunity to study how this small, scrappy songbird responded when human noises disappeared.

“I realized we gotta do this, and we gotta do this now,” she says.

By recording the species' calls among the abandoned streets of the Bay Area in the following months, Derryberry and colleagues have revealed that the shutdown dramatically improved the birds' calls, both in quality and efficiency. Male birds in particular rely on their songs to defend territory and find mates.

"The songs didn't change as much as we predicted—they changed even more," says Derryberry, of the University of Tennessee, Knoxville. "It highlights just how big of an effect noise pollution has."

The research, published today in Science, is among the first to scientifically evaluate the effects of the pandemic on urban wildlife. It also adds to a burgeoning field of research into how the barrage of human-made noise has disrupted nature, from ships drowning out whale songs to automobile traffic jamming bat sonar.

Question 15: Which word does the writer use to describe the extent of research on noise pollution.

- A- Improved
- B- Disrupted
- C- Burgeoning**
- D- Drawing

Answer: C

Question 16: What purpose do the calls of the birds serve?

- A- They help the male secure their territory.**
- B- They help them locate other birds.
- C- They show them the direction during flight.
- D- They assist them in finding food.

Answer - Option A

Question 17: The passage is primarily about the impact of the pandemic on_____

- A- bats
- B- whales
- C- sparrows**

D- coyotes

Answer: C

Question 18: The results of Derryberry and her companion's research were unexpected because _____

A- it revealed that birds did not change their songs or their other habits.

B- It showed that birds migrated from their original homes due to the pandemic.

C- The birds' songs became fewer and less audible when fewer humans watched them.

D- The bird songs became louder and better when human noises reduced.

Answer - D

Question 19 - For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q and R choose the appropriate sentences for S2 and S3 respectively.

S1: Finland's Helsinki Airport is using a unique method for screening arriving passengers for COVID 19 - specially trained dogs that can detect the virus in humans - even before they show any symptoms

S2:

S3:

S4: According to the press release "The dog will perform its work in a separate booth so that the fear of spreading the infection is reduced"

P- Those taking the test will swipe with a test wipe and drop it into a cup, which is given to the dog.

Q - Upon arrival at the airport, passengers may be asked to volunteer for the program, and if they agree. Are given a wipe to collect a sweat sample

R- More dogs are currently being trained and should be available for the screening procedure in a few months

A. RQ

B. RP

C. QP

D. PQ

Ans: C

Question 20 - For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q and R choose the appropriate sentences for S2 and S3 respectively.

S1: COVID-19 spreads mainly among people who are in close contact (within about 6 feet) for a prolonged period.

S2:

S3:

S4: Since people can spread the virus before they know they are sick it is important to stay at least 6 feet away from others, when possible even if you - or they - do not have any symptoms

P: Social distancing is especially important for people who are at higher risk for severe illness from COVID - 19.

Q: Spread happens when an infected person coughs, sneezes, or talks, and droplets from their mouth or nose are launched into the air and land in the mouths or noses of people nearby

R: The droplets can also be inhaled into the lungs.

A. QR

B. PQ

C. RQ

D. RP

Ans: A

Question 21 - You are going to read a text about an interesting initiative. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1 - 2) in the text. There is one extra sentence that you need to choose.

This year COVID-19 pandemic has introduced a wide swath of Americans to the joys of gardens and gardening. (1) _____ American's rose garden at the American Rose Centre is seeking volunteers to participate during its upcoming Volunteer days from 8:00 a.m. to 3:00 p.m. on October 23rd and 24th (2) _____. Mask wearing and social distancing will be observed and a brown, bag lunch will be provided to all who register.

A- Volunteers are welcome to come and work in the garden any time during the two days.

B- The fresh air and other healthful benefits of outdoor exercises, together with the good feeling of accomplishing something useful have drawn many to being gardening or increase activities in the garden

C- After the tour, volunteers will be guided through tasks by garden team leaders.

- A. (1) - C, (2) - B
- B. (1) - A, (2) - C
- C. (1) - C, (2) - A
- D. (1) - B, (2) - A

Ans D

Question 22 - Which of the following sentences does NOT use informal language?

- a. Can we sort this out together?
- b. I sincerely apologise for the oversight**
- c. Thanks a lot for sharing this information
- d. This is a high priority account, take care!

Answer - B (apologise is formal)

Question 23 - For the four sentences (S1 - S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, R, choose the appropriate sentences for S2, S3 respectively.

S-1: Gianni Crea, the head key-keeper of the Vatican, is intimately familiar with the contours of history.

S-2:

S-3:

S:4: They traverse a 4.6 - mile route through the museums which see upto 28,000 visitors per day.

P: Almost every morning for the past six years, he's opened the doors to the Vatican Museums.

Q: Crea and his team of 10 - Five each on the morning and evening shifts - open and close 300 doors every day, mobilizing about 700 employees along with them.

R: Crea has worked in the Vatican for 20 years and as head key-keeper for six.

- a. RP
- b. PQ**
- c. QR
- d. QP

Answer - Option B (PQ)

Question 24 - Read the passage carefully. Then select the words/ options listed A to D which best fill in the blanks.

Indian-Americans are among the best-educated and economically successful US immigrant groups and share the ideology and political _____ of most middle-class professionals in that country. The most recent Asian American Voter Survey confirms what previous studies have shown. Even when _____ to other Asian American groups, such as Chinese and Koreans, Indian-Americans are the most likely to support the Democratic Party and its candidates. Just 16% of them identified themselves as Republicans.

Options:

Blank 1:

- a. viewpoint
- b. Habit
- c. Job
- d. Casualty

Blank 2:

- a. Caused
- b. Groups
- c. Compared
- d. Asked

- a. AC
- b. BA
- c. BD
- d. CB

Answer : Option A

Logical Ability

Question 1: Which is the wrong term in the following series ?

axc,cve,fsh,jpm,oyq,udw

- A. Udw
- B. Ojq
- C. Jpm
- D. fsh

Solution 1:

AXC = 1 letter gap between 1st and 3rd letter

CVE = 1 letter gap between 1st and 3rd letter

FSH = 1 letter gap between 1st and 3rd letter

OYQ = 1 letter gap between 1st and 3rd letter

UDW = 1 letter gap between 1st and 3rd letter

JPM= no pattern like above words.

Hence JPM is the wrong term in the series.

Question 2: Given below is a question by two statement, I and II each containing some information .
Decide which of the statement (s) is/are sufficient to answer the question.

Among Six people P,Q,R,S,T and U , how many are teachers ?
Statement:

- I. “ Q and T are teachers “ is True .
- II. “ At least one of P and R is a teacher” is false and S and U’s status is same like P and R.
- A. Statement II alone is sufficient.
- B. Both the statement I and II together are needed.
- C. Both the statement I and II together are not sufficient.
- D. Statement I alone is sufficient.

Solution 2: Both the statement I and II together are not sufficient.

Question 3: In each of the five pairs of the letter- clusters, the letter in the second term is a rearranged/ transformed form of the letter in the first term in a particular pattern. In which two pairs, has the transformation been done the same way ?

- [A] WMSHD- DSHWM
- [B] NPKRQ - PRKQN
- [C] HQRWK - HKWQR
- [D] ZIGPM- PIZGM
- [E] BWIKG - GIKBW

- A. A and E
- B. A and C
- C. D and B

Solution 3:

A = WMSHD- DSHWM

Here,

WMSHD divide it into two parts i.e., WM and SHD

Now, in second part move the last letter in front and so on, i.e, DSH

Now put second part before the first part i.e., DSHWM

Similarly in E = BWIKG - GIKBW

Here, divide it into two parts i.e., BW and IKG

Now, in second part move the last letter in front and so on i.e., GIK

Further, shift the second part before first part ie., GIKBW

Hence Option A is correct i.e, A and E

This PDF is made by PrepInsta, we have copied this from them

Question 4: There are five person in a family A, B,C,D and E. In which, one is working as a doctor; one is an engineer. Both A and C are unmarried ladies, who are not working. None of the ladies is working as a doctor and a lawyer in the family.E is the husband of the only one married couple in the family. B is the brother of C and neither a lawyer and nor an engineer.

Who is the doctor in the family ?

- A. A
- B. E
- C. B
- D. D

Soution 4: Option C

A, B are unmarried ladies who are not working. E is the husband of only one married couple..so D is the lady and none of the ladies are working as doctor and lawyer.SO now E profession is not given but B is neither lawyer nor an engineer so.. B can be a doctor

Question 5: The following are the criteria for selecting a candidate for the post Assistant Manager. The candidate must.

(i) Be a graduate in engineering in specification of Human Resource Management with minimum 55% marks.

(ii) Have three years full time experience.

(iii) Have secured more than 60 % in the interview and at least 70% in the written test.

However, if the candidate fulfills the above criteria except.

In case of the applicant who satisfies all other criteria except-

- at(i) above , but has more than five year experience in relevant field. his/her case is to be referred to the management.
- at(ii) above, but has secured more than 65% in the written test as well as in the interview. his/her case to be referred to the HR department.
- at(iii) above, but has graduated in engineering with specialization in Human Resource Management with a minimum 65% marks in his/her case to be referred to the General Manager.

Sidharth has recently completed his graduate in engineering with specialization of Human Resource Management with minimum 65 % marks. He has now secured 65% in the interview and 65% in the written test. Thanks PrepInsta for doing the hard work, we just copied it from them.

Based on these criteria and the information Provided , decide the course of action.

- A- Refer to HR department
- B- He would be selected.
- C- Refer to the General Manager.
- D- Refer to Management.

Solution 5:- Refer to the HR Department

Because he has already fulfilled the above criteria and scored 65% in the written test as well as in the interview so his case will be referred to the HR department.

Question 6: Two Statements are given followed by three conclusion numbered I,II and III . Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusion logically follow (s) from the statements.

Statements-

All animals are plants.
All plants are shrubs.

Conclusion-

- I. Some shrubs are plants.
- II. Some animal are not shrubs.
- III. All animal are shrubs.

- A- Only Conclusion I and II follow.
- B- None of the Conclusion Follow.
- C. Only Conclusion I and III follow
- D. None of the above

Solution 6: Option C

Question 7:- Three Statements are followed by four conclusions numbered I, II, III and IV. Assuming the statement to be true. Even if they do not confirm to real world knowledge, decide which of the conclusion(s), logically follows from the statements.

Statement:

1. All clothes are Shirts
2. All shirts are pants.
3. All cots are pants.

Conclusion:

1. No clothe is cot
2. Some cots are shirts.
3. Some pants are clothes.
4. Some cots are clothes.

A- Only II follow

B- Either II or I follow

C- Only Either I or IV and III follow.

D- Only III follow.

Solution 7:

Only Either I or IV and III follow

Question 8: In a certain code, $a+b$ means a is the wife of b ; $a*b$ means a is the brother of b and a/b means a is the son of b .

If $T/z * U+W$, then which of the following is true ?

- A- U is the aunt of T
- B- W is the wife of Z
- C- T is the daughter of Z
- D- U is the uncle of T

Solution 8:-A

T is the son of z , z is the brother of u and u is the wife of W
So U is the aunt of T

Question 9: There are five person in a family A, B, C, D and E . In which, one is working as a doctor; one is an engineer. Both A and C are unmarried ladies, who are not working. None of the ladies is working as a doctor and a lawyer in the family. E is the husband of the only one married couple in the family. B is the brother of C and neither a lawyer and nor an engineer.

Who is the lawyer ?

- A- E
- B- D
- C- A
- D- B

Solution 9: option A

A, B are unmarried ladies who are not working. E is the husband of only one married couple..so D is the lady and none of the ladies are working as doctor and lawyer. B is neither lawyer nor an engineer so.. B is a doctor and the person that is left is E so E is a lawyer.

Question 10:- Given Below is a question followed by two statements, I and II ,each containing some information.Decide which of the statement is /are sufficient to answer the question.

The ratio of fees of two different schools is 2: 2.5 What would be the fees of the school if discount of 25% and 35% are given on the both the schools respectively ?

Statements-

- I. Discount on the second school fees in Rs. 8750 ?
 - II. difference between the discount on the two school fees is Rs. 3750 ?
- a. Statement II alone is sufficient
 - b. Statement I alone is sufficient
 - c. Both Statement I and II together are not sufficient.
 - d. Both Statement I and II together are sufficient

Solution 10:-

Here both the statements I and II together are sufficient to answer the question.

Question 11: There are five people in the family **O,P,Q,R,**and **S** They are working as a farmer ,a teacher,a lawyer,an engineer and a doctor. P is an unmarried daughter of O working as a teacher.S is the brother of Q ,working as a lawyer Q is the husband of the only married couple in the family. O is the father of an unmarried daughter and two sons. Working as farmer O's daughter in law is a doctor.

Who is an engineer in the family ?

- A- O
- B- P
- C- R
- D- Q

Solution 11: Option D

O - farmer

P- teacher

Q- Engineer

R- doctor

S- lawyer

O is the father of P who is teacher (unmarried daughter) and Q(married) and S (lawyer) (Brother) . So Q is married so R is the wife of Q who is a doctor. The only one who is left is Q so Q is an engineer.

Question 12:- A statement is followed by two assumptions number I and II . Consider the statement and decide which of the given assumptions(S) is/are Implicit in the statement .

Statement:

If he is a hard worker ,he will succeed in Life.

Assumptions:

I To succeed,he must be a hard worker

II He will succeed in life.

A- None of I and II are implicit.

B- Only I is implicit.

C- Only II is implicit.

D- Both I and II are implicit.

Solution 12:

Only I is implicit

Question 13:- A Statement is followed by three courses of action numbered I,II and III . Assuming everything in the statement to be true, decide which of the suggested courses of action (a decision to be taken for follow up / improvement in regard to the problem) logically follows for pursuing .

Statement:-

There is a considerable increase in the number persons infected by corona virus during the last few months through person to person contact and direct contact with respiratory droplets, exhausted by the infected person.

Courses of action

- I. Wear amast when social distancing is not possible.
II. The government should give adequate information through mass media regarding corona virus
III. Health Centres and facilities should be increase and fully equipped properly for the treatment patients
- a. Only I is implicit.
b. All are implicit.
c. Both I and II are implicit.
d. Only II is implicit.

Solution 13:-

Both I and II are implicit

Question 14:- Given below is a question followed by two statements,I and II.each containing some information Decide which of the statements(s) is/are sufficeint to answer the question.

What is the age of Sumit ? Statements.

- I. Sumit is five year younger than amit , who is double the age of Prateek.
II. Prateek is 10 years elder than Ravi whose age is 22 years.

- A- The Combination of both the statement I and II are necessary.
B- The Combination of both the statement I and II are not necessary.
C- Statement II alone is sufficient.
D- Statement I alone is sufficient.

Solution 14:The Combination of both the statement I and II are necessary.

Option A

Question 15:- A statement is followed by two assumptions numbered I and II. Consider the statement and decide which of the gives assumption is/are implicit in the statement

Statement-

If you have any queries ,ask there to me

Assumption:

- I. You have no questions.
II. I can answer any questions
- a. Neither I nor II is implicit.

- b. Only II is implicit.
- c. Both I and II are implicit.
- d. Only L is implicit.

Solution 15: Both I and II are implicit

Question 16:- The following are the criteria for selecting a candidate for the post Assistant Manager. The candidate must.

- (i) Be a graduate in engineering in specification of Human Resource Management with minimum 55% marks.
- (ii) Have three years full time experience.
- (iii) Have secured more than 60 % in the interview and at least 70% in the written test.

However, if the candidate fulfills the above criteria except.

In case of the applicant who satisfies all other criteria except-

- at(i) above , but has more than five year experience in relevant field. his/her case is to be referred to the management.
- at(ii) above, but has secured more than 65% in the written test as well as in the interview. his/her case to be referred to the HR Operatement.
- at(iii) above, but has graduated in engineering with specialization Human Resource Management with a minimum 65% marks in his/her case to be referred to the General Manager.

Amit has completed his B.E with 60% marks without HRM specialization but he has been working as an assistant manager in a required company for the last six year. He has now secured 65% in the interview and 66% in the written test. If you are reading this, please appreciate the hard work done by PrepInsta team

- A- Refer to HR department
- B- He would be selected.
- C- Refer to the General Manager.
- D- Refer to Management.

Solution 16:

Refer to the General Manager.

Question 17:- Consider the venn diagram given below:-

The number in the venn diagram indicates the number of the person /people watching the TV programmes. The diagram is drawn after surveying 150 persons in a population of 12000. How many person/people can be expected to watch at least two TV Programs?

- A-3200
- B- 2880
- C-4320
- D-2280

Solution 17:

$$24 + 4 + 16 + 10 = 54$$

$$\text{Fraction of people who have taken part in survey} = 12000/150 = 80$$

$$\text{Fraction of people expected to watch at least 2 TV programs} = 54 * 80 = 4320$$

(Options are incorrect for this question)

Question 18:- In a certain code,P+Q means P is the father of Q; P-Q means P is the sister of Q and P/Q means P is the brother of Q.

Which is the following equation,shows that A is the uncle of D ?

- a. $(A+B+C-D)$
- b. $(A-D+C/B)$
- c. $(A+B/C-D)$

d. $(A-B+C/D)$

Solution 18:-

The correct answer for this question will be $(A/B+C/D)$

A/B means that A is the brother of B

$B+C$ means that B is the father of C, which means that A is the uncle of C

Now, C/D means that C is the brother of D, which means that A will be the uncle of D

Question 19:- The Sequence of folding a piece of square paper and the manner in which the folded paper has been cut is shown in the figures marked X, Y, and Z. How would the paper look when unfolded ?

Solution 19: Option B

Question 20:- The following diagram shows the people who can speak various languages, the rectangle stand for “Spanish; the circle stands for “Indian; the triangle stands for “Russian”, and the square stands for “American”. The numbers in different segment show the number of persons.

Answer the question on the basis of the information given in the diagram.

How many people can only speak both language Spanish and Russian ?

- A- 17
- B- 10
- C- 18
- D- 13

Solution 20: Option D (13)

Question 21:- A Cube is made by folding the giving sheet, In the cube so formed ,which letter/ symbol will be on the opposite face to the face having symbol ‘%’?

A- (+)

B-(Y)

C-(a)

D-(\$)

Solution 21:- Option C (a)

Question 22:- The diagram given below shows the number of students who got distinction in three subjects out of 320 students. Study the diagram carefully and answer the questions

What is the percentage of students who got distinction only in two subject ?

A- 48

B- 10

C- 25

D-15

Solution 22: $\frac{20 + 12 + 16}{320} \times 100 = 15\%$

Question 23:- The following diagram shows the people who can speak various languages, the rectangle stand for “Spanish; the circle stands for “Indian; the triangle stands for “Russian”, and the square stands for “American”. The numbers in different segments show the number of persons.

Answer the question on the basis of the information given in the diagram.

How many people can speak American and Russian languages ?

- A- 15
- B- 8
- C- 13
- D- 9

Solution 23:

There are 8 people who can speak American and Russian

Question 24: The sequence of folding a piece of square paper and the manner in which the folded paper has been cut is shown in the figures marked X,Y and Z. How would the paper look when unfolded ?

Solution 24:

149

Question 25:- These are seven figures, the first and last two of which are unnumbered. One of the numbered figures does not fit into the series. The number of that figure is the answer. Find it out .

- A- 2
- B-3
- C-4
- D-1

Solution 25: Option B

Question 26:- The figure marked “X” is folded to form a box. Four possible boxes A,B,C and D are given below some of which can be formed and some cannot be formed. Choose from the alternatives the boxes that can be formed .

- A- B and D only
- B- B and C only
- C- All of A,B,C and D

D-A and B only

Solution 26:- Option B (B and C only)

Question 27:- The Two figures on the left of the sign "∴" are related in a certain way. The same relationship holds goods for the second pair of figures on the right of the sign "∴" of which ,one figure is missing .Find the missing figure from the alternatives.

Solution 27:-

Option D is correct as from the starting two image we can see that the position of the diagram in the adjacent column is interchanged but keeping the shading to that part of the image.

Question 28. There are five persons in a family O,P,Q,R and S. They are working as a farmer, a teacher, a lawyer, an engineer and a doctor. P is an unmarried daughter of O and working as a teacher. S is the brother of Q, working as a lawyer. Q is the husband of the only married couple in the family. O is the father of an unmarried daughter and two sons working as a farmer. O's daughter-in-law is a doctor.

Which of the following are male members in the family?

- A. R,O and S
- B. P,Q and S
- C. O,Q and S
- D. O,P and Q

Answer: Option C

Question 29 . The two figures on the left of the sign '::' are related in a certain way. The same relationship holds good for the second pair of figures on the right of the sign '::' of which one figure is missing. Find the missing figure from the alternatives?

Option A

Option B

Option C

Option D

Answer: Option C

Programming Logic

Question 1- In a Singly Circular Linked List, how many address fields are there

A. 1

- B. 1+1
- C. 2
- D. 2+1

Answer: Option A

Question 2- Select best suitable answer for below functions

- sizeof()
 - strlen
-
- A. sizeof() - returns size of string including null characters
strlen() - Return size of string including null characters
 - B. sizeof() - returns size of string excluding null characters
strlen() - Return size of string excluding null characters
 - C. sizeof() - returns size of string including null characters
strlen() - Return size of string excluding null characters
 - D. sizeof() - returns size of string excluding null characters
strlen() - Return size of string including null characters

Answer: Option C

Question 3- When we compose a binary tree through the given preorder sequence, what will be left child of 6? (Note: Consider 4 as root node)

4, 2, 1, 3, 6, 5, 7

- A. 5
- B. 1
- C. 7
- D. 3

Answer: Option A

Question 4 - Based on below infix and postfix expressions, identify prefix expression

- Infix Expression - $P - Q * (R + S) / (W - X) * Y + Z$
- Postfix Expression - $PORS+*-WX-Y*/Z+$

- A. $P - / * Q + R + S * WXYZ -$
- B. $-P / * Q + RS + * W - XYZ$

- C. -P/*Q+RS+*-WXYZ
- D. P-/*+RS+Q*-WXYZ-

All answers are wrong

Answer: -P-Q+/*+RS*-WXYZ. Best choice in the given choices can be option A

Question 5- Which of the following is not a logical operator

- A. |
- B. &&
- C. ||
- D. &

Answer: Option D

Question 6- The data modeling phase consists of which of the following?

- A. Creation of logical data model
- B. Creation of infographics
- C. Creation of big data analysis model
- D. Creation of evaluation tool

Answer: Option A

Question 7- What will be the output of the given program?

```
void main()
{
    char a[10][10]={“kellos”,“hellos”,“fellos”}
    printf(“%s”,a[1])
}
```

- A. hellos
- B. ellos
- C. Compile time error
- D. ellos hellos fellos

Answer: Option D

Question 8- What will be the output?

```
class car
{
```

```
public void Show()
{
    System.out.println("Brand is not defined yet");
}
}
class mercedes extends car
{
    public void Show()
    {
        System.out.println("It's mercedes");
    }
}
Class Benz extends mercedes
{
}
public class main()
{
    Public static void main(String[] args)
    {
        car obj = new Benz();
        obj.Show();
    }
}
```

- A. Compile Time Error
- B. Run Time Error
- C. It's mercedes
- D. Brand is not defined yet

Answer: It's mercedes

Question 9- What will be the output of the following program?

```
public class Main
{
    public static void main(String[] args)
    {
        try
        {
            int[] arr = {10, 25, 2, 6, 8, 9, 7, 32}
            for(int i=0; i<arr.length; i++)
            {
```

```
        System.out.print(arr[i+1]);
    }
}
catch(Exception e)
{
    System.out.println("Inside Exception");
}
}
}
```

Type your answer here

Answer: 252689732Inside Exception

Question 10- What will be the output of the below code?

```
public class Main
{
    int x = 10;
    public static void main(String[] args)
    {
        try
        {
            Main t1 = new Main();
            System.out.println(t1.x);
        }
        catch(Exception e)
        {
            System.out.println("Exception caught");
            return;
        }
    }
    static
    {
        int x = 20;
        System.out.print(x+" ");
    }
}
```

Enter your answer ONLY as a NUMERAL in the box

Answer- 20 10

Coding

Question 1

We want to estimate the cost of painting a property.

Interior wall painting cost is Rs.18 per sq.ft. and exterior wall painting cost is Rs.12 per sq.ft.

Take input as

1. Number of Interior walls
2. Number of Exterior walls
3. Surface Area of each Interior Wall in units of square feet
4. Surface Area of each Exterior Wall in units of square feet

If a user enters zero as the number of walls then skip Surface area values as User may don't want to paint that wall.

Calculate and display the total cost of painting the property

Example 1:

```
6
3
12.3
15.2
12.3
15.2
12.3
15.2
10.10
10.10
10.00
Total estimated Cost : 1847.4 INR
```

Note: Follow in input and output format as given in above example

Solution in C:

```
#include<stdio.h>
int main()
{
    int ni,ne,i=0;
    float int_p=18,ext_p=12,cost=0,temp;
    scanf("%d %d",&ni,&ne);
    if(ni<0 || ne<0 )
    {
        printf("INVALID INPUT");
    }
    else if(ni==0 && ne==0)
    {
        printf("Total estimated Cost : 0.0");
    }
    else
    {
        for(i=0;i<ni;i++)
        {
            scanf("%f",&temp);
            cost+= int_p*temp;
        }
        for(i=0;i<ne;i++)
        {
            scanf("%f",&temp);
            cost+= ext_p*temp;
        }
        printf("Total estimated Cost : %.1f",cost);
    }
    return 0;
}
```

Solution in C++:

```
#include<iostream>
using namespace std;
int main()
{
```

```
int ni,ne,i=0;
float int_p=18,ext_p=12,cost=0,temp;
scanf("%d %d",&ni,&ne);
if(ni<0 || ne<0 )
{
cout<<"INVALID INPUT";
}
else if(ni==0 && ne==0)
{
cout<<"Total estimated Cost : 0.0";
}
else
{
for(i=0;i<ni;i++)
{
    cin>>temp;
    cost+= int_p*temp;
}
for(i=0;i<ne;i++)
{
    cin>>temp;
    cost+= ext_p*temp;
}
cout<<"Total estimated Cost : "<<cost;

}
return 0;
}
```

Solution in Java:

```
import java.util.Scanner;

class Main {
    public static void main(String[] args) {
        int ni, ne, i = 0;
        float intP = 18, extP = 12, cost = 0, temp;
        Scanner sc = new Scanner(System.in);
        ni = sc.nextInt();
        ne = sc.nextInt();
        if(ni < 0 || ne < 0) {
```

```
        System.out.print("INVALID INPUT");
    } else if(ni == 0 && ne == 0) {
        System.out.print("Total estimated Cost : 0.0");
    } else {
        for(i = 0; i < ni; i++) {
            temp = sc.nextFloat();
            cost += intP * temp;
        }
        for(i = 0; i < ne; i++) {
            temp = sc.nextFloat();
            cost += extP * temp;
        }
        System.out.printf("Total estimated Cost : %.1f", cost);
    }
}
```

Solution in Python:

```
interior_walls = int(input())
exterior_walls = int(input())
if interior_walls:
    int_walls = []
    for i in range(interior_walls):
        int_walls.append(float(input()))

if exterior_walls:
    ext_walls = []
    for i in range(exterior_walls):
        ext_walls.append(float(input()))
if exterior_walls < 0 or interior_walls < 0:
    print("Invalid Input")
    exit()
if exterior_walls and interior_walls:
    print("Total estimated Cost : ",
          (sum(int_walls)*18+sum(ext_walls)*12), "INR")
else:
    if exterior_walls:
        print("Total estimated Cost : ",sum(ext_walls)*12,"INR")
    elif interior_walls:
        print("Total estimated Cost : ",sum(int_walls)*18,"INR")
    else:
        print("Total estimated Cost : 0.0 INR")
```

Question 2

A City Bus is a Ring Route Bus which runs in circular fashion. That is, Bus once starts at the Source Bus Stop, halts at each Bus Stop in its Route and at the end it reaches the Source Bus Stop again. If there are n number of Stops and if the bus starts at Bus Stop 1, then after n th Bus Stop, the next stop in the Route will be Bus Stop number 1 always.

If there are n stops, there will be n paths. One path connects two stops. Distances (in meters) for all paths in Ring Route is given in array `Path[]` as given below:

`Path = [800, 600, 750, 900, 1400, 1200, 1100, 1500]`

Fare is determined based on the distance covered from source to destination stop as Distance between Input Source and Destination Stops can be measured by looking at values in array `Path[]` and fare can be calculated as per following criteria:

- If $d \geq 1000$ metres, then fare = 5 INR
- (When calculating fare for others, the calculated fare containing any fraction value should be ceiled. For example, for distance 900m when fare initially calculated is 4.5 which must be ceiled to 5)

`Path` is circular in function. Value at each index indicates distance till current stop from the previous one. And each index position can be mapped with values at same index in `BusStops []` array, which is a string array holding abbreviation of names for all stops as-

"THANERAILWAYSTN" = "TH", "GAONDEVI" = "GA", "ICEFACTROY" = "IC",
"HARINIWASCIRCLE" = "HA", "TEENHATHNAKA" = "TE", "LUISWADI" = "LU",
"NITINCOMPANYJUNCTION" = "NI", "CADBURYJUNCTION" = "CA"

Given, $n=8$, where n is number of total `BusStops`.

`BusStops = [ "TH", "GA", "IC", "HA", "TE", "LU", "NI", "CA" ]`

Write a code with function `getFare(String Source, String Destination)` which take Input as source and destination stops (in the format containing first two characters of the Name of the Bus Stop) and calculate and return travel fare.

Example 1:

Input Values

ca

Ca

Output Values

INVALID OUTPUT

Example 2:

Input Values

NI
HA
Output Values
23.0 INR

Note: Input and Output should be in format given in example.
Input should not be case sensitive and output should be in the format <FLOAT> INR

Solution in Python:

```
import math

def getFare(source,destination):
    route=[ [ "TH", "GA", "IC", "HA", "TE", "LU", "NI", "CA"],
             [800,600,750,900,1400,1200,1100,1500]
           ]
    fare = 0.0
    if not (source in route[0] and destination in route[0]):
        print("Invalid Input")
        exit()
    if route[0].index(source) < route[0].index(destination):
        for i in range(route[0].index(source),route[0].index(destination)+1):
            fare+=route[1][i]
    elif route[0].index(destination) < route[0].index(source):
        for i in range(route[0].index(source)+1,len(route[0])):
            fare+=route[1][i]
    for i in range(0,route[0].index(destination)+1):
        fare+=route[1][i]
    return float(math.ceil(fare*0.005))

source = input()
destination = input()
fare = getFare(source,destination)
if fare == 0:
    print("Invalid Input")
else:
    print(fare)
```

Solution in C++:

```
#include <bits/stdc++.h>
using namespace std;
int main() {
    string s , d;
    cin>>s>>d;
    transform(s.begin(),s.end() , s.begin(),::toupper);
    transform(d.begin(),d.end() , d.begin(),::toupper);
    string arrs[8] = {"TH" , "GA", "IC" , "HA" , "TE", "LU" , "NI", "CA"};
    float arr[8]={800,600,750,900,1400,1200,1100,1500};
    float res=0;
    int st ,ed;
    for(int i=0;i<8;i++)
    {
        if(s==arrs[i])
            st=i;

        if(d==arrs[i])
            ed=i;

    }
    if(st==ed)
    {
        cout<<" INVALID INPUT";
        return 0;
    }
    else
    {
        int i=st+1;
        cout<<i;
        while(i!=ed+1)
        {
            res+=(arr[i]);
            i=(i+1)%8;
        }
        cout<<(ceil)(res*0.005);
        return 0;
    }
}
```

25th October slot 2

Numerical Ability

Question:- Two gears which work in tandem have 16th and 20th teeth' respectively. If the former returns 15 times in 8 seconds. How many turns will the latter take in one-third of a minute.

- a. $49\frac{1}{7}$
- b. $49\frac{1}{2}$
- c. $51\frac{3}{7}$
- d. $49\frac{1}{4}$

Question:- At an election between two candidates A and B , all the eligible voters had voted , but 4% of voters were not valid. A, the winner got support from 52% of the voters and defeated B by 600 votes. What was the total number of voters?

- A. 6250
- B. 8000
- C. 6000
- D. 7500

Answer : - 15625

Question:- The monthly expenses in a boarding house are partly fixed and partly a multiple of the number of boarders. It is Rs 78660 and rs 94884 when the numbers of borders are 62 and 75 respectively. What is the monthly expense (in Rs), when the number of borders is 80?

- A: 100926
- B: 100804
- C: 101124
- D: 101534

Answer: 101124

Question: 72 men are engaged for a task with a timeline given beforehand It is found that is $38\frac{6}{13}$ of the given time 36% of the task is accomplished. How many additional men are to be engaged so that the timeline can be met?

- A: 6
- B: 8
- C: 12
- D: 9

Question: The average speed of X always turns out to be 150% that of Y, who can travel 20 km in 3 hr 36 min. If X sets on a journey of 150 km and stops for half an hour each at two stages in between, what will be the total time (in hours) he had been on move?

- A: 13.5
- B: 16.5
- C: 17
- D: 15

Answer: 19 hrs

Question: X working alone takes 75 days more than Y to do a work, and working together they complete it in 20 days. If a certain sum has been earmarked as wages for this work, in what ratio should it get distributed among X and Y?

- A: 1:4
- B: 1:5
- C: 2:5
- D: 2:3

Answer: 1:4

Question: A room, measuring 6m 65cm long and 4m 55cm broad is to be paved with least number of squared tiles. Then the number of square tiles required to cover the floor is ____.

- A: 274
- B: 257
- C: 187

D: 210

Answer: 247

Question: If 2 numbers are respectively 25% and 40% less than the third number, what is the ratio of these 2 numbers?

A 3:4

B 4:5

C 5:4

D 3:5

Solution:

Let the 3rd number be 100.

Then the first number is 25% of 3rd number = $\frac{25 \times 100}{100}$

$$\frac{25 \times 100}{100} \\ = 25$$

So the first number = $(100 - 25) = 75$

Similarly,

The second number is 40% of 3rd number = $\frac{40 \times 100}{100}$
= 40

Hence the second number = $(100 - 40) = 60$

Hence, ratio of both the numbers = $\frac{75}{60} = \frac{5}{4}$

So, the ratio will be 5:4

Question: A number is to be divided by 1001 ($= 7 \times 11 \times 13$) and it was divided in succession by 7, 11 and 13, to obtain the remainders 4, 6 and 12 respectively. What would have been the remainder if the number was divided directly by 1001?

A 970

B 828

C 764
D 982

Answer: 970

Question: A sum invested in a scheme where the interest gets compounded quarterly grows to Rs 140000 and Rs 157304 respectively in 15 and 21 months respectively. What is the rate of interest per annum?

A 24
B 6
C 15
D 12

Answer: 6

Question: In a factory, the coefficients of variation of the wages of urban and rural workers are 52% and 60% respectively and their standard deviations are 2600 and 2640 respectively. If 60% of the workers are urban. What is the overall average wage(in Rs) of the workers?

A 4350
B 4200
C 4450
D 4600

Answer: 4600

Question : A, B, C are three cups having capacities of 120, 180 and 200 cc respectively which are completely filled with tea of three different varieties. They are all mixed in a separate vessel of capacity more than that A, B, C taken together, and then the mixture is poured successively into A,B, C. Then how much (in cc) of A and B's tea will be there in C?

A. 56(A), 64(B)
B. 52(A), 68(B)
C. 44(A), 76(B)
D. 48(A), 72(B)

Answer: 48(A), 72(B)

Question: What is the simplified value of:

$$\frac{0.397}{1.2 \times 1.2 + 0.66 + 1.1 \times 1.1} = ?$$

- a. 1
- b. 0.1
- c. 0.01
- d. 0.001

Answer:0.1

Question : What is the sum (in Rs) which when divided among A, B, C, D in the proportion 2:3:5:8 provides Rs 8420 less than what it provides to him when the proportion is $\frac{1}{2} : \frac{1}{3} : \frac{1}{5} : \frac{1}{8}$?

- A. 25020
- B. 37530
- C. 12510
- D. 17540

Answer:25020

Question : A boat rows a certain stretch upstream in one hour, and the difference between the time taken by it to row the same stretch downstream and that in still water is eight minutes. What is the average of the between the speed of the boat in still water and that of the stream?

- A. 2.75
- B. 3
- C 2.5
- D 3.25

Question : Raju lends Rs 3000 to Bharath and a certain sum to Charan at the same time of 6% per annum Simple Interest. If after 5 year, Raju altogether receives Rs 1650 as interest from Bharath and Charan, What is the sum lent to Charan?

- A. Rs 3250
- B. Rs 2500
- C. 3300
- D. 2750

Answer: For Bharath and Charan 6% for 5 year = 30% for each

30% for 3000 = 900

=> total interest - 900 = Charan

1650 - 900 = 30% of x (given to Charan)

30% of x = 750

X = Rs 2500 (option a is correct)

Question The radius of a solid sphere and a solid right circular cone are equal and the height of the cone is equal to the diameter of its base. They are melted and the combined matter is recast into a solid hemisphere What is the ratio of the radius of the hemisphere to that of the cone?

- A. Cube Root 4
- B. Cube Root 6
- C. Cube Root 2
- D. Cube Root 3

Answer : Cube root 3

Question: The average rainfall (in mm) in a city during the months “March to October”, of a year calculated over a period of ten years is presented in a tabular form below,

Month	March	April	May	June	July	Aug	Sept	Oct
Rainfall	44	56	154	312	333	350	288	147

What is the ratio of the average rainfall for the months having three figure data to that of the same for the rest?

- A. 264: 25
- B. 132: 25
- C. 99: 50
- D. 66: 25

Answer: 132:25

Question: If the marks distribution of a number of candidates in an examination, out of 100, are in accordance with the table given below, what is the estimated number of candidates who scored between 58 and 72

Marks (m)	$m \leq 55$		\$\$	$65 \leq m \leq 70$	$70 \leq m \leq 75$
No. of candidates	410	40	50	40	30

- A. 118
- B. 112
- C. 122
- D. 120

Question : The median of frequency distribution table is _____

Class	50 - 54	55 - 59	60 - 64	65 - 69	70 - 74	75 - 79
Frequency	12	26	30	8	13	11

- a. 62
- b. 61
- c. 61.5
- d. 62.5

Answer: 62

Question : What is the cumulative frequency Greater than type corresponding to the class mark 59.5 for the Frequency table given below:

Class	20 - 29	30 - 39	40 - 49	50 - 59	60 - 69	70 - 79	80 - 89
Frequency	4	5	4	7	12	11	6

- a. 19
- b. 20

- c. 36
- d. 29

Question:- If the HCF of 180 and 432 is expressed as $(180m + 432n)$, where m and n are integers, then what is the difference between m and n ?

- a. 7
- b. 3
- c. 8
- d. 9

Solution:-

Prime factors of 180 and 432 is :-

$$\rightarrow 180 = 2 * 2 * 3 * 3 * 5$$

$$\rightarrow 432 = 2 * 2 * 2 * 2 * 3 * 3 * 3$$

$$\text{HCF} = 2 * 2 * 3 * 3 = 36.$$

Now, given that, HCF is written as $180m + 432n$.

So,

$$\rightarrow 180m + 432n = 36.$$

$$\rightarrow 36(5m + 12n) = 36$$

dividing both sides we get,

$$\rightarrow 5m + 12n = 1$$

Now, we have given that, m and n both are integers.

So,

putting values of m , we get :-

$$m = 0, n = (1/12) \Rightarrow n = \text{not an integer.}$$

$$m = 1, n = (-1/3) \Rightarrow n = \text{not an integer.}$$

$$m = 2, n = (-3/4) \Rightarrow n = \text{not an integer.}$$

$$m = 3, n = (-7/6) \Rightarrow n = \text{not an integer.}$$

$$m = 4, n = (-19/12) \Rightarrow n = \text{not an integer.}$$

$$m = 5, n = (-2) \Rightarrow n = \text{an integer.}$$

Hence,

$$\rightarrow \text{Difference between } m \text{ and } n = m - n = 5 - (-2) = 5 + 2 = 7 \text{ (Ans.)}$$

Question:- If $(x+10)\%$ of 240 is 60% more than $x\%$ of 180, then 15% of $(x+20)$ is what percent less than 25% of x ?

- a. 15
- b. 16
- c. 17

d. 18

Solution:

$$(x+10)\% \text{ of } 240 = x\% \text{ of } 180 + \{60\% \text{ of } 180x/100\}$$

solving this to get

$$x = 50$$

$$15\% \text{ of } (x+20) = 25\% \text{ of } x - \{y\% \text{ of } 25x/100\}$$

apply x value here, to get y value

$$15\% \text{ of } (50+20) = 25\% \text{ of } 50 - \{y\% \text{ of } (25 \cdot 50)/100\}$$

$$10.5 = 12.5 - \{y\% \text{ of } 12.5\}$$

$$\{y\% \text{ of } 12.5\} = 2$$

$$y \cdot 12.5/100 = 2$$

$$y = 200/12.5$$

$$y = 16$$

Verbal Ability

Question 1: Which of the following sentences does NOT use informal language?

A- Sorry, I could not come by last time.

B- Can you pick up some ice on your way back?

C- The professor's lecture was way over my head.

D- Sorry, I could not attend your party last night.

Answer - Option D. ('could not' is formal. Couldn't will be informal)

Question 2: Which of the following options means the same as the highlighted phrase below:

I admired the way my brother could think outside the box.

A- My brother was thinking while walking about.

B- My brother was too simple and only wanted peace and tranquility.

C- My brother could give interesting and unusual solutions to problems.

D- My brother used to call his office a box he could think new things in.

Answer- C

Question 3: One part of the sentence below may contain an error. Identify the error.

Something about the way he spoke stuck a bell in Lauren's mind.

- A- Something about
- B- stuck a bell
- C- in Lauren's mind
- D- way he spoke

Answer- B

Explanation: Struck a bell

Question 4: Complete the following sentence by filling in the blank (1 and 2) with the right words from the list given below:

Critics have argued that reality television shows reflect reality in ways that are ____1____ or even fraudulent through ____2____ editing, coaching participants on what they say and how to behave, generating storylines ahead of time, and staging scenes for the cameras.

Blank 1) A- deceive B- deception C- deceptive D- deceit

Blank 2) A- misinterpret B- misled C- misleading D- misinterpreting

- a. 1 (A), 2 (A)
- b. 1 (B), 2 (B)
- c. **1-C , 2- C**
- d. 1 (D), 2 (D)

Answer- C

Question 5: Read the passage carefully. Then select the words/ options listed A to D which best fill in the blanks.

Saturn turns direct in Capricorn today, and this is an important transit. Saturn has been retrograde since May giving us some time to __1__ the discussions we have made and the karma they have created. Remember, Saturn governs ____2____ and obligations, and if there is a lesson to be learned, you can bet that Saturn will teach it. Now, in retrograde Saturn's energy is a ____3____ one. So, rather than feeling an urge to take action, you may have instead felt like you needed some time to sit and think. That' s what a retrograde Saturn ____4____ is supposed to do. But now it's turning direct, and it's time to own our responsibilities again.

Blank 1) A- make B- consider C- Sell D- Fire

Blank 2) A - responsibilities B. burden C. education

Blank 3)

Blank 4)

Answer: INCOMPLETE QUESTION

Question 6: Read the passage and answer the question.

Despite a setback caused by the Covid 19 pandemic and schedules being affected, the Indian Space Research Organisation (ISRO) has continued to slowly pursue its two ambitious missions-- the Ganganyan and Chandrayan-3. Even as officials had said that the staffers were working from home through the lockdown, several had started reading to their workspaces through the lockdown.

Using the payload on Chandrayaan-2 orbiter, which has three optical heads, the space agency has a greater resolution and a stereo view of the moon. The image data will also help them decide and fine tune the point of touchdown of the lander. Since the Chandrayaan-2 orbiter is working to capacity, the upcoming mission will only have a lander and rover which will be taken to the moon by a propulsion module.

The chances of success at Chandrayaan-3 are being increased with the space agency using the robust data acquired by Chandrayaan-2 orbiter. Director of Vikram Sarabhai Space Centre S Somanth recently iterated that the Human spaceflight programme was significant. Drawing a comparison with other countries like the USA, he said Human Space Travel is a capacity we need to create even under stress as the capability will be essential for the future.

What is the passage about?

A- working under constraints

B- Significance of space programming for future,

C- Meeting the target deadlines.

D- Commitment of the scientists at ISRO.

Answer: D

Question 7: Read the passage and answer the question.

Despite a setback caused by the Covid 19 pandemic and schedules being affected, the Indian Space Research Organisation (ISRO) has continued to slowly pursue its two ambitious missions-- the Ganganyan and Chandrayan-3. Even as officials had said that the staffers were working from home through the lockdown, several had started reading to their workspaces through the lockdown.

Using the payload on Chandrayaan-2 orbiter, which has three optical heads, the space agency has a greater resolution and a stereo view of the moon. The image data will also help them decide and fine tune the point of touchdown of the lander. Since the Chandrayaan-2 orbiter is working to capacity, the

upcoming mission will only have a lander and rover which will be taken to the moon by a propulsion module.

The chances of success at Chandrayaan-3 are being increased with the space agency using the robust data acquired by Chandrayaan-2 orbiter. Director of Vikram Sarabhai Space Centre S Somanth recently iterated that the Human spaceflight programme was significant. Drawing a comparison with other countries like the USA, he said Human Space Travel is a capacity we need to create even under stress as the capability will be essential for the future.

Director Somanth's statement indicates a pressing read

- a. To show off his
- b. To b ready for a space war
- c. To plan for India's imminent future
- d. To prove India's

Answer - INCOMPLETE QUESTION

Question 8: Read the passage and answer the question.

Despite a setback caused by the Covid 19 pandemic and schedules being affected, the Indian Space Research Organisation (ISRO) has continued to slowly pursue its two ambitious missions-- the Ganganyan and Chandrayan-3. Even as officials had said that the staffers were working from home through the lockdown, several had started reading to their workspaces through the lockdown.

Using the payload on Chandrayaan-2 orbiter, which has three optical heads, the space agency has a greater resolution and a stereo view of the moon. The image data will also help them decide and fine tune the point of touchdown of the lander. Since the Chandrayaan-2 orbiter is working to capacity, the upcoming mission will only have a lander and rover which will be taken to the moon by a propulsion module.

The chances of success at Chandrayaan-3 are being increased with the space agency using the robust data acquired by Chandrayaan-2 orbiter. Director of Vikram Sarabhai Space Centre S Somanth recently iterated that the Human spaceflight programme was significant. Drawing a comparison with other countries like the USA, he said Human Space Travel is a capacity we need to create even under stress as the capability will be essential for the future.

The expression 'fine tune' in the passage implies:

- a. Cleaning and _____ all parts of a device
- b. Testing performance of all sound devices
- c. Checking for various defects in a machine
- d. **Making minute changes to make things better**

Answer - Option D

Question 9 - You are going to read a text about the impact of Covid -19 pandemic. Some sentences are missing from the text. Choose the most appropriate sentences for each gap (1 - 2) in the text from (A - C). There is one extra sentence that you do not need to use.

A night out at the movies can get very costly, especially when you factor in traffic, parking and concessions. All this adds up to one's expenses. _____. This way it's less and less of a hassle to just Netflix and chill. Theatre chains seem to have been hit hardest. _____. To fill these empty seats, they are trying to pull out the stops viz restaurants, quality food and drinks served to patrons and luxurious reclining seats.

- A. Hence, many prefer binge watching movies and TV shows in the comfort of their homes.
- B. Movie lovers need to get out of their couches and move into the theatres.
- C. Most of their seats are going empty

- a. 1 - A, 2 - C
- b. 1 - C, 2 - A
- c. 1 - A, 2 - B
- d. 1 - B, 2 - C

Answer - Option A (1 - A, 2 - C)

Question 10: One part of the sentence below contains an error. Identify the part.

In the evening / Bhushan took his seat / on the window / of that empty house.

- a. Bhushan took his seat
- b. on the window
- c. In the evening
- d. of that empty house.

Answer 10 - Option B (it will be BY the window)

Question 11 : For the four sentence (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, R, choose the appropriate sentences for S2 and S3 respectively.

S1: It is neither the size nor the length of life which makes man human.

S2:

S3:

S4: Man is not like a tree

Options:

P: The man may physically attain the size of giant, yet intellectually he may remain a dwarf

Q: The growth of mind and intellect is never in proportion to the growth of the human body

R: My friend's brother was a dwarf

- a. **RP**
- b. QP
- c. RQ
- d. PR

Answer - Option A (RP)

Question 12: Two sentences have been removed from the text below. Read the text and then match the missing sentences to fill up Blank 1 and Blank 2. You will need to choose any 2 sentences out of three provided:

Unlike undergraduate courses where some students do minimal reading and still succeed, graduate studies require a student to read large volumes of information. Reading at graduation school is the way in which students glean new ideas, theories, models, etc. that inform their theses and research papers.

- (1) _____ For example, a literature review requires a student to read with great breadth and depth within his/her research area
- (2) _____ The number of documents to read, analyze, and synthesize to compile a literature review can be mind boggling.

Options:

P: Graduate students are asked to actively engage with the information they read

Q: Graduate students do not want to read the books available in libraries

R: Books are a man's best friend

S: Then the ideas are synthesized into a unified whole.

- a. QS
- b. RS
- c. **PS**
- d. SP

Answer - Option C (PS)

Question 13: Fill in the blanks with the most appropriate options given below:

Information _____ defined as a collection of symbols which, _____ combined, communicates a message or intelligence.

- a. Can be / when
- b. Should be / which
- c. Should / when
- d. Can be / where

Answer - Can be / when

Question 14: Read the following passage:

The much-delayed Indian Premier League starts Saturday without its customary glitz and glamour, but the Twenty20 tournament is expected to be a welcome relief to cricket fans during the coronavirus pandemic. The short-form extravaganza normally starts in March but along with other major international sporting events was postponed as countries went into virus lockdowns. It was then moved to the United Arab Emirates as cases rose in India.

All the eight teams have been in strict, biosecure 'bubbles' since landing in the UAE, with the competition set to kick off when defending champions Mumbai Indians take on Chennai Super Kings in Abu Dhabi on September 19. There will be no gala opening ceremony for the world's chances of success at Chandrayaan-3 are being increased with the space agency using the robust data acquired by Chandrayaan-2 orbiter. Director of Vikram Sarabhai Space Centre S Somanth recently iterated that the Human spaceflight programme was significant. Drawing a comparison with other countries like the USA, he said Human Space Travel is a capacity we need to create even under stress as the capability will be essential for the future. richest T20 league, and the games will be played behind closed doors at three venues including Dubai and Sharjah.

Yet president of the Board of Control for Cricket in India, Sourav Ganguly, expects a surge in viewership for the 13th edition with the matches scheduled for India's evening primetime TV slots.

"There is something positive in everything." commented Sourav Ganguly

Based on your understanding of the passage answer the following questions by choosing the best option:

The expression 'Bio secure bubbles' refers to:

- a. It consists of a staged dance drama about fairy tales, where heroes and heroines dance and sing, performed in small villages.
- b. consists of greek and iranian characters from history books whodie for their country or kingdoms; often in the pursuit of beautiful women.
- c. Safety PPE kit
- d. Social distancing methods.

Answer - **OPTIONS ARE INCORRECTLY MENTIONED.**

Question 15:

Which of the following is NOT a relevant criteria for conduct of the 13th IPL series?

- a. The Mahabharata teaches readers about the finest aspects of warfare and martial struggle and how man's ambition can make or break him in the final race.
- b. Venue for IPL will be shifted to Middle East
- c. Matches will be telecast on prime-time slot
- d. The epic works as a tale of good versus evil in the battle between Pandavas and Kauravas, and also highlights the internal struggle in all of us, which leads to spiritual wisdom.

Answer - **OPTIONS ARE INCORRECTLY MENTIONED.**

Question 16:

Which of the following sentences is indicative of the mood of the general public?

- a. The much delayed Indian Premier League starts on Saturday without its customary glitz and glamour
- b. All epics extoll the necessity of valour, the beauty of women and the lure of money and property that is the bane of humankind.
- c. The Games will be played behind closed doors at three venues including Dubai and Sharjah
- d. All epics teach us that the common man has to learn about the right and wrong of life only through the stories of the rich and famous.

Answer - **OPTIONS ARE INCORRECTLY MENTIONED.**

Question 17: For the four sentences (S1 - S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, R, choose appropriate sentences for S2 and S3 respectively.

S1: The 1940 version of the movie, Pinocchio, is no exception.

S2:

S3:

S4: Surprisingly, his character in the movie is not as prominent as it is in the book.

P: Jimmy Cricket appears as the Talking Cricket in the book.

Q: The movie is based on a story that appeared as a serial in a newspaper called The Adventures of Pinocchio written by Carlo Collodi.

R: It was written in 1881 an 1882

- a. PQ
- b. RQ
- c. **QP**
- d. PR

Answer - QP

Question 18: Choose the pair of options that are appropriate to complete the sentence.

Martin Sir had a reputation as the _____ of Principals, but those who knew him well, said he was a _____ man.

Blank 1: A. mad B. tough C. slovenly D. strictest

Blank 2: A. crazy B. family C. effective D. just

- a. 1D , 2A
- b. 1C, 2A
- c. **1D, 2D**
- d. 1B, 2B

Answer - Option C (1D, 2D)

Question 19: One part of the sentence below may contain error. Identify the part. If there is no error, choose 'No error.'

Since sunrise to sunset / my grandmother would sit by her wheel, / spinning and reciting prayers.

- a. my grandmother would sit by her wheel
- b. No error
- c. **Since sunrise to sunset**
- d. spinning and reciting prayers.

Answer - Option C - (FROM sunrise to sunset)

Question 20: Fill in the blanks with the most appropriate pair of words from the given options.

As WHO and partners work together on the response -- tracking the pandemic, _____ on critical interventions, distributing vital medical supplies to those in need--- they are _____ to find a vaccine.

- a. Advising / race
- b. Advise / racing
- c. **Advising / racing**
- d. Advised / raced

Answer - Option C

Logical Ability

Question 1: In a certain code, P + R means P is the son of R; P - R means P is the wife of R and P / R means P is the father of R.

If A+B-Q/S, then which of the following is true?

- a. S is the uncle of A
- b. A is the grandson of S
- c. A is the brother of S
- d. A is the sister of S

Answer : A is Brother of S

Question 2: There is a group of 6 friends P, Q, R, S, T and U.

- (i) T is the shorter than S but taller than U
- (ii) Q and R shorter than U
- (iii) P is shorter than T but taller than U

Who is 4th from the bottom when they are arranged in ascending order of height?

- A. Q
- B. S
- C. P
- D. R

Answer:P

Question 3: Statement

- 1. Some papers are pens.
- 2. Some pens are books.
- 3. Some books are flowers.

Conclusion:

- I. Some flower are papers
- II. Some books are papers
- III. Some papers are books
- IV. No flowers is paper

- A. Either II and III follows
- B. Either I and II follows
- C. Either II and IV follows
- D. Either I and IV follows

Answer: Either I or IV follows

Question 4: Fill in the blanks with the most appropriate pair of words from the options given below.

Information _____ defined as a collection of symbols which, _____ combined, communicates a message or intelligence.

- A. Can be/ where
- B. should/ when
- C. Should be/ which
- D. Can be/when

Answer:D

Question 5: Among 5 object A,B,C,D and E.:

- i. C is twice as heavy as E.
- ii. A and D together are as heavy as B and C together.
- iii. A and C together are as heavy as B and E together.
- iv. A and B together are one and half time as heavy C and D together.

Which among the five is the heaviest of all ?

- A- (B)
- B-(A)
- C-(C)
- D-(D)

Answer : D

Question 6: Which is the wrong term in the series ?

vco, teo, qhj, mle,hqc,bwa

- A-mle
- B-bwa

C-teo
D-hqc

Repeated Question:

Question 7:- There is a group of 6 friends P,Q,R,S,T and U

- (i) T is shorter than S but taller than U.
- (ii) Q and R shorter than U.
- (iii) P is shorter than T but taller than U.

Who is fourth from the bottom when they are arranged in ascending order of height ?

- A- (Q)
- B-(S)
- C-(P)
- D-(T)

Answer:P

Question 8 : In each of the five pairs of the letter- clusters, the letter in the second term is a rearranged/ transformed form of the letter in the first term in a particular pattern. In which two pairs, has the transformation been done the same way ?

- [A] MASON- AMNOS
- [B] PARTY - APRYT
- [C] FAULT - AFTLU
- [D] LODGE- DOLEG
- [E] CARGO - ACOGS

- A. B and D
- B. C and D
- C. D and E
- D. A and C

Answer:Option D

Question 9:-The Two figures on the left of the sign "∴" are related in a certain way. The same relationship holds goods for the second pair of figures on the right of the sign "∴"of which, one figure is missing .Find the missing figure from the alternatives.

Answer: A

Question 10:- Eight Cricket teams A,B,C,D,E,F,G and H played one day matches with another. Every Team played one match with every other team at the league stage in each match.the wrong team earned 2 point and the losing team did not earn any point A won only 1 match ,B lost only one match , C lost 3 matches and earned 2 points more than the D. E earned 4 point more than G and G earned the same point as that of H,E and F together earned 16 points.

After the league match,the top two teams as per the league points table played the final match and the team scoring the second highest point at the league stage won.

Which team won in the final ?

- A-(B)
- B-(D)
- C-(E)
- D-(C)

Answer : Option C - (E)

Question 11: A Cube is made by folding the giving sheet, In the cube so formed ,which letter/ symbol will be on the opposite face to the face having symbol ‘%’?

- A- (a)
- B-(\$)
- C-(Y)
- D-(+)

Solution- Option A (a)

Question 12:-In a certain code, P@R means P is the wife of R; P\$R means P is the husband of R and P#R means P is the son of R.

Which of the following equations shows that D is the mother in law of A ?

A- A#D@C\$B

B- A\$B#C@D

C- A@B#C\$D

D- A@B\$C#D

Answer:Option C

Question 13:-In a certain code, P+R means P is the Son of R; P-R means P is the wife of R and P/R means P is the father of R.

If A+B-Q/S, then which of the following is true ?

A- A is the sister of S

B- S is the uncle of A

C- A is the brother of S

D- A is the grandson of S

Answer: Option C

Question 14:-Three batsman Subham ,Mayank and Mohit respectively scored a total of 850,900 and 500 runs in 2019 against three teams. The three teams were England,Australia and Sri lanka.

(i) Subham scored an average of 300 runs against England and Australia.

(ii) Mayank scored 100 runs more than Subham against England and his average number of runs against Australia and Sri Lanka was 300 .

(iii) Mayank scored 50 runs more than Mohit against Australia.

(iv) Mohit scored as many runs as that of Subham against Sri Lanka and 200 runs less than what Mayank scored against England.

What was the total number of runs scored by the three batsmen against Australia in 2019 ?

A-900

B-600

C-750

D-550

Answer : 550

Solution:-

Question 15:- Among a group of fifteen persons seven people can speak in Hindi, 8 persons can speak Urdu while three of them cannot speak none of both languages. How many of them can speak both languages ?

A- 5

B- 0

C- 3

D- 4

Answer: 3

Question 16:- The Figure marked 'X' is folded to form a box. Four possible A, B, C and D are given below some of which can be formed and some cannot be formed. Choose from the alternatives the boxes that can be formed.

- A- B and C only
- B- A and B only
- C- A and D only
- D- All of A,B,C and D

Question 17:- Read the following information carefully and answer the given question:

A public charitable Organization desires to select a Candidate for the post of Programme Coordinator for a Health Project ,based on the following criteria.

The candidate must (i) hold BE degree with minimum 60% marks and above (ii) have an experience of 5 Years in the relevant field (iii) be ready to execute a bond of three years of service.

In case of the applicant who satisfies all other criteria except-

- (a) at (i), above but has BE degree with minimum 55% marks but has completed M.Tech with 50% his/her case is to be referred to the Secretary.
- (b) at(ii) above,but has 3 years full time experience as a Programme Manager,his/her case is to be referred to the Project Director.
- (c) at(iii) above, but is ready to give Rs. 30,000/- as security money,his/her case is to be President of trust.

Based on these criteria and information provided decide the course of action.

Suresh has completed BE degree with 62% marks and he has been working as Project Manager for last 3 years in a Government funding health project .He is ready to execute a bond of three years of services. What decision should be taken by

- A- He would be selected
- B- Refer to president of trust
- C- Refer to Secretary of trust

D- Refer to Project Director

Answer: Option D

Question 18:- Given below is a question followed by two statements, I and II each containing some information. Decide which of the statement (s) is/are sufficient to answer the question.

Among six members of the family O,P,Q,S,R and T, how many are females ?

- (i) Q is wife of P and mother of T. R is grandmother of O and mother of P.
- (ii) T is granddaughter of S

- A- Both I and II together are not sufficient.
- B- Statements II alone is sufficient
- C- Statements I alone is sufficient
- D-Both I and II together are sufficient.

Answer: Both I and II together are not sufficient.

Solution:-

Question 19:- A statement is followed by three assumptions numbered I,II and III consider and decide which of the given assumptions is/are implicit in the statement

Statement:

It is better that the newly recruited lectures be given adequate training before assigning them full - fledged teaching duties in colleges.

Assumptions:

- I. Training would help the fresh recruit improve their job-related skills for improved performance.
- II. The new recruits do not process skill sets before the training is imparted to them.
- III. Training is a formal mandatory requirement which needs to be fulfilled.

- A- Only II is implicit
- B- Only I and II are implicit
- C- All of I,II and III are implicit
- D- Only III are implicit.

Answer: Option B

Question 20 :- Given below is a question followed by two statements, I and II each containing some information. Decide which of the statements is/are sufficient to answer the question

Among Five friends P, Q, R, S and T, how many are married ?

Statements

- (i) "R and T are married" is true
- (ii) "At least one of P and S is married" is false and Q's marital status is same as that of S.

- A- Both the statements I and II together are needed
- B-
- C-
- D-

Question 21:- Which of the option figure would come next in the following figure Series ?

C-

D-

Question 22. A statement is followed by two assumptions numbered I and II. Consider the statement and decide which of the following assumption(s) is/are implicit in the statement

Statement

The educational framework now requires to go through a process of change so as to cater to the individuals according to their interests and talents.

Assumptions

- I. The current educational system is geared to mainstream individuals without due regard to their unique personalities
- II. Learners find less scope for their nurturing their individual interests and talents in the present system

- A. Only I is implicit
- B. Only II is implicit
- C. Neither I nor II is implicit
- D. Both I and II are implicit

Answer: Option D

Question 23. Seven friends P, Q, R, S, T, U and V are sitting in a circular table facing the center.

- I. P is between T and U
- II. V is between Q and R
- III. S is left of U and Right of Q

Who is exactly right of R?

- A. U
- B. P
- C. V
- D. Q

Answer: Option C

Question 24. There is a group of five friends P, Q, R, S and T. P is second in height but younger than R. Q is taller than S but younger in age. R and S are of the same age but R is shortest in the group. T is taller than Q and elder to R. P is not the youngest in group.

Who will be in the third position, if all the friends are arranged in ascending order of the heights?

- A. Q
- B. S
- C. R
- D. T

Answer: Option A

Question 25 . A statement is followed by three courses of action numbered I, II and III. Assuming everything in the statement to be true, decide which of the suggested courses of action (a decision to be taken for follow up/improvement in regard to the problem) logically follow(s) for pursuing

Statement:

Of late, it has come to the notice of the municipal authorities that a large section of people in certain sector are suffering from water-borne diseases

Course of Action:

1. All the hospitals and health care workers should be kept on high alert to address the emerging situation and proper medical attention to the affected
2. A body of specialists should soon be constituted to survey water supply network in the city to correct any systematic errors responsible for spreading the diseases
3. The municipal authority should issue an advisory warning to people not to drink piped water and depend on other water sources

- A. All of 1,2 and 3 follow
- B. Only 2 follows
- C. Only 1 follows
- D. Only 1 and 2 follow

Answer: Option D

Question 26. In the following diagram, the rectangle stands for 'Engineers'; the circle stands for 'Teachers'; the triangle stands for 'Lawyers', and the square for 'Doctors'. The numbers in different segments show the number of persons.

Answer the question on the basis of the information given in the diagram.

How many engineers are lawyers as well as doctors?

- A. 9
- B. 14

- C. 7
- D. 5

Answer: Option D

Question 27. Given below is a question followed by three statements I,II and III, each containing some information. Decide which of the statements is/are sufficient to answer the question.

Four subjects were taught i.e. Hindi, English, Math and Science in four consecutive periods of one hour each starting from 8.00 am. At what time was the science period scheduled?

Statements:

- I. Mathematics period started from 9.00 am which was preceded by hindi
- II. English was scheduled in the last
- III. Hindi period was scheduled sometime before science

- A. Statement I alone is sufficient
- B. Statements I and II together are sufficient
- C. Statement III alone is sufficient
- D. Statement II alone is sufficient

Answer: Option B

Programming Logic

Question 1 - What will be the output of the following program?

```
public class Main
{
    public static void main(String args[])
    {
        System.out.println("ab\raba\r");
    }
}
```

aba

Question 2 - What will be the output?

```
class Main
{
    private int SUM;
    public static void main(String args[])
    {
        Main main = new Main();
    }
    public void Main(int a, int b)
    {
        a=10;
        b=10;
        SUM = a+b;
        System.out.println(SUM);
    }
}
```

- A. Compilation error
- B. 0
- C. 20
- D. No output

Answer : Option A

Explanation - the declaration of variable SUM is wrong, it should be private int SUM;

Question 3- _____ is a process to identify the key aspects of an entity and hiding the rest.

- A. Polymorphism
- B. Encapsulation
- C. Inheritance
- D. Abstraction

Answer : Option B

Question 4- _____ function is used to show key pressed by user will appear on the screen

- A. gets()
- B. getche()
- C. gfets()
- D. getch()

Answer : Option B

Question 5 - The primary mission of an analyst or system designer is to:

- A. Extract the physical requirements of the users and convert them into software
- B. Development of Software evaluation tool
- C. Create a data flow diagram
- D. Calculate the return on investment

Answer : Option C

Question 6- Assume Linked list as head 2 -> 4 -> 6 -> 8

```
structemp{
    int emp_id;
    structemp *next;
};
structemp *head, *next;
temp=head;
while(temp -> next != NULL)
{
    printf("%d",temp -> emp_id)
    temp = temp -> next;
}
```

What will be the output of the following program ?

- A. 2460
- B. 246
- C. 2468
- D. 246NULL

Answer : Option B 246

Question 7- When we implement stack by using linked list then :

- A. Insertion of node is done from end & deletion from end
- B. Insertion of node is from beginning and deletion from beginning
- C. Insertion of node is done from end & deletion from beginning
- D. Insertion of node is done from beginning and deletion from end

Answer : Option A

Question 8- Among the following loops which is a post tested loop ?

- A. do-while
- B. while
- C. for
- D. if

Answer : Option A

Question 9- Which one is not a type of topology ?

- A. Bus Topology
- B. Ring Topology
- C. Circuit Topology
- D. Star Topology

Answer : Option C

Question 10 - What would be the Time Complexity of below code ?

```
include<stdio.h>
void main()
{
    int count=11;
    for(int i1; i<=count; i++)
    {
        printf("Time Complexity!!");
    }
}
```

$O(n)$ or $O(1)$

Coding

Question-1

There are total n number of Monkeys sitting on the branches of a huge Tree. As travelers offer Bananas and Peanuts, the Monkeys jump down the Tree. If every Monkey can eat k Bananas and j Peanuts. If total m number of Bananas and p number of Peanuts are offered by travelers, calculate how many Monkeys remain on the Tree after some of them jumped down to eat.

At a time one Monkey gets down and finishes eating and go to the other side of the road. The Monkey who climbed down does not climb up again after eating until the other Monkeys finish eating.

Monkey can either eat k Bananas or j Peanuts. If for last Monkey there are less than k Bananas left on the ground or less than j Peanuts left on the ground, only that Monkey can eat Bananas($<k$) along with the Peanuts($<j$).

Write code to take inputs as n , m , p , k , j and return the number of Monkeys left on the Tree.

Where, n = Total no of Monkeys

k = Number of eatable Bananas by Single Monkey (Monkey that jumped down last may get less than k Bananas)

j = Number of eatable Peanuts by single Monkey (Monkey that jumped down last may get less than j Peanuts).

m = Total number of Bananas

p = Total number of Peanuts

Remember that the Monkeys always eat Bananas and Peanuts, so there is no possibility of k and j having a value zero

Example 1:

Input Values

20

2

3

12

12

Output Values

Number of Monkeys left on the tree:10

200

Preplnsta Royal Pass

Note: Kindly follow the order of inputs as n,k,j,m,p as given in the above example. And output must include the same format as in above example(Number of Monkeys left on the Tree:<Integer>)
For any wrong input display INVALID INPUT.Credits given to Preplnsta

Solution in C

```
#include <stdio.h>
int main()
{
    int n,k,j,m,p;
    float atebanana=0.0,atepeanut=0.0;
    scanf("%d %d %d %d %d",&n,&k,&j,&m,&p);
    if(n<0 || k<0 || j<0 || m<0 || p<0)
    {
        printf("INVALID INPUT");
    }
    else
    {
        if(k>0)
            atebanana =(float)m/k;
        if(j>0)
            atepeanut =(float) p/j;
        n=n-atebanana-atepeanut;
        printf("Number of Monkeys left on the Tree:%d",n);
    }
    return 0;
}
```

Solution in Java

```
import java.util.*;
class Monkeys
{
```

```
public static void main(String []args)
{
    Scanner sc = new Scanner (System.in);
    int n = sc.nextInt();
    int k = sc.nextInt();
    int j = sc.nextInt();
    int m = sc.nextInt();
    int p = sc.nextInt();
    int atebanana=0 ,atepeanut=0;
    if( n<0 || k<0 || j<0 || m<0 || p<0)
    {
        System.out.println("Invalid Input");
    }
    else
    {
        if(k>0)
            atebanana =m/k;
        if(j>0)
            atepeanut = p/j;
        n=n-atebanana-atepeanut;
        System.out.println("Number of Monkeys left on the Tree: "+n);
    }
}
}
```

Question 2

Chain Marketing Organization has has a scheme for income generation, through which its members generate income for themselves. The scheme is such that suppose A joins the scheme and makes R and V to join this scheme then A is Parent Member of R and V who are child Members. When any member joins the scheme then the parent gets total commission of 10% from each of its child members.

Child members receive commission of 5% respectively. If a Parent member does not have any member joined under him, then he gets commission of 5%.

Take name of the members joining the scheme as input.

Display how many members joined the scheme including parent member. Calculate the Total commission gained by each members in the scheme. The fixed amount for joining the scheme is Rs.5000 on which commission will be generated

SchemeAmount = 5000

If you are reading this please give credits to Preplnsta, we didn't know the code, we copied it from them

Example 1: When there are more than one child members

Input : (Do not give input prompts. Accept values as follows.)

Amit //Enter parent Member as this
Y //Enter Y if Parent member has child members otherwise enter N
Rajesh, Virat //Enter names of child members of Amit in comma separated

Output: (Final Output must be in format given below.)

TOTAL MEMBERS:3

COMMISSION DETAILS

Amit: 1000 INR

Rajesh :250 INR

Virat: 250 INR

Example 2: When there is only one child member in the hierarchy

Input :

Amit
Y
Rajesh

Output:

Total Members: 2

Commission Details

Amit: 500 INR

Rajesh: 250 INR

```
Solution in C++
using namespace std;
int main()
{
    string par;
    cin >> par;
```

```

string x;
cin >> x;
if (x == "N") {
    cout << "TOTAL MEMBERS:1\n";
    cout << "COMISSION DETAILS\n";
    cout << par << ":250 INR\n";
} else {
    string child;
    cin >> child;
    vector<string>v;
    string temp = "";
    for (int i = 0; i < child.length(); i++) {
        if (child[i] == ',') {
            v.push_back(temp);
            temp = "";
        }
        else if (child[i] != ' ')
            temp += child[i];
    }
    v.push_back(temp);
    cout << "TOTAL MEMBERS:" << v.size() + 1 << "\n";
    cout << "COMISSION DETAILS\n";
    cout << par << ":" << v.size() * 500 << " INR\n";
    for (auto a : v) {
        cout << a << ":" << "250 INR\n";
    }
}
}

```

```
for i in child:  
    print("{0}:250 INR".format(i))
```

Question 1. Fill in the blanks with most appropriate set of words from the option given below:

What did the painter do _____ himself from falling?

When he felt the ladder_____, he grabbed the gutter to save himself from falling.

A.To save/beginning to slip

B.For saving/began to slip

C.To save/began slipping

D.To save/begin to slip

Answer: For saving/began to slip

Question 2. One part of the sentence below may contain an error. Identify the part. If there is no error, choose 'No error'

My grandmother/ always goes to school with me/ because the school was attached to the temple.

- A. Always go to school with me
- B. Because the school was attached to the temple
- C. My grandmother
- D. No error

Answer: Always go to school with me

Question 3. One part of the sentence below may contain an error. Identify the part. If there is no error, choose 'No error'

As before, he kept off the beat track,/ making his way through open meadows,/ and patches of trees.

- A. As before, he kept off the beat track
- B. making his way through open meadows
- C. No error
- D. and patches of trees.

Answer: As before, he kept off the beat track

Question 4. Fill in the blanks with the most appropriate set of words from the option given below:

Everyday we are _____ with hundreds of advertisements. They range from commercials on T.V, billboards on roadsides, posters on walls as also brochures and pamphlets _____ on streets.

- A. confounded/distributing
- B. faced/distributive
- C. bombarded/distribution
- D. bombarded/distributed

Answer: bombarded/distributed

Question 5. For the four sentence (S1 to S4) paragraph given below, sentences S1 & S4 are given. From the options P, Q and R, choose appropriate sentences for S2 & S3.

S-1: After refreshing himself with sleep and food, they set off briskly carrying his little ailing sister on the back

S-2:

S-3:

S-4: These thoughts pursued and tormented him throughout

Options

P: Holland, to him now did not seem very far off

Q: He was worried, though, about the safety of his mother who he had left behind

R: He did not know when he would finally return to her

A.RQ

B.RP

C.QP

D.PQ

Answer:PQ

Question 6 : Read the following passage carefully

“If we don’t laugh, we’ll cry” is a phrase that often rings true. That said, if I so much as hear “coronavirus” at bedtime, a good night’s sleep gets replaced with a lengthy late-night nap, as I’ll lay awake processing the scope of this massive tragedy into the wee hours. That’s why, in order to get some sleep and preserve what’s left of my mental health, I’ve decided to ban any form of entertainment but comedy past eight o’clock at night. And apparently, “I’m not alone”, says vivian.

Scott Weems, cognitive neuroscientist and author of Ha! The Science of When We Laugh and Why, says the need to seek out humor during tragic times like these is a common coping mechanism. “It’s easy to go into a pretty negative rabbit hole with news and everything else,” he says. “There’s so much in the world that can make you laugh or cry, and it’s your choice which of those two to do.” There are moments when a craving for comedy can feel inappropriate and awkward, but Weems says there are both emotional and physical health benefits to laughing.

Based on your understanding of the passage answer the following questions by choosing the best option.

“Apparently, I’m not alone.” What does Vivian mean by this?

A.She finds the comedy show so engaging that she forgets her fears.

B.There are others too, who seek out humour like her.

C.Her friends are with her and she watches the show.

D.She is able to connect emotionally with the comedians.

Answer:There are others too, who seek out humour like her.

**It’s easy to go into a pretty negative rabbit hole with news and everything else.
In this statement, the expression ‘negative rabbit hole implies**

- A. A confused and bizarre state of mind
 - B. A situation which opens up new avenues
 - C. Dwell upon information and news
 - D. A rabbit's burrow
- Answer: A confused and bizarre state of mind**

Question 9. The following sentence can be revised so that it reads better. Choose the sentence that is the best revision.

A team of Health inspectors are in the process of currently investigating the restaurant. It is likely that they may completely close it down in about 3 to 5 days

- A. A team of Health inspectors are in the process of currently investigating the restaurant. It is likely that they may completely close it down in about 3 to 5 days.
- B. A team of Health inspectors are currently investigating the restaurant and they may completely close it down in about 3 to 5 days.
- C. A team of Health inspectors investigating the restaurant. It is likely that they may completely close it down in about 3 to 5 days.
- D. A team of Health inspectors are currently investigating the restaurant and may close it down in about 3 to 5 days.

Answer: A team of Health inspectors are currently investigating the restaurant and they may completely close it down in about 3 to 5 days.

in many ways.

- II. The Pollution Control Board should close down all industries in the residential areas.
- III. Spread awareness among the masses to reduce and prevent pollution.
 - A. Only I and II follow.
 - B. All I, II and III follow.
 - C. Only III follows
 - D. Only I follows

Answer: Option B

Q2. In a family of ten persons with three couples, each having two children, R and T are brothers and each has two children. P is the father of T and Q is mother of R. B is the brother of A, who is the cousin sister of C.

- A. Sister
- B. Brother
- C. Grandson
- D. Cousin

Answer: Option C

Q3. In a row, seven people are standing for march past.

- I. B is standing right to A and left to C.
- II. D is standing left to E but right to C.
- III. F is standing right to E and left to G.

Who is standing in the middle of the row?

- A. D
- B. Either B or G
- C. A
- D. Either C or E

Answer: Option A

Q4. The following are the criteria for selecting a school psychologist for a reputed school. The candidates must:

- (i) be a Postgraduate in Psychology with more than 60% in the Postgraduate examination
- (ii) have Postgraduate diploma in Guidance and Counseling.

(iii) have secured more than 65% in the interview and at least 60% in the written test.

(iv) have at least 3 years of experience in the relevant area.

In case of the candidates who satisfies all other criteria except -

(a) at (i), above, but has secured more than 65% in the written test as well as in the interview, his/her case is to be referred to the Management.

(b) at (ii) and (iii) above, but has more than ten-year experience in relevant field, his/her case is to be referred to the Principal,

Dinesh has done his Master's degree in Psychology with 65% of marks. For the last 10 years, he has been working as a School psychologist/counselor written test.

Based on these criteria and information provided, decide the course of action.

- A. Could not be selected
- B. Refer to the management
- C. Could be selected
- D. Refer to the principal

Answer: Option D

Q5. Which is the wrong term in the following series? dgf, fhx, iku, mor, rtl, xzf

- A. xzf
- B. iku
- C. dgf
- D. Mor

Answer: Option C

Q6. In a school, 30% of the boys are illiterate while 80% of the girls are literate. If the ratio of the boys to that of the girls is 2:3, then what %age of the students is literate?!

- A. 35 percent
- B. 27 percent
- C. 65 percent
- D. 76 percent

Answer: Option D

Q7. Deepika appeared in five subjects, P, Q, R, S and T in an examination. She has scored an average of 36 marks in all subjects. Her mark in subject S is 5 marks more than that in subject T while in subject T she scored 8 marks fewer than in P and in subject Q she scored as many as in subject S and T. She scored a total 107 in both subject Q and R. How many marks Deepika obtained in subject T?

- A. 30
- B. 52
- C. 65
- D. 20

Answer: Option D

Q8. Given below is a question followed by three statements, I, II and III, each containing some information. Decide which of the statement(s) is/are sufficient to answer the question.

How is A related to B?

Statements:

I. A is husband of C.

II. C has two children B and D.

III. C is married to D's father A. How is A related to B?

- A. Statement III alone is sufficient
- B. Either I and II or II and III together are sufficient
- C. Statement II alone is sufficient
- D. Statement I alone is sufficient

Answer: Option B

Q9. In a sports academy, T-shirts were to be equally distributed among 125 athletes. At this occasion, 35 athletes were absent and therefore each athlete got 4 t-shirts extra. How many t-shirts in total, were available for distribution?

- A. 3200
- B. 2800
- C. 2400
- D. 2900

Answer: Option B

Q10. In each of the five pairs of letter-clusters, the letters in the second term is a rearranged/ transformed form of the letters in the first term in a particular pattern. In which two pairs, the transformation has been done the same way?

- [A] RDXPQ - XDPRQ
- [B] MUKHI - KUMIH
- [C] GTRSK - RTGKS
- [D] PKRHU - UPHRK
- [E] MPQTJ - MTJQP

- A. B and C
- B. D and B
- C. A and D
- D. A and C

Answer: Option A

Programming Logic

Question 1: Match the following:

Match functions usage C language		Output in float data type format	
A	ceil(3.6)	1	32.000000
B	floor(3.6)	2	3.000000
C	pow(2, 5)	3	12.000000
D	abs(-12)	4	25.000000
		5	4.000000
		6	0.000000

- A. A-5, B-2, C-4, D-3
- B. A-2, B-5, C-4, D-3
- C. A-5, B-2, C-1, D-6

D. A-2, B-6, C-1, D-3

Answer: None of the mentioned options are correct. The correct answer will be: **A - 5, B - 2, C - 1, D - 3**

Question 2: When we implement stack by using linked list then:

- A. Insertion of node is done from end and deletion from end
- B. Insertion of node is done from beginning and deletion from end
- C. Insertion of node is done from beginning and deletion from beginning
- D. Insertion of node is done from end and deletion from beginning

Answer: Option C

Question 3: Integer $m=10$, $n=35$, $p=5$, $d=6$. Comment about the output of the given two statements:

Print $m*n + p/d$

Print $p/d + m*n$

- A. Differ by 10
- B. Same
- C. Differ by 20
- D. Differ due to left and right precedence

Answer: Option b

Question 4: What will be the value of `fseek()` function if error occurs?

- A. Any non zero value
- B. 0
- C. Null
- D. 1

Answer: Option A

Question 5: The statement `printf("%d,25 ? 5 ? 0 : 5 : 25");` will print

- A. 5
- B. Compile time error

- C. 0
- D. 25

Answer: Option C

Question 6: The primary mission of an analyst or systems designer is to

- A. Calculate the return on investment
- B. Development of software evaluation tool
- C. Create Data Flow Diagram
- D. Extract the physical requirements of the users and convert them to software.

Answer: Option D

Question 7: When we execute the given code what will be the value of x and y?

```
#include <stdio.h>
#include <conio.h>
void swap (int &x, int &y)
{
    int temp;
    temp = x;
    x=y;
    x= temp;
}
int main()
{
    int x= 10, y = 20;
    swap(x,y);
    cout<<x<<y;
    return 0;
}
```

Enter your answer only as a numeral

Answer: 1020

Question 8: What will be the output of the following program

```
public class Main
{
    public static void main(String args[])
    {
        int i = 1, j=1;
        for(;j<=i ; System.out.println(i+ "-" + j++));
    }
}
```

Answer: 1-1

Question 9: What will be the output of the below code

```
class Test1
{
    private static int add(int a, int b)
    {
        System.out.println("Inside private method");
        return a+b;
    }

    protected static int add(int a, int b)
    {
        System.out.println("Inside protected method");
        return a+b+c;
    }
}

public class Main extends Test1
{
    static int add(int a, int b, int c)
    {
        System.out.println("Inside static method");
        return a+b+c;
    }
    public static void main(String[] args)
    {
        Main t = new Main();
    }
}
```

```
System.out.println(t.add(10,20,20));  
}  
}
```

- A. Inside protected method
- B. Compilation error
- C. Run time error
- D. Inside static method

Answer: Option B

Question 10: Which of the following is incorrect syntax for function declaration with default argument?

- A. `int foo(int x= 10, int y=20, int z=30);`
- B. `int foo(int x, int y=20, int z =30);`
- C. `int foo(int x, int y, int z =30);`
- D. `int foo(int x, int y=20, int z);`

Answer: Option B

- A. $S = R/2$
- B. $S = \sqrt{R}$
- C. $S = 2R$
- D. $S = R$

Answer: Option A

Question 2: Raju buys 3 goats and 2 sheep for Rs 11600. When he sells the goat at 20% profit and sheep at 10% loss, he earns a total profit of Rs 1000. The cost of one sheep is?

- A. 2400
- B. 4600
- C. 2200
- D. 2600

Question 3: If $\frac{\sqrt{7} + \sqrt{5}}{\sqrt{7} - \sqrt{5}} = a - b\sqrt{35}$, then the value of $a - 2b$ is?

- A. 8
- B. 7
- C. 4
- D. 5

Answer: Option C

Question 4: A hollow spherical ball of thickness of 1 cm and external radius of 5 cm is melted and then from solid so obtained, without any loss of material, 61 identical spherical balls are obtained. What is the diameter (in cm) of each ball?

- A. 2
- B. 1.5
- C. 3
- D. 1

Answer: Diameter of small spherical balls is 2 cm

Question 5: Four distribution P, Q, R, S are given below:

P = 4, 2, 1, 3, 3, 5, 6, 9, 8, 7

Q = 4, 5, 6, 7, 8, 9, 10, 11, 12, 13

R = 5, 6, 4, 5, 7, 5, 8, 1, 5, 2

S = 2, 6, 6, 11, 10, 9, 10, 8, 10, 7

What is the mean of the two modes in the body in the only binomial distribution among the above?

- A. 8
- B. 5
- C. 3
- D. 6

Answer 5: Option B

Question 6: What is the value of:

$$1.59 \times 1.59 + 8.46 \times 0.53 + 9 \times 0.47 \times 0.47 ?$$

- A. 6.25
- B. 9
- C. 9.025
- D. 4

Answer: Option B

Question 7: Raju lends Rs 3000 to Bharath and a certain sum to Charan at the same time of 6% per annum simple interest. If after 5 years, Raju altogether receives Rs 1650 as interest from Bharath and Charan, What is the sum lent to Charan ?

- A. Rs 2500
- B. Rs 3300
- C. Rs 2750
- D. Rs 3250

219

Preplnsta Royal Pass

10% Discount
Coupon Code:

Royal Pass

Join Now

Answer 7: Option A

For Bharath and Charan 6% for 5 year = 30% for each

30% for 3000 = 900

=> total interest - 900 = Charan

1650 - 900 = 30% of x (given to Charan)

30% of x = 750

X = Rs 2500 (option a is correct)

Question 8: In how many ways X give Rs 500 to Y using only Rs 100 and Rs 20 notes, with the condition that she has only 16 notes of Rs 20, and being asked to use the notes of both the denominations?

- A. 3
- B. 2
- C. 6
- D. 4

Answer: Option A

Question 9: A train starting from a station X was to arrive at a station Y at 6.06 P.M. It could travel at 62.5% of its usual speed and reach Y at 7 P.M. At what time did it start from X?

- A. 4:44 PM
- B. 4:24 PM
- C. 4:36 PM
- D. 4:56 PM

Answer : Option C

Question 10: The ratio of incomes of P and Q is 7: 5 and the ratio of their expenditure is 4: 3. If at the end of year, P and Q save Rs 3000 and Rs 2000 respectively, what is Q's income?

- A. 4000
- B. 4500
- C. 7000
- D. 5000

Answer: Option D

Question 11: A retailer has fixed the List Price of an article at 20% above the cost price. If he offers a discount of Rs 2 for a purchase of Rs 40, what is his gain or loss percentage?

- A. 12% loss
- B. 10% gain
- C. 14% gain
- D. 8% loss

Answer : Option C

Question 12: The median of the following data is:

Class	0-10	10-20	20-30	30-40	40-50
Frequency	10	15	12	15	8

- A. 24.366
- B. 24.266
- C. 24.123
- D. 24.166

Answer 12: Option D

Question 13: The capacity of three containers X, Y, and Z are 1, 2, and 4 liters respectively. Initially X is empty, while Y and Z are full of water and milk respectively. X is filled from Y, Y is replenished from Z and X is emptied into Z. If this process is repeated once more, then what will be the ratio of milk in Y to water in Z?

- A. 4: 5
- B. 4: 3
- C. 1: 1
- D. 3: 5

Answer 13: Option D

Question 14: Four men and two women can do a piece of work together in one day. If a woman is twice as efficient as a man, in how many days can a woman working alone do the work?

- A. 2
- B. 6
- C. 4
- D. 8

Answer: Option C

Question 15: If 25% of a number is equal to the three - fifths of another number, what will be the ratio of the first number?

- A. 12:5
- B. 15:12
- C. 5:12
- D. 12:15

Answer: Option C

Question 16: A sales representative commission is 6% on all sales up to Rs 15,000 and 5% on all the sales exceeding this. He remits Rs 47,350 to his company after deducting his commission. What was the total sale?

- A. 49000
- B. 50500
- C. 50000
- D. 47500

Answer 16: Option C

$$47350 = x - 6\% \text{ of } 15000 - 5\% \text{ of } (x-15000)$$

222

Preplnsta Royal Pass

$$47350 = x - 900 - 5\% \text{ of } x - 5\% \text{ of } 15000$$

$$47350 + 900 - 750 = x - 5\% \text{ of } x$$

$$47500 = 95\% \text{ of } x$$

$$\Rightarrow x = 47500 \times 100/95$$

$$x = 50000$$

Rs. 50000

Question 17: Two engines having different speeds are to run on parallel track with the starting point of slower being ahead of the faster by 5km and 6km in two separate cases. What is the ratio between the distance that the faster train needs to travel in these cases to catch up the slower one?

- A. 2:3
- B. 5:12
- C. 5:6
- D. 3:4

Question 18: For a grouped frequency distribution having eight classes, the upper class boundaries of the lowest and the highest classes are 10 and 66 respectively. What is the lower class boundary of the highest class?

- a. 60
- b. 57
- c. 58
- d. 59

Question 19: The Average marks (out of 100) scored by the students of four towns A, B, C and D of a district in English and Hindi at a secondary level examination held in 2019 are presented through a bar graph shown below.

How much percentage (correct upto 2 decimal places) are the average marks in Hindi above that of the highest marks among the towns in english?

- A. 20.67
- B. 14.33
- C. 18.33
- D. 16.67

Answer 19: Option D

Question 20: The average score in mathematics of a class increases by 10% if the total marks secured by a number of students who form 20% of the class strength and whose average score is 48 is not included in the calculation . What is the average score?

- A. 80
- B. 75
- C. 60
- D. 90

Question 21: What is the simplified value of

$$(7^2 + 24^2) \div \left[20^2 - \frac{1}{2}(5^2 - 1) + 10 \{ (0.3)^2 + (0.1)^2 \} - 2 \times 7 \right]^2$$

- A. $\frac{1}{225}$

- A. $\frac{1}{5}$
B. $\frac{1}{125}$
C. $\frac{1}{25}$
D. $\frac{1}{25}$

Answer: Option A

Question 22: Two gear which work in tandem have 16 and 20 teeth respectively. If the former turns 15 times in 8 seconds, how many turns will the latter take in one-third of a minute?

- A. $49\frac{1}{4}$
B. $49\frac{1}{7}$
C. $49\frac{1}{2}$
D. $51\frac{3}{7}$

Question 23: What sum (in Rs.) given on loan for two years with scheme of return on the basis of compound interest at a yearly rate of 10% will correspond to repayment through monthly installments of Rs. 9075?

- A. 189000
B. 198000
C. 180000
D. 165000

Question 24: The sum of two numbers is 2604 and their hcf is 124. Which is smaller between them if their difference is the least possible?

- A. 11146
B. 496
C. 1240
D. 620

Answer : Option C

Question 25: What will be the percentage increase in the area of a square, if it's side is increased by 20%?

- A. 20%
- B. 44%
- C. 36%
- D. 40%

Answer : Option B

Question 26: Four teams P, Q, R, S played round robin league (each playing against each other) matches , and the points table is as under:

Team	Number of Matches played	Number won	Number lost	Number Drawn	Points Scored
P	3	2	0	1	7
Q	3	2	1	0	6
R	3	0	1	0	2
S	3	0	2	1	1

If A is the overall average points scored by four teams per match and B is the points scored by Q if the number of matches it had won, lost and drawn be the same, then what is the difference (correct to two decimal places) between A and B?

- A. 1.33
- B. 2.67
- C. 1.67
- D. 0.33

Answer: Option B

Verbal Ability

Question 1: You are going to read a text about a railway project in the Saharan region. Some sentences are missing from the text. Choose the from the list to (A - C) the most appropriate sentence for each gap (1 to 2)for the text. There is one extra sentence that you do not need to use.

Trans- Saharan railway was a project to build a rail line South through Algeria to sub-saharan Africa.(1) _____ but Algeria's were comparatively near France and possesses moreover as own means of defence, so that if the other parts of French Africa could be firmly knit together by a railroad there would be little to fear from an outside foe (2)_____ such a road would bring the different parts of the country into touch with one another and would greatly facilitate their economic conquest.

- a. Besides the strategic reasons in favour of a Trans- Saharan railroad there were political and economic ones as well.
- b. The southern portions of the French African empire were particularly isolated, the vast interior reasons presenting an almost insurmountable barrier between them and Algiers , so that in case of a war with a strong Naval power like England, they would be in great danger.
- c. As far back as 1880 some preliminary surveys to the south of Algiers were made by exploring parties.

Options'

- A. (1)-A, 2-(C)
- B. (1)-C, 2-(B)
- C. (1)-B, 2-(C)
- D. (1)-B, 2-(A)

Answer: D

Question 2: One part of the sentence below may contain a grammatical error. Identify the part if there is No Error choose "No Error"

India's chess Olympiad gold winning team captain Vidit Gujarati says the experience of playing against, and defeating iconic Viswanathan Anand, was the most special moment of his life.

- a. says that the experience of playing against and defeating.
- b. India's chess Olympiad gold winning team captain.
- c. **No error**
- d. was the most special moment of his life

Answer - 'No error' Option C

Question 3: For the four sentence (S1 to S4) paragraph below sentences S1 and S4 are given. From the options P Q and R choose the appropriate sentences for S2 and S3 respectively.

S1: US President Donald Trump on Wednesday refused to commit himself to allow a peaceful transfer of power if he lost his November 3 re-election bid, raising the largely unfounded prospect of widespread fraud in mail - in ballots.

S2

S3

S4 : And as a candidate in 2016, he had refused to say he would accept the outcome of the election if he lost.

Options

P: This is not the first time he was non-committal on the issue, talking the same stance most recently in an interview to Fox News

Q: If it was a fair and free election, Trump claimed, there will be “continuation” of power and not transfer.

R: President trump married to Melania Trump, a former model some years ago.

- a. QR
- b. PQ
- c. **QP**
- d. RQ

Answer: QP

Question 4: Read the passage given below and answer questions.

The field of behavioral economics blends ideas from psychology and economics, and it can provide valuable insight that individuals are not behaving in their own best interests.

Behavioral economics provides a framework to understand when and how people make errors. Systematic errors or biases recur predictably in particular circumstances. Lessons from behavioral economics can be used to create environments that nudge people toward wiser decisions and healthier lives.

Behavioral economics emerged against the backdrop of the traditional economic approach known as rational choice model. The rational person is assumed to correctly weigh costs and benefits and calculate the best choices for himself. The rational person is expected to know it's preferences (both present and future) and never flip flow between two contradictory desire's. He has perfect self-control and can restrain impulses that may prevent him from achieving his long-term goals.

Traditional economics uses these assumptions to predict real human behaviour. The standard policy advice that stems from this way of thinking is to give people as many choices as possible, and let them choose the one they like best (with minimum government intervention). Because they knew the preferences better than government officials do. Individuals are in the best position to know what is best for them.

In contrast, behavioral economics shows that actual human beings do not act the way. People have limited cognitive abilities and a great deal of trouble exercising self-control. People often make choices that bear a mixed relationship and do their own preference (happiness). They tend to choose the option that has the greatest immediate appeal at the cost of long-term happiness such as taking drugs or overeating.

In the fifth paragraph the writer states, that individual often-----

- a. Get carried away by the influence of powerful pressures
- b. Are swayed by peer pressure to change their opinions
- c. Sacrifice long-term benefits in favour of short-term pleasures**
- d. Overtook short term benefits for long-term advantages

Answer: C

Question 5: Read the passage given below and answer questions.

The field of behavioral economics blends ideas from psychology and economics, and it can provide valuable insight that individuals are not behaving in their own best interests.

Behavioral economics provides a framework to understand when and how people make errors. Systematic errors or biases recur predictably in particular circumstances. Lessons from behavioral economics can be used to create environments that nudge people toward wiser decisions and healthier lives.

Behavioral economics emerged against the backdrop of the traditional economic approach known as rational choice model. The rational person is assumed to correctly weigh costs and benefits and calculate the best choices for himself. The rational person is expected to know it's preferences (both present and future) and never flip flow between two contradictory desire's. He has perfect self-control and can restrain impulses that may prevent him from achieving his long-term goals.

Traditional economics uses these assumptions to predict real human behaviour. The standard policy advice that stems from this way of thinking is to give people as many choices as possible, and let them choose the one they like best (with minimum government intervention). Because they knew the preferences better than government officials do. Individuals are in the best position to know what is best for them.

In contrast, behavioral economics shows that actual human beings do not act the way. People have limited cognitive abilities and a great deal of trouble exercising self-control. People often make choices that bear a mixed relationship and do their own preference (happiness). They tend to choose the option that has the greatest immediate appeal at the cost of long-term happiness such as taking drugs or overeating.

Which statement best summarises what the writer is saying in the passage

- a. **People are often confused and irrational in their behaviour when faced with challenges**
- b. People are guided according to their individual personalities in the choices and decisions
- c. People need someone to control them and regulate their public behaviour
- d. People make many wrong choices when they are in difficult situation

Answer: Option A

The field of behavioral economics blends ideas from psychology and economics, and it can provide valuable insight that individuals are not behaving in their own best interests.

Behavioral economics provides a framework to understand when and how people make errors. Systematic errors or biases recur predictably in particular circumstances. Lessons from behavioral economics can be used to create environments that nudge people toward wiser decisions and healthier lives.

Behavioral economics emerged against the backdrop of the traditional economic approach known as rational choice model. The rational person is assumed to correctly weigh costs and benefits and calculate the best choices for himself. The rational person is expected to know it's preferences (both present and future) and never flip flow between two contradictory desire's. He has perfect self-control and can restrain impulses that may prevent him from achieving his long-term goals.

Traditional economics uses these assumptions to predict real human behaviour. The standard policy advice that stems from this way of thinking is to give people as many choices as possible, and let them choose the one they like best (with minimum government intervention). Because they knew the preferences better than government officials do. Individuals are in the best position to know what is best for them.

In contrast, behavioral economics shows that actual human beings do not act the way. People have limited cognitive abilities and a great deal of trouble exercising self-control. People often make choices that bear a mixed relationship and do their own preference (happiness). They tend to choose the option that has the greatest immediate appeal at the cost of long-term happiness such as taking drugs or overeating.

What does the writer call the traditional economics model ?

- a. Systematic error
- b. Mixed preference
- c. **Rational choice**
- d. Standard policy

Answer: C

Question 7: Read the passage given below and answer questions.

The field of behavioral economics blends ideas from psychology and economics, and it can provide valuable insight that individuals are not behaving in their own best interests.

Behavioral economics provides a framework to understand when and how people make errors. Systematic errors or biases recur predictably in particular circumstances. Lessons from behavioral economics can be used to create environments that nudge people toward wiser decisions and healthier lives.

Behavioral economics emerged against the backdrop of the traditional economic approach known as rational choice model. The rational person is assumed to correctly weigh costs and benefits and calculate the best choices for himself. The rational person is expected to know it's preferences (both present and future) and never flip flow between two contradictory desire's. He has perfect self-control and can restrain impulses that may prevent him from achieving his long-term goals.

Traditional economics uses these assumptions to predict real human behaviour. The standard policy advice that stems from this way of thinking is to give people as many choices as possible, and let them choose the one they like best (with minimum government intervention). Because they knew the preferences better than government officials do. Individuals are in the best position to know what is best for them.

In contrast, behavioral economics shows that actual human beings do not act the way. People have limited cognitive abilities and a great deal of trouble exercising self-control. People often make choices that bear a mixed relationship and do their own preference (happiness). They tend to choose the option that has the greatest immediate appeal at the cost of long-term happiness such as taking drugs or overeating.

Which of the following action words does the writer use to describe the implicit purpose of behavioral economics in human behaviour?

- a. To blend
- b. To restrain ‘
- c. To appear
- d. To nudge**

Answer - Option D

Question 8: You are going to read a text about glaciers. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

Since the early 1900s many glaciers around the world have been rapidly melting. _____(1)_____ Specially, since the industrial revolution, carbon dioxide and other greenhouse gas emissions have raised temperatures, even higher in the poles _____ (2) _____. Scientists project that if mis emissions continue to rise unchecked, the Arctic could be ice free in the summer as soon as the year 2040 as ocean and air temperatures continue to rise rapidly.

- A. more than a third of remaining glaciers of the world would have melted by 2030
- B. As a result, glaciers are rapidly melting, calving off into the sea and thread retreating on land
- C. Human activities are at the root of its phenomenon

- (1)- C, (2)- B
- (1)- C, (2)- A
- (1)- B, (2)- C
- (1)- A, (2)- E

Answer: A

Question 9: For the four sentence (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose appropriate sentences for S2 and S3 respectively.

S1: Since the COVID-19 pandemic has disrupted the normal lifestyle of people across the globe, the virtual would be an has come to the rescue.

S2:

S3:

S4: Accordingly, various stakeholders such as government and private organizations are trying their best to assist each other by sprucing up their existing online platforms, apps and providing training to teachers to use this app and platforms to optimum level.

P: Consequently, catering to the needs of all stages of education from pre-primary to university level, online education has emerged as an alternative to ordinary face to face classes.

Q: Amongst many institutions, schools have also shifted their base to virtual platforms to conduct classes online.

R: Apart from upskilling teachers on apps, organising counseling sessions for other stakeholders such as parents and students are some of the important measures taken by these organizations.

Options

- a. PQ
- b. RP
- c. RQ
- d. QP

Answer: D

Question 10: Read the passage given below and answer questions

Man-made fibres are to be distinguished from natural fibres such as silk, cotton, and wool. Natural fibres also consist of polymers (in the case of biologically produced compounds such as cellulose and protein) but they emerge from the textile manufacturing process in a relatively unaltered state. Some man-made fibres too, are derived from naturally occurring polymers. For instance, Rayon and acetate, two of the first man-made fibres ever to be produced, are made of the same cellulose polymers that make up cotton, hemp, flax and the structural fibres of wood. In the case of rayon and acetate, however, the cellulose is required in a radically altered state (usually from wood pulp operations) and is further modified in order to be regenerated into practical cellulose-based fibres. Rayon and Acetate therefore belong to a group of man-made fibres known as regenerated fibres.

Another group of man-made fibres (and by far the larger group) is the synthetic fibres. Synthetic fibres are made of polymers, like polyester, they do not occur naturally but instead that are produced entirely in the chemical plant or laboratory almost always from byproduct of petroleum and natural gas. These polymers include nylon and polyethylene Terephthalate-mentioned above, but they also include many other compounds such as acrylics, the Polyurethanes things and polypropylene. Synthetic fibres can be mass-produced to almost any set of required properties. Millions of tons of Synthetic fibres are produced every year.

About which of the following does the writer say that they were the first man-made fibres?

- a. Cotton and hemp
- b. Acetate and Rayon**
- c. Flax and Rayon
- d. Wool and Silk

Answer: Acetate and Rayon

Question 11: Read the passage given below and answer questions

Man-made fibres are to be distinguished from natural fibres such as silk, cotton, and wool. Natural fibres also consist of polymers (in the case of biologically produced compounds such as cellulose and protein) but they emerge from the textile manufacturing process in a relatively unaltered state. Some man-made fibres too, are derived from naturally occurring polymers. For instance, Rayon and acetate, two of the first man-made fibres ever to be produced, are made of the same cellulose polymers that make up cotton, hemp, flax and the structural fibres of wood. In the case of rayon and acetate, however, the cellulose is required in a radically altered state (usually from wood pulp operations) and is further modified in order to be regenerated into practical cellulose-based fibres. Rayon and Acetate therefore belong to a group of man-made fibres known as regenerated fibres.

Another group of man-made fibres (and by far the larger group) is the synthetic fibres. Synthetic fibres are made of polymers, like polyester, they do not occur naturally but instead that are produced entirely in the chemical plant or laboratory almost always from byproduct of petroleum and natural gas. These polymers include nylon and polyethylene Terephthalate-mentioned above, but they also include many other compounds such as acrylics, the Polyurethanes things and polypropylene. Synthetic fibres can be mass-produced to almost any set of required properties. Millions of tons of Synthetic fibres are produced every year.

What by products are created out of the decimal processing of petroleum or natural gas?

- a. Rayons
- b. Acetate
- c. Cellulose
- d. Polyester

Answer: Polyester

Question 12: Read the passage given below and answer questions

Man-made fibres are to be distinguished from natural fibres such as silk, cotton, and wool. Natural fibres also consist of polymers (in the case of biologically produced compounds such as cellulose and protein)

but they emerge from the textile manufacturing process in a relatively unaltered state. Some man-made fibres too, are derived from naturally occurring polymers. For instance, Rayon and acetate, two of the first man-made fibres ever to be produced, are made of the same cellulose polymers that make up cotton, hemp, flax and the structural fibres of wood. In the case of rayon and acetate, however, the cellulose is required in a radically altered state (usually from wood pulp operations) and is further modified in order to be regenerated into practical cellulose-based fibres. Rayon and Acetate therefore belong to a group of man-made fibres known as regenerated fibres.

Another group of man-made fibres (and by far the larger group) is the synthetic fibres. Synthetic fibres are made of polymers, like polyester, they do not occur naturally but instead that are produced entirely in the chemical plant or laboratory almost always from byproduct of petroleum and natural gas. These polymers include nylon and polyethylene Terephthalate-mentioned above, but they also include many other compounds such as acrylics, the Polyurethanes things and polypropylene. Synthetic fibres can be mass-produced to almost any set of required properties. Millions of tons of Synthetic fibres are produced every year.

The passage is mainly about _____

- a. Different types of man-made fibres
- b. The difference between man-made and natural fibres
- c. The processing of man-made fibres
- d. **The mass-production of man-made fibres**

Answer: The mass-production of man-made fibres

Question 13 : Read the passage given below and answer questions

Man-made fibres are to be distinguished from natural fibres such as silk, cotton, and wool. Natural fibres also consist of polymers (in the case of biologically produced compounds such as cellulose and protein) but they emerge from the textile manufacturing process in a relatively unaltered state. Some man-made fibres too, are derived from naturally occurring polymers. For instance, Rayon and acetate, two of the first man-made fibres ever to be produced, are made of the same cellulose polymers that make up cotton, hemp, flax and the structural fibres of wood. In the case of rayon and acetate, however, the cellulose is required in a radically altered state (usually from wood pulp operations) and is further modified in order to be regenerated into practical cellulose-based fibres. Rayon and Acetate therefore belong to a group of man-made fibres known as regenerated fibres.

Another group of man-made fibres (and by far the larger group) is the synthetic fibres. Synthetic fibres are made of polymers, like polyester, they do not occur naturally but instead that are produced entirely in the chemical plant or laboratory almost always from byproduct of petroleum and natural gas. These polymers include nylon and polyethylene Terephthalate-mentioned above, but they also include many other compounds such as acrylics, the Polyurethanes things and polypropylene. Synthetic fibres can be mass-produced to almost any set of required properties. Millions of tons of Synthetic fibres are produced every year.

Which statement is correct according to the given passage-

- a. Synthetic fibres are the smallest group of man-made fibres
- b. Natural fibres do not contain any polymers
- c. Synthetic fibres are mass produced in millions of tons**
- d. Wool cannot be considered as natural fibres

Answer: Synthetic fibres are mass produced in millions of tons

Question 14: One part of the sentence below may contain a grammatical error. Identify the part if there is an error, or choose 'No error'

The new suspension bridge over the large lake were inaugurated yesterday with great fanfare and illuminations.

- A- The new suspension bridge over the large lake
- B- were inaugurated yesterday**
- C- No error
- D- with great fanfare and illuminations.

Answer- B(was inaugurated yesterday)

Question 15: The following sentence pair can be combined into one better sentence. Choose the option that gives the best combination without changing the meaning.

You did not measure the ingredients correctly. Your cake did not come out well.

- A- If you had measured the ingredients correctly your cake would have not come out well.

- B- Because you had not measured the ingredients correctly your cake would have come out well.
C- As you have measured the ingredients correctly your cake did not come out well.
D- **If you had measured the ingredients correctly your cake would have come out well.**

Answer: D

Question 16: Select the most appropriate option to fill in the blank.

I've achieved a life goal, a dream for myself _____ I had for many years, the winner said.

- A- who
B- whom
C- whose
D- **which**

Answer: D

Question 17: One part of the sentence below may contain a grammatical error. Identify the part if there is an error, or choose 'No error'

While I was working, I have received a call from my sister.

- A- **I have received**
B- a call from my sister
C- While I was working
D- No error

Answer: A

Question 18: Read the following passage and fill in the blanks by selecting the most appropriate option.

The word "SARI" means 'strip of cloth' in Sanskrit. But for the Indian women ---- and a few men --- who have been (1)_____ themselves in silk, cotton, or linen for millennia, these swaths of fabric are more than just simple garments. They are symbols of national pride, ambassadors for (2)_____ design and craftsmanship, and a prime example of the rich differences in India's 29 states.

Blank 1) A- typing B- binding C- draping D- fastening

Blank 2) A- outdated B- fixed C- habitual D- traditional

- A. 1(D), 2 (A)
- B. 1(B), 2 (C)
- C. 1(A), 2 (B)
- D. 1(C), 2 (D)**

Answer: D

Question 19: Fill in the blank with the most appropriate set of words from the options given below.

What did the painter do _____ himself from falling?

When he felt the ladder _____ he grabbed the gutter to save himself from falling.

- a. To save/ begin to slip
- b. To save/ began slipping
- c. For saving/ began to slip**
- d. To save/ beginning to slip

Answer - Option C.

Question 20: Select the most appropriate option to fill in the blank.

Look carefully, can't you _____ the resemblance between the mother and the daughter.

- a. Make off
- b. Make up
- c. Make away
- d. Make out**

Answer: D

Question 21: Read the passage carefully. Then select the words/ options listed A to D with best fill in the blank.

The Moon should give you a feeling of confidence but will affect your temper, and there will be a few mood swings and these in turn will bring (1)_____ self-doubt. However, in the final analysis you should feel hopeful about the future. Optimism breeds success- and attracts (2)_____ employees. Watch out for dictatorial and take evasive action. If you can stay out of their way, then you will end the day much happier.

Blank 1) A- Certainly B- Occasional C- Cowardice D- Many

Blank 2) A- Anger B- Potential C- by law D- Dangerous

- a. 1 (B), 2 (C)
- b. 1 (C), 2 (C)
- c. 1 (B), 2 (B)
- d. 1 (D), 2 (B)

Answer: D

Question 22: Which of the following sentences uses formal language?

- a. Do not stress yourself, we'll figure it out somehow.
- b. This was really cool, keep them coming!
- c. **You are required to submit the documents for due diligence prior to release of the loan.**
- d. This just doesn't work for me, you'll have to make another submission of the design.

Answer - C

Question 23: You are going to read a text about----- Some sentences are missing from the text. Choose the from the list to (A - C) the most appropriate sentence for each gap (1 to 2)for the text. There is one extra sentence that you do not need to use.

Many women in Western society, aware of the power of names to influence identity, are aware that choosing how to identify themselves after marriage can be a significant decision (1)_____. One fascinating survey reveals that a women's choice is likely to reveal a great deal about herself and her relationship with her husband (2)_____. On the other hand, women who keep their birth names put their personal concerns ahead of relationships and social expectations.

A- Women who take their husband's name place the most importance on relationships.

B- Female forms of address influence others perceptions as well.

C- They may follow the tradition of taking their husband's last name, hyphenate their own name and their husband's, or keep their birth name.

- a. 1(C), 2(A)
- b. 1(B), 2(C)
- c. 1(B), 2(A)
- d. 1(A), 2(B)

Answer: A

Logical Ability

Question 1: Nehal, Iqbal, Ronit, Malini and Harbhajan participate in any one of the five activities i.e. Quiz, Singing, Dance, Debate and Mimicry. Ronit participates in Singing. Harbhajan does not participate in Debate and Mimicry. Malini does not participate in Mimicry. Iqbal participates in Quiz. Who participates in Debate?

- a. Cannot be determined
- b. Nehal
- c. Malini
- d. Nehal or Malini

Answer - Malini

There must be a option here “None of these” as all these are false

Question 2: In a certain code $P + Q$ means P is the father of Q, $P - Q$ means P is the wife of Q, $P \times Q$ means P is the daughter of Q and P / Q means P is the brother of Q.

If $F \times G - H + J - K$, which of the following statements may not be true.

- a. K is the son of G
- b. J is the brother of F
- c. F is the sister of K
- d. H is the father of K

Answer - All Options are False

Question 3: Six friends P, Q, R, S, T and U are standing in a queue at a ticket counter. Q is between U and P. S is just before T. R is just before U. U is ahead of S with two persons in between them. Who is standing at the last place in the queue?

- a. P
- b. U
- c. S
- d. T

Answer - Option D (T)

Question 4: All the teaching faculties are notified that the University will provide transport facilities at a minimum cost from the nearby residential areas to the University except those who have been provided with travelling allowance.

Assumptions:

- I. Most of the teaching faculties will travel by University's bus.
 - II. Those teachers who are provided with travelling allowance ignore such notice
- a. Both I and II are implicit
 - b. Only I is implicit
 - c. Only II is implicit
 - d. Neither I nor II is implicit

Answer - Only II is implicit

Question 5: In each of the five pairs of letter clusters, the letters in the second term are a rearranged/transformed form of the letters in the first term in a particular pattern. In which two pairs, the transformation has been done the same way?

- A. FRESH - SRHFE
- B. CLIMB - BMILC

- C. DOUGH - UODHG
- D. MIXER - XRMIE
- E. CRANK - ACRKN

- a. C and D
- b. B and E
- c. A and D
- d. Missing

Answer - C and D

Question 6: Given below is a question followed by two statements, I and II, each containing some information. Decide which of the statement/s is/are sufficient to answer the question.

What amount would Mr Anuj need to pay to the taxi company for traveling a distance of 121 km?

- I. The taxi company charges Rs. 11 per km along with a fixed charge applicable on all journeys.
- II. The taxi company charged Rs. 835 which included the fixed charge for a journey of 35 km.

- a. Both the statements I and II together are necessary
- b. Both the statements I and II together are not sufficient
- c. Statement II alone is sufficient
- d. Statement I alone is sufficient

Answer - Option A

Question 7: Given below is a question followed by two statements, I and II, each containing some information. Decide which of the statement/s is/are sufficient to answer the question.

Eight friends A, B, C, D, E, F, G and H are sitting around a circular table clockwise in the same sequence around a circular table facing the centre at equal distance between them. Who's sitting in the South East direction?

Statements:

- I. C is sitting diagonally opposite to G
- II. B is sitting in West direction

- a. Statement I alone is sufficient
- b. Statement II alone is sufficient
- c. Both the statements I and II together are necessary
- d. Both the statements I and II together are not sufficient

Answer - Statement II alone is sufficient

Question 8: Select the figure that will replace the question mark from the following series:

- 1. 
- 2. 
- 3. 
- 4. 

Answer -

Question 9: Select the option that is related to the third figure in the same way as the second figure is related to the first figure.

1.

2.

3.

4.

Answer - Option 1.

Question 10. A paper is folded and cut as shown below. How will it appear when unfolded?

4.

Answer - Option 4

Question 11: Read the following information carefully and answer the given questions.

A public charitable trust desires to select a Homeopathy doctor for its hospital in a rural area based on the following criteria

The candidate must be-

- (i). holding BHMS degree with minimum 60% marks
- (ii) having 5 years of experience of practice in a rural area
- (iii) having a good knowledge of the local language.

In case of applicant who satisfies all other criteria except-

- a. at (i) above, but has my minimum 50% marks at BHMS and has completed MD with 55% his/her cases to be referred to the chief Medical Officer
- b. at (ii) above, but has 3 years full time experience of practice in an urban or rural hospital but spent at least 5 years in a rural area, his/her case is to be referred to the Secretary.
- c. at (iii) above, but has working knowledge of Hindi, his/ her case to be referred to Hospital Management

Based on these criteria and information provided decide the course of action.

Jasvinder has completed BHMS with a minimum of 52% marks and also has completed MD with a minimum of 55% marks. He has practiced for six years in a remote village. He has a good knowledge of Hindi as well as the local language. What decision would be taken for him?

- a. Refer to the hospital management
- b. he would be selected
- c. refer to the secretary
- d. refer to chief medical officer

Answer: Refer to Chief Medical Officer.

Question 12: Three statements are given followed by 4 conclusions numbered I, II, III and IV .Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statement

All organizers are participants
Some organizers are managers.
All managers are females.

Conclusion

- I. Some participants are managers.
- II. Some females are participants.
- III. No female is an organizer
- IV. All participants are female

Options

- a. Only conclusion II, III and IV follows
- b. Only conclusion I and IV
- c. Only conclusion I and II and III follows
- d. Only conclusion I and II follow

Answer - Only conclusion I and II follow

Question 13: Given below is a question followed by two statements, I and II, each containing some information. Decide which of the statements is/ are sufficient to answer the question.

Is the expression “ $B > E$ ” correct?

- I. $B = C > D > F = M$
- II. $H = M > T > E = P$

- both statements I and II together are necessary.
- statement II alone is sufficient
- both the statements I and II together are not sufficient.
- statement I alone is sufficient

Answer -both statements I and II together are necessary.

Options for the following questions are incorrect, as the ratio given in both option A and option C are incorrect

Question 14: The number of students studying in six different disciplines of a college are given below. Study the given data and answer the questions that follow

Number of students in different disciplines

Disciplines	Total	Boys	Girls
Science	1020	680	340
Social Science	2380	1700	680
Humanities	1700	510	1190
Law	680	408	272
Management	1700	1020	680
Commerce	2040	1190	850
Total	9520	5508	4012

Which of the following pairs of the name of the discipline and its ratio of boys to girls is not correct?

- a. Social Science, 5:2
- b. Law, 3:2
- c. Commerce, 7:3
- d. Science, 2:1

Answer: -Social Science, 5:2, Commerce 7:3,

Question 15: A statement is followed by three courses of action numbered I, II and III. Assuming everything in the statement to be true, decide which of the suggested courses of action (a decision to be taken for the follow-up/ improvement in regard to the problem) logically follow(s) for pursuing.

Statement:

The management of the organisation has decided to give free lunch from next month to all employees. This PDF is the sole property of PrepInsta Technologies, we have just copied the content from them.

Courses of Action-

- I. The organization would appoint Chefs who would prepare healthy and tasty food for the staff
- II. The pantry facilities have to be checked and new purchases have to be made
- III. Funds will have to be allocated to facilitate the new pantry facilities.

- All of I, II and III follow
- Only III follows
- Only I and II follows
- Only I follows

Answer: All of I, II and III follow

Question 16: Question: The following are the criteria of recruitment for the post of Manager at an organization.

The candidate must--

- a. have completed graduation from any stream with more than 70%
- b. be less than 30 years of age as on June 1, 2020

- c. have completed a PG diploma in creative writing with at least 75% marks

However, if the candidate fulfills all the above criteria except

- d. at (b), but has done post graduation in journalism, his/ her case to be referred to the vice president.
- e. at (c) , but have secured more than 85% marks in graduation in his/her case to be referred to the Senior Creative Manager.

Natasha completed her graduation from commerce stream with 70% marks. She completed her post graduation in journalism in 2018 at the age of 29 years. She has completed a PG diploma in creative writing with 75% marks.

- Her case is to be referred to the vice president
- She would be selected
- Her case is to be referred to the Senior Creative Manager
- She would not be selected

Answer: She would not be selected

Question 17: Consider the venn diagram given below:

The number in the Venn diagram indicates the number of persons who can speak various languages in a city. The diagram is drawn after surveying 200 persons in a population of 15,000. How many people can be expected to speak just one language?

Options.

- a. 8400
- b. 8750
- c. 9600
- d. 9450

Answer - Option D

Question 18: Consider the venn diagram given below:

The number in the Venn diagram indicates the number of persons who can speak various languages in a city. The diagram is drawn after surveying 200 persons in a population of 15,000. How many people can be expected to speak at least two languages?

Options

- a. 4950

- b. 2900
- c. 5200
- d. 2400

Answer - 5550

Question 19 : In the following diagram, the triangle stands for 'males' the circle stands for the 'doctors' rectangle stands for 'government employed' the hexagon stands for 'corona warriors'. The numbers in different segments show the number of persons of that segment. The following PDF is made by PrepInsta, we are copying the content from them.

How many government employed doctors are either Corona warriors or males or both?

- a. 73
- b. 22
- c. 35
- d. 38

Answer : 73

Question 20 : A paper is folded and cut as shown below. How will it appear when unfolded?

Options.

Answer - Option C

Question 21: Two statements are given followed by Three conclusions numbered I, II, and III. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statements:

No cylinder is a drum.

All balls are cylinders.

Conclusions:

I- No drum is a cylinder.

II- Some cylinders are balls.

III- No ball is drum.

- a. Only conclusion I and III follow.
- b. Only conclusion I and II follow.
- c. All of the conclusions follow.
- d. Only conclusion II and III follow.

Answer: All of the conclusions follow.

Question 22: In a certain code,

A%B means A is the husband of B,

A&B means A is the son of B,

A#B means A is the wife of B,

A@B means A is the daughter of B,

A\$B means A is the sister of B

If Q \$ M \$ P @ C # H & R % Z then which of the following statements is NOT correct?

- a. H is father of Q
- b. Z is mother of H
- c. Z is mother-in-law of C
- d. R is maternal grandfather of Q

Answer: R is maternal grandfather of Q

The data is given wrong in this question, according to the question A and G both play Congo

Question 23: Seven friends A, B, C, D, E, F, and G play one of the seven musical instruments i.e. Guitar, Flute, Dholak, Congo, Piano, Drum, and Violin. E does not play Congo. A, E and G do not play violin, flute and guitar. F plays piano, D plays drum. Who plays Congo?

- a. G
- b. A
- c. C
- d. B

Question 24: A statement is followed by three assumptions numbered I, II, and III. Consider the statement and decide which of the given assumption(s) is/are implicit in the statement.

Statement:

Happiness of a person does not depend only on his wealth.

Assumptions:

I- Overall well being is also important which contributes to happiness.

II- Wealth alone does not provide happiness.

III- The main objective of most of the persons is just acquiring more wealth.

- a. Only I and II are implicit.
- b. Only I is implicit.
- c. Only II is implicit.
- d. Only III is implicit.

Answer: Option C

Question 25: Which is the wrong term in the following series?

RSPH, UWUN, XAZT, AEEZ, DIKG

- a. AEEZ
- b. DIKG
- c. RSPH

d. UWUN

Answer: DIKG

Question 26: The following are the criteria of recruitment for the post of Technical Assistants at an organization.

The candidate must:

A- have completed B.Tech in Electrical Engineering with more than 80% marks.

B- be willing to execute a bond of not leaving the job at least for two years.

C- have secured more than 85% marks in the written test and more than 70% marks in the Personal interview.

D- be willing to relocate to the head office located at New Delhi.

However, if the candidate fulfils all the above criteria except

E- at (B), but has at least two years work experience as Technical Assistant, his/her case is to be referred to the General Manager.

F- at (C), but has also completed M.tech in Electrical Engineering, his/her case is to be referred to the Head (Operations).

Preksha has completed B.tech and M.tech in Electrical Engineering with 82% marks in both the examinations. She has secured 72% marks in Personal Interview and 88% marks in written test. She is willing to relocate to the head office at New Delhi. She is willing to execute a bond of not leaving the job for one year. She has got three years working experience as Technical Assistant.

- a. The candidate would be recruited.
- b. Her case is to be referred to the Head (Operations)
- c. Her case is to be referred to the General Manager.
- d. The candidate would not be recruited.

Answer : Option C

Question 27: Six friends P, Q, R, S, T, and U are in a group.

- I. Q and R are shorter than U but heavier than P.
- II. S is heavier than Q and taller than R.
- III. T is shorter than S but taller than U.

- IV. U is heavier than S.
V. P is shorter than T but taller than U.

Who is fourth from the top when they are arranged in the descending order of their heights in the group?

- a. U
- b. S
- c. P
- d. T

Answer - Option A

Question 28: A cube is made by following the given sheet, in the cube so formed, which pair of letters will be on the opposite faces.

- a. N & A
- b. P & Y
- c. M & Y
- d. E & P

Question 29: Which of the following patterns of the boxes can be formed when the sheet given below is folded? (the numbers/symbols are shown to indicate the sides only)

- a. Only 1, 2, and 4
- b. Only 1 and 2
- c. Only 2 and 4
- d. Only 2, 3, and 4

Question 30 : In the following, the pentagon stands for ‘athletes’, the circle stands for ‘married persons’, the rectangle stands for ‘person who exercises regularly’, the square stands for ‘morning walkers’. The different segments are represented through different letters inside the segment.

Which letter represents married athletes who are morning walkers also but do not exercise regularly?

- a. K
- b. D
- c. H
- d. F

Answer : F

Programming Logic

Question 1- What is the function of rewind()?

- A. Setting file pointer at the beginning of the file.
- B. Setting file pointer at the end of file
- C. Setting file pointer anywhere in file
- D. Setting file pointer at the beginning of line

Answer- Option A

Explanation - In the C Programming Language, the **rewind function** sets the file position to the beginning of the file for the stream pointed to by stream. It also clears the error and end-of-file indicators for stream.

Question 2- Select the precise options for the below scenarios-

Expression 1: `cout << end;`

Expression 2: `cout << "\n" << flush;`

- 1. Both expression will give different results
- 2. Both expression will give same results
- 3. Second expression will not insert new line
- 4. First expression will not insert new line

Answer- Option A

The first expression will print end in the same line

And the second expression will print flush in the new line

Question 3- Construct Post Order Traversal for the constructed tree with the given in-order and preorder traversals

In-order: 9 7 10 6 8

Pre-order: 6 7 9 10 8

1. 9 10 7 8 6
2. 8 9 10 7 6
3. 9 8 10 7 6
4. 9 7 6 10 8

Answer- Option A: 9 10 7 8 6

Question 4- Consider the following variables declarations:

float num1;

short num2;

long num3;

What is the data type of $\text{num1} - \text{num3} / \text{num2}$?

1. float
2. None of the above
3. short
4. double

Answer- Option A

The result of $\text{num3}/\text{num2}$ will be in long(integer), and when that result will be subtracted from num1 which is a float data, the resulting answer will be in decimal and hence the correct answer will be option A

Question 5- What will be the output of the following program?

```
import java.util.*;
public class Main
{
    public static void main(String[] args)
    {
```

ArrayList<Integer>TempArrayList = newArrayList<Integer>();
TempArrayList.add(30);
TempArrayList.add(20);
TempArrayList.add(10);
TempArrayList.add(40);
TempArrayList.add(50);

Collection.sort(TempArrayList, Collection reverseOrder{});
Collection.sort(TempArrayList, Collection reverseOrder{});

System.out.println(TempArrayList);
}
}
```

Answer: [50, 40, 30, 20, 10]

Question 6- float(*p)[5];
Here , p is_____.

1. Pointer
2. Array of pointer
3. Float
4. Pointers to array of float

Answer- Pointer to array of float

Question7- The type of software testing you can do when you have both the source code and the executable code in hand is called as

- A. Black box testing
- B. Red box testing
- C. White box testing
- D. Blue box testing.

Answer : Option C

Question 8- Spot the error in the given code. If there is no error, select the most appropriate option

```
class Employee
{
Private
Int UserId;
Public
Employee() UserId(0) { }           // _____ line 8
Friend int displayUser(Employee);
};
Int displayUser(Employee emp)
{
Emp userId += 12;
Return emp UserId;
}
Int main()
{
Employee e;
Cout << "Employee UserId: " << displayUser(e) << end; // _____ line 19.
Return 0;
}
```

1. Compilation Error
2. Employee UserId 12
3. Error at line 9
4. Error at line 8

Answer: Employee UserId 12

Question 9- What will be the output of the below program?

```
public class Main
{
    public static void main(String[] args)
    {
        int x=10,y,z;
```

```
        z=y=x;
        y-= x--;
        z-= --x;
        x=---x - x--;
        System.out.println(x+"-"+y+"-"+z);
    }
}
```

Answer- 8-0-2

Question 10- What will be the output of the following program

abstract class Shape

```
{
    public abstract void Disp();
}
```

class Triangle extends Shape

```
{
    public final void Disp()
    {
        System.out.println("Triangle");
    }
}
```

class Rectangle extends Triangle

```
{
    public void Disp()
    {
        System.out.println("It's Rectangle");
    }
}
```

public class Main

```
{
    public static void main(String[] args)
    {
        Rectangle obj = new Rectangle();
        obj.Disp();
    }
}
```

```
}  
}
```

1. Runtime Error
2. Triangle
3. Compile-time Error
4. It's Rectangle

Answer- Runtime Error

Coding

Question-1

FULLY AUTOMATIC VENDING MACHINE

dispenses your cuppa on just press of button. A vending machine can serve range of products as follows:
Coffee

1. Espresso Coffee
2. Cappuccino Coffee
3. Latte Coffee

Tea

1. Plain Tea
2. Assam Tea
3. Ginger Tea
4. Cardamom Tea
5. Masala Tea
6. Lemon Tea
7. Green Tea
8. Organic Darjeeling Tea

Soups

1. Hot and Sour Soup
2. Veg Corn Soup
3. Tomato Soup
4. Spicy Tomato Soup

Beverages

1. Hot Chocolate Drink
2. Badam Drink
3. Badam-Pista Drink

Write a program to take input for main menu & sub menu and display the name of sub menu selected in the following format (enter the first letter to select main menu):

Welcome to CCD

Enjoy your <name of sub menu>

Example 1:

Input

c
1

Output

Welcome to CCD!

Enjoy your Espresso Coffee!

Example 2:

Input

t
9

Output

INVALID OUTPUT!

Code in C

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    char c[3][20]={"Espresso Coffee","Cappuccino Coffee","Latte Coffee"};
```

```
    char t[8][30]={"Plain Tea","Assam Tea","Ginger Tea","Cardamom Tea","Masala Tea","Lemon Tea","Green Tea","Organic Darjeeling Tea"};
```

```
    char s[4][20]={"Hot and Sour Soup","Veg Corn Soup","Tomato Soup","Spicy Tomato Soup"};
```

```
    char b[3][20]={"Hot Chocolate Drink","Badam Drink","Badam-Pista Drink"};
```

```
    char str[]="Welcome to CCD!\nEnjoy your ";
```

```
    char ch;
```

```
    int item, i;
```

```
    scanf("%c",&ch);
```

```
scanf("%d",&item);
if(ch=='c')
{
for(i=0; i<3; i++)
{
if(item==i+1)
{
printf("Welcome to CCD!\nEnjoy your %s!",c[i]);
break;
}
}
if(i==3)
{
printf("INVALID OPTION!");
}
}
else if(ch=='t')
{
for(i=0; i<8; i++)
{
if(item==i+1)
{
printf("Welcome to CCD!\nEnjoy your %s!",t[i]);
break;
}
}
if(i==8)
{
printf("INVALID OPTION!");
}
}
else if(ch=='s')
{
for(i=0; i<4; i++)

Numerical Ability

Question 1- If there is a 45% increase in amount in 3 years at simple interest, what will be the compound interest on 12000 at the same rate after 2 years?

- A. 15600
- B. 1800
- C. 3600
- D. 3870**

Answer: Option D

Question 2- What is the mean proportional between the fourth proportionals of (0.03, 5, 0.006) and (0.81, 29.4, 5.4)?

- A. 1.4**
- B. 14
- C. 2.8
- D. 0.28

Answer: Option A

Question 3- If A and B can do a piece of work in 60 days, B and C can do it in 100 days, A and C can do it in 75 days. In how many days can B alone do it?

- A. 200 days
- B. 150 days**
- C. 100 days
- D. 75 days

Answer: Option B

Question 4: Sarita wants to give a stationary kit, which includes a pencil, an eraser and a sharpener, to some kids in her village. She went to the wholesaler to purchase these items. The seller sells pencils in

packing of 12, erasers in packing of 18, and sharpener in packaging of 10. She purchases the minimum no. of packets of pencils, sharpener, and erasers. So that a fix number of kits can be prepared, without any item being unused or short. What is the no. of packets of pencils purchased by her?

- A. 10
- B. 12
- C. 15**
- D. 18

Answer: Option C

Question 5: A shopkeeper who incurred a loss in a certain deal, finds that the difference between the selling and cost price is $16\frac{2}{3}\%$ of their sum. By what percentage should the selling price have been increased, so that it would have been a break-even deal?

- A. 24
- B. 36**
- C. 40
- D. 25

Answer: Option B

Question 6: A can do a job in 26 days. B is 30% more efficient than A. How many days can B alone do the same job?

- A. 20 days**
- B. 24 days
- C. 18 days
- D. 23 days

Answer: Option A

Question 7: If the real positive fourth square root of $(28+16\sqrt{3})$ is divided by $(2+\sqrt{3})$ and the result is expressed as $(a+b\sqrt{3})$ with a & b both being integers then $(4a+3b)$ is equal to

- A. -3
- B. 1
- C. -1**
- D. 2

Answer: Option C

Question 8: If the mean of the data 5,7,10,14,x,25,32,19 is x, then what is the value of x?

- a. 14.5
- b. 15
- c. 14
- d. 16**

Answer: Option D

Question 9: What is the sum (in Rs) which when divided among A,B,C,D in the proportion 2:3:5:8 provides Rs 8420 less to D than what it provides to him when the proportion is

$$\frac{1}{2} : \frac{1}{3} : \frac{1}{5} : \frac{1}{8}?$$

- a. 17540
- b. 25020**
- c. 12510
- d. 27430

Answer: Option B

Question 10: When an owner sells his house for Rs.26400, he loses 20%. At what price should he have sold the house in order to get the profit of 12%?

- a. Rs 36000
- b. Rs 33000
- c. Rs 35000
- d. Rs 36960**

Answer: Option D

Question 11: If 20% of $(a+b) = 25\%$ of $(a-b)$, what percent of a is b?

- a. $11\frac{5}{9}$
- b. $11\frac{1}{9}$
- c. $11\frac{7}{9}$
- d. $11\frac{2}{9}$

Answer: Option B

Question 12: If the same simple interest gets paid annually on each of three different sum of money in schemes providing interest rates of 10, 12 and 15 percent respectively per annum. What is the equivalent rate of interest on the total sum?

- A. 12
- B. 12.5
- C. 12.67
- D. 12.33

Answer : Option A

Question 13: If the curved surface area of a cylinder is 1012 cm^2 and height of the cylinder is 23 cm, what is the volume of the cylinder?

- A. 3542 cm^2
- B. 3602 cm^2
- C. 3502 cm^2
- D. 3712 cm^2

Answer: Option A

Question 14: What is the standard Deviation (correct upto two decimal places) of the numbers: 21334, 21335, 21336, 21337 and 21338?

- A. 1.41
- B. 21336.41
- C. 21338
- D. 2

Answer: Option A

Question 15: The volumes of three containers are in the ratio 2:3:4. They are full of mixtures of milk and water in the ratios 3:1 , 3:2 , 4:3 respectively. When the contents of all these three containers are poured into a fourth container, the ratio of milk and water in the fourth container is _____.

- A. 121:249
- B. 121:239
- C. **391:239**
- D. 391:249

Answer: Option C

Question 16: If $\sqrt{1 + \frac{31}{225}} = 1 + \frac{x}{15}$ then the value of x is

- A. **1**
- B. 15
- C. 2
- D. 16

Answer: Option A

Question 17: If $5\sqrt{5} \times 625 \times \sqrt[4]{5} = 5^{n+\frac{1}{5}}$, what will be the value of n?

- A. $7\frac{11}{20}$
- B. $5\frac{11}{20}$
- C. $6\frac{11}{20}$
- D. $4\frac{11}{20}$

Answer: Option B

Question 18: A bus travels the first one-fourth distance at a speed 15kmph, the second one-fourth distance at a speed of 20 kmph, the third one-fourth distance at a speed of 30kmph and the last one-fourth distance at the speed of 40kmph. The average speed of the bus for the whole journey is :

- a. 26.250 kmph
- b. 34.056 kmph
- c. 29.027 kmph
- d. 22.857 kmph

Answer : Option A

Question 19: The daily sale of wheat flour (in kgs) in a certain grocery shop is given below:

Mon	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
47	15	37	20	38	42	18

What is the Standard Deviation of the given data?

- A. 13.4
- B. 12.0**
- C. 14.4
- D. 13.2

Answer: Option B

Question 20: If mean of 29 observations is 33 and on adding one more observation the new mean becomes 34. What is the value of 30th observation?

- A. 63**
- B. 68
- C. 55
- D. 34

Answer: Option A

Question 21: If 6 pens and 7 pencils together costs Rs.90, while 5 pens and 6 pencils costs Rs.76, What will be the cost of each pen?

- a. Rs. 10
- b. Rs. 12
- c. Rs. 8**
- d. Rs. 6

Answer: Option C

Question 22: The following table gives the expenditure of a company (in lakh rupees per annum) over the given years 2015 to 2019?

Expenditure/year	Salary	Transport	Bonus	Taxes	Advertisement
2015	250	97	4	80	4.1
2016	200	113	4.25	70	3.0
2017	270	95	4.5	85	8.1
2018	300	103	4.5	79	7.6
2019	325	92	5	75	9.2

The total amount incurred on advertisement by the company during the period 2015 to 2019 is what percent of the total amount of transport incurred during this period?

- A. 3.5%
- B. 3.75%
- C. 4%
- D. 6.4%**

Answer: Option D

Question 23: What is the area (in cm^2) of a trapezium whose parallel sides are 12 cm and 16 cm and whose height is equal to that of an equilateral triangle of side $\sqrt{3}$ cm?

- A. 24.5
- B. 17.5
- C. 21**
- D. 28

Answer : Option C

Question 24: The following bar graph shows the production of iron by a company (in 100000 tonnes) over the years.

What is the percentage increase in the production of iron in 2015 compared to that in 2011?

- A. 143.127%
- B. 57.142%**
- C. 50%
- D. 47.125%

Answer: Option B

Verbal Ability

Question 1- You are going to read a text about digitalization and technology. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2). There is one extra sentence that you do not need to use.

Digitalization is uplifting our country towards advancement _____ (1)_____. With digitalization government services are reaching citizens in the remotest of locations. _____ (2)_____. Even pregnant working women and parents are receiving informative messages on health through the Kilikari mobile application.

Option

- It is helping to fill gaps which crept up due to lack of physical infrastructure.
- For instance, farmers are receiving weather updates on their phones, which is helping them to plan their agricultural activities.
- Does digitalization and technology, are playing a crucial role in ensuring that services reach all citizens

- 1(A), (2)C
- 1(C), (2)A
- **1(A), (2)B**
- 1(B), (2)C

Answer: C

Question 2: In the part of the sentence below may contain an error, Identify the error. If there is no error choose “No error”

Since sunrise to sunset/ my grandmother would sit by her wheels, spinning and reciting prayers.

Options

- since sunrise to sunset**
- my grandmother would sit by her wheel,
- no error
- spinning and reciting prayers

Answer: A (from sunrise to sunset)

Question 3: Read the passage given below

Terming India's winning of a non-permanent seat of the UN Security Council one of its "best performances" ever, the Union government said the majority of votes it received in the General Assembly demonstrated the "goodwill" the country enjoyed. India will promote multilateral solutions for the COVID-19 crisis and enhance global action against terrorism, among its priorities, during the two-year term beginning January 2021, it said. In the election decided overnight on Wednesday, India secured 184 of the 192 votes, far in excess of the 128, or two-thirds minimum, it needed to be confirmed.

"The strong support by almost the entire U.N. membership for India's election demonstrates the goodwill that India enjoys in the U.N. and the confidence that the international community has reposed in India's capability to contribute to the work of the Council," said MEA Secretary Vikas Swarup on Thursday.

India's term on the 15-member Council will be its eighth. Briefing the media about the win, Mr. Swarup said India would be the "voice for all those who are not represented in the Council" during its tenure. He also thanked the government of Afghanistan, which had allowed India to contest unopposed by giving up its bid for the seat in favour of India in 2013.

On the basis of your understanding the passage and answer the questions below by choosing the best option.

India's overwhelming success at the recent General Assembly elections of the UN security council for a non-permanent seat was a result of the tremendous goodwill of a number of nations. Which of the following sentences does not represent the above thought?

- a. The strong support by almost the entire UN membership for India's election demonstrates the Goodwill that India enjoys in the UN.
- b. The union government said the majority of votes it received in a general assembly demonstrated the goodwill the country enjoyed.
- c. The confidence that the international community has reposed in India's capability to contribute to the work of the council.
- d. Briefing the media about the win, Mr swarup said India would be the "voice for all those who are not represented in the council" during its tenure.

Answer: The confidence that the international community has reposed in India's capability to contribute to the work of the council.

Question 4: Read the passage given below

Terming India's winning of a non-permanent seat of the UN Security Council one of its "best performances" ever, the Union government said the majority of votes it received in the General Assembly demonstrated the "goodwill" the country enjoyed. India will promote multilateral solutions for the COVID-19 crisis and enhance global action against terrorism, among its priorities, during the two-year term beginning January 2021, it said. In the election decided overnight on Wednesday, India secured 184 of the 192 votes, far in excess of the 128, or two-thirds minimum, it needed to be confirmed.

"The strong support by almost the entire U.N. membership for India's election demonstrates the goodwill that India enjoys in the U.N. and the confidence that the international community has reposed in India's capability to contribute to the work of the Council," said MEA Secretary Vikas Swarup on Thursday.

India's term on the 15-member Council will be its eighth. Briefing the media about the win, Mr. Swarup said India would be the "voice for all those who are not represented in the Council" during its tenure. He also thanked the government of Afghanistan, which had allowed India to contest unopposed by giving up its bid for the seat in favour of India in 2013.

On the basis of your understanding the passage and answer the questions below by choosing the best option.

What was the total amount of votes which India received in the election of non-permanent seat of the U.N Security Council

- a. Two-thirds of 184
- b. 192
- c. 128
- d. 184

Answer: 184

Question 5: Read the passage given below

Terming India's winning of a non-permanent seat of the UN Security Council one of its "best performances" ever, the Union government said the majority of votes it received in the General Assembly demonstrated the "goodwill" the country enjoyed. India will promote multilateral solutions

for the COVID-19 crisis and enhance global action against terrorism, among its priorities, during the two-year term beginning January 2021, it said. In the election decided overnight on Wednesday, India secured 184 of the 192 votes, far in excess of the 128, or two-thirds minimum, it needed to be confirmed.

“The strong support by almost the entire U.N. membership for India’s election demonstrates the goodwill that India enjoys in the U.N. and the confidence that the international community has reposed in India’s capability to contribute to the work of the Council,” said MEA Secretary Vikas Swarup on Thursday.

India’s term on the 15-member Council will be its eighth. Briefing the media about the win, Mr. Swarup said India would be the “voice for all those who are not represented in the Council” during its tenure. He also thanked the government of Afghanistan, which had allowed India to contest unopposed by giving up its bid for the seat in favour of India in 2013.

On the basis of your understanding the passage and answer the questions below by choosing the best option.

What will be India's priorities during its two year term in the Security Council?

- a. To be a voice for those represented at the Security Council
- b. To further strengthen the confidence reposed in its abilities by the international community.
- c. To be the ground for the Government of Afghanistan to make way for India to stand unopposed in 2013.
- d. To promote multilateral solutions for Covid-19 crisis and enhance action against global terrorism.

Answer: To promote multilateral solutions for Covid-19 crisis and enhance action against global terrorism.

Question 6: Read the passage given below

Terming India’s winning of a non-permanent seat of the UN Security Council one of its “best performances” ever, the Union government said the majority of votes it received in the General Assembly demonstrated the “goodwill” the country enjoyed. India will promote multilateral solutions for the COVID-19 crisis and enhance global action against terrorism, among its priorities, during the two-year term beginning January 2021, it said. In the election decided overnight on Wednesday, India

secured 184 of the 192 votes, far in excess of the 128, or two-thirds minimum, it needed to be confirmed.

“The strong support by almost the entire U.N. membership for India’s election demonstrates the goodwill that India enjoys in the U.N. and the confidence that the international community has reposed in India’s capability to contribute to the work of the Council,” said MEA Secretary Vikas Swarup on Thursday.

India’s term on the 15-member Council will be its eighth. Briefing the media about the win, Mr. Swarup said India would be the “voice for all those who are not represented in the Council” during its tenure. He also thanked the government of Afghanistan, which had allowed India to contest unopposed by giving up its bid for the seat in favour of India in 2013.

On the basis of your understanding the passage and answer the questions below by choosing the best option.

According to the MEA secretary, Mr Vikas swarup, why does India need to thank Afghanistan for their success?

- a. Afghanistan is India's biggest supporter in the UN security Council
- b. Afghanistan camping in favour of India
- c. Afghanistan voted for India so India could win. .
- d. Afghanistan give up its bid for a seat in India has favour in 2013

Answer: Afghanistan give up its bid for a seat in India has favour in 2013

Question 7: Fill in the blanks with the most appropriate pair of words from the options given below.

There are many jobs where workers deal with _____ situations Therefore, companies must ensure the proper safety _____ are in place to protect the workers from any injury.

- a. hazardous/gears
- b. hazardous/measures
- c. hazards/measures
- d. hazarding/precaution.

Answer: Hazardous and Measures

Question 8: For the four sentences S1 to S4 in the paragraph below, sentences S1 and S4 are given. From the options P Q and R choose appropriate sentences from S2 and S3 appropriately.

S1: The past is not dead and static, it is alive and dynamic and is involved in determining the quality of our present between and the prospects of our future.

S2:

S3:

S4: I, therefore pledge myself to loyalty of our past culture from wheresoever it may have come and by whomsoever it may have been contributing(Dr Radhakrishnan)

P: The process of the constant renewal is, indeed the process of growth of national culture and national character

Q: It is the business of education, as I see it to minister this constant renewal and I may be forgiven the presumption that me my choice to the high office has mainly if not entirely account of my long association with the education of my people

R: The work on one's self is to follow the urge towards more development as a free person and under self imposed discipline, which alone can render the development possible.

Option

- a. RQ
- b. QR
- c. PQ
- d. **PR**

Question 9: Did you remember _____ seats for the theatre tomorrow?

Yes, I have the tickets here. Do you mind _____ it with you? I fear I may lose them.

- a. booking/ to keep
- b. To book/ keeping
- c. To have booked/ keeping
- d. booked/ to keep

Answer: Option A

Question 10: Read the passage and answer the question

Rosio Sanchez, a Mexican American chef who lives in Copenhagen, makes the best tortillas in Scandinavia. That, she admits, isn't necessarily saying much -- like laying claim to the best pizza in Indonesia, "It was so much worse" she said, describing the state of Mexican food when she arrived in 2010 to work as the pastry chef in the celebrated restaurant Noma. "Imagine the worst Tex-Mex food in America and imagine that being passed on like a game of telephone, by people who have no idea what real Mexican food is" that is beginning to change, and not only in in Copenhagen, Where Mrs Sanchez has opened a Taqueria with freshly ground hand pressed corn tortillas. It goes far beyond tacos and tortillas, though Mexican cuisine has made the leap to the global stage of fine dining.

Chefs are making house-cured chorizo in Toronto, and Michelin-starred chilaquiles at Punto MX in Madrid. Last week, the Houston chef Hugo Ortega, who began his working life as a shoeshine boy in Mexico City, received the James Beard Foundation's award for best chef in his region: a first for a Mexico-born chef.

"Everywhere, I see a new respect for Mexican culture," said Martha Ortiz, a celebrity chef in Mexico who is opening a warmly elegant restaurant, Ella Canta, in the InterContinental London Park Lane hotel this summer. Ten years ago, when a taco in London might easily have contained canned baked beans, the idea of a Mexican restaurant in a posh hotel would have been mystifying.

"Our traditional food has always had a high value at home, and there is a lot of respect for the women who produce it," she said. "But for people internationally to be excited about it and willing to pay for it? That is new."

Which of the following is NOT a Mexican food item?

- a. Chorizo
- b. Tortillas

- c. Chilaquiles
- d. Taqueria

Answer: D Taqueria

Question 11: Read the passage and answer the question

Rosio Sanchez, a Mexican American chef who lives in Copenhagen, makes the best tortillas in Scandinavia. That, she admits, isn't necessarily saying much -- like laying claim to the best pizza in Indonesia, "It was so much worse" she said, describing the state of Mexican food when she arrived in 2010 to work as the pastry chef in the celebrated restaurant Noma. "Imagine the worst Tex-Mex food in America and imagine that being passed on like a game of telephone, by people who have no idea what real Mexican food is" that is beginning to change, and not only in in Copenhagen, Where Mrs Sanchez has opened a Taqueria with freshly ground hand pressed corn tortillas.

It goes far beyond tacos and tortillas, though Mexican cuisine has made the leap to the global stage of fine dining.

Chefs are making house-cured chorizo in Toronto, and Michelin-starred chilaquiles at Punto MX in Madrid. Last week, the Houston chef Hugo Ortega, who began his working life as a shoeshine boy in Mexico City, received the James Beard Foundation's award for best chef in his region: a first for a Mexico-born chef.

"Everywhere, I see a new respect for Mexican culture," said Martha Ortiz, a celebrity chef in Mexico who is opening a warmly elegant restaurant, Ella Canta, in the InterContinental London Park Lane hotel this summer. Ten years ago, when a taco in London might easily have contained canned baked beans, the idea of a Mexican restaurant in a posh hotel would have been mystifying.

"Our traditional food has always had a high value at home, and there is a lot of respect for the women who produce it," she said. "But for people internationally to be excited about it and willing to pay for it? That is new."

What is the main idea of the passage?

- a. Mexican restaurants are opening in different countries
- b. There is more to Mexican food than just tacos and tortillas
- c. There are celebrity chefs in Mexican cuisine now-a-days
- d. Mexican food is been globally appreciated now

Answer: Mexican food is been globally appreciated now

Question 12: You are going to read a text about motivation. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence. There is an extra sentence you need not to use.

Motivation is the desire to act in the service of a goal. It is the crucial element in setting and attaining one's objectives--- and research shows that people can have many sources, and often people have multiple motives for engaging in any behaviour. (1)_____ Motivation can also be intrinsic- it is a desire to improve at a certain activity. (2)_____

A- Everyone feels motivated or demotivated of willpower at times.

B- Intrinsic motivation tends to push people more forcefully, and the accomplishments are more fulfilling.

C- Motivation might be extrinsic, whereby a person is inspired by outside forces-- other peoples or events that transpire.

- a. 1(B), 2(A)
- b. 1(C), 2(B)**
- c. 1(A), 2(B)
- d. 1(A), 2(C)

Answer: B

Question 13: Self-styled visionaries and people particularly fond of their pajamas have for decades been arguing that a lot of work done in large shared offices could be better done at home. With Covid-19 their (1)_____ were put to the test in a huge if not randomized trial. The preliminary results are now in. Yes, a lot of work can be done at home; and what is more, many people seem to (2)_____ doing it there.

Blank 1) A- mindsets B- ideas C- philosophies D- designs

Blank 2) A- desire B- select C-prove D-prefer

- a. 1(D), 2(C)
- b. 1(C), 2(A)
- c. 1(B), 2(D)**

d. 1(C), 2(A)

Answer: C

Question 14: Fill in the blanks with the most appropriate pair of words from the options given below.

The Indian Air Force was _____ established on 8th October 1932 as a part of an auxiliary air force of the British Empire and was known as the Royal Air Force. It was only after India became a republic in 1950 that the name _____ to Indian Air Force.

- a. Official/ has been changed
- b. Officious/ had been changed
- c. Judiciously/ has been changed
- d. **officially/ was changed**

Answer: D

Question 15: Which of the following sentences does NOT use formal language?

- a. In a short time, we will serve refreshments.
- b. Welcome aboard! To operate your seat belt, insert the metal tab into the buckle, and pull tight.
- c. This is the final boarding call for passengers Neha and Mohit Sahini booked on flight 327A to Kansas City. Please proceed to Gate 3 immediately.
- d. **We'd like to thank you folks for flying with us today.**

Question 16: One part of the sentence below may contain an error. Identify the part. If there is error, choose 'No Error'.

There is no doubt / that this is the most difficult but disrupting year / that many of us will ever have experienced

- a. **that this is the most difficult but disrupting year**
- b. No error
- c. that many of us will ever have experienced

- d. There is no doubt

Answer - Option A

Question 17: One part of the sentence below may contain an error. Identify the part. If there is error, choose 'No Error'.

When he felt exhausted, he placed his little baby brother / softly under a tree / and falling on knees, uttered a prayer

- a. No error
- b. and falling on knees, uttered a prayer
- c. softly under a tree
- d. **When he felt exhausted, he placed his little baby brother**

Answer - Option D

Question 18: The following three sentences can be revised into one better sentence. Choose the sentence that is the best revision.

I was at the fair. I got lost. I got scared.

- a. I went to fair and got scared as i was lost.
- b. I am scared after i am lost in the fair
- c. **I got lost at the fair and was scared**
- d. I am lost at the fair so i am too scared

Answer - Option C.

Question 19: You are going to read a text about skills that the workforce of the future will need. Some sentences are incomplete. Choose the sentences from A, B and C to fill the blanks. There is one extra sentence that you do not need to use.

As technological innovations continue to change the workplace, we are seeing more industries entrust their operations to new gadgets, software and programs that can transform the workplace.

_____. With more industries starting to embrace RPA software, RPA robots would be able to handle mundane, repetitive tasks like some of the clerical work normally dealt with by administrative staff, thereby lowering running costs and increasing productivity. There is a common concern that

companies employing technology like RPA are only interested in increasing their profit margins through cost reduction, and that this trend would eventually leave most of the workforce jobless.

A) By equipping our future generation of workers with such business skills, we can ensure that when automation fully takes over, our workers will have the survival skills to become better employees and leaders of the future.

B) However, while it is true that the menial tasks of administrative and clerical jobs are likely to be taken over by automation, the demands on the average office worker will evolve to include more creative work, managerial duties and communication with clients and suppliers.

C) One such technology that has the potential to revolutionise workplaces in the coming years is RPA (Robotic Process Automation).

- a. 1-A , 2-B
- b. 1-A , 2-C
- c. 1-C , 2-B
- d. 1-B , 2-A

Answer - Option C

Question 20: For the four sentences (S1 - S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, and R. Choose the appropriate sentences in the sentences.

S1: The ‘Palace of the Wind’ was built for the female residents of Jaipur’s City Palace.

S2:

S3:

S4: The vented, ornate windows and balconies provide passive-cooling, keeping the interior more comfortable than the sunbaked streets, all without using any mechanical air conditioning devices.

P: And they could do so in relative comfort as its architecture allowed cool air to pass through.

Q: Traditionally, the women of Jaipur wore scarves over their faces when in public.

R: It gave the women of City Palace a place to watch the activities on the streets of the city without having to wear veils and scarves

- a. RP
- b. QR
- c. PR
- d. PQ

Answer - RP

Question 21: Which of the following sentences does NOT use informal language?

- a. In a short time, we will serve refreshments
- b. Welcome aboard! To operate your seat belt, insert the metal tab into the buckle and pull tight
- c. This is the final boarding call for passengers Neha and Mohit Saini booked on flight 372A to Kansas City
- d. We'd like to thank you folks for flying with us today.

Answer - A

Question 22: Fill in the blanks:

Melting glaciers add to rising sea levels, which in turn increases coastal _____ and elevates storm surge as warming air and ocean temperatures create more frequent and intense coastal storms like hurricanes and typhoons. Specifically, the Greenland and Antarctic ice sheets are the largest _____ of global sea level rise. Right now, the Greenland ice sheet is disappearing four times faster than in 2003 and already contributes 20% of current sea level rise.

Blank 1: A. erosion B. eroded C. corrosion D. corrode

Blank 2: A. destruction B. contribution C. contributors D. responsibility

- a. 1. B 2. D
- b. 1. D 2. B
- c. 1. C 2. A
- d. 1. A 2. C

Answer - Option D.

Logical Ability

Question 1:- Which is the wrong term in the following series ?

jkl, lin, mho, ofq, per, rds, sbu

- A. sbu
- B. ofq
- C. per
- D. rds**

Answer 1:- Option D

Question 2:- In each of the five pairs of the letter- clusters, the letter in the second term is a rearranged/ transformed form of the letter in the first term in a particular pattern. In which two pairs, has the transformation been done the same way ?

- [A] MASON- AMNOS
- [B] PARTY - APRYT
- [C] FAULT - AFTLU
- [D] LODGE- DOLEG
- [E] CARGO - ACOGS

- A. B and D
- B. C and D
- C. D and E
- D. A and C**

Answer 2: Option D

Question 3:- A statement is followed by three assumptions numbered I, II and III consider and decide which of the given assumptions is/are implicit in the statement

Statement:

A visit of school children to Zoo to explore their knowledge about Zoo animals.

Assumptions:-

- I. There is no full of freedom for animals in the Zoo.
- II. Children are likely to learn from their interaction with new environment.

- A. Neither I nor II is implicit
- B. Only I is implicit
- C. Both I and II are implicit
- D. Only II is implicit.**

Answer 3:- Option D

Question 4:- Eight persons P,Q,R,S,T,U,V and W are sitting around the circular table facing the center. U is sitting between S and W. P is facing W and T is second to the left of W.S is the third to the right of Q,Who is second to the right of V.

Who is sitting between R and V ?

- A. Q
- B. S**
- C. T
- D. P

Answer 4:- Option B

Question 5:- Given below is a question followed by two statements,I and II each containing some information. Decide which of the statements is /are sufficient to answer the question.

In a row, Vijay is sitting exactly in the middle of Ambar and Sonam. What is Vijay's position from the right end of the row ?

Statement:-

- (i) Vijay is 16th from the left and is separated by 4 persons from Ambar who is his left and if Ambar interchanges his position with Sonam,he becomes 15th from the right.

(ii) Vijay is 16th from the left and if Sonam changes her position with Amber, she becomes 11th from the left.

- A. Both the statements I and II are not sufficient
- B. Either statements I alone or statement II alone is sufficient.
- C. Statement II alone is sufficient.
- D. Statement I alone is sufficient.

Answer 6:- Option A

Question 7:- The Sequence of folding a piece of square paper and the manner in which the folded paper has been cut is shown in the figures marked X, Y, and Z. How would the paper look when unfolded ?

Answer 7:- Option B

Question 8:- There are five persons in a group Raju, Sanjay, Deepak, Suresh and Mukesh. Deepak is elder to Raju, but not as tall as Suresh. Suresh is younger to Sanjay and taller than Mukesh and Raju. Sanjay is taller than Mukesh but not younger than Raju. Mukesh is elder to Sanjay but is the shortest of all the friends.

Who among the following is the eldest ?

- A. Suresh
- B. Deepak
- C. Either Deepak or Mukesh**
- D. Sanjay

Answer 8:- Option C

Question 9:- There are 160 Students in a college hostel which contributes to three news papers - Hindi, Tamil and English. 15 of them do not read any newspaper. The number of Students reading Hindi paper is half the number of those reading English paper and one-third of the number of those reading Tamil paper. 4 students read all the three newspapers and 8 read only two newspapers- Hindi and Tamil . 5 students read Hindi and English newspapers only. Not the Tamil paper.

The number of students who study Tamil and English newspaper is twice the number of students who study Hindi and English newspapers.

How many students read Tamil newspapers only ?

- A. 54
- B. 64
- C. 37
- D. 13

Answer 9:- Option A

Question 10:-Consider the Venn diagram given below:

The numbers in the Venn diagram indicates the number of persons who can speak different languages in a city. The diagram is drawn after surveying 200 persons. In a population of 15,000. How many people can be expected to speak in Hindi language only ?

- A. 2290
- B. 3150**
- C. 3232
- D. 4320

Answer 10:- Option B

Question 11:- A statement is followed by three arguments numbered I, II and III. Decide which of the arguments is/are strong (important and directly related to the question) and which is/ are weak (not important and not related to the central message of the question).

Statements:-

Should the industrial factories located in crowded cities be shifted to the city outskirts ?

Arguments:-

- (i) No. The shift would cause inconvenience to the industrial workers as they would have to travel a long distance every day.
- (ii) Yes. The factories are responsible for significantly adding to the pollution level in the city causing menace to the city living.
- (iii). No Moving out of the city would require huge expenditure from the factory owners to which they may not agree.

- A. Only argument II is strong
- B. All of I, II and III are strong.
- C. Only argument I is strong
- D. **Only I and II are strong.**

Solution 11:- Option D

Question 12:-The Figure marked 'X' lying flat with patterns on it is folded to form a box such that patterns/blanks show on the faces of the box ..Four possible A,B,C and D are given below some of which can be formed and some cannot be formed .Choose from the alternatives the boxes that can be formed.

- a. **B and C Only**
- b. A and B only
- c. B and D only
- d. A and D only

Solution 12:- Option A

Question 13:- In a coded from A+B means A is the daughter of B; A x B means A is the brother of B; A/B means A is the husband of B and A-B means A is the sister of B. Which of the following Shows that P is the niece of T?

- A. (T/ S-R+ Q x P)
- B. (P+ Q x R- S+T)
- C. (P x Q-R/S+T)
- D. (T- S+R x Q/P)

Solution 13:- Option D

The following question is wrong

Question 14:- In the following diagram, the triangle stands for 'males' the circle stand for 'doctor', the rectangle stands for 'government employed', the hexagon stands for 'corona warriors'. The number in different segments show the number of person for that segment.

How many government employed doctors are either corona warriors or males or both?

A-73

B-35

C-38

D-22

Answer 14:-

Question 15:- A statement is followed by three courses of action numbers I ,II and III. Assuming everything in the statements to be true, decide which of the suggested courses of action (a decision to be taken for follow up/improvement in regard to the problem) logically follows for pursuing.

Statements:

In one of the worst road accidents ,15 people died when a roadways bus carrying them colished on to a running truck.

Courses of Action:

- (i) The bus driver should immediately be suspended without any queries.
- (ii) The government should make markings to all accident -prone areas.
- (iii) The department of roadways should hold an enquiry at every level and try to punish those who are responsible for negligence , in the court .

- A. Only I follow for pursuing
- B. Both I and II follow for pursuing
- C. Both II and III follow for pursuing**
- D. Only II follow for pursuing

Answer 15:- Option C

Question 16:- The Figure marked 'X' is folded to form a box. Four possible A,B,C and D are given below some of which can be formed and some cannot be formed .Choose from the alternatives the boxes that can be formed.

Direction:- The Two figures on the left of the sign ":" are related in a certain way. The same relationship holds goods for the second pair of figures on the right of the sign ":" of which ,one figure is missing .Find the missing figure from the alternatives

Question 17:- In a certain code ,if
 'A+B' means 'A is the wife of B'
 'A x B' means 'A is the son of B'
 'A/B' means 'A' is the brother of B'. then

What is the meaning of the expression 'H / K x S + M' ?

- A. M is son of H
- B. K is brother of M
- C. H is son of M
- D. H is brother of M

Answer 17:- Option C

Question 18:- Which of the Option figures would come next in the following figures series ?

B-

C-

D-

Answer 18: Option B

Question 19:

1. All vegetables are fruit
2. No carrot is fruit.
3. Some roots are carrots.
4. All roots are eatables.

Conclusion

- I. Some fruits are eatables
- II. No root is vegetable
- III. Some eatables are corrects
- IV. Some roots are vegetables

Options

- a. Only II, III and IV follow
- b. Only III and IV follow
- c. Only III and either II and IV follow

Answer: Option C

Question 20 - Read the following information carefully and answer the given question:

A public charitable organization desires to select a candidate for the post of programme Coordinator for a health project, based on the following criteria:

The Candidate must

- (i) hold B.E. degree with minimum 60% marks and above
- (ii) have an experience of 5 years in the relevant field
- (iii) be ready to execute a bond of three years of service

Incase of the applicant who satisfies all other criteria except

1. At (i) above, but has B.E. degree with minimum 55% marks but has completed M.Tech with 50%, his/her case is to be referred to the secretary.
2. At (ii) above, but has 3 years full time experience as a programme manager, his/her case is to be referred to the project director
3. At (iii) above, but is ready to give Rs.30,000/- as secure money, his/her case is to be referred to the president of the trust

Based on the criteria and information provided decide the course of action.

Jayvinder has completed B.E degree with 56% marks and also has M.Tech with 55% marks, he has been working for 6 years in a Government Funding Health Project. He is ready to execute a bond of 3 years of service. What decision would be taken for him?

- A. Refer to project director
- B. Refer to secretary of trust
- C. Refer to president of trust
- D. He would be selected

Answer: Option B

Question 21 . Given below is a question followed by two statements I and II, each containing some information. Decide which of the statements is/are sufficient to answer the question

How much did Mayank get as profit at the year-end in business done by Abinash, Mayank and Pankaj?

Statements:

- I. Abinash invested Rs.6000 every month for eight months and earned a profit which was one and a half times that of Mayank while that of Abinash's total investment is three times than that of Pankaj
- II. Pankaj and Mayank invested for one year in the ratio of 1:2 and the total profit earned by all three was Rs.3600

- A. Statement II alone is sufficient
- B. Both statements I and II are not sufficient
- C. statements I and II are necessary
- D. Statement I alone is sufficient

Answer: Option D

Question 22 - There are four friends Roy, Prem, Amar and Dhir

- 1. Each one plays one of the following games - Badminton, Hockey, Tennis and Cricket
- 2. Each owns only one of the following coloured cars - Red, Blue, White and Yellow
- 3. Prem owns a white car and plays cricket
- 4. Amar does not play either Badminton or Tennis and does not own a yellow car.
- 5. Dhir does not play Badminton and owns a red car.

Who plays Badminton and owns a yellow car?

- A. Amar
- B. Dhir
- C. Roy
- D. Prem

Answer: Option C

Question 23 - In a family of 7 persons having 4 female and 3 male members, P is the brother of Q and son of R. R has two children and two grandchildren. V is the daughter of S who is the son-in-law of R. W is the nephew of Q and son of T. How is V related to T?

- A. Cousin sister
- B. Niece
- C. Nephew
- D. Sister-in-law

Answer: Option B

Question 24 - :-A statement is followed by three assumptions numbered I and II. Consider the statement and decide which of the given assumption(s) is/are implicit in the statement

Statement:

The advancement of technology will lead to increase in the sale of smartphone due to its multipurpose usage

Assumptions:

- I. With the help of smartphone people use many facilities that are available online now a day
 - II. There are more functions of smartphone rather than just conversation
- A. Neither I nor II is implicit
 - B. Both I and II are implicit
 - C. Only II is implicit
 - D. Only I is implicit

Answer: Option B

Question 25: Given below is a question followed by two statements, I and II each containing some information. Decide which of the statements is/are sufficient to answer the question

What is the age of Sumit? Statement:

- I: Sumit is five years younger than Amit, who is double the age of Prateek
- II. Prateek is 10 years older than Ravi whose age is 22 years.

- A. The combination of both the statements I and II are necessary.**
- B. Statement II alone is sufficient
- C. Statement I alone is sufficient
- D. The combination of both the statements I and II are not sufficient.

Answer - Option A.

Question 26 - The following are the criteria for selecting trainees for the IT department of a company. The candidate must

- 1. Be an engineering graduate in IT or Computer Science or Electronics with at least 65% of marks
 - 2. Be not less than 22 years and not more than 27 years of age as on 1.3.2020
 - 3. Have secured more than 80% in HSC examination
 - 4. Have scored at least 60% in the written test and at least 50% in the interview
- However if the candidate fulfils all the above except

- (i) at 2 and/or 3 but has scored at least 70% in the written test and 60% in the interview his/her case is referred to the General Manager, HR
- (ii) at 3 and/or 4 but has secured more than 75% in the engineering examination his/her case is to be referred to the VP,HR

Based on the criteria given above and without adding any additional information, you have to make a decision for the candidate whose profile has been given below. Mark your answer by choosing the appropriate alternative

Poonam passed graduate engineering in computer science in 2015 at the age of 21 years with 78% of marks. She scored 65% in the interview as well as in the written test. She has secured 80% of marks in the HSC examination.What decision would be taken in her case?

- A. Her case is to be referred to the VP, HR
- B. Her case is to be referred to the General manager, HR
- C. She is not to be selected
- D. She is to be selected

Answer: Option C

Programming Logic

Question 1- What is the function of rewind()?

- A. Setting file pointer at the beginning of the file.
- B. Setting file pointer at the end of file
- C. Setting file pointer anywhere in file
- D. Setting file pointer at the beginning of line

Answer- Option A

Explanation - In the C Programming Language, the **rewind function** sets the file position to the beginning of the file for the stream pointed to by stream. It also clears the error and end-of-file indicators for stream.

Question 2- Select the precise options for the below scenarios-

Expression 1: `cout << end;`

Expression 1: `cout << "\n " << flush;`

1. Both expression will give different results
2. Both expression will give same results
3. Second expression will not insert new line
4. First expression will not insert new line

Answer- Option A

The first expression will print end in the same line

And the second expression will print flush in the new line

Question 3- Construct Post Order Traversal for the constructed tree with the given in-order and preorder traversals

In-order: 9 7 10 6 8

Pre-order: 6 7 9 10 8

1. 9 10 7 8 6
2. 8 9 10 7 6
3. 9 8 10 7 6
4. 9 7 6 10 8

Answer- Option A: 9 10 7 8 6

Question 4- Consider the following variables declarations:

`float num1;`

`short num2;`

`long num3;`

What is the data type of `num1 - num3 / num2`?

1. float
2. None of the above
3. short
4. double

Answer- Option A

The result of num3/num2 will be in long(integer), and when that result will be subtracted from num1 which is a float data, the resulting answer will be in decimal and hence the correct answer will be option A

Question 5- What will be the output of the following program?

```
import java.util.*;
public class Main
{
    public static void main(String[] args)
    {
        ArrayList<Integer>TempArrayList = new ArrayList<Integer>();
        TempArrayList.add(30);
        TempArrayList.add(20);
        TempArrayList.add(10);
        TempArrayList.add(40);
        TempArrayList.add(50);

        Collection.sort(TempArrayList, Collection.reverseOrder{});
        Collection.sort(TempArrayList, Collection.reverseOrder{});

        System.out.println(TempArrayList);
    }
}
```

Answer: [50, 40, 30, 20, 10]

Question 6- float(*p)[5];
Here , p is_____.

1. Pointer
2. Array of pointer
3. Float
4. Pointers to array of float

Answer- Pointer to array of float

Question7- The type of software testing you can do when you have both the source code and the executable code in hand is called as

- A. Black box testing
- B. Red box testing
- C. White box testing
- D. Blue box testing.

Answer : Option C

Question 8- Spot the error in the given code. If there is no error, select the most appropriate option

```
class Employee
{
Private
Int UserId;
Public
Employee() UserId(0) { }           //_____ line 8
Friend int displayUser(Employee);
};
Int displayUser(Employee emp)
{
Emp userId += 12;
Return emp UserId;
}
Int main()
{
Employee e;
Cout << "Employee UserId: " << displayUser(e) << end; // _____ line 19.
Return 0;
}
```

1. Compilation Error

2. Employee UserId 12
3. Error at line 9
4. Error at line 8

Answer: Employee UserId 12

Question 9- What will be the output of the below program?

```
public class Main
{
    public static void main(String[] args)
    {
        int x=10,y,z;
        z=y=x;
        y-= x--;
        z-= --x;
        x=--x - x--;
        System.out.println(x+"-"+y+"-"+z);
    }
}
```

Answer- 8-0-2

Question 10- What will be the output of the following program

```
abstract class Shape
{
    public abstract void Disp();
}
class Triangle extends Shape
{
    public final void Disp()
    {
        System.out.println("Triangle");
    }
}
```

1. Runtime Error
2. Triangle
3. Compile-time Error
4. It's Rectangle

Answer- Runtime Error

Coding

Question 1

A doctor has a clinic where he serves his patients. The doctor's consultation fees are different for different groups of patients depending on their age. If the patient's age is below 17, fees is 200 INR. If the patient's age is between 17 and 40, fees is 400 INR. If patient's age is above 40, fees is 300 INR. Write a code to calculate earnings in a day for which one array/List of values representing age of patients visited on that day is passed as input.

Note:

- Age should not be zero or less than zero or above 120
- Doctor consults a maximum of 20 patients a day
- Enter age value (press Enter without a value to stop):

Example 1:

Input

20

30
40
50
2
3
14

Output

Total Income 2000 INR

Note: Input and Output Format should be same as given in the above example.

For any wrong input display INVALID INPUT

Output Format

Total Income <Integer> INR

Solution in Python:

```
age = []
for i in range(20):
    m = input()
    if m == "":
        break
    elif int(m) in range(0,120):
        age.append(int(m))
    else:
        print("INVALID INPUT")
        exit()
fees = 0
for i in age:
    if i < 17:
        fees+=200
    elif i <40:
        fees+=400
    else:
        fees+=300
print("Total Income {} INR".format(fees))
```

Question-2

This is a basic classification problem, where a set of balls is given as SetBalls[].

Balls are of different colors, brands, sizes and weights. Ball description is given in the format like "BrandName-Size-Weight-Color"

Given values for set are as follows:

310

```
SetBalls = ["Cosco-Small-58-Red", "KC-Medium-95-Red", "Stag-Big-156-Red", "KC-Medium-95-Red",  
"YSI-Small-152-Red", "Cosco-Small-58-Red", "KC-Big-155-Red", "YSI-Small-52-Red", "Cosco-Small-  
58-Green", "KC-Medium-95-Green", "Stag-Big-156-Green", "Cosco-Small-58-Green", "KC-Small-55-  
Green", "YSI-Big-152-Green", "KC-Big-155-Green",  
"YSI-Small-52-Green", "Cosco-Small-58-White", "KC-Medium-95-White", "Stag-Big-156-White", "KC-  
Medium-95-White", "KC-Big-155-White", "KC-Medium-95-White", "Cosco-Small-58-White", "YSI-Big-  
152-White", "KC-Big-155-White", "Ysi-Small-52-White"]
```

Classify the given sets based on the given input which can be one value among: Brand / Size / Weight / Color and display all new sets after classification with the criteria name at the beginning of the set in sorted order of Criteria.

Note that weights can be treated as string values, so it may give different sorted sequence even though it's a numeric value.

For other inputs, return INVALID INPUT.

Numerical Ability

Question: In a competitive exam, 5 marks are awarded for every correct answer and for every wrong answer, 2 marks are deducted. Sathwik scores 32 marks in the examination. If 4 marks had been awarded for each correct answer and 1 mark had been deducted for each incorrect answer, Sathwik would have scored 34 marks. If Sathwik attempted all the questions, how many questions were there in the test ?

- A. 14
- B. 12
- C. 20
- D. 26

Answer: Option D

Question: Two cars A and B, which are 280 Kms apart, start travelling at the same time. If they travel in opposite directions, they meet after two hours. If they travel in same direction, A meets B after 14 hrs. What is the speed of car B?

- A. 70 Kmph
- B. 60 Kmph**
- C. 80 Kmph
- D. 50 Kmph

Answer:- Option B

Provided options for the question below is wrong

Question: The following table gives the expenditure of a company (in lakh rupees per annum) over the given years 2015 to 2019?

Expenditure/year	Salary	Transport	Bonus	Taxes	Advertisement
2015	250	105	4	80	2.1
2016	198.7	72.70	4.25	75.5	13.3
2017	270	110	4.5	85	3.5
2018	318	108	93.7	158.2	22.1
2019	325	120	5	75	4.3

What percent of the total expenditure in 2018 is the total expenditure on all these items in 2016?

- A. 52.4%
- B. 52.7%
- C. 50.7%
- D. 56.2%

Answer: 52.064%

Question: The salary in rupees of 10 employees in a company per day is 50, 55, 60, 65, 70, 72, 75, 80, 84, 89.

What is the standard deviation in the above data?

- A. 11.517
- B. 11.747
- C. 11.143
- D. 11.983

Answer:- Option D

Question: If $\frac{1}{6} : \frac{1}{x} :: \frac{1}{x} : \frac{1}{2.16}$, the value of x is:

- A. 6
- B. 3.6
- C. 1.6
- D. 2.6

Solution: Option B

Question(Incomplete): Consider the following Pie Chart and Table. What is the population of village A if the population of illiterates in village C in 2019 is 11250.

Village	%Illiterates
A	40

B	48
C	45
D	35
E	30

Question: If a dealer makes a profit of 20% by selling an article for Rs.18 , by how much should he increase his selling price in order to make a profit of 30%?

- a. Rs. 4.5
- b. Rs. 2.5
- c. Rs. 3.5
- d. Rs. 1.5

Answer: Option D

Question: The difference between the simple interest and compound Interest calculated annually on a certain amount at the rate of 20% per annum for 2 years is Rs. 248.20. What is the amount?

- a. 6205
- b. 6002
- c. 6022.5
- d. 6202.5

Solution:- option A - 6205

Question - The mean of the following data is

Class	0-10	10-20	20-30	30-40	40-50	50-60
Frequency	3	6	7	6	3	5

- 1. 5

2. 25
3. 35
4. 3

Answer:- 30

Question - If a and b represent the frequencies of the modal class and median class respectively of the data, the value of $3a+4b$ is _____.

Class	0-10	10-20	20-30	30-40	40-50
Frequency	12	14	10	17	7

1. 98
2. 27
3. 90
4. 91

Answer: Option D

Question: If mean of 29 observations is 33 and on adding one more observation the new mean becomes 34. What is the value of 30th observation?

- a. 68
- b. 63**
- c. 34
- d. 55

Answer: Option B

Question: A sales representative's commission is 6% on all sales upto Rs.15000 and 5% on all sales exceeding this. He remits Rs. 47350 to his company after deducting his commission. What were the total sales?

- a. Rs. 50000
- b. Rs. 49000
- c. Rs. 50500
- d. Rs. 47500

Answer: Option A

Question: If the perimeter of a rectangle is 82cm and its diagonal is 29cm long, what is the area of the rectangle?

- a. 420 cm^2
- b. 441 cm^2
- c. 400 cm^2
- d. 900 cm^2

Answer: Option A

Question: If a motor bike starts at a speed of 60kmph with its speed increasing by 12 kmph every three hours. In how many hours will it cover 480 km?

- a. 6 hours 30 minutes
- b. 7 hours
- c. 6 hours
- d. 8 hours

Answer: Option B

Question: If $\sqrt[3]{\frac{4913}{4096}} = 1 + \frac{a}{16}$, what is the value of a?

- a. 3
- b. 2
- c. 1
- d. 4

Answer: Option C

Question: If a number is divisible by 7, the remainder is 4. What will be the remainder when the square of the same number is divided by 7?

- a. 4
- b. 6
- c. 3
- d. 2

Answer : Option D

Question: If $\sqrt{2} = 1.414$ and $\sqrt{3} = 1.732$, the value of $\frac{1}{3\sqrt{2} - 2\sqrt{3}}$?

- a. 1.2813
- b. 1.2803
- c. 1.75
- d. **1.2843**

Answer: Option D

Question: 10% of the voters did not cast their votes in an election between two candidates. 20% of the voters were found invalid. The winning candidate got 60% of the valid votes and won by a majority of 2,880 votes. What is the total number of voters who cast their vote?

- a. 18,000
- b. 25,000
- c. **20,000**
- d. 24,000

Answer: Option C

Question: The value of $\frac{7.6 \times 3.8 \times 15.28 + 1.8 \times 5.4 \times 16.2}{(7.6)^2 + (5.4)^2 - 41.04} + \sqrt[2]{\frac{343}{512}}$ lies between

- a. 16 and 17
- b. 13 and 14
- c. 12 and 13
- d. 15 and 16

Answer:- Option B

Question: A can do a piece of work in 72 days. He works at it for 8 days and then b alone finishes the remaining work in 48 days. In how many days will A and B finish the work by working together?

- a. $30\frac{5}{7}$
- b. $30\frac{1}{7}$
- c. $30\frac{6}{7}$
- d. $30\frac{2}{7}$

Answer: Option C

Question:- A and B undertake a piece of work for Rs. 720. A alone can do it in 12 days while B alone can do it in 16 days. If they get C to help them and finish to work in 6 days, what should be the C's share of the money earned.

- a. Rs. 270
- b. Rs. 360
- c. Rs. 80
- d. Rs. 90

Answer: Option D

Question: A sells an article to B at a profit of 15%. B then sells it to C, making a profit of 20%. If C paid Rs. 690. What is the original price of the article?

- a. 700
- b. 690
- c. 575
- d. 500

Answer:- Option D

Question: A, B and C enter into a partnership and their shares are in the ratio $(\frac{1}{3}):(\frac{1}{4}):(\frac{1}{6})$. After 3 months, A withdraws one-fourth of his capital and after 9 months a profit of Rs. 582 is divided among them. What is C's share in profit.?

- A. 144
- B. 200
- C. 222
- D. 216

Answer:- C share in profit = Rs 141.1

Question: If the area of the base of a right circular cone is 9856 cm^2 and its height is 33cm, what is the curved surface area of the cone?

- A. 21040 cm^2
- B. 11440 cm^2**
- C. 12420 cm^2
- D. 12000 cm^2

Answer:- Option B

Verbal Ability

Question 1: Fill in the blanks with the most appropriate set of words from the options given below.

What did the painter do _____ himself from falling?

When he felt the ladder _____ he grabbed the gutter to save himself from falling.

- a. To save/began slipping
- b. To save/ beginning to slip
- c. To save/begin to slip
- d. For saving/began to slip**

Answer: D

Question 2: One part of the sentence below may contain an error. Identify the part. If there is no error, choose ‘ No error’

Since sunrise to sunset / my grandmother would sit by her wheel, / spinning and reciting prayers.

- a. my grandmother would sit by her wheel,
- b. Since sunrise to sunset**
- c. spinning and reciting prayers
- d. No error

Answer: B (from sunrise to sunset)

Question 3: The following three sentences can be revised into one better sentence. Choose the sentence that is the best revision.

I was at the fair. I got lost. I got scared.

- a. I am lost at the fair so i am too scared
- b. I am scared after i am lost in the fair
- c. I went to fair and got scared as I was lost.
- d. I got lost at the fair and was scared**

Answer: D

Question 4: Choose the most appropriate word to complete this sentence correctly.

The psychic made many_____about the future, but none of them came to pass.

- a. Predictions
- b. sooth-sayings
- c. sayings
- d. Mutterings

Answer: Predictions

Question 5: Which of the following sentences uses informal language?

- a. The candidate whom she had approved appeared in an interview before the hospital board.

- b. The candidate she picked turned up to meet the hospital board.
- c. The candidate whom she had finalized was ultimately rejected by the hospital board.
- d. The candidate whom she had rejected was ultimately chosen by the hospital board.

Answer: The candidate she picked turned up to meet the hospital board.

Question 6: Read the Passage and answer the following question:

Today, more than ever silent reading is the norm. The majority of us bottle the words in our heads, as if sitting in an imaginary library. Reading out loud is largely reserved for bedtime stories and performances.

Now research, however, suggests that we may be missing out by reading only the Voices inside our minds. The ancient art of reading aloud has a number of benefits for adults, from helping improve our memories and understand complex text to strengthening emotional bonds between people. And far from being a rare or bygone activity, it is still surprisingly common in modern life. Many of us intuitively use it as a convenient tool for making sense of the written word, and adjust not aware of it.

Cal MacLeod, a psychologist at the university of Waterloo in Canada, has made extensive research on the impact of reading aloud on memory. He and his collaborations have shown that people consistently remember words and text better if they read them aloud then if they read them silently. This memory-boosting effect of reading aloud is particularly strong in children, but is beneficial for older people too.

Which of the following is a by-product of reading silently?

- a. **Having poor recall**
- b. Having a prodigious intellect
- c. Developing verbal ability
- d. Having conflicts with people.

Answer: A

Question 7: Read the Passage and answer the following question:

Today, more than ever silent reading is the norm. The majority of us bottle the words in our heads, as if sitting in an imaginary library. Reading out loud is largely reserved for bedtime stories and performances.

Now research, however, suggests that we may be missing out by reading only the Voices inside our minds. The ancient art of reading aloud has a number of benefits for adults, from helping improve our memories and understand complex text to strengthening emotional bonds between people. And far from being a rare or bygone activity, it is still surprisingly common in modern life. Many of us intuitively use it as a convenient tool for making sense of the written word, and adjust not aware of it.

Cal MacLeod, a psychologist at the university of Waterloo in Canada, has made extensive research on the impact of reading aloud on memory. He and his collaborations have shown that people consistently remember words and text better if they read them aloud then if they read them silently. This memory-boosting effect of reading aloud is particularly strong in children, but is beneficial for older people to which of the following is a byproduct of reading aloud having conflicts with people, too.

Which option is closest in meaning to the word: intuitively

- a. Naturally
- b. Magically
- c. Systematically
- d. Truthfully

Answer: Naturally

Question 8: Read the Passage and answer the following question:

Today, more than ever silent reading is the norm. The majority of us bottle the words in our heads, as if sitting in an imaginary library. Reading out loud is largely reserved for bedtime stories and performances.

Now research, however, suggests that we may be missing out by reading only the Voices inside our minds. The ancient art of reading aloud has a number of benefits for adults, from helping improve our memories and understand complex text to strengthening emotional bonds between people. And far from being a rare or bygone activity, it is still surprisingly common in modern life. Many of us intuitively use it as a convenient tool for making sense of the written word, and adjust not aware of it.

Cal MacLeod, a psychologist at the university of Waterloo in Canada, has made extensive research on the impact of reading aloud on memory. He and his collaborations have shown that people consistently remember words and text better if they read them aloud then if they read them silently. This memory-boosting effect of reading aloud is particularly strong in children, but is beneficial for older people to which of the following is a byproduct of reading aloud having conflicts with people, too.

Which of the following statements is TRUE?

- a. Reading aloud makes one establish better relationship with people
- b. Reading aloud scrambles signals in our brain
- c. Reading aloud makes it difficult to understand difficult texts
- d. Reading aloud is not as good as reading silently.

Answer: Reading aloud makes one establish better relationship with people

Question 9: Read the Passage and answer the following question:

Today, more than ever silent reading is the norm. The majority of us bottle the words in our heads, as if sitting in an imaginary library. Reading out loud is largely reserved for bedtime stories and performances.

Now research, however, suggests that we may be missing out by reading only the Voices inside our minds. The ancient art of reading aloud has a number of benefits for adults, from helping improve our memories and understand complex text to strengthening emotional bonds between people. And far from being a rare or bygone activity, it is still surprisingly common in modern life. Many of us intuitively use it as a convenient tool for making sense of the written word, and adjust not aware of it.

Cal MacLeod, a psychologist at the university of Waterloo in Canada, has made extensive research on the impact of reading aloud on memory. He and his collaborations have shown that people consistently remember words and text better if they read them aloud then if they read them silently. This memory-boosting effect of reading aloud is particularly strong in children, but is beneficial for older people to which of the following is a byproduct of reading aloud having conflicts with people, too.

With reference to the passage above, which option is closest in meaning to following sentence segment-

“Bottle the words in our head as if sitting in an imaginary library”

- a. To behave like head librarian and ask everyone to maintain silence
- b. To magically be able to stop talking once and for all
- c. To visualise that one is sitting in a public library and reading books silently
- d. To manage to hold one's tongue especially when one is angry

Answer- To manage to hold one's tongue especially when one is angry

Question 10: Complete the following sentence by filling in the blanks (1 and 2) with the right word from the list given below

One very old method used in the investigation of past climatic conditions _____1_____ the measurement of water levels in ancient lakes. In temperate regions, there are enough lakes for correlations between them to give us a _____2_____ picture.

Blank 1: A. involves B. involve C. involving D. was involving

Blank 2: A. constant B. reliable C. safe D. secure

- a. 1.A , 2B
- b. 1C , 2A
- c. 1B , 2D
- d. 1D , 2C

Answer - A

Question 11: One part of the sentence below may contain an error. Identify the part.

He could not figure / out why the / neighbourhood had get / such a bad reputation.

- a. Out why the
- b. He could not figure
- c. Such a bad reputation
- d. Neighbourhood had get

Answer - D

Question 12: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the option P, Q, R, choose the appropriate sentences to fill up S2 and S3.

S1: There are three amazing plants that work in every single climate

S2:

S3:

S4: But perhaps the best are tomatoes, which too have many varieties and are of temperamental vegetables.

P: There is spinach, which is very easy to grow because it handles water well and can stand different levels of heat.

Q: Then come carrots, of which there are many varieties, most of which grow in all types of climate

R: Indians usually grow their own vegetables

- a. PQ
- b. RP
- c. QP
- d. QR

Answer - PQ

Question 13:

S1. London like the rest of the UK is committed to becoming net-zero carbon by 2050

S2.

S3.

S4. And exactly how different would the urban environment look if it were not zero ?

P. But how does London, a city choked with traffic and full of carbon-emitting processes and structures - from fossil fuel generated energy to steel skyscrapers – reach such a goal?

Q. That means greenhouse gas (GHG) emissions would be dramatically slashed and any remaining emissions offset, neutralising environmental impact and slowing climate change.

R. The UK became net-zero carbon 20 years ago and is the biggest proponent of reversing climate change and saving the planet.

- a. RQ
- b. RP
- c. PR
- d. QP

Answer - QP

Logical Ability

Argument III is not provided

Question 1: Should all the government departments in the country be handed over to the private sector?

Arguments:

- I. No. The private sector will not be sure to handle the entire government department which is made for social services.
- II. Yes. Private sector will handle all departments better than the government.

- A. All of I, II, III are strong.
- B. Only argument I is strong
- C. **Only argument II is strong**
- D. Both I and II are strong.

Answer: Option C

Question 2:-The Sequence of folding a piece of square paper and the manner in which the folded paper has been cut is shown in the figures marked X, Y, and Z. How would the paper look when unfolded ?

A-

B-

C-

D-

Answer - Option A

Question 3:- The Figure marked 'X' lying flat with patterns on it is folded to form a box such that patterns/blanks show on the faces of the box ..Four possible A,B,C and D are given below some of which can be formed and some cannot be formed .Choose from the alternatives the boxes that can be formed.

- A. (A and C only)
- B. (B and C only)
- C. (C only)
- D. (B only)

Answer:-

Question 4:- Determine the wrong term in the series
cze, etg, hoj, lkm, qls, wfy

- A. wfy
- B. lkm
- C. qls
- D. hoj

Answer - Option B (lkm)

Question 5 :- The Figure marked 'X' is folded to form a box. Four possible A,B,C and D are given below some of which can be formed and some cannot be formed .Choose from the alternatives the boxes that can be formed.

- A. (A and C only)
- B. (A only)**
- C. (B only)
- D. (B and C only)

Answer :- Option B (A only)

Question 6- Seven friends A,B,C,D,E,F and G play one of the seven musical instruments viz, the guitar, flute, dholak, congo, piano, drums and violin. E does not play the congo. A, E and G do not play the violin, flute and guitar. F plays the piano. D plays the drums. Who plays the guitar?

- A. Either B or C**
- B. Either A or E
- C. B
- D. C

Answer: Option A (Either B or C)

Question 7 - A statement is followed by two assumptions numbered I and II. Consider the statement and decide which of the given assumption(s) is/are implicit in the statement.

Statement :

Our city has got the maximum rainfall this year in comparison to the last 10 years.

Assumptions:

- I. The city was facing drought since the last 10 years.
- II. Many areas in the city got flooded due to such heavy rainfall.

- A. Both I and II are implicit.
- B. Only I is implicit
- C. Neither I nor II is implicit**
- D. Only II is implicit

Answer - Option C

Question 8 - Six friends A,B,C,D,E,F are standing in a row facing the East.

- I. C is between B and D.
- II. E is between D and F.
- III. D is right to E and left to C.
- IV. If A is standing extreme right in the row, who is in the Extreme Left?

- A. C
- B. D
- C. F
- D. B

Answer - Option C (F)

Question 9: The candidate must be-

1. Holding BHMS degree with minimum 60% marks
2. Having five years of experience of practice in rural area
3. Having a good knowledge of the local language

In case the applicant who satisfies all other criteria except-

- I. At (1) above, but has minimum 50% marks at BHMS and has completed MD with 55%, his/her case is to be referred to the Chief Medical Officer
- II. At (2) above, but has 3 years full time experience of practice in an urban or a rural hospital but spent at least 5 years in a rural area, his/her case to be referred to the Secretary.
- III. At (3) above, but has working knowledge of hindi , his/her case is to be referred to the Hospital Management.

Based on the criteria and information provided, decide the course of action.

Jasvinder has completed BHMS with a minimum of 61% marks and has practiced for 4 years in an urban hospital. He speaks the local language. What decision would be taken for him.

- A. He would be selected**
- B. Refer to the Chief Medical Officer
- C. Refer to the secretary
- D. Refer to the Hospital Management.

Answer :- Option A

Question 10: Given below is a question followed by 2 statements, I and II each containing some information decide which of the statement(s) is suitable

How is Seema related to Ram?

Statements

- I** Ram has a brother, Mohan. Mohan is the son of Rahul. Seema is Rahul's sister
II Rahul is the father of ram and brother of seema

- a. Either the statement I and II are sufficient**
- b. Statement II alone is sufficient
- c. Statement I alone is sufficient
- d. Both the statement I and II are necessary

Answer - Option A (aunt)

Question 11: Which of the option figures would come next in the following figure series?

Option

a.

b.

c.

d.

Two Options are right for the following question

Question 12: The number of students studying in six different disciplines of a college are given below. Study the given data and answer the questions that follow

Number of students in different disciplines

Disciplines	Total	Boys	Girls
Science	1020	680	340
Social Science	2380	1700	680
Humanities	1700	510	1190
Law	680	408	272
Management	1700	1020	680
Commerce	2040	1190	850
Total	9520	5508	4012

Which of the following pairs of the name of the discipline and its ratio of boys to girls is not correct?

- Social Science, 5:2
- Law, 3:2
- Commerce, 7:3
- Science, 2:1

Answer:- Social Science, 5:2, Commerce 7:3

Question 13: In the following diagram the rectangle stands for “Poet” , the circle stands for “Musician” and the triangle stands for “Dancer”, and the square stands for “Singer”.The number in the different segments shows the number of persons

Answer the following on the basis of information given in the diagram

A. 12
B. 36
C. 7
D. 4

Question 14: Given below is a question followed by statements I and II each containing some information. Decide which of the following is sufficient to answer the question.

Statements:

- I. Q is the wife of P and the mother of T, R is the grandmother of O and the mother of P
- II. T is the granddaughter of S, R is the grandmother of O and T

- A. statement II alone is sufficient.
- B. Both the statements I and II together are not sufficient**
- C. Both the statements I and II together are necessary
- D. statement I is alone sufficient

Answer - Option B (Gender of O is unknown)

Questions 15: In a group of six friends P, Q, R, S, T and U of different ages but all have their birthdays on the same date. The youngest is seventeen years old and the oldest is T of 22 years. U is somewhere between Q and S in age. P is older than Q. R is older than S.

If Q is 17 years old, which of the following could be the age of S and R respectively?

- a. 18 and 20
- b. 17 and 20
- c. 19 and 18
- d. 19 and 21

Answer - Option D

Question 16: Seven friends O, P, Q, R, S, T and U are standing in a row.

I- Q is the right of U

II- P is between T and S.

III- U is between Q and R

IV- O is right of Q who is left of S

Who is exactly in the middle of the row?

- a. O
- b. U
- c. R
- d. S

Answer - Option A

Question 17. Six friends P, Q, R, S, T and U are in a group.

1. Q and R are shorter than U but heavier than P
2. S is heavier than Q and taller than R
3. T is shorter than S but taller than U
4. U is heavier than S
5. P is shorter than T but taller than

U Who is tallest in the group?

- A. P
- B. Q
- C. R
- D. S

Answer: Option D

Question 18. In a certain code, P+Q means P is the husband of Q; P-Q means P is the daughter of Q and P/Q means P is wife of Q

If A+B-C/D, then which of the following is true?

- A. C is the mother of A
- B. D is the mother of B
- C. D is the father of B
- D. A is the brother of D

Answer: Option C

Question 19. In each of the five pairs of the letter-clusters, the letters in the second term are rearranged/transformed. Find the transformation which is same.

- A. MANSON : AMNOS
- B. PARTY : APRYT
- C. FAULT : AFTLU
- D. LODGE : DOLEG
- E. CARGO : ACOGS

- A. A and C

- B. D and E
- C. C and D
- D. B and C

Answer: Option A

Question 20. A statement is followed by two assumptions numbered I and II. Consider the statement and decide which of the given assumptions are appropriate.

Statement:

The workers are protesting against the new incentive policy which has been implemented this year by the management this year

Assumptions:

- I. The workers are not happy with the changes that have been made in the new incentive policy.
 - II. The management has assured the workers for redrafting the policy to avoid further protests
-
- A. Only II is implicit
 - B. Neither I or II is implicit
 - C. Both I and II are implicit
 - D. Only I is implicit

Answer: Option D

Question 21. In a coded form, A#B means A is the paternal grandfather of B; A\$B means A is the son of B and A@B means A is the brother of B.

Which of the following equations show that P is the father of S?

- A. P#Q@R\$S
- B. P#Q\$R@S
- C. P\$Q#R@S
- D. P@Q\$R#S

Answer: Option A

Question 22. Five persons P, Q, R, S and T are sitting in a row. Who is sitting in the middle?

Statements:

1. P is between R and Q. Q is on the left to P
 2. T is between Q and S
 3. T is on the left of Q but the right of S
-
- A. Statement III alone is sufficient
 - B. Statement II alone is sufficient
 - C. Both statements I and II are together sufficient
 - D. Statement I alone is sufficient

Answer: Option C

Question 23. Statement:

Our city has got the maximum rainfall this year in comparison to the last 10 years.

Assumptions:

- I. The city was facing drought since last 10 years
 - II. Many areas in the city got flooded due to such heavy rainfall
-
- A. Only I is implicit
 - B. Both I and II are implicit
 - C. Neither I nor II is implicit
 - D. Only II is implicit

Answer: Option C

Question 24. Statements:

1. No poet is singer
2. All poets are dancers

Conclusions:

1. No singer is dancer
2. No dancer is singer

- A. Only I follows
- B. I and II follows
- C. Only II follows
- D. None of the conclusions follow

Answer: Option D

Question 25. A statement is followed by three courses of action numbered I, II and III. Assuming everything in the statement to be true, decide which of the suggested courses of action (a decision to be taken for follow up/ improvement in regard to the problem) logically follow. **Statement:**

The number of passengers following through air route has considerably increased in the last few years and the current numbers of airports and operational flights are not sufficient to fulfil the increasing demands and to provide better services.

Courses of Action:

- I. All the passengers should be asked to use other modes of travel in future.
 - II. The Aviation Ministry should further strengthen air infrastructure as the traffic demand is high.
 - III. More staff should be appointed to provide better services to the increasing numbers of passengers at the airports.
- A. Only I and III follow
 - B. Only I and II follow
 - C. Only II and III follows
 - D. Only I follows

Answer: Option C

Question 1: In hashing technique, hash function takes a _____ as input and returns the _____ value of that key in order to identify the index of array

- a. Null, Hash
- b. Hash, key
- c. Key, Null
- d. Key, Hash

Answer: Option D- Key, Hash

Question 2: A sorted array has 10 elements. Find out the total number of comparisons needed, if every search is successful to find the item in binary search manner?

- a. 30
- b. 31
- c. 28
- d. 29

Answer:

Question 3: Across this life cycle process, the development of custom software evolves through various environments. Which among the following is incorrect

- a. Production sandbox environment
- b. Production staging environment
- c. Development sandbox environment
- d. Development integration environment

Answer:

Question 4: What will be the output of the following program?

```
public class Main
{
    public static void Check(int[] a, int[] b)
    {
```

            System.out.println("equal");
        else
            System.out.println("Not equal");
    }

    public static void main(String args[])
    {
        int a[]= {5,6,7,8};
        int b[]= {5,6,7,8};
        Check(a,b);
    }
}
```

Type your answer here.

Answer: Not Equal

Question 5: We can't overload _____ operator.

1. = (assignment operator)
2. . (dot operator)
3. () (parenthesis)
4. [] (subscript operator)

Answer: Option B

Question 6: What would be the output of the snippet below?

```
#include<iostream>
using namespace std;
int main()
{
    int chArr[]={91 , 93, 95};
    cout<< *chArr+1;
    return 0;
```

Answer: 92

Question 7: What would be the output of the code below?

```
public class Main
{
    final int a= null;
    public static void main(String args[])
    {
        Main obj= new Main();
        System.out.println(obj.a);
    }
}
```

1. NULL
2. 0
3. Error: incompatible types: <null> cannot be converted to int
4. Error: variable a wrongly initialized in the default constructor.

Answer: Error: incompatible types

Question 8: The process of calling function in that function itself is called _____.

1. Nested function
2. Recursive function
3. Repetitive function
4. Function definition

Answer: Recursive function.

Question 9: Which of the functions below is used to convert double value 8.93 to 9?

1. ceil()
2. top()

3. floor()
4. fabs()

Answer: ceil()

Question 10: When we execute the given program what will it print?

```
#include <stdio.h>
```

```
int main()
{
    int x= 3;
    switch(x)
    {
        case x+0+0: printf("value remains 3 itself");
        case x+0: printf("still value remains 3 itself");
        case x+2: printf("value will be 5");
        default: printf("get confused");
    }

    getch();

    return 0;
}
```

A. Compile time error
B. value remains 3 itself still value remains 3 itself
C. still value remains 3 itself
D. value remains 3 itself

Answer: Option A

Coding

Question - Display sequence of Fibonacci series until the number given by user and count total even number and odd numbers in that series expect zero. Fibonacci series should start with 1.

Total count of even numbers should be displayed in the first row and odd numbers should be displayed in next row

343

Number given by user for Fibonacci series should be greater than 5 and less than or equal to 20,

Otherwise display "INVALID INPUT"

If number given by user is space, character or empty display "INVALID INPUT"

The text message should be displayed in exact format as it is case sensitive.

In below example 2 is for count of even numbers that is (2,8) and 4 is count of odd number thats (1,1,3,5,13).

Example:

Input

7

Output

1 1 2 3 5 8 13

2

5

Code in C

```
#include <stdio.h>
int main()
{
    int num;
    int a=1, b=1, c;
    int odd = 2, even = 0;
    int i;
    scanf("%d",&num);
    if(num>=5 && num<=20)
    {
        printf("%d %d ",a,b);
        for(i=1; i<=num-2; i++)
        {
            c = a + b;
            a = b;
            b = c;
            printf("%d ",c);
            if(c%2==0)
            {
                even++;
            }
        }
    }
}

Question - Consider there are n positive integers representing total number of Trains running between Station $RS[0]$ and $RS[d-1]$. RS is the array containing Railway Stations in order of sequence of the stations located one after other. The d represents the total number of the stations. $RS[0]$ and $RS[d-1]$ are the stations at both ends. There is another array T of the size d which is equal to the size of RS . T represents the time in minutes between the last and current station. Array positions can be mapped for RS and T in such a way that the train will take time $T[k]$ to reach the station $RS[k]$ from station $RS[k-1]$.

N trains starts at $RS[0]$ at different timestamps represented by float value to indicate hour value before precision point and minute value after precision point. (11.30)

Values of RS and T are given as -

$RS[0] = \text{PANVEL}$ $T[0] = 0$

$RS[1] = \text{KHANDESHWAR}$ $T[1] = 4$

$RS[2] = \text{MANSAROVAR}$ $T[2] = 5$

$RS[3] = \text{KHARGHAR}$ $T[3] = 3$

$RS[4] = \text{BELAPUR}$ $T[4] = 4$

$RS[5] = \text{SEAWOOD}$ $T[5] = 5$

$RS[6] = \text{NERUL}$ $T[6] = 3$

Trains is set of values representing starting time (in float) for n number of trains running from PANVEL to NERUL, given as follows

Trains = [7.30,8.2,12.45,13.30,14.44,15.50,9.15,10.20,23.59,17.33,19.20]

Count the number of trains which are yet to arrive for current day at station where user is present at particular time.

Write code to return count of trains left for the day at station name and time entered by the user.

Note:- The time is represented in 24 Hour Fashion and assume that all trains start at station $RS[0]$.

Example 1:

Input Values

Enter current time (hour.min)float

11.20

['PANVEL', 'KHANDESHWAR', 'MANSAROVAR', 'KHARGHAR', 'BELAR', 'SEAWOOD', 'NERUL']

Numerical Ability

Question 1: In an examination, 80% students passed in Science, 70% in Mathematics and 60% in both Science and Mathematics. If 65 students failed in both subjects, what is the total number of students?

- a. 6500
- b. 3250
- c. 650
- d. 1300

Solution :- Option C

Question 2: Mr. Ramu invested Rs. 9000 at a certain rate of interest compounded annually for three years. If it amounts to Rs. 10,890 at the end of second year, what will be the interest for the third year?

- a. Rs. 990
- b. Rs. 1210
- c. **Rs. 1089**
- d. Rs. 1331

Answer: Option C

Question 3: If mean of 29 observations is 33 and on adding one more observation the new mean becomes 34. What is the value of 30th observation?

- a. 55
- b. 64
- c. 34
- d. 68

Answer : 63

Question 4: The median of the following data is _____

Class	0-10	10-20	20-30	30-40	40-50	50-60
Frequency	8	12	10	14	16	10

- a. 31.571
- b. 33.571
- c. 32.571
- d. 34.571

Solution:-

Question 5: If $x + y = 45$ and $x - y = 11$, what is the ratio of $x : y$?

- a. 28 : 17
- b. 25 : 24
- c. 17 : 28
- d. 23 : 26

Answer: Option A

Question 6: The length of a rectangle is 48 m and its perimeter is 150 m. What will be the perimeter of the square whose area is equal to this rectangle?

- A. 144 m
- B. 128 m
- C. 360 m
- D. 324 m

Answer: Option A

Question 7: The perimeter of a rectangular plot is 36 m, if the length is increased by 6 m and the breadth is decreased by 3 m, and the area of the plot remains the same, what is the length of the plot?

- A. 20 m
- B. 12 m
- C. 6 m
- D. 8 m

Answer:- Option C (6m)

Question 8: 80 kg of alloy X is mixed with 50 kg of alloy Y. If alloy X has lead and copper in the ratio 3:7 and alloy Y has lead and copper in the ratio 7: 3, what is the amount of lead in the new alloy?

- A. 24 kg
- B. 35 kg
- C. 56 kg
- D. 59 kg**

Answer: Option D

Question 9: A 2 meter broad walkway is built around a garden 18 meters long and 12 meters wide. What will be the area of the walkway?

- A. 136 m^2**
- B. 154 m^2
- C. 104 m^2
- D. 64 m^2

Answer: Option A

Question 10: The following table gives the percentage distribution of the population of four states A, B, C, and D based on the poverty line and on gender.

State	percent of population below poverty line	Population of Male and Female	
		Below Poverty line	Above Poverty Line
		M: F	M: F
A	40	3: 4	4: 5
B	35	5: 7	3: 5
C	28	1: 2	3: 4
D	40	4: 7	4: 3

If state A's female population of the below poverty line is 2,00,000, what is the total population of state A?

- A. 800000
- B. 925000
- C. 900000
- D. 875000**

Answer: Option D

Provide Options are wrong for this question

Question 11 - What is the value of $\sqrt{0.0016} + \sqrt{1.44} + \sqrt[3]{0.125} / \sqrt[3]{0.512}$?

- A. 0.99
- B. 2.49
- C. 0.97
- D. 1.02**

Answer - 1.865

Question 12: Mr. Raju travelled a certain distance at a certain speed. Had he moved 4 kmph faster, he would have taken 30 minutes less to cover the distance. If he had moved 2 kmph slower, he would have taken 30 minutes more to cover the distance. What was the distance travelled by him?

- A. 8 km
- B. 12 km**
- C. 4 km
- D. 9 km

Answer: Option B

Question 13: The population of a town is 1,21,000. If it increases at the rate of 10% per annum, what is the difference between the population 3 years hence and that of 2 years ago?

- A. 61055
- B. 62041
- C. 61051**
- D. 61251

Answer:- Option C

Question 14: A boat covers 56 km upstream in 7 hours and 48 km downstream in four hours. What is the speed of the boat in still water?

- A. 8 kmph
- B. 4 kmph
- C. 12 kmph
- D. 10 kmph

Answer: D (10 Kmph)

Question 15: What is the mean of the mode and the median on the following data?

12, 28, 26, 27, 17, 16, 22, 25, 15, 16, 11

- A. 17
- B. 16.5
- C. 16
- D. 16.3

Answer - Option C (16)

Question 16: When a commission of 12% is given on the marked price of a magazine, the publisher gains 20%. If the commission is increased to 23%, what will be the publisher's percentage gain?

- A. 7.5%
- B. 8%
- C. 6%
- D. 5%

Answer: D (5%)

Question 17: If A and B can do a piece of work in 24 days , B and C can do it in 40 days , while A and C can do it in 30 days, in how many days can A alone do it.

- A. 40 days
- B. 120 days
- C. 60 days
- D. 75 days

Solution :- B (120 days)

Question 18: If $-10.5 + \left\{ \frac{7}{2} - \left(\frac{5}{2} + 3.7 - x \right) \right\} \times 10.2 \div 2 = 281.73$, what is the value of x?

- A. 64
- B. 61
- C. 60
- D. 63

Answer: Option C

Question 19: The incomes of A and B are in the ratio of 8:5 and their expenditures in the ratio 13:7. If each save Rs. 3000 what is the expenditure of B

- A. Rs. 10000
- B. Rs. 16000
- C. Rs. 13000
- D. Rs. 7000

Answer: Option D

Question 20: If $(\sqrt{5} - \sqrt{3}) / (\sqrt{5} + \sqrt{3}) = a + b\sqrt{15}$, what is the value of $2a + 3b$?

- A. 11
- B. 10**
- C. 5
- D. 8

Answer: Option B

Question 21: A can finish a work in 16 days and B can finish the same work in 20 days. After A had worked for 4 days, B also joined with A to finish the remaining work. In how many days will the remaining work be finished?

- A. $8(8/9)$ days
- B. $8(1/9)$ days
- C. $6(2/3)$ days
- D. $6(1/3)$ days.

Answer: Option C $6(2/3)$ days

Question 22: A Shopkeeper sells one machine for Rs.990 at a profit of 10% and another machine for Rs. 1960 at a loss of 2%. What is his gain or loss percent?

Option

- a. $1\frac{1}{29}\%$
- b. $1\frac{19}{29}\%$
- c. $1\frac{11}{29}\%$

d. $1\frac{21}{29}\%$

Answer: Option D

Question 23: Sarita wants to give the stationary kit, which includes a pencil, an eraser and a sharpener to some kids in a village. She went to a wholesaler to purchase these items. The seller sells pencils in a package of 12, erasing in a packing of 18 and sharpeners in a packing of 10. She purchases the minimum number of packets of pencils, eraser and sharpeners so that a fixed number of kits can be prepared without any item being unused or short. What is the number of packets of pencils purchased by her?

Option

- a. 12
- b. 15
- c. 18
- d. 10

Answer: Option C

Question 24: Raju lends Rs.3000 to Bharath and a certain sum to charan at the same time at 6% per annum simple interest. If at 5 years, Raju altogether receives at Rs.1650 as interest from Bharath and charan, What is the sum lent to Charan?

Options

- a. Rs. 2750
- b. Rs.2500
- c. Rs.3250
- d. Rs. 3300

Answer:- Option b-2500

Question 25: What is the standard deviation of the data given below?
10, 28, 13, 18, 29, 30, 22, 23 25 and 32

- A. 7.7
- B. 7.0
- C. 49.0

D. 6.2

Answer: Option B

Question 26: The following pie chart shows the expenditure in percentage on various items and savings of a family during a month.

■ Education ■ Provision ■ Clothes ■ House Rent ■ Transport ■ Savings ■ Other

What is the monthly expenditure on education if the monthly expenditure on clothes is Rs 2400?

- A. Rs. 6000
- B. Rs. 4000
- C. Rs. 3500
- D. Rs. 3000**

Answer: Option D

Verbal Ability

Question 1: Experts suggest that it may take the development of multiple vaccines to begin the process of protecting the world's population from Covid- 19. Most of the current vaccine front-runners require two ___(1)___ that could possibly be administered annually. No vaccine is 100 percent effective, and once a vaccine is approved, there are still many ___(2)___ to overcome before a shot can be made widely available.

Blank 1: A- doses B- bouts C- spells D- circles

Blank 2: A- tracks B- jumps C- hurdles D- snags

- a. 1(C), 2(B)
- b. 1(B), 2(D)
- c. 1(D), 2(A)
- d. 1(A), 2(C)

Answer - D

Question 2: Dias, who knew farming intimately, came up with the ambitious goal of planting one million jackfruit trees across Sri Lanka. _____(1)_____ He visited villages to distribute the jackfruit seedlings and mailed seeds to far-flung corners in the country _____(2)_____ Today Dias is considered a national hero and like most Sri Lankan children, I first learned about Dias in a Sri Lankan textbook. His jackfruit campaign also helped establish food security in Sri Lanka during World War II, while nearby places such as Bengal and Vietnam experienced horrific famines in the 1940s.

Options:

P: The English rulers planned to kill Dias by poisoning him.

Q: A planter by trade, Dias imported jackfruit seeds from Malaysia and gathered healthy seeds for generations.

R: My parents had a nickname for me but I was too embarrassed to use it.

S: Over time, Dias' campaign paved the way to many successful jackfruit plantations across the country and earned him the heroic nickname of *Kos Mama*, or Uncle Jack.

- a. QP
- b. RP
- c. SR
- d. QS

Answer: D

Question 3- Choose the most APPROPRIATE word to complete this sentence correctly :

The doctor vowed to continue his research despite his earlier efforts being _____ by the senior management by the research facility.

- 1. Supported
- 2. Favored
- 3. Encouraged

4. Discouraged

Answer - D

Question 4: One part of the sentence below may contain an error, Identify the error. Choose no error if there is No Error.

The rein of the king was clearly coming to an end

Option

- a. The King
- b. The rein of**
- c. To an end
- d. Was clearly coming

Answer: The rein of

Question 5: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose the appropriate sentence. There will be one sentence which you do not need to use.

S1: India's rural districts, home to nearly 74% of India's population, accounted for 65% of all Covid-19 tests conducted in August, and 55% of them.

S2

S3

S4: This is the first time that the district-level officer on testing from across the country was made public.

Option

P: The government will start distributing Wheat and Ragi through the Public Distribution System in October.

Q: The government this week released in Parliament data on the number of covid-19 tests conducted at each of India's 734 districts in August.

R: Urban districts, on the other hand, are home to 14% of the population and accounted for nearly 22% for tests conducted in August with 28 positive% of the cases reported that month coming from them.

Answer: RQ

Question 6: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose the appropriate sentence. There will be one sentence which you do not need to use.

S1: Sleeping all night is great for most of our body--but not for your joints

S2:

S3:

S4: Rheumatologists recommend warming yourself with the heating pad, raising your home thermostat, or doing gentle hand exercise as soon as you can

P: Lack of movement during the night can have a walking up as a stiff as steel

Q: Keeping pills by your bed so you can take the morning medications immediately also helps.

R: Fortunately, there are ways to combat this problem

- QP
- PQ
- RP
- PR

Answer: B

Question 7: Read the passage below and answer the questions

Although China may not have deliberately created Covid-19, it is possible that its release was the result of a lab accident at the Wuhan Institute of Virology, which has been doing “gain-of-function” gene editing research on bat coronavirus. Sooner research modifies the genetic sequence of a virus to make it dead or more transmissible--- specifically transmissible between species. We may never know the truth of the virus origins. But, the Covid-19 pandemic has shown all countries what is possible. To decimate global economies without inviting a significant economic or geopolitical tool itself. So there are new dangers.

Gene editing has now made it possible to engineer viruses whose effects range from covid-19 to the bubonic plague. And the danger comes not only from governments Rogue. Scientists and biohackers have access to the same tools. This is why India must take the lead in developing bio defences. The dangers about gene editing are many and it is forecast that in an era of bioethicists and biohackers, we will have to make difficult choices about whether to restrict the Synthetic biology technologies making the manufacture of these viruses possible.

The danger is acute because in the near future we will routinely have our genetic material analysed with artificial modified genes (AI) and genomic data scientists will decipher the complex relationships between DNA and biological processes and find treatments for diseases. Later in this decade we will be able to download and “print” at home medicines, tissues and bacteria custom-designed to suit our DNA and keep us healthy.

What is the key theme of the passage above?

- a. The China launched a war against the world by releasing covid-19
- b. The cutting edge genetic editing and AI technology must be regulated under control to safeguard people and economies.
- c. That China made a lot of money by messing of economics of different countries and nation who were reeling under the Covid-19 crisis
- d. That India should be extra careful with genetical pool data as purely Arya and one that many Rogue scientists are waiting to liy them

Answer: The cutting edge genetic editing and AI technology must be regulated under control to safeguard people and economies.

Question 8: You are going to read a text about Mark Twain. Some sentences are missing from the text. Choose from the lust (A-C) the most appropriate sentence for each gap (1-2).

When Mark Twain proposed to Olivia Langdon, her father wanted to be sure of his good character. Since they had no friends in common, Twain offered the names of several friends he had made out west. All wote back condemning Twain as a louse and a freeloader , two predicted that he would fill a drunkard’s grave. (2) _____ “Then I’ll be your friend myself”. Langdon said. Langdon was right, for Twain proved to be a faithful and loving husband to Olivia.

- A. Langdon wrote to ask them what they thought of the match
- B. Twain took his pen name from an alert cry used on his steamboat - “by the mark, twain”.
- C. Twain bitterly remarked that apparently he didn't have any friends

continue to rise unchecked, the Arctic could be ice free in the summer as soon as the year 2040 as ocean and air temperatures continue to rise rapidly.

- A. More than a third of the remaining glaciers of the world would have melted by 2030.
 - B. As a result, glaciers are rapidly melting, calving off into the sea and retreating on land.
 - C. Human activities are at the root of this phenomenon.
-
- a. 1 (B), 2 (C)
 - b. 1 (A), 2 (B)
 - c. 1 (C), 2 (A)
 - d. 1 (C), 2 (B)

Answer - D

Question 12: The following three sentences can be revised into a better sentence. Choose the sentence that is the best revision:

He told us that he had read Milton. He had read it in a prose translation. He had read it when he was fourteen.

- A. He was fourteen when Milton's prose translation he had read.
- B. He told us he had read Milton in a prose translation when he was fourteen**
- C. When he read Milton prose translation, he told us he was fourteen
- D. He has read Milton at fourteen in a prose translation.

Answer - B

Question 13: One part of the sentence below may contain an error. Identify the part. If there's no error, mark 'No Error'

The challenge, after COVID - 19 vaccine is developed, will be to find a simplistic method of distribution that will benefit the largest number.

- a. No Error**
- b. The challenge, after COVID - 19 vaccine is developed,
- c. that will benefit the largest number.
- d. will be to find a simplistic method of distribution

Answer - A

Logical Ability

Question 1: Three statements are given followed by two conclusions. Consider the statements to be true events if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statement:

- A. Some doctors are musicians.
- B. Some dancers are signers
- C. All singers are musicians

Conclusion:

- I. All dancers are musicians
 - II. Some singers are doctors
-
- A. Only conclusion ii follows
 - B. Only conclusion i follows
 - C. Both conclusions i and ii follows
 - D. Both conclusion i and ii do not follows**

Answer: Option D

Question 2: Select the correct option based on the following statements

- A. If data in statement I alone is sufficient to answer the question
- B. If data in statement II alone is sufficient to answer the question
- C. If data of both either statement I alone or statement II alone are sufficient to answer the question.
- D. If data in both statements I and II together are necessary to answer the question.

- I. X is older than Y, Z is younger than W
- II. W is older than Z, X is younger than Z.

Who is younger among W, X, and Z?

- A. C
- B. B
- C. D
- D. A

Answer:- Option C

Question 3: Select the correct option based on the following statements

- A. If data in statement I alone is sufficient to answer the question
- B. If data in statement II alone is sufficient to answer the question
- C. If data of both either statement I alone or statement II alone are sufficient to answer the question.
- D. If data in both statements I and II together are necessary to answer the question.

- I. Point S is towards north of point T and point U is 20 m east of point S.
- II. Point V is towards south-west of point S and point S is 10 m from point T

What is the distance between point T and U?

- A. D
- B. C
- C. A
- D. B

Answer: Option A

Question 4: If 'AxB' means 'A' is the grandfather of 'B', 'A-B' means 'A' is the son of 'B', 'A/B' means 'A' is the wife of 'B', 'A+B' means 'A' is the father of 'B' and 'A*B' means 'A' is the brother of 'B' then how is 'A' related to 'G' in $A / B \times D - C * F + G$?

- a. **Grand-Mother**
- b. Grand-son
- c. Grand-father
- d. Grand-daughter

Solution:- A

Amisha wanted to throw a reception party. The expenditure distribution of the party was 30% on Catering, 25% on Decoration, 20% on Music System, 15% on Photography & Videography and 10% on Invitations.

The total expenditure was Rs. 10,59,600

How much money was spent on the music system?

- a. Rs. 211,920
- b. Rs. 27,830
- c. Rs. 105,960
- d. Rs. 264,900

Answer: Option A

Question 6:- Choose the box that is similar to the box formed by the given sheet of paper(X).

Solution:- Option C

Question 7:- Based on the following data,answer the questions:

Amisha wanted to throw a reception party. The expenditure percentage distribution of the party was 30% on Catering,25% on Decoration,20% on music system,15% on photography & Videography and 10% on invitations.

The total expenditure was Rs. 1,059,600.

How much money was spent on decoration in the party ?

A-Rs.27830

B-Rs.264,900

C-Rs.158,940

D-Rs.42,384

Answer:-Option B

Question 8:- Which figure will come next in the following ?

Solution:- Option C

Question 9: Complete the given puzzle.

Which of the given options will replace the question mark below?

10,14,19,26,35,48,?

a. 57

- b. 69
- c. 55
- d. 63**

Answer: Option D

Question 10: If 'AxB' means 'A' is the daughter of 'B'. 'A-B' means 'A' is the mother of 'B', 'A/B' means 'A' is the wife of 'B', 'A+B' means 'A' is the father of 'B' and 'A*B' means 'A' is the brother of 'B' then how is F related to 'D' in $F \times E * B + C * D$?

- a. Uncle
- b. Cousin brother
- c. Cousin sister**
- d. Aunt

Answer- Option C

Question 11: Two statements are given followed by two conclusions I, II and III. Consider the statements to be true events if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements provided that Amit likes Apples.

Statements:

- A. Amit likes apples, then Anu likes apples.
- B. Anu likes apples then simran likes mangoes.

Conclusion:

- I. Anu likes apples.
 - II. Simran likes apples.
 - III. Simran likes mangoes.
-
- a. Only conclusion I & II follows.
 - b. Only conclusion I & III follows.**
 - c. Only conclusion II follows.
 - d. Only conclusion I follows.

Answer : Option B

Question 12- Two statements are given followed by two conclusions I and II. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. All Cats are Lions.
- B. Some Lions are Tiger.

Conclusions:

- I. Some Tigers are Cats.
- II. Some Lions are Cats .

- 1. Neither conclusion I nor II follows.
- 2. Only conclusion II follows
- 3. Both conclusion I & II follows
- 4. Only conclusion II follows

Solution:- Option 1

Question 13 - Choose the pair similar to the following:

MDXF: OBZD

- 1. CLPQ: MXCF
- 2. BMXT: COZW
- 3. ILPR: KNRT
- 4. SGFN: UEHL

Answer - Option 4

Question 14 - Find the wrong term in the given series -

CIDJ, EKFL, GMHO, IOJP, KQLR

- 1. EKFL
- 2. KQLR
- 3. IOJP
- 4. GMHO

Solution:- D (GMHO)

Question 15: P, Q, R, S, T, U & V are sitting in a line facing north but not in the same order Two persons are sitting between P and Q. U is sitting between Q and S. V is at the west end. T is in the middle and S is at the east end. P is sitting just right of V. What is the position of R from left?

1. Sixth
2. First
3. Third
4. Fourth

Solution:- Third (C)

Question 16: Which letter will come in the place of question mark?

- A. N
- B. P
- C. R
- D. U

Answer: Option 3

Question 17: Which of the following elements satisfies the Venn diagram?

- A. Quadrilaterals, Square, Triangle
- B. Colour, Plate, Fork**
- C. Doctor, Patient, Nurse
- D. Transport, Bus, Cycle

Answer: Option B

Question 18: Nehal, Iqbal, Ronit, Malini and Harbhajan participate in any one of the five activities, i.e., Quiz, singing, dance, debate and mimicry. Ronit Participates in singing, Harbhajan doesn't participate in Debate and Mimicry, Malini doesn't participate in mimicry. Iqbal participates in Quiz. Who Participates in Debate?

- a. Nehal
- b. Nehal or Malini
- c. Malini
- d. Can't be determined

Solution:- Malini (C)

Question that is asked is wrong

Question 19 - In the following diagram, the triangle stands for 'males' the circle stand for 'doctor', the rectangle stands for 'government employed', the hexagon stands for 'corona warriors'. The number in different segments show the number of person for that segment.

How many government employed doctors are either corona warriors or males or both.?

- A. 35
- B. 73
- C. 22
- D. 38

Question 20: Given below is a question followed by two statements, I and II each containing

What is the age of Sumit? Statement:

- I: Sumit is five years younger than Amit, who is double the age of Prateek
- II. Prateek is 10 years older than Ravi whose age is 22 years.

- E. The combination of both the statements I and II are necessary.**
- F. Statement II alone is sufficient
- G. Statement I alone is sufficient
- H. The combination of both the statements I and II are not sufficient.

Answer - Option A.

Question 21. Study the given information carefully.

For a job selection in a company the following conditions need to be fulfilled.

The candidate must:

1. be at least 23 years and at most 28 years as on 01 December 2020.
2. have at least 65% marks in written exam and 40% marks in interview.
3. possess a graduation degree with minimum 60% marks.
4. have one-year work experience.

In case a candidate who fulfils all conditions except (iv) but possess 80% marks in graduation then case is to be referred to manager.

In the following question, details of candidates are given. Select the appropriate option accordingly.

Anshika was born on 07 March 1997. She completed her graduation with 75% marks. She has a work experience of 2 years. She scored 70% marks in written exam and 55% marks in interview.

- A. If candidate is to be selected
- B. If data is insufficient to conclude
- C. If candidate is to be rejected
- D. If case is to be referred to manager

Answer: Option A

Programming Logic

Question 1: Which of the following is not a technique of dynamic memory allocations?

- A. realloc()
- B. calloc()
- C. malloc()
- D. dmalloc()

Answer: Option D (dmalloc())

Question 2: Which of the following statements about constructor is NOT true?

- A. Constructor has the same name as the class name
- B. We can overload constructor in derived class
- C. We can define more than one constructor with different signature in the same class
- D. Constructor has no return type

Answer: Option B

Question 3: When the given code is executed, what will be the output that is printed?

```
#include <stdio.h>
#define SQUARE(s)s*s

int main()
{
    int a=3;
    printf("%d",SQUARE(a+2));

    return 0;
}
```

Answer: 11

Question 4: What will be the output of the code below?

```
import java.util.*;
public class Main
{
    public static void main(String...a)
    {
        Map<Integer, String>tempMap= new HashMap<Integer, String>();
        tempMap.put(null, "Java");
        tempMap.put(1, "Java EE");
        tempMap.put(1, "Advance Java");
        System.out.println(tempMap.get(1));
    }
}

1)
```

Answer: Advance Java

Question: A bus conductor has a bunch of coins, each coin have different value. New coins are added ahead of the bunch. Only coins are issued to the customer from top side of the bunch. Developer X wants to implement this in the application by the help of data structure. Which data structure is the best suitable for implementation of current logic ?

- a. Trees
- b. Graphs
- c. Queues
- d. Stack

Answer : Option D (Stack)

Question 5: Glass box testing is also known as _____

- a. Black Box Testing
- b. White Box Testing
- c. Sanity Testing
- d. Smoke Testing

Answer : Option B

Question 6 : What is the full form of ROI in context of Software Development ?

- a. Rate of Integration
- b. Rationality of internet
- c. Reduction of investment
- d. Return on investment

Answer : Option D

Question 7: Specify the precise answer for Overloading of destructor.

- 1) Partially Possible
- 2) Not Possible
- 3) Possible
- 4) None of the given options

Answer: Not possible

Question 8: What would be the output of the below code ?

```
#include<iostream>
using namespace std;
int main()
```

```
{
    int num=5;
    num = printf("Apple Fruit");
    printf("%d", num);
    return 0;
}
```

Answer : AppleFruit11

Question 9: Match the following pairs

Real time usage terms		Best suited underlined data structures	
A	Network Data model	1	Tree
		2	Queue
B	Relational Database Management System	3	Array
		4	Graph

- 1) A-4, B-3
- 2) A-3, B-2
- 3) A-3, B-1
- 4) A-2, B-4

Answer: A-4, B-3.

Question : 1

Take a single line text message from user. Separate the vowels from the text. Find the repeating occurrences of vowels from the text message.

Display count of which vowels has repeated how many times.

Display a new text message by removing the vowels characters as output.

Display the output in the exact format shown below in example, after displaying count of characters on next lines display the new text message on next line.

“Hll wlcm” is the next text message.

If text message entered by user does not contain any vowels then display 0 as output.

If text message entered by user contain any numeric value then display 0 as output.

If user entered blank or empty text message display “INVALID INPUT” as output. Message “INVALID INPUT” is case sensitive. Display it in exact format given

Example 1:

Input:

Hello welcome

Output

a : 0

e : 3

i : 0

o : 2

u : 0

Hll wlcm

Example 2:

Input:

Hll wlcm

Output

0

Code in C

```

Question-2

Indian Premier League IPL Cricket Matches are organized for a few Days. The problem is to prepare Timetable from Day1 to Day n, where n depend on the teams participating. Set A represent the names of teams participating. Set A will be input from the user. Do not show input user message directly accept the teams names as string values and enter q to stop taking inputs.

Write a code to display Pairing of Teams and possible number of matches possible excluding Semi Final and Final.

Note: Minimum 3 Teams are required and maximum limit of Teams is 12.

Example 1

Input Values

CHENNAI

MUMBAI

KOLKATA

PATNA

Q

Output Values

TOTAL MATCHES: 6

CHENNAI-VS- MUMBAI

CHENNAI-VS-KOLKATA

Total number of students = 4800

The ratio of boys and girls in school A and E is 11: 13 and 6: 5 respectively and 55% of the number of students in school D are boys. Then the difference between the total number of boys in A and E, and the number of girls in D is?

- A. 36
- B. 24**
- C. 30
- D. 32

Answer : Option B

Question 2: The mean of the median, the mode and the range of the data:

15, 10, 17, 13, 25, 17, 11, 18, 14, 19, 12, 20 is:

- A. 15
- B. $16\frac{2}{3}$
- C. 16**
- D. $15\frac{1}{3}$

Answer: Option C

Question 3:- Sarita Wants to gift the stationary kit. Which includes a pencil, an eraser and a sharpener to some kids in her village. She went to a wholesaler for purchase these items. The seller sells pencils in packing of 12. Erasers in a packing of 18 and Sharpener in a packing of 10. She purchases the minimum number of packet of pencils, eraser and sharpener so that affix number of kits can be prepared without any item being unused or short. What is the number of packet of pencils purchased by her ?

- A. 10
- B. 12
- C. 15
- D. 18**

Answer: Option D

Options Provided are wrong

Question 4:- The ratio of alcohol and water in vessels A and B are 3:7 and 4:1 respectively. Five liters and $7\frac{1}{2}$ liters solutions from vessels A and B respectively are mixed in vessels in C. What is the ratio and alcohol in solution in C ?

- A- 18:7
- B- 20:7
- C- 7:18
- D- 9:20

Answer: 3:2

Question 5: The value of $\frac{(2.4)^2 + (1.5)^2 + 3.6}{(2.4)^4 + (1.5)^4 + (3.6)^2}$ lies between?

- A. 0.1 and 0.3**
- B. 0.3 and 0.5
- C. 0.7 and 0.9
- D. 0.5 and 0.7

Answer: Option A

Question 6: A trader sells articles X and Y for INR 480 each with no loss or profit in the whole transaction. If A sold at $16\frac{2}{3}\%$ loss, then B sold at a profit of

- A. 20%
- B. 25%**
- C. $16\frac{2}{3}\%$
- D. 24%

Answer: Option B

Question 7: Pipes A and B can fill a tank in 10 minutes and 20 minutes respectively. Whereas pipe C alone can empty a full tank in $12\frac{1}{2}$ minutes. A and C are opened together at 8:00 am. After half an hour, A is turned off and B is opened, while C remains open right from 8 am. When will the tank be emptied

- A. 9:10am
- B. 8:45 am
- C. 9:00 am
- D. 8:50 am**

Answer: Option D

Question 8: What is the mean marks of students for the following data? (Nearest to an integer)

Marks	0 and above	10 and above	20 and above	30 and above	40 and above	50 and above
No. of Students	37	34	29	22	12	0

- A. 23
- B. 24
- C. 27
- D. 31**

Answer: Option D

Question 9: Let x be the upper limit of the modal class and y be the class mark of the median class of the following data:

Class	10-15	15-20	20-25	25-30	30-35	35-40
Frequency	8	12	10	11	13	6

What is the value ($x - y$)?

- A. 10.5
- B. 12.5**
- C. 7.5
- D. 15.5

Answer: Option B

Question 10: The speed of a boat in still water 9 times the speed of the stream. The boat travels a distance of 54km upstream and the same distance downstream and it takes 4 hours 3 minutes for the whole journey. The speed of the boat in km/hr while going upstream is,

- A. 20
- B. 27
- C. 24**
- D. 18

Answer: Option C

Question 11: If A is 20% less than B, C is 20% more than D and D is 25% less than A, Then,

- A. $27B = 40C$
- B. $25C = 18B$**

- C. $19C = 25B$
D. $35B = 27C$

Answer: Option B

Question 12: The value of $(\frac{3}{4} \div 2 \text{ of } \frac{2}{31} - \frac{5}{7} \div 2 \frac{2}{3} \times 7 \frac{3}{10}) * (3 \frac{1}{5} \div 4 \frac{1}{2} \text{ of } 5 \frac{1}{3})$ is

- A. $18/35$
B. $9/7$
C. $2/15$
D. $7/10$

Answer: Option A

Question 13: If $(x + 10)\%$ of 240 is 60% more than $x\%$ of 180, then 15% of $(x+20)$ is what percent less than 25% of x ?

- A. $19\frac{1}{21}$
B. 15
C. $15\frac{1}{2}$
D. 16

Answer : Option D

Solution:- $(x+10)\%$ of 240 = $x\%$ of 180 + {60 % of $180x/100$ }

solving this to get

$$x = 50$$

$$15\% \text{ of } (x+20) = 25\% \text{ of } x - \{y\% \text{ of } 25x/100\}$$

apply x value here, to get y value

$$15\% \text{ of } (50+20) = 25\% \text{ of } 50 - \{y\% \text{ of } (25*50)/100\}$$

$$10.5 = 12.5 - \{y\% \text{ of } 12.5\}$$

$$\{y\% \text{ of } 12.5\} = 2$$

$$y * 12.5/100 = 2$$

$$y = 200/12.5$$

$$y = 16$$

Question 14: Study the table and answer the question.

Number of cars sold by dealers A, B, C, D, & E in the first 5 months of 2019.

Month/ Dealer	A	B	C	D	E
January	396	309	386	400	389
February	405	402	388	395	384
March	403	395	424	387	396
April	398	398	480	378	482
May	382	404	394	405	400

The total number of cars sold by dealer A in April and May and by dealer C in January and March is what percent more than the total number of cars sold by dealer B in February and April and by dealer E in May?

- a. 24.5
- b. 30.6
- c. 40.8
- d. 32.5

Answer: Option D

Question 15: A certain sum amounts to INR 9799 in 3 years and to INR 12464 in 8 years at a certain rate percent per annum. What will be the amount (in rupees) of the same sum in 5 years at double the earlier rate, at simple interest?

- a. 12840
- b. 12530
- c. 13500
- d. 12960

Question 16: A and B can complete a certain task in 45 days and 60 days, respectively. Both worked together for 15 days, then B left. The remaining task was completed by A and C together in next $7\frac{1}{2}$ days. In how many days can C alone do 50% of the same task?

- A. 30
- B. 20**
- C. 15
- D. 40

Answer: Option A

Question 17: A certain loan was returned in two equal annual installments of INR 8820 each and the rate of interest was 5% compounded annually. The interest (in rupees) paid in this scheme was?

- A. 1260
- B. 1200
- C. 1320
- D. 1240**

Answer: Option D

Question 18 : A circle is inscribed in an equilateral triangle of side 12 cm. What is the area (in cm^2) of the square inscribed in the circle?

- A. $30\sqrt{3}$
- B. 30
- C. $24\sqrt{3}$
- D. 24**

Answer: Option D

Question 19: If the variance of $5x_1 + 9, 5x_2 + 9, \dots, 5x_n + 9$ is 225, then the standard deviation of $9x_1 - 5, 9x_2 - 5, \dots, 9x_n - 5$ is:

- A. 25
- B. 27
- C. 23
- D. 18**

Answer:

Question 20: Three years ago, the ratio of ages of A and B was 7:1, After three years from now, the ratio of their ages will be: 4:1. What is the difference between their ages (in years) after seven years from now?

- A. 28
- B. 42
- C. 36**
- D. 32

Answer: Option C

Question 21: A train travelling at 79 km/h crosses a man, going in the same direction at 7 km/h, in 12 seconds. If the same train crosses a woman coming from the opposite direction, in 10 seconds then the speed (in km/h) of the woman is?

- A. 7.4**
- B. 6.6
- C. 5.8
- D. 5.2

Answer: Option A

Question 22: A shopkeeper buys goods at 30% discount on the marked price. He resets the marked price and sells them at $21\frac{1}{4}\%$ discount on the new marked price and gains 25% profit. By what percent is the new marked price more than the original marked price?

- A. $11\frac{1}{9}$**
- B. $11\frac{1}{4}$
- C. $9\frac{3}{4}$
- D. $10\frac{5}{3}$

Answer: Option A

Question 23: The sum of the height and the radius of a solid right circular cylinder is 41 cm. If its total surface area is 2706 cm^2 , then its volume (in cm^3) is closest to (Take $\pi = \frac{22}{7}$)

- A. 10584
- B. 10568**
- C. 9568
- D. 9584

Answer: Option B

Question 24: The ratio of incomes of X and Y in 2018 was 3:4. The ratio of their individual incomes in 2018 and 2019 were 4:5 and 5:8 respectively. If their total income in 2019 was INR 657720, then the income (in rupees) of X in 2019 was?

- A. 254000
- B. 245000
- C. 194400
- D. 243000**

Answer: Option D

Question 25: In a competitive exam, 5 marks are awarded for every correct answer and for every wrong answer, 2 marks are deducted. Sathwik scores 32 marks in the examination. If 4 marks had been awarded for each correct answer and 1 mark had been deducted for each incorrect answer, Sathwik would have scored 34 marks. If Sathwik attempted all the questions, how many questions were there in the test ?

- A. 14
- B. 12
- C. 20
- D. 26**

Answer: Option D

Option are given wrong in the exam for the below question

Question 26 : If $\left[\sqrt{1 + \frac{\sqrt{3}}{2}} + \sqrt{1 - \frac{\sqrt{3}}{2}} \right] \times \frac{5 + 2\sqrt{3}}{7 + 4\sqrt{3}} = a + b\sqrt{3}$, then what is the value of (a + 2b)?

- A. 4
- B. 13
- C. 3
- D. 9

Answer: -1

Verbal Ability

Question 1. Read the following passage and fill in the blanks by selecting the most appropriate option

The most important things are hardest to say. They are the things you get (1) _____ of, because words diminish them. World shrinks things that seemed (2) _____ when they are in your head, to no more than a living size when they are brought out.

Options

Blank 1

- A. Ashamed

- B. Sly
- C. Secret
- D. Massive

Blank 2

- A. Negligible
 - B. Limitless
 - C. Supporting
 - D. Vast
-
- a. (1) - B, (2) - D
 - b. (1) - A, (2) - B**
 - c. (1) - A, (2) - C
 - d. (1) - C, (2) - D

Answer - B

Question 2: One part of the sentence below may contain an error. Identify the part:

She soon realize / that cycling up the hill / needed tremendous / strength in the upper and lower legs.

- A. Strength in the upper and lower legs.
- B. She soon realize**
- C. That cycling up the hill
- D. Needed tremendous

Answer: B

Question 3: Identify the segment in the given sentence that contains a grammatical error/

Around / twelve hundreds / families live / in this residential complex.

- A. Families live
- B. Twelve hundreds**
- C. Around
- D. In this residential complex

Answer - B

Question 4: For the four sentences (S1 to S4) in the paragraph below, sentences S1 and S4 are given. From the options P,Q, R, choose the appropriate sentences for S2 and S3.

S1: Media has now reincarnated itself into a ‘public court’ and started interfering with court proceedings.

S2:

S3:

S4: Thus, building public prejudices that can sometimes influence the process of justice and deprive an accused the rights to a free and fair trial.

P: Media trial is basically adjudication by media before or after the verdict of the court that has become a trend to increase circulation or TRPs of newspapers and news channels

Q: Media trials are common place now, with journalists conducting separate investigations and building opinion for or against an accused even before the court takes cognizance

R: It completely overlooks the vital gap between an accused and a convict, putting at stake the principles of ‘innocent until proven guilty’

- A. RP
- B. PR
- C. RQ
- D. QP

Answer: RQ

Question 5: You are going to read a text about telecommuting. Some sentences are missing from the text. Choose from the list (A - C) the most appropriate sentence for each gap. There is one extra sentence that you do not need to use.

When you telecommute, you work outside of an organization’s brick and mortar location.

_____1_____ Many industries - including sales, publishing, customer service and marketing --- offer telecommuting jobs. Today even doctors and lawyers have begun working from home. _____2_____ while others may work remotely for part of the week and go into the office for the reminder of the week.

- A. Access to Wi-Fi can help make communications virtually seamless
- B. You usually use technology to help you do your job and connect with your employer and employees
- C. However, there are some offices where employees telecommute full time.

- a. (1) - A , (2) - B
- b. (1) - B , (2) - A**
- c. (1) - B , (2) - C
- d. (1) - A , (2) - C

Answer - B

Question 6: Read the passage and answer the questions:

“He no longer dreamed of storms, not of women, nor of great occurrences, nor of great fish, nor lights, nor contests of strength, nor of his wife. He only dreamed of places now and of the lions on the beach.” They played like young cats in the dusk and he loved them as he loved the boy.” - The old Man and the Sea.

Since the publication of The Old Man and the Sea, there has been much debate surrounding the story's symbols. Does the old man represent the author nearing the end of his career? Do the vicious sharks stand for cruel literary critics for the inevitably destructive forces of nature? While most readers agree that, as a parable, The Old Man and the Sea addresses universal life, the image of the lions playing on the African beach, which is presented three times in the novel, remains something of an enigma. Like poetry, the lions are supremely suggestive without being tethered to a single meaning. Indeed, the only certainty about the image is that it serves as a source of comfort and renewal for Santiago.

This passage, which describes Santiago's dreams on the night before he sets out for his fishing expedition (the first day that the narrative covers), simultaneously confirms and moves beyond Hemingway's immediately recognizable vision of the universe. Hemingway made his career telling stories about ' great occurrences' “ great fish” and “ contest of strength”. The fact that Santiago no longer dreams of any of these makes him unique among Hemingway's heroes. Of course, by dreaming of lions he is still in a recognizably 'Hemingway - esque' world, but the lions here are at play and thus suggest a time of youth and ease. They are also linked explicitly to Manolin, a connection that is made apparent at the end of the novel as the boy watches over his aged Friend as Santiago's dream of the lions returns.

What kind of allegory does “the Old Man and the Sea” address?

- a. It describes the spare story of the trajectory of the life of a man who does not receive God's blessing
- b. It address universal truths of life through symbolic representation**
- c. It expresses Ernest Hemingway's personality as a believer

- d. It tells the story of a poor fisherman's life in Africa

Answer - B

Question 7: Read the passage and answer the questions:

“He no longer dreamed of storms, nor of women, nor of great occurrences, nor of great fish, nor lights, nor contests of strength, nor of his wife. He only dreamed of places now and of the lions on the beach.” They played like young cats in the dusk and he loved them as he loved the boy.” - The old Man and the Sea.

Since the publication of *The Old Man and the Sea*, there has been much debate surrounding the story's symbols. Does the old man represent the author nearing the end of his career? Do the vicious sharks stand for cruel literary critics for the inevitably destructive forces of nature? While most readers agree that, as a parable, *The Old Man and the Sea* addresses universal life, the image of the lions playing on the African beach, which is presented three times in the novel, remains something of an enigma. Like poetry, the lions are supremely suggestive without being tethered to a single meaning. Indeed, the only certainty about the image is that it serves as a source of comfort and renewal for Santiago.

This passage, which describes Santiago's dreams on the night before he sets out for his fishing expedition (the first day that the narrative covers), simultaneously confirms and moves beyond Hemingway's immediately recognizable vision of the universe. Hemingway made his career telling stories about 'great occurrences' "great fish" and "contest of strength". The fact that Santiago no longer dreams of any of these makes him unique among Hemingway's heroes. Of course, by dreaming of lions he is still in a recognizably 'Hemingway - esque' world, but the lions here are at play and thus suggest a time of youth and ease. They are also linked explicitly to Manolin, a connection that is made apparent at the end of the novel as the boy watches over his aged friend as Santiago's dream of the lions returns.

Which imagery/ description in the book is inexplicable, according to many readers?

- a. The description of African lions playing on the beach
- b. The description of rabid sharks
- c. The descriptions of Santiago's sailing
- d. The description of the boat

Answer - A

Question 8: Read the passage and answer the questions:

“He no longer dreamed of storms, not of women, nor of great occurrences, nor of great fish, nor lights, nor contests of strength, nor of his wife. He only dreamed of places now and of the lions on the beach.” They played like young cats in the dusk and he loved them as he loved the boy.” - The old Man and the Sea.

Since the publication of *The Old Man and the Sea*, there has been much debate surrounding the story's symbols. Does the old man represent the author nearing the end of his career? Do the vicious sharks stand for cruel literary critics for the inevitably destructive forces of nature? While most readers agree that, as a parable, *The Old Man and the Sea* addresses universal life, the image of the lions playing on the African beach, which is presented three times in the novel, remains something of an enigma. Like poetry, the lions are supremely suggestive without being tethered to a single meaning. Indeed, the only certainty about the image is that it serves as a source of comfort and renewal for Santiago.

They are also linked explicitly to Manolin, a connection that is made apparent at the end of the novel as the boy watches over his aged Friend as Santiago's dream of the lions returns.

Which themes were Hemingway's favourites?

- a. Moral science, animal life and nature.
- b. Great science, huge fish and challenges of might.**
- c. History, adventure and exploration
- d. Love, relationships and tragedy

Answer: B

Question 9: Read the passage and answer the questions:

“He no longer dreamed of storms, not of women, nor of great occurrences, nor of great fish, nor lights, nor contests of strength, nor of his wife. He only dreamed of places now and of the lions on the beach.”

They played like young cats in the dusk and he loved them as he loved the boy.” - The old Man and the Sea.

Since the publication of *The Old Man and the Sea*, there has been much debate surrounding the story's symbols. Does the old man represent the author nearing the end of his career? Do the vicious sharks stand for cruel literary critics for the inevitably destructive forces of nature? While most readers agree that, as a parable, *The Old Man and the Sea* addresses universal life, the image of the lions playing on the African beach, which is presented three times in the novel, remains something of an enigma. Like poetry, the lions are supremely suggestive without being tethered to a single meaning. Indeed, the only certainty about the image is that it serves as a source of comfort and renewal for Santiago.

This passage, which describes Santiago's dreams on the night before he sets out for his fishing expedition (the first day that the narrative covers), simultaneously confirms and moves beyond Hemingway's immediately recognizable vision of the universe. Hemingway made his career telling stories about 'great occurrences' "great fish" and "contest of strength". The fact that Santiago no longer dreams of any of these makes him unique among Hemingway's heroes. Of course, by dreaming of lions he is still in a recognizably 'Hemingway - esque' world, but the lions here are at play and thus suggest a time of youth and ease. They are also linked explicitly to Manolin, a connection that is made apparent at the end of the novel as the boy watches over his aged Friend as Santiago's dream of the lions returns.

What characteristic makes Santiago an atypical hero of Hemingway's?

- a. Santiago is only thinking of great occurrences
- b. Santiago is only thinking of women and huge tests of strength
- c. Santiago is only thinking of great fishing and expeditions
- d. Santiago only dreams of a softer and gentler past, which was of youthful play.**

Answer - D

Question 10: Identify the segment in the sentence that contains a grammatical error.

Thanks God, / no one / was seriously hurt/ in the accident.

- a. Thanks God,**
- b. Was seriously hurt
- c. No one
- d. In the accident

Answer: A

Question 11: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, and R choose the appropriate sentences for S2 and S3 respectively.

S1: Proofreading is the final step of the writing process.

S2:

S3:

S4: If you jump right into proofreading, you will tend to read what intended to write but not what actually appears on the page.

Options:

P: We encourage you to never proofread right after you complete a draft.

Q: My sister used to read physics texts.

R: Give yourself some time to clear your hand.

- a. **QP**
- b. RP
- c. RQ
- d. PR

Answer: QP

Question 12: Choose the most appropriate word to complete this sentence correctly.

The TV show ‘ The Good Doctor’ is about an autistic surgeon, who is a wizard at surgery and _____ solving all difficult medical crises within minutes.

- a. Is expert for
- b. **Is capable of**
- c. Has mastery to
- d. Incapable of

Answer: Is capable of

Question 13: Fill in the blanks in the sentences below with suitable options.

It's no longer clothes and or books or makeup items that people want to buy online. Even when it comes to buying the everyday groceries, people are _____1_____ turning online amid the pandemic. A recent study indicates that online grocery is likely to _____2_____ more than two-fold as more shoppers are now ordering items online.

Blank 1) A- occasional B- increasingly C- rare D- excessively

Blank 2) A- flourishing B- expansion C- reduce D- grow

- a. 1(B), 2(D)
- b. 1(A), 2(B)
- c. 1(C), 2(C)
- d. 1(D), 2(A)

Answer: 1(B), 2(D)

Question 14: Choose the most appropriate words to complete this sentence correctly.

If I had seen the painting on display before the auction, I would, _____ have bid for it.

- a. **Without a doubt**
- b. Most unlikely
- c. Refused to
- d. Definitely thinking

Answer: Without a doubt

Question 15 : For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q, and R choose the appropriate sentences for S2 and S3 respectively.

S1: INS Vikrant is the first artifact carrier to be designed by the Directorate of Naval Design of the Indian Navy.

S2:

S3:

S4: Due to this, it became the first ship to be built completely using domestically produced steel.

Options:

P: The keel for Vikrant was laid by the Defence Minister at the Cochin Shipyard on 28th February 2009. 400

d. Acme of prediction

Answer: Acme of prediction

Questions 18 : The following three sentences can be revised into one better sentence. Choose the sentence that is the best revision

I was at the fair. I got lost . I got scared

- a. I am lost at the fair so I am too scared.
- b. I went to fair and got scared as I was lost
- c. I am scared after I am lost at the fair
- d. I got lost at the fair and was scared

Answer: I went to fair and got scared as I was lost

Questions 19 : The following two sentences can be revised into one better sentence. Choose the sentence that is the best revision

There are two main warring factions. Their violent methods are not different enough

- a. The two warring factions have too small a difference in violent methods
- b. The differences are the same between the two warring factions
- c. The two main warring factions have the same violence
- d. The violent methods of the two main warring factions are not sufficiently different.

Answer: The violent methods of the two main warring factions are not sufficiently different.

Question 20 : Aisha had been very successful managing her team in Edinburgh and was asked by the company to lead a remote team for an important two- year project. Keen to demonstrate her leadership abilities to the head office. Aisha got her team members together for a remote meeting. But right from that first meeting , she realized that this was going to be a different challenge. We have copied this from Prep Insta, forgive us for that

1. _____ Lucia kept asking about really specific details while Aisha was hoping to use the meeting to get to know the team members and identify priorities. Archies and Lucia kept accidentally talking at the same time, and when they didn't speak, there was an uncomfortable

silence. Valentina hardly said a word. _____ Without these visual clues, Aisha had no idea whether people were interested, lost, confused or bored.

Option

- No one had their cameras on, so there was none of the usual communication through body language and facial expressions.
- Compared to a face-to-face meeting the remote team is not preferred by all the managers
- For a start, Archie was late for the meeting by about 15 minutes because of the ‘technical problems’.

- A,C
- B,A
- A,B
- C,A

Answer - C, A

Question 21 : Read the passage and answer the following questions:

“Sometimes fate is like a small sandstorm that keeps changing directions. You change direction but the sandstorm chases you. You turn again, but the storm adjusts. Over and over you play this out, like some ominous dance with death just before dawn. Why? Because this storm isn't something that blew in from far away, something that has nothing to do with you. This storm is you. Something *inside* of you. So all you can do is give in to it, step right inside the storm, closing your eyes and plugging up your ears so the sand doesn't get in, and walk through it, step by step. There's no sun there, no moon, no direction, no sense of time. Just fine white sand swirling up into the sky like pulverized bones. That's the kind of sandstorm you need to imagine.

And you really will have to make it through that violent, metaphysical, symbolic storm. No matter how metaphysical or symbolic it might be, make no mistake about it: it will cut through flesh like a thousand razor blades. People will bleed there, and *you* will bleed too. Hot, red blood. You'll catch that blood in your hands, your own blood and the blood of others.

And once the storm is over you won't remember how you made it through, how you managed to survive. You won't even be sure, in fact, whether the storm is really over. But one thing is certain. When you come out of the storm you won't be the same person who walked in. That's what this storm's all about.”

Which word is closest in meaning to the below word?

SYMBOLIC

- a. **Significant**
- b. Copycat
- c. Emblematic
- d. Thematic

Answer - A

Question 22: Read the passage and answer the following questions:

“Sometimes fate is like a small sandstorm that keeps changing directions. You change direction but the sandstorm chases you. You turn again, but the storm adjusts. Over and over you play this out, like some ominous dance with death just before dawn. Why? Because this storm isn't something that blew in from far away, something that has nothing to do with you. This storm is you. Something *inside* of you. So all you can do is give in to it, step right inside the storm, closing your eyes and plugging up your ears so the sand doesn't get in, and walk through it, step by step. There's no sun there, no moon, no direction, no sense of time. Just fine white sand swirling up into the sky like pulverized bones. That's the kind of sandstorm you need to imagine.

And you really will have to make it through that violent, metaphysical, symbolic storm. And once the storm is over you won't remember how you made it through, how you managed to survive. You won't even be sure, in fact, whether the storm is really over. But one thing is certain. When you come out of the storm you won't be the same person who walked in. That's what this storm's all about.”

What is the best advice given, that can help human beings to tackle the life storms that knock us about?

- a. That man should negotiate with Fate to not trouble him continuously and with such cruelty.
- b. That man should fight with all his strength to overcome the trials and be victorious.
- c. That man should pray and plead with God to deliver us from our problems
- d. **That man should bend to the will of fate and submit to the storm, accept the destruction but also slowly walk through the storm.**

Answer - D

Question 23: Read the passage and answer the following questions:

And once the storm is over you won't remember how you made it through, how you managed to survive. You won't even be sure, in fact, whether the storm is really over. But one thing is certain. When you come out of the storm you won't be the same person who walked in. That's what this storm's all about."

What is the theme of the passage?

- a. It is about the imaginary problems that humans think they have, which in turn destroy the simple trajectory of a person's life
- b. It is about the many internal and external challenges that destiny throws at human beings through life.**
- c. It is about the sand storms that overcome human beings who live in remote and tough terrains
- d. It is about the horrific effects of climate change and its effects on human lives.

Answer - B

Logical Ability

Question 1. Sam, Vicky, Rohan, Nanny and Jimmy are five friends. Vicky is good at english, Mathematics and chemistry. Nainy is good at Chemistry and Statistics. Jimmy is good at statistics, Chemistry and English. Rohan and Sam are good at English and Physics, who are good at chemistry and english but not physics

- a. Nainy and jimmy
- b. Jimmy and Sam
- c. Jimmy and Vicky**
- d. Vicky and Nainy

Answer: Option C

Question 2. Three statements are given followed by three conclusions I, II and III. Consider the statement to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statement

Statements

- A. Some medicines are alcohols.**
- B. All medicines are syrups.**
- C. Some syrups are sweet.**

Conclusions

- I** Some medicines are sweet.
- II** Some alcohols are sweet.
- III** All syrups are medicines.

- a. Only conclusions I and III follows
- b. All conclusions I, II and III follows
- c. None of the conclusions follow**
- d. Only conclusions I and II follows

Answer: Option C

Question 3: Given below is a question followed by two statements, 1 and 0 , each containing some information. Decide which of the statement(s) is / are sufficient to answer the question. What is the age of Sumit? Statements:

- I.** Sumit is five years younger than Amit, who is double the age of Prateek.
- II.** Prateek is 10 years older than Ravi whose age is 22 years.

- A. Statement II is sufficient alone.
- B. The combination of both the statements I and II are necessary**
- C. Statement I alone is sufficient
- D. The combination of both the statements I and II are not sufficient.

Answer: Option B

Question 4: Six boxes K,L,M,N,O and P are painted with either blue or black color. K, N and L are painted in blue while the rest are black O and P are big while other are small, P, K and N are empty while the rest are filled. Which black box is small and filled

- A. L
- B. O
- C. N
- D. M**

Answer: Option D

Question 5:- The pair of letters given below has a certain relationship. Select the pair of letters from the given alternatives that have the similar relationship.

BLV:HRB

- A-UOV : RZS
- B-KTV : HIT
- C-HQR : SCW
- D-EOY : KUE**

Answer: Option D

Question 6:- In the following figure, the pentagon represent seeds, the triangle represent red, the rectangle represents chlorophyll, the circle represents leaves and the square represents green. Find the number which represents the green leaves with chlorophyll.

- A-30
- B- 45
- C-25**
- D-36

Answer: Option C

Question 7:- Find the wrong term in the given series.

KBCL,NEFO,QHIS,TBCU,WEFX

- A- KBCL
- B- QHIS**
- C- TBCU
- D-WEFX

Answer: Option B

Question 8:- Given below is a question followed by two statements, I and II,each containing some information.Decide which of the statement(s) is/ are sufficient to answer the question.

In a group of six friends, Saras Pawan, Sunil,Neha,Naman and Sara,each a different height,who is the third tallest ?

- (i) Pawan is taller than Sunil and Neha ,Naman is Shorter than Pawan but not Sunil.
- (ii)Neha is taller than Saras,Sara is the tallest girl and Saras is the smallest girl among the group.

- A- The data in both statements I and II is insufficient to answer the question
- B- The data in statement I alone is sufficient to answer the question
- C- The data in statement II alone is sufficient to answer the question
- D- The data of both statement I alone and statement II alone are sufficient to answer the question

Answer: Option A

Question 9:- Which of the figure option will come in place of the question mark ?

Solution:- Option C

Question 10:- A square sheet of paper has been folded and cut as shown in the following series of figures . How will it appear when unfolded ?

D-

Solution:- Option B

Question 11:- A family spends 25% on food ,20% on education ,15% on clothes ,12% on parties ,10% on travelling and saves the remaining 18%. If they save Rs. 11,430, then how much money was spent on education ,clothes and food together ?

A-Rs 35,500

B-Rs 40,600

C-Rs 42100

D-Rs 38,100

Solution:- Option D

Question 12:- Study the given information carefully.

Following are the criteria for admitting a student in post- graduation course in a reputed college.

The Student must :

- (i) have passed the XII standard with more than 50% marks.
- (ii) have secured at least 60% marks at graduation level.
- (iii) be of at least 21 years of age or more as on 01.01.2020
- (iv) have secured more than 55% marks in the entrance test.

- In case of the student, who satisfies all other criteria except.

a)(ii) above, but has obtained at least 70% marks in entrance test, should be referred to the HOD.

b)(i) above, but has obtained at least 80% marks at graduation level, should be referred to the Dean.

Seema was born on 15.11.1999 She has succeeded 65% marks in XII standard, She secured 60% marks in the entrance test and 62% marks in her graduation course.

A- The student to be referred to the Dean

B- The student is not to be admitted.

C- The student is to be admitted.

D- The student is to be referred to the HOD.

Solution:- Option B

Question 13:- A cube is made by folding the given sheet , in the cube so formed ,which letter/symbol will be on the opposite face to face having the symbol ‘%’ ?

- A-(y)
- B-(\$)
- C-(a)
- D-(+)

Solution:-Option A

Question 14:- P,R,Q,O,S,M and T are sitting in a line facing North but not necessarily in the same order P is sitting between R and S,T is to the immediate left of O.There are only two persons between M and S ,R is sitting between P and Q,S is to the immediate right of P. What is the Position of T with respect to R ?

- A- Fourth to the right
- B- Third to the left
- C- Third to the right
- D- Fourth to the left

Solution:- Option C

Question 15:- Which figure will come next in the following series ?

A-

B-

C-

D-

Solution:-Option C

Question 16: What number will be opposite to 13, when the given figure is folded into a box?

Options:

- a. 6
- b. 21
- c. 19
- d. 5

Answer : Option D

Question 17:- In the following figure, the triangle represents researchers, the square represents historians, the rectangle represents lectures and the circle represents singers. Find the researcher who is neither historian nor lecturer but singer and the lecturer who is researcher and singer but not historian.

- A- R,T
- B-W,M
- C-N,R

D-K,P

Solution:-Option C

Question 18: The age of the mother is twice of her son. If the sum of their ages is 60, what is the age of the mother?

Option

- a. 30 years
- b. 40 years
- c. 36 years
- d. 48 years

AnswerOption B

Question 19: Two statements are given followed by three conclusions, I II and III. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. Some clocks have numbers.
- B. All clocks have needles

Conclusion

- I. Some clocks have needles.
- II. All needles are clocks.
- III. Some numbers are needles.

Options:

- a. Only conclusions I & III follows.
- b. Only conclusions I follow.
- c. All conclusions I, II & III follows.
- d. Only conclusions II & III follows.

Answer: **Option A**

Question 20: K is the mother of N and P is the father of L. N is the maternal uncle of G and O. L is the only sister of N. E is the father of O. How is K related to E?

- a. Son-in-law
- b. Sister-in-law
- c. Mother-in-law
- d. Mother

Solution:- Option C

Question 21: A builder constructed a building. The expenditure percentage was 20% on cement, 15% on bricks, 18% on iron, 10% on electricity, 25% on decoration and 12% on plumbing works. The total expenditure was Rs. 20,65,500.

How much money was spent on electricity and plumbing works together?

- a. Rs. 4,58,400
- b. Rs. 4,50,500
- c. **Rs. 4,54,410**
- d. Rs. 4,45,500

Answer: **Option C**

Question 22: Read the following instruction carefully and answer the question.

- i. 'A&B' means 'A' is sister of 'B'
- ii. 'A\$B' means 'A' is daughter of 'B'
- iii. 'A#B' means 'A' is brother of 'B'
- iv. 'A*B' means 'A' is father of 'B'

Which of the following options means 'M' is the sister-in-law of 'S' ?

- A- S#R*M&N\$O
- B- N\$R&S*M#O
- C- M&N#O*R\$S

D- R*S#M\$O&N

Solution:- Option C

Question 23: Two statements are given followed by three conclusions, I II and III. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. Some birds are sparrows.
- B. All eagles are birds.
- C. All sparrows have wings

Conclusion

- I. Some birds have wings.
- II. Some sparrows are eagles.
- III. All eagles are sparrows.

Option:

- a. Only conclusion I & III follows.
- b. Only conclusion II follows.
- c. All conclusion I,II & III follows.
- d. **Only conclusion I follow.**

Answer: Option D

Question 24:Two statements are given followed by three conclusions, I II and III. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. If Priya likes singing,Madhu likes dancing.
- B. If Madhu likes dancing,madhu likes music.

Conclusion

- I. Priya likes music.
- II. Madhu likes dancing.
- III. Megha likes singing.

Options:

- a. **Only conclusion II follows.**
- b. All conclusions I,II & III follow.
- c. Only conclusion I follow.
- d. Only conclusion I & III follows.

Answer: Option A

Question 25: Given below is a question followed by two statements, I, II, each containing some information. Decide which of the statement(s) is/are sufficient to answer the question.

How Far is Janny from her starting point? If

- I. Janny moves 4km towards south, then 3 km towards right, 5km towards left, 3 km towards left and 3 km towards right and stops.
- II. Janny moves 7km towards south, then 4 km towards left, 2km towards right, 4 km towards right and 3 km towards left and stops.

- The data of both statements I alone and statement II alone are sufficient to answer the questions
- The data in both statements I and II together are necessary to answer the questions
- The data in statement I alone is sufficient to answer the questions
- The data in statement II alone is sufficient to answer the questions

Answer: Option A

Question 26: Two statements are given followed by three conclusions numbered I, II and III. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

statements:

- A. All animals are plants
- B. All plants are shrubs

Conclusions:

- I. Some shrubs are plants
- II. Some animals are not shrubs
- III. All animals are shrubs

Options:

- a. Only conclusion I & III follows.
- b. Only conclusion I & II follows.
- c. Only conclusion II follows.
- d. None of the conclusions follows.

Answer: Option A

Question 27: A builder constructed a building. The expenditure percentage was 20% on cement, 15% on bricks, 18% on iron, 10% on electricity, 25% on decoration and 12% on plumbing works. The total expenditure was Rs. 20,65,500.

How much money was spent on bricks in the construction of the building?

Option

- a. Rs. 2,50,750
- b. Rs. 3,45,500
- c. Rs. 2,65,500
- d. Rs. 3,09,825

Answer: Option D

Options Provided is wrong

Question 28: A square sheet of paper has been folded and cut as shown in the following series of figures . How will it appear when unfolded ?

Option

d.

Answer: Option D

Programming Logic

Question 1: If a user wants to store data in linear data structure then which one is not suitable to implant this logic?

- A. String
- B. Graph
- C. Queue
- D. Array

Answer: Option D

Options are given wrong in this question

Question 2: Match the following:

	Functions		Significance
A	abs()	1	Get the absolute value of float
B	ceil()	2	Computes the nearest integer greater than the argument passed.

C	<code>fabs()</code>	3	Get the absolute value of integer
D	<code>floor()</code>	4	The largest integer that is smaller than or equal to given value

1. A-2, B-3, C-1, D-4
2. A-3, B-2, C-1, D-4
3. A-1, B-2, C-3, D-1
4. A-3, B-4, C-2, D-1

Answer:

A-1, B-2, C-3, D-4

Question 3: Identify the significant term which deserves “C language is a platform dependent language”

- a. Modularity
- b. Flexibility
- c. Portability
- d. Extensibility

Answer : Option D (Extensible)

Question 4: In a double circular linked list what will be the contents of right address field of last node?

- a. NULL
- b. Address of first node
- c. Garbage Value
- d. Depends on user

Answer : Address of first node

Question 5 : When we implement queue by using linked list then

- a. Insertion of node is done from beginning and deletion from beginning
- b. Insertion of node is done from end and deletion from end
- c. Insertion of node is done from beginning and deletion from end
- d. Insertion of node is done from end and deletion from beginning.

Question 6: What is the correct full-form of SPRAE - a generic structured testing approach ?

- a. Specification-Premeditation-Repeatability-Accountability-Evaluation
- b. Specification-Programming-Randomization-Accountability-Economy
- c. Specification-Programming-Repeatability-Accountability-Economy
- d. Specification-Premeditation-Repeatability-Accountability-Economy

Answer: Specification-Premeditation-Repeatability-Accountability-Economy

Question 7: Consider the given code. What will be the output when it is executed ?

```
#include<string.h>
#include<stdio.h>
int main()
{
    int i= -1;
    do
    {
        printf("HelloC")
    }
    while(i++);
    return 0;
}
```

Answer: HelloCHelloC

Question 8: What will be the output of the following pseudo code, if $x=10$, $y=12$, $z=8$, $num = 0$?

```
Integer x,y,z,num
If  $x < y$  and  $x < z$ 
    num = x
end if
If  $y < z$  and  $y < x$ 
    num = y
End if
If  $z < x$  and  $z < y$ 
    Num = z
```

You can use any suitable data structure to hold the menu card items with price.

Inputs for Menu Number and Quantity should be integers greater than 0 and less than 21. For any other input, return as output: INVALID INPUT

Example 1

INPUT VALUES

1 //for enter menu number

2 //for enter quantity

Y //Do you want to order

More Items? (y/n)

2 //for enter menu number

3 //for enter quantity

N //Do you want to order

More items? (y/n)

Output values

Total Amount : 550.0 INR

Note: Input prompt should not be the part of code

(Only accept values as input in order as given above)

Output should be in the format given above.

Solution in C

```
#include <stdio.h>
```

```
int main()
```

```
{
```

```
    float price[10] = {80.0, 130.0, 100.0, 80.0, 90.0, 110.0, 120.0, 140.0, 70.0, 80.0};
```

```
    float total = 0;
```

```
    int num, quantity;
```

```
    char choice;
```

```
    int i;
```

```
    start:
```

```
    scanf("%d",&num);
```

```
scanf("%d",&quantity);
if(quantity<0 || quantity>21)
{
    printf("INVALID INPUT");
}
else
{
    for(i=0; i<10; i++)
    {
        if(num==i+1)
        {
            total = total + (price[i] * quantity);
        }
    }
    scanf(" %c",&choice);
    if(choice=='y' || choice=='Y')
    {
        goto start;
    }
    else if(choice=='n' || choice == 'N')
    {
        printf("Total Amount : %.1f INR",total);
    }
    else
    {
        printf("INVALID INPUT");
    }
}
return 0;
}
```

Question 2 : A customer purchases one or more items and gives the respective quantity for each time to be purchased. Based on the quantity and price of the items, display the final amount after discount. A customer is eligible for 10% discount on total purchase price above Rs. 1000. For total purchase price Rs. 1000, no discount is given. Check is customer has a membership with the store.

If he is member, then he gets an extra 5% discount on every purchase, but if purchase amount of member is alone Rs.1000 then he gets total discount of 15% on purchase price. For example, if Rajesh does purchase of Rs.1800 which is above Rs.1000 and he is not member of store he gets discount of 10%.

But, if Rajesh is member of store then he gets total 15% discount on Rs. 1800 since its above Rs.1000, but if he does purchase of Rs.800 which is below Rs.1000 then he gets only discount of 5%.

Given, items and price

Item No	Items	Price
1.	Yoghurt	50
2.	Cheese	100
3.	Milk	40
4.	Fruit	200
5.	Oil	300

Calculate the actual price customer has to pay.

Example 1:

1 3 5

2 1 6

Y

1649.0INR

Note:

1. Order of input should be as given in above example

<ItemNumber> space <ItemNumber> space.....

<Quantity> space <Quantity> space.....

(you can enter any item numbers from 1 to 5 only else display INVALID INPUT)

{You must enter quantity as many times as to match with ItemNumber entered else display INVALID INPUT}

2. Output format should match with the format

28th October slot 2

Question 1 : Find the value of

$$\frac{\frac{2}{3} \div \frac{2}{3} \text{ of } \frac{2}{3} + \frac{3}{2} \times \frac{5}{7} - \frac{3}{2}}{\frac{3}{2} \text{ of } \frac{3}{2} \div \frac{3}{2} - \frac{1}{2} \times \frac{5}{7} - \frac{3}{2}} = ?$$

- A. -3
- B. -2
- C. 1
- D. 3

Option: A

Question 2 : Find the value of

$$\frac{\frac{\sqrt{7}}{\sqrt{7}-\sqrt{5}} - \frac{\sqrt{5}}{\sqrt{7}+\sqrt{5}}}{\frac{\sqrt{5}}{\sqrt{5}-\sqrt{3}} - \frac{\sqrt{3}}{\sqrt{5}+\sqrt{3}}} = ?$$

- A. $2 + \sqrt{5}$
- B. $2 + \sqrt{7}$
- C. $3/2$
- D. 6

Answer: Option C

Question 3 : If $5^X 3^Y = 225 * 405$, find the value of X^{2Y-3X}

- A. 81
- B. 25
- C. 125
- D. 27

Answer : Option D

Question 4 : Two trains 200 m and 180 m in length respectively, are running in the same direction, on parallel tracks. The first train runs at the speed of 25m/s and second at the rate of 20m/s. How long will they take to cross each other?

- A. 1 minute 30 seconds
- B. 1 minute 26 seconds
- C. 1 minute 16 seconds
- D. 1 minute 6 seconds

Answer: Option C

Question 5 : Raju lends Rs 3000 to Bharath, and a certain sum to Charan at the same time at 6% per annum simple interest. If after 5 years, Raju altogether receives Rs 1650 as interest from Bharath and Charan, what is the sum lent to Charan?

- A. Rs 3300
- B. Rs 3250
- C. **Rs 2500**
- D. Rs 2750

Answer : Option C

Question 6 : To complete a work P takes 25% more time than Q. If together they take 25 days to complete the work, how much time shall Q take to do it alone?

Option

- a. 50 days
- b. 35 days
- c. 45 days
- d. 40 days

Answer: Option C

Question 7 : If the mean of 26 observations is 29, and on adding four more observations, the new mean becomes 32. What is the mean of the last four observations?

Option

- a. 30.5
- b. 41.5
- c. 46.5
- d. 51.5

Answer: Option D

Question 8 : Two numbers A and B respectively 30% and 60% less than the third number. By what percent A is greater than B?

Option

- a. 35%
- b. 75%
- c. 85%
- d. 45%

Solution :- B

Question 9 : If an alloy contains only two metals 'A' and 'B' in the ratio of 3: 9.5, determine the percentage quantity of A?

Option

- a. 24%
- b. 27%
- c. 30%
- d. 20%

Solution:- A

Question 10 :- Find the mode of the given set of numbers:-

6,11,5,8,6,8,5,11,8,9,7,11,5,6,8,9,11,8,7,6,9.

- A. 9
- B. 6
- C. 11
- D. 8

Solution:- D

Question 11 : The number of students in three classes in the ratio 1:3:5. If 16 students are increased in each class, the ratio of the number of students changes to 3:5:7. The total number of students in three classes after increase is

- a. 135
- b. 150
- c. 120
- d. 105

Answer: Option C

Question 12: Aman can do a piece of work in 20 days, Aman and Chandrakant together can do the same work in 15 days. Aman, Bharat and Chandrakant together can complete the same work in 10 days. In how many days Bharat and Chandrakant together can complete the work?

Options

- a. 25 days
- b. 27 days
- c. 20 days
- d. 15 days

Answer: Option C

Question 13: Find the Variance of the following data:
12, 22, 28, 24, 21, 16, 31, 14

Option

- a. 25,33
- b. 41,54
- c. 39,25
- d. 45,63

Answer: Option A

Question 14: The length of a rectangular sheet is twice its breadth. If the area of the rectangular sheet is 242 cm^2 . What is the length of a rectangular sheet?

Option

- a. 18 cm
- b. 16 cm
- c. 22 cm
- d. 12 cm

Answer: **Option C**

Question 15 :- Area of right triangle is 180 cm^2 , if its base is 40 cm. Find its perimeter.

A.85

B.100

C.95

D.90

Answer: **Option D**

Question 16:- Due to an increase of 10% in the price of bananas, 4 bananas less are available for Rs 40. The present rate is (Rs) of bananas per dozen is

- a. 12
- b. 10
- c. 16
- d. 14

Answer: **Option A**

Question 17 :- The runs scored by Ramesh in 10 matches are:

75, 58, 29, 73, 67, 91, 29, 39, 63, 72

What is the mean score and median score of Ramesh in these matches?

- a. 62 and 65 respectively
- b. 60.6 and 64 respectively
- c. 60.6 and 65 respectively
- d. 60 and 65 respectively

Answer: **-D**

Question 18 :- What is the greatest four digit number divisible by 5 , 10 , 15 and 20?

- a. 9960
- b. 9980
- c. 9990
- d. 9900

Answer:- A

Question 19: Five years ago Rahul's age was 5 years less than three times of the sum of the ages of his three children. After five years hence, his age will become 5 years more than the sum of the ages of his children. Then. What is the present age of Rahul ?

- a. 50 years
- b. 45 years
- c. 55 years
- d. 40 years

Question 20 : Study the following table and answer the questions given :

Company	Total number of employees	Percentage of employees who work in night shift	Proportions of male and female employees who work in night shift (male : female)
A	2400	30	2:1
B	2800	28	3:4
C	2500	32	1:3
D	2600	24	2:1

Which company has the highest number of female employees who work in night shift ?

- a. B
- b. C**
- c. D
- d. A

Answer:- option B

Question 21 : The cost price of 30 boxes is the same as the selling price of x boxes. If the profit is 20%, the value of x will be:

Options:

- a. 22
- b. 18
- c. 25**
- d. 16

Answer:- Option C

Question 22 : Samira completes a journey in 15 hours, she travels first and third quarter of the total distance with the speed of 24kmph, and second and fourth quarter of total distance with the help of 16kmph. The total distance (in km) covered in this journey is

- a. 205
- b. 269
- c. 217
- d. 288**

Answer: Option D

Question 23: Sahil deposited an amount in a bank at a certain rate of interest which is compounded annually. When he inquired from the bank after two years, its value was 1,58,700 Rs. and after three years its value was 1,82,505 Rs. The amount deposited by him and the rate of interest, respectively was: 435

Question 24: A sales representative's commission is 6% on all sales upto Rs. 15000 and 5% on all sales exceeding this. He remits Rs. 47350 to his company after deducting his commission. What were the total sales?

- A. Rs. 47500
- B. Rs. 49000
- C. Rs. 50500
- D. Rs. 50000

Answer: Option D

Question 25 : A mobile dealer sells a mobile at a discount of 25% on its marked price and earns a profit of 10%. If the marked price of the mobile is rupees 8800, what will be the cost price (in rupees) of the mobile?

- a. 6075
- b. 6000
- c. 6030
- d. 5940

Answer:- Option D

Question 26 : Study the following pie chart and answer the following question

If the number of total valid votes were 15000, the number of valid votes obtained by T was

- A. 1200
- B. 1800
- C. 1600
- D. 1400

Answer: Option A

Verbal Ability

Question 1: You are going to read a text about a museum. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2). There is one extra sentence that you do not need to use.

The Kiran Nadar Museum of Art is one of Delhi's best private Museums_____1_____

It houses masterpieces by some of India's best modern and contemporary artists _____2_____. It is a must visit for those who love and appreciate art.

- A. In the recent past, it has hosted stellar retrospectives and extremely well-curated group exhibitions.
- B. Here art lovers can find everything from paintings, paints and sculptures to immense installations and cutting-edge new media.
- C. It was all set up at the initiative of art collecto, Kiran Nadar

- (1)B, (2) A
- (1)C, (2) A
- (1)A, (2) B
- (1)A, (2) C

Answer - A

Question 2: Select the most appropriate options to fill in the blank

Last week Madhuri and her family went to the farmhouse _____ her grandmother had built two decades ago

Options

- a. Whose
- b. There
- c. That
- d. Whom

Answer: that

Question 3: Read the following passage and fill in the blanks by selecting the most appropriate option.

Consumer behaviour is the most observational activity conducted to study the behaviour of the consumer in the marketplace from the time they enter the market and _____ the buying decision till the final purchase is made. In other words consumer behaviour is the study of how the consumer makes purchases _____ and what underlying factors influence such decisions.

Answer - B

Question 4: Read the passage and answer the question

It is the longest highway tunnel in the world. The strategically important tunnel is 9.02 km long as it connects Manali to Lahaul-Spiti valley throughout the year. The valley was earlier cutoff for about 6 months every year due to heavy snowfall. The tunnel is built with ultra-modern specifications in the Pir Panjal Range of the Himalayas at an altitude of 3,000 meters(10,000 feet)from the Main Sea Level (MSL).

Prime minister Narendra Modi on Saturday, inaugurated the strategically important all-weather Atal Tunnel, which reduces the distance between Manali and Leh by 46 km and travel time by four to five hours at Rohtang in Himachal Pradesh. Atal Tunnel, built by the Border Roads Organisation, is the longest highway tunnel in the world.

The tunnel has been designed for a traffic density of 3,000 cars in 1,500 trucks per day each of which can travel at a maximum speed of 80 kmph.

The 9.2 km tunnel connects Manali to Lahaul-spiti valley throughout the year, the Prime Minister's Office has said nothing that the valley was earlier cut off about 6 months every year due to heavy rainfall. Modi was accompanied by Defence minister Rajnath Singh and Chief of Defence Staff Gen Bipin Rawat. The Atal Bihari Vajpayee government had taken the decision to construct the strategic tunnel below the Rohtang Pass on June 3, 2009 and the foundation stone for the access road to the South portal of the tunnel was laid on May 26,2002.

How many times gets reduced between Manali and Leh if the tunnel is used?

Option

- Forty-six hours
- Six hours
- Nine and a quarter hours

439

Why is the tunnel considered as strategically important?

Option

- a. Because it is built according to the latest technical designs
- b. Because it is situated at a great height above sea level
- c. Because it connects parts which were earlier inaccessible in cold weather
- d. Because it is the longest tunnel and safe for travel

Answer: Because it is built according to the latest technical designs

Question 8: Select the most important option to fill in the blanks

The institution claims that after undergoing their courses students from the across the country embark _____ a challenging journey of transforming _____ highly informed and skilled professionals in their chosen field

Option

- a. On, into
- b. Through, by
- c. To, form
- d. Over, in

Answer: On, into

Question 9: Read the passage and answer the question

At a time when the health and wealth of people are at risk due to Covid-19 pandemic across the world, a survey hinted at the widening gap between the rich and poor because of monetary easing policy adopted by central banks around the world.

According to Wealth Report 2020 released by German Multinational financial services company Allianz Global the accommodative monetary policies are protecting the wealth of the super-rich from adverse impact of Coronavirus

Never in the last ten years, was there such a big increase in wealth for the rich. “Worldwide, gross financial assets grew by 9.7 % in 2019, clocking the strongest growth since 2005”, the report said.

The year 2019 was marred by social unrest, escalating trade conflicts and an industrial recession. But as Central banks reserved course and embarked on bond-based monetary easing, stock markets decoupled from fundamentals and soared by 25%, lifting financial assets in the process. The assets class of security increased by a whopping 13.7 percent in 2009, never was the economic growth faster in the 21st century,” Allianz Global said.

In 2019, the gross financial assets of households in North America and Oceania (Australia, New Zealand)-- which are by the richest -- increased by a record of 11.9% each and toppled the regional growth league table dominated by Emerging Markets.

Zero and Negative interest rates are sweet poison. They undermine wealth accumulation and aggravate social inequality, and asset owners can pocket nice windfall profits, it's not sustainable’.

The passage is mainly about_____

- The safeguard assets that broaden disparity in society
- The expenditure the poor incur during the pandemic

At a time when the health and wealth of people are at risk due to Covid-19 pandemic across the world, a survey hinted at the widening gap between the rich and poor because of monetary easing policy adopted by central banks around the world.

According to Wealth Report 2020 released by German Multinational financial services company Allianz Global the accommodative monetary policies are protecting the wealth of the super-rich from adverse impact of Coronavirus

Never in the last ten years, was there such a big increase in wealth for the rich. "Worldwide, gross financial assets grew by 9.7 % in 2019, clocking the strongest growth since 2005", the report said.

The year 2019 was marred by social unrest, escalating trade conflicts and an industrial recession. But as Central banks reserved course and embarked on board-based monetary easing, stock markets decoupled from fundamentals and soared by 25%, lifting financial assets in the process. The assets class of security increased by a whopping 13.7 percent in 2009, never was the economic growth faster in the 21st century," Allianz Global said.

In 2019, the gross financial assets of households in North America and Oceania (Australia, New Zealand)-- which are by the richest -- increased by a record of 11.9% each and toppled the regional growth league table dominated by Emerging Markets.

Zero and Negative interest rates are sweet poison. They undermine wealth accumulation and aggravate social inequality, and asset owners can pocket nice windfall profits, it's not sustainable'.

By how much the gross financial assets of households in the rich countries increase in 2019?

- a. 11.9 percent
- b. 13.7 percent
- c. 25 percent
- d. 9.7 percent

Answer: 9.7 percent

Question 13: Select the most appropriate option to fill in the blank

I think the shopkeeper pulled a fast one_____ you, this is not an original product.

Option

- a. Over
- b. At
- c. In
- d. On

Answer: On

Question 14: One part of the sentence below may contain an error. Identify the part. If there is no error, choose No Error.

The reporter / along with a few camera persons are presenting at the latest facts of the case

Option

- a. The latest facts of the case
- b. Along with a few camera persons are presenting
- c. The reporter
- d. No error

Answer: Along with a few camera persons are presenting (Reporter is the subject which is singular, hence it should 'is' and not 'are')

Question 15: Aisha had been very successful managing her team in Edinburgh and was asked by the company to lead a remote team for an important two- year project. Keen to demonstrate her leadership abilities to the head office. Aisha got her team members together for a remote meeting. But right from that first meeting , she realized that this was going to be a different challenge. We have copied this from Prep Insta, forgive us for that

1. _____ Lucia kept asking about really specific details while Aisha was hoping to use the meeting to get to know the team members and identify priorities. Archies and Lucia kept accidentally talking at the same time, and when they didn't speak, there was an uncomfortable silence. Valentina hardly said a word. _____ Without these visual clues, Aisha had no idea whether people were interested, lost, confused or bored.

Option

- a. No one had their cameras on, so there was none of the usual communication through body language and facial expressions.
- b. Compared to a face-to-face meeting the remote team is not preferred by all the managers
- c. For a start, Archie was late for the meeting by about 15 minutes because of the 'technical problems'.

- A,C
- B,A
- A,B
- C,A

Answer - C, A

Question 16: You are going to read the text about glaciers. Some sentences are missing from the text. Choose from the list (A - C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

Since the early 1900s, many glaciers around the world have been rapidly melting. _____. Specifically, since the industrial revolution, carbon dioxide and other greenhouse gas emissions have raised temperatures, even higher in the poles, _____. Scientists project that if emissions continue to rise unchecked, the Arctic could be ice free in the summer as soon as the year 2040 as ocean and air temperatures continue to rise rapidly.

- A. More than a third of the remaining glaciers of the world would have melted by 2030.
- B. As a result, glaciers are rapidly melting, calving off into the sea and retreating on land.
- C. Human activities are at the root of this phenomenon.

- a. 1 (B), 2 (C)
- b. 1 (A), 2 (B)
- c. 1 (C), 2 (A)
- d. 1 (C), 2 (B)

Answer - D

Question 17: One part of the sentence below may contain an error. Identify the part. If there is no error mark 'No error';

Whoever are / suspected to be guilty / will be called for an interrogation.

- A. No error
- B. Whoever are
- C. suspected to be guilty
- D. will be called for an interrogation.

Answer - B

Question 18:- For the four sentence (S1 to S4) paragraph below, sentences S1 and S4 are given. From the Option P,Q,R,choose appropriate sentences for S2 and S3 respectively.

S1: Immunization is a global health and development success story,saving millions of lives every year.

S2: _____

S3: _____

S4: We now have vaccines to prevent more than 20 life- threatening diseases helping people of all ages live longer and healthier lives.

P. Vaccines reduce risks of getting a disease by working with your body's natural defenses to build protection.

Q. When you get a vaccine, your immune system responds.

R. Immunization is a key component of primary health care and an indisputable human right.

A- PQ

B- RQ

C- QR

D-PR

Answer: A

Question 19:- Which one of the following sentences uses formal language ?

A- Shall we put this on our agenda for the next client-meet ?

B- I apologize for the technical glitch that occurred during our webinar yesterday .

C- I'm disappointed with the sales figures, they need to look up !

D- This presentation takes the cake !

Answer - B (apologize is formal)

Question 20: One part of the following below may contain an error. Identify the error. If there is no error, choose 'No error'

Making the country self-reliant will help / to reduce its dependence on imports / and may also give a boost to exports.

- a. To reduce its dependence in imports
- b. Making the country self-reliant will help
- c. No error
- d. and may also give a boost to exports.

Answer: To reduce its dependence in imports (it will be)

Question 21: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P, Q and R choose the appropriate sentences for S2 and S3.

S1: The Panchtantra is a legendary collection of short stories from India.

- a. PR
- b. RQ**
- c. PQ
- d. QP

Answer: B

Question 23: Complete the following sentences by filling in the blanks (1 and 2) with the right word from the list given below.

The purpose of myth was to provide the hearer with a truth with the audience then _____ for themselves within the value system of their culture. Mythology tries to answer the most difficult and the most basic questions of human _____. Who am I? Where did I come from? Why am I here? Where am I going?

Blank 1) A- interpreted B- interpret C- told D- understand

Blank 2) A- behaviour B-Success C- existence D- existential

- a. 1(A), 2(D)
- b. 1(D), 2(B)
- c. 1(A), 2(C)**
- d. 1(B), 2(C)

Answer: C

Question 24: The following sentence pair can be combined into one better sentence. Choose the option that combines the two sentences best.

All schools in the city will remain closed till October 31. The decision has been taken because of the Covid-19 pandemic.

- a. **In the view of the Covid-19 pandemic, all schools in the city will remain closed till October 31.**
- b. All schools in the city will remain closed till October 31, the decision has been taken because of the Covid-19 pandemic.
- c. The decision has been taken because of Covid-19 pandemic and all schools in the city will remain closed till October 31.
- d. The decision has been taken all schools in the city will remain closed till October 31 because of the Covid-19 pandemic.

Answer: A

Logical Ability

Question 1: Two statements are given followed by two conclusions I and II. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. Some fans are doors.
- B. All doors are windows.

Conclusions:

- I. Some windows are fans.
 - II. Some doors are fans.
-
- a. Only conclusion II follows.
 - b. Both conclusion I and II follow.
 - c. Neither conclusion I nor II follow.
 - d. Only conclusion I follow.

Answer: Option B

- A. If data in statement I alone is sufficient to answer the question.
- B. If data in statement II alone is sufficient to answer the question.
- C. If data of either statement I alone or statement II alone is sufficient to answer the question.
- D. If data in both the statements I and II together are necessary to answer the question.

In the following question, two statements are given. Based on the above directions, decide whether the data provided in the following statements is sufficient to answer the question.

- I. Point B is five kilometers north-west of point A and point D is towards west of point A.
- II. Point D is four kilometers south of point B. Point C is towards east of point B.

What is the distance between point A and point D?

- A. B
- B. D
- C. C
- D. A

Answer: Option B (If data in both the statements I and II together are necessary to answer the question.)

Question 3 : Common directions are given below:

- A. If data in statement I alone is sufficient to answer the question.
- B. If data in statement II alone is sufficient to answer the question.
- C. If data of either statement I alone or statement II alone is sufficient to answer the question.
- D. If data in both the statements I and II together are necessary to answer the question.

In the following question, two statements are given. Based on the above directions, decide whether the data provided in the following statements is sufficient to answer the question.

- I. P is younger than Q. Q is younger than R.
- II. Q is older than P and S. R is older than Q.

Who is the oldest among P, Q, R, and S?

- A. A
- B. C

- C. B
- D. D

Answer : Option C (B)

Question 4 : Two statements are given followed by two conclusions I and II. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. Some rings are pins
- B. All pins are watches

Conclusions:

- I. All watches are pins
 - II. Some pins are rings
-
- a. Only conclusion II follows.
 - b. Both conclusion I and II follow.
 - c. Neither conclusion I nor II follow.
 - d. Only conclusion I follow.

Answer: Option A

Question 5 : Two statements are given followed by two conclusions I and II. Consider the statements to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements.

Statements:

- A. All ships are boats.
- B. Some boats are busses

Answer: Before compilation

Question 6 : Print inorder traversal when preorder and postorder traversal are given.

Preorder Elements (Integers): {11, 12, 14, 15, 13, 16}

Preorder Elements (Integers): {14, 15, 12, 16, 13, 11}

- A. {14, 12, 15, 11, 13, 16}
- B. {12, 14, 11, 15, 13, 16}
- C. {14, 12, 15, 11, 16, 13}
- D. {12,14, 11, 15, 16, 13}

Answer: {14, 12, 15, 11, 16, 13}

Question 7: What will be the output of the following pseudo code

Integer age

SET age = 90

```
If age>0
    Print "New Born"
Else if age > 20
    Print "Getting Young"
Else if age>50
    Print "Getting old"
Else if age>80
    Print " Really old "
End if
```

- a. Getting old
- b. Getting young
- c. New Born
- d. Really old

Answer : Option D (Really old)

Question 8: A binary search tree is constructed by inserting the following numbers. Find the number of nodes contained in the left subtree

59, 24, 71, 14, 29, 67, 100, 12 17, 46, 69, 33

- a. 9

Question 1 : A customer has a choice to buy TV from set of 3 company models provided by store.
If customer take an exchange offer.

- Then customer get discount of 2% is old TV is not in working condition
- Customer gets discount of 20% if old TV is in working condition

If customer do not opt for exchange offer then, he has to pay MRP of TV as amount

Display the amount of customer has to pay.

Menu for TV condition should be displayed only if customer choose for exchange offer

When user enters invalid option then code should stop with message “INVALID INPUT”, it should be displayed in same format as it is case sensitive.

Make sure output text should be in exact format mentioned above

Assume following List is already seen by customer, There should be 3 inputs for each question whose answer should be a number given with that choice.

First input choice

Display List (Select TV Model)

1. Samsung 10000
2. Onida 7000
3. HDLC 6000

Second Input Choice

Want to take Exchange Offer

1. Yes
2. No

Third Input Choice

Current Condition of customer's old TV

1. Working
2. Not Working

For example, if customer want TV HDLC and he want to opt exchange offer for his old TV which is in working condition then output will be 4800.0 INR

All input values should be entered in Following Format

3

1

1

Output 4800.0 INR

Note that when customer do not opt for exchange offer, there will be only 2 inputs.

Code in C

```
#include <stdio.h>
```

```
int main()
```

```
{
int price[3] = {10000, 7000, 6000};
int num, exchange, working;
float discount;
float total;
scanf("%d",&num);
if(num>=1 && num<=3)
{
    scanf("%d",&exchange);
    if(exchange==1)
    {
        scanf("%d",&working);
        {
            if(working == 1)
            {
                discount = (20*price[num-1])/100;
                total = price[num-1] - discount;
            }
            else if(discount == 2)
            {
                discount = (2*price[num-1])/100;
                total = price[num-1] - discount;
            }
            else
            {
                printf("INVALID INPUT");
            }
        }
        else if(exchange == 2)
        {
            total = price[num-1];
        }
        printf("%.1f INR",total);
    }
else
{
    printf("INVALID INPUT");
}
```

```
}  
return 0;  
}
```

Numerical Ability

Question 1: What is the sum in Rs. which when divided among A, B, C, D in the proportion 2:3:5:8 provides Rs. 8420 less to D than what it provides to him when the proportion is $(\frac{1}{2}) : (\frac{1}{3}) : (\frac{1}{5}) : (\frac{1}{8})$?

- A. 37530
- B. 25020
- C. 17540
- D. 12510

Answer: Option B

Question 2 :- If the length of the rectangle is increased by 20% and its breadth is decreased by 20% its area_____.

- A. decrease by 6%
- B. increased by 5%
- C. decreases by 4%
- D. does not change

Answer:- Option C

Question 3 :- Rekha covers a certain distance by car. Had she moved 5km/h faster, she would have taken 30 minute less time to cover the distance. If she had moved 2 km/h slower, she would have taken 40 minute more time to cover the distance .Find the distance, in Kms.

- A- 10
- B- 20
- C- 5
- D- 15

Answer:- Option C

Question 4 :- The number of packets of milk sold her day by a shopkeeper on seven different days in the month are 20,25,19,16,24,26,17. The variance of this data is (correct to two decimal places)_____

- A. 15.25
- B. 13.71**
- C. 11.57
- D. 14.35

Answer:- Option B

Question 5 :- What is the difference between the mean and the median of the given data ?

5,9,8,15,12,9,2,19,21,11

- A. 1.3
- B. 1.1
- C. 1.2
- D. 0.9

Answer:- Provide options are wrong (answer will be 0.1)

Question 6:- Raman and Sahil working together could complete a work in 35 days and with the help of Arun they could complete it in 28 days.How long would Arun take to complete the work alone ?

- A. 210 days
- B. 280 days
- C. 70 days
- D. 140 days**

Answer:- D

Question 7:- Sarita Wants to gift the stationary kit. Which includes a pencil, an eraser and a sharpener to some kids in her village. She went to a wholesaler for purchase these items. The seller sells pencils in packing of 12. Erasers in a packing of 18 and Sharpener in a packing of 10.She purchases the minimum number of packet of pencils,eraser and sharpener.so that affix number of kits can be prepared without any item being unused or short. What is the number of packet of pencils purchased by her ?

- A. 10
- B. 12
- C. 15
- D. 18

Answer: Option C

Question 8:- In what time does a sum of money become triple the amount at a simple interest of 10% per annum ?

- A. 15 year
- B. 20 year
- C. 25 year
- D. 10 year

Answer:- Option B

Question 9:- A shopkeeper bought 60 erasers for Rs. 50. How many erasers should he sell for Rs. 50 in order to earn a profit of 20% ?

- A. 50
- B. 55
- C. 52
- D. 48

Answer: Option A

Question 10:- If $4^{(P-2Q)} = 1024$ and $2^{2(P+Q)} = 16 \times 4^5$, find the value of Q.

- A. $\frac{2}{3}$
- B. $\frac{3}{19}$
- C. $\frac{3}{5}$
- D. $\frac{5}{4}$

Answer: Option A

Question 11: Two trains running in opposite direction cross a stationary pole in 25 seconds and 15 seconds respectively and they cross each other in 18 seconds. The ratio of their lengths is:

- a. 1:1
- b. 5:3
- c. 5:7
- d. 2:3

Solution- Provided options are wrong(Please check it again..my answer is 3:7)

Question 12 : If the mode of a data is 12 and the arithmetic mean is 9, the median is _____?

- a. 9
- b. 7
- c. 10
- d. 8

Answer:- Option C

Question 13 : A bucket contains a mixture of two liquids P and Q in the ratio 11:7. If 9 litres of the mixture is replaced by 9 litres of liquid Q, then the ratio of two liquids becomes 5:9. How much of the liquid Q does the bucket have in litres?

- a. $\frac{653}{745}$
- b. $\frac{33}{539}$
- c. $\frac{64}{349}$
- d. $\frac{54}{54}$

Answer:- Option A

Question 14:- $(64)^{\frac{2}{3}} \times (81)^{\frac{3}{4}} + (8)^{\frac{5}{3}} \times (125)^{\frac{4}{3}}$

- a. 20432
- b. 21354
- c. 16254
- d. 22547

Answer:- Option A

Question 15 : The average weight of a group of 18 students is 45 kg. A new student who weighs 64 kg joins the group. What is the new average weight of the new group, in kg?

- a. 47
- b. 46
- c. 48
- d. 45

Solution:- Option B

Question 16 : What is the sum of money at compound interest will amount to Rs. 6930 in 3 years, if the rate of interest is 5% for the first year, 10% for the second year and 20% for the third year?

- a. Rs. 5000
- b. Rs. 4500
- c. Rs. 4000
- d. Rs. 5500

Answer: Option A

Question 17: If $(x+10)\%$ of 240 is 60% more than $x\%$ of 180, then 15% of $(x+20)$ is what percent less than 25% of x ?

- a. $19\frac{1}{21}$
- b. $15\frac{1}{2}$
- c. 16
- d. 15

Answer:- Option C

Question 18:- Shweta buys an old mobile phone for Rs 6400 and spends Rs 600 on its repair. If she sells the mobile for Rs 8400, her profit percent is .

A. 20

- B. 30
- C. 25
- D. 35

Answer:- Option A

Question 19:- The breadth of a cuboidal box is $\frac{1}{2}$ of its length and its height is $\frac{1}{2}$ of its breadth. If the volume of the box is 1000 cm^3 , its breadth is

- a. 20cm
- b. 10cm**
- c. 30cm
- d. 5cm

Answer:- Option B

Question 20: The pie-chart below shows the expenditure of a family on different heads. Study the chart and answer the question that follows:

If the total expenditure on Grocery and healthcare is Rs 18000, then what is the total expenditure of the family?

- A. Rs 70,000
- B. Rs 60,000**
- C. Rs 80,000
- D. Rs 50,000

Answer: Option B

Question 21: If the diameter of the circle shown in the figure is 14 cm, then what is the area of the black coloured portion of the circle. (Take $\pi = 22/7$)

- A. 38.5 cm²**
- B. 70.5 cm²
- C. 45 cm²
- D. 90 cm²

Answer: Option A

Question 22 :-
$$\frac{(4 \times 0.36 + 9 \times 0.64 + 12 \times 0.48)(2 \times 0.6 - 3 \times 0.8)}{4 \times 0.36 - 9 \times 0.64}$$

- A. 4.8
- B. 3.6**
- C. 1
- D. 2.5

Answer :- Option B

Question 23:-
Subject and Maximum marks

Name of the students	General Awareness(Max marks 30)	Numerical Aptitude (Max marks 50)	General intelligence (Max Marks 40)	English (Max Marks 30)
Raghav	22	36	35	15
Neha	18	48	33	17
Manisha	26	41	29	16
Shantanu	24	39	30	22
Ritesh	19	35	32	25

What is the difference, between percentages of marks, obtained by Neha in general awareness and general intelligence?

- a. 22.5
- b. 24
- c. 15
- d. 17.5

Answer:-Option A

$$\frac{7}{5} \times \frac{25}{13} \text{ of } \frac{26}{49} - \frac{7}{5} \text{ of } \frac{5}{28}$$

Question 24: The value of $\frac{9}{4} \times \frac{7}{18} \text{ of } \frac{72}{49} - \frac{3}{5}$ is:

- A. $\frac{55}{61}$
- B. $\frac{46}{33}$
- C. $\frac{46}{63}$
- D. 46

Answer: Option A

Question 25 :- Amar alone can complete 12.5% of a work in 2 days and Raghu alone can complete the whole work in 16 days. If both work together, in how many days can they complete the whole work ?

485

- A. 10
- B. 6
- C. 12
- D. 8

Answer:- Option D

Verbal Ability

Question 1: Complete the following sentence by filling in the blanks(1 and 2) with the right word from the list given below.

On Nov. 3, 1957 the Soviet Union lofted a dog named Laika _____ the satellite Sputnik 2. The milestone came less than a month after the Soviets _____ the Space age, and the Cold War space race, with the launch of Sputnik 1 on Oct 4.

Blank 1) A- aboard B- abroad C- after D- from

Blank 2) A- comprehended B- abandoned C- kicked off D- was launching

- a. 1A, 2C
- b. 1B, 2D
- c. 1D, 2C
- d. 1C, 2B

Answer - Option A

Question 2: The following sentence pair can be combined into one better sentence. Choose the option that combined the two statements best without changing the meaning.

You did not tell me you wanted to go to the market. I would have asked you to go with me.

- a. I asked you to go with me, but you did not tell me you wanted to go to the market.
- b. I didn't ask you to go with me although you had told me you wanted to go to the market.
- c. **I would have asked you to go with me if you had told me you wanted to go to the market.**

- d. I wouldn't have asked you to go with me because you had not told me you wanted to go to the market.

Answer - C

Question 3: You are going to read a text about Greece and the Greek language. Some sentences are missing from the text (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

When I was in high school, my dad took me to Greece. (1)_____ When we came home, I got a tutor from the university to start teaching me the ancient Greek language. (2)_____ every Greek word is so rich and complex that it needs two or more English words to translate it.

A- During the school, I teach courses on the history and culture of ancient Greece, as well as a seminar on Alexander the Great.

B- Once you become familiar with the alphabet, the magic begins.

C- I swore then and there I would devote my life to understanding the country's ancient civilization.

- a. 1C, 2B
- b. 1A, 2C
- c. 1B, 2A
- d. 1A, 2B

Answer: A

Question 4: One part of the sentence below may contain an error. Identify the part. If there is no error, choose 'No error'.

Several economists has expressed concern about the impact of the pandemic on the world economy.

- a. **Several economists has**
- b. the impact of the pandemic on the world economy.
- c. expressed concern about
- d. No error

Answer: A

Question 8: Read the following passage and fill in the blanks by selecting the most appropriate option.

An earthquake of the magnitude 7.3 on the Richter scale struck near Sakaiminato, Japan on this day in the year 2000. It was the most powerful earthquake since the (1)_____ Kobe earthquake of 1995, but the damage and casualties were relatively low because the epicenter was in a sparsely (2)_____ area.

Blank 1 A. distributing B. Upsetting C. harmful D. devastating

Blank 2. A. Occupied B. Inhabited C. lived D. Engaged

Options

- a. 1. B, 2. A
- b. 1. D, 2. B**
- c. 1. D, 2. D
- d. 1. A, 2. C

Answer - Option B

Question 9: Select the most appropriate option to fill in the blanks

The World Health Organisation estimates that there are _____ 70 million cases of Hepatitis C world-wide and 40,000 deaths _____ it each year.

Options

- a. Over, from
- b. Above, through
- c. Beyond, within
- d. Over, by**

Answer - D

Question 10: One part of the sentence below may contain an error. Identify the part. If there is no error, choose 'No Error'

Since sunrise to sunset / my grandmother would sit by her wheel, / spinning and reciting prayers.

Options

- a. My grandmother would sit by her wheel
- b. No Error
- c. Spinning and reciting prayers
- d. **Since sunrise to sunset**

Answer - D

Question 11: Select the most appropriate option to fill in the blanks

The Substitute teacher admitted that they were _____ naughty children as she had expected.

Options

- a. As to
- b. Not much
- c. **Not such**
- d. As about

Answer - C

Question 12: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. For the options P Q and R, choose appropriate sentences for S2 and S3 respectively.

S1: Water conservation is the careful use and preservation of water from any source.

S2

S3

S4: That's the idea of water conservation.

P: Nowadays, people are looking for ways to make water last to reduce their water bills.

Answer: PR

Question 13: You are going to read a text about Moroccan pottery. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

In Fez Morocco we visited a pottery workshop just outside the city for a behind-the-scenes look at the production process. First raw clay from local quarries is hammered down to a fine powder and mixed with water. (1)_____ The clay vessels are dried for several days in the sun, baked in a kiln, then covered in a milky white glaze and set out to dry once more.

(2)_____ The painted wares are returned to kiln for a final fire, from where they emerge resplendent and durable, ready to elevate your dinner table or any bare nook in your home.

A: At this stage , the artisans begin to paint the vessels with the finest of brushstrokes, embellishing them in hypnotic geometric Motifs, florid arabesques, or tribal symbols drawn from an age-old repertoire.

B: The clay is then rolled out and kneaded vigorously by foot before being transferred to the potter's wheel, where it takes an interminable form ----- plates, bowls, cup, tagines, salt and pepper shakers, urns and teapots.

C: Moroccan ceramics are known for their vivid hand-painted designs and no matter how many pottery shops you wander past, it's hard not to get lost into those mesmerizing whirlpools of colour.

- 1-A, 2-C
- 1-A, 2-B
- 1-C, 2-A
- 1-B, 2-A

Answer: 1-B, 2-A

Question 14: You are going to read a text about General Dyer. Some sentences are missing from the text. Choose from the list (A-C) the most appropriate sentence for each gap (1-2) in the text. There is one extra sentence that you do not need to use.

Was General Dyer a wrong man at the wrong place? _____1_____ These are mere speculations. _____2_____ Yet, Gandhiji forgave him for his heinous act saying that, “it would be sin for me to serve General Dyer and co-operate with him to shoot innocent men. But it will be an exercise of forgiveness or love for me to nurse him back to life, if he was suffering from a physical malady.

- A: Let us not forget that in those ten minutes, General Dyer put Indian firmly on the path of freedom.
B: Or was he soldier merely following orders given to him by the his Supreme commander, The Queen
C: The Queen was so upset that she gave orders to recall Dyer back to England and punish him severely.

Options

- d. 1-B, 2-A

Answer:

Question 15: One part of the sentence may contain an error. Identify the error.

Something about the way he spoke stuck a bell in Lauren’s mind.

- A. Something about
- B. in Lauren’s mind.
- C. **stuck a bell**
- D. he way he spoke

Answer - C

Question 16: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 is given. From the options P, Q, and R, choose the appropriate sentences S and S3 respectively.

S1: With the advent of the internet in the 1990's, technology started to revolutionize at an electrifying rate.

S2:

S3:

S4: As a result, today one can stream the newly released movies as well as live content on various platforms like Netflix, Youtube, Spotify, Amazon Prime, Pandora, Hulu, etc.

P: People have started to reply on the internet for their mode of entertainment as well as for many facets of their lifestyles

Q: Smartphones, tablets, and laptops have made access to all multimedia information very easy for everybody.

R: There are various other factors which are driving the growth of streaming services.

- a. QR
- b. PR**
- c. RQ
- d. PQ

Answer - PR

Question 17: Read the passage and answer the questions that follow:

The first cellular phone was available from Motorola in 1983. However, the first integration of radio and telephone communications took place shortly after the turn of the twentieth century. Bell Labs (which would one day be part of AT&T) created the first version of a mobile, two-way, voice based radiotelephone. The first ship-to-shore radio telephones were used in 1919. A radiotelephone was installed in a Detroit Police Department police car in 1921; the technology would be introduced into other dispatch services in later years. In Europe, radio-telephone communications were also used on first-class passenger trains about 1926.

Bell Labs claims the first truly mobile telephone call was made in St Louis, Missouri, on June 17, 1946. The systems operated under the push to talk format. A user selected a channel, used the push button feature to speak, and had to be connected by an operator. By 1948, wireless telephone service was available in almost 100 cities and highway corridors. Customers included utilities, truck fleet operators, and reporters. There were only about 5,000 customers in the United States at the time making 30,000 weekly calls.

The wireless network could not handle large call volumes. A single transmitter on a central tower provided a small number of channels for an entire metropolitan area. A handful of receiver towers handled the call return signals. No more than three subscribers could make calls at one time in any city. The service cost \$15 per month, plus 30 to 40 cents per local call, and the equipment weighed 80 pounds.

In which year was the first two-way ship-to-shore call made?

- a. 1921
- b. 1926
- c. 1983
- d. 1919

Answer - D

Question18: Read the passage and answer the questions that follow:

The first cellular phone was available from Motorola in 1983. However, the first integration of radio and telephone communications took place shortly after the turn of the twentieth century. A radiotelephone was installed in a Detroit Police Department police car in 1921; the technology would be introduced into other dispatch services in later years. In Europe, radio-telephone communications were also used on first-class passenger trains about 1926.

Bell Labs claims the first truly mobile telephone call was made in St Louis, Missouri, on June 17, 1946. The systems operated under the push to talk format. A user selected a channel, used the push button feature to speak, and had to be connected by an operator. By 1948, wireless telephone service was available in almost 100 cities and highway corridors. Customers included utilities, truck fleet operators, and reporters. There were only about 5,000 customers in the United States at the time making 30,000 weekly calls.

The wireless network could not handle large call volumes. A single transmitter on a central tower provided a small number of channels for an entire metropolitan area. A handful of receiver towers handled the call return signals. No more than three subscribers could make calls at one time in any city. The service cost \$15 per month, plus 30 to 40 cents per local call, and the equipment weighed 80 pounds.

Which of the statements given below is true about the early mobile phone?

- a. **The services of an operator were required.**
- b. Accessibility to all regardless of location was ensured
- c. An unlimited number of customers could be accommodated
- d. Call return signals were easy to receive

Answer - A

Question 21: Read the passage and answer the questions that follow:

Emmanuelle Charpentier and Jennifer Doudna are awarded the Nobel Prize in Chemistry 2020 for discovering one of gene technology's sharpest tools: the CRISPR/Cas9 genetic scissors.

One of the attractions of science is that it is unpredictable – you can never know in advance where an idea or a question may lead. Sometimes a curious mind will meet a dead end, sometimes it will encounter a thorny labyrinth that takes years to navigate. But, now and again, she realises she is the first person ever to gaze upon a horizon of untold possibility.

The gene editor called CRISPR-Cas9 is one such unexpected discovery with breathtaking potential. When Emmanuelle Charpentier and Jennifer Doudna started investigating the immune system of a *Streptococcus* bacterium, one idea was that they could perhaps develop a new form of antibiotic. Instead, they discovered a molecular tool that can be used to make precise incisions in genetic material, making it possible to easily change the code of life.

Just eight years after their discovery, these genetic scissors have reshaped the life sciences. Biochemists and cell biologists can now easily investigate the functions of different genes and their possible role in the progression of disease. In plant breeding, researchers can give plants specific characteristics, such as the ability to withstand drought in a warmer climate. In medicine, this gene editor is contributing to new cancer therapies and the first studies attempting to cure inherited diseases.

There are almost endless examples of how CRISPR-Cas9 could be used, which also include unethical applications. As with all powerful technology, these genetic scissors need to be regulated.

Which statement is true according to the information in the passage?

- a. The researchers began their investigation ten years ago
- b. Their exploration can lead to the development of a new vaccine
- c. The two scientists worked on the treatment of two deadly disease
- d. The two scientists started their work on antibiotics to fight back

Answer - The two scientists started their work on antibiotics to fight back

Question 22: Read the passage and answer the questions that follow:

Emmanuelle Charpentier and Jennifer Doudna are awarded the Nobel Prize in Chemistry 2020 for discovering one of gene technology's sharpest tools: the CRISPR/Cas9 genetic scissors.

One of the attractions of science is that it is unpredictable – you can never know in advance where an idea or a question may lead. Sometimes a curious mind will meet a dead end, sometimes it will

encounter a thorny labyrinth that takes years to navigate. But, now and again, she realises she is the first person ever to gaze upon a horizon of untold possibility.

The gene editor called CRISPR-Cas9 is one such unexpected discovery with breathtaking potential. When Emmanuelle Charpentier and Jennifer Doudna started investigating the immune system of a *Streptococcus* bacterium, one idea was that they could perhaps develop a new form of antibiotic. Instead, they discovered a molecular tool that can be used to make precise incisions in genetic material, making it possible to easily change the code of life.

Just eight years after their discovery, these genetic scissors have reshaped the life sciences. Biochemists and cell biologists can now easily investigate the functions of different genes and their possible role in the progression of disease. In plant breeding, researchers can give plants specific characteristics, such as the ability to withstand drought in a warmer climate. In medicine, this gene editor is contributing to new cancer therapies and the first studies attempting to cure inherited diseases.

There are almost endless examples of how CRISPR-Cas9 could be used, which also include unethical applications. As with all powerful technology, these genetic scissors need to be regulated.

Which one of the following will probably NOT be affected by the scientific discovery?

- a. Climate change and environmental research
- b. Psychological support post surgeries for cancer
- c. Medication for different types of cancer
- d. Treatment of hereditary and genetic diseases

Answer - Psychological support post surgeries for cancer

Question 23: Read the passage and answer the questions that follow:

Emmanuelle Charpentier and Jennifer Doudna are awarded the Nobel Prize in Chemistry 2020 for discovering one of gene technology's sharpest tools: the CRISPR/Cas9 genetic scissors.

One of the attractions of science is that it is unpredictable – you can never know in advance where an idea or a question may lead. Sometimes a curious mind will meet a dead end, sometimes it will encounter a thorny labyrinth that takes years to navigate. But, now and again, she realises she is the first person ever to gaze upon a horizon of untold possibility.

The gene editor called CRISPR-Cas9 is one such unexpected discovery with breathtaking potential. When Emmanuelle Charpentier and Jennifer Doudna started investigating the immune system of a

Streptococcus bacterium, one idea was that they could perhaps develop a new form of antibiotic. Instead, they discovered a molecular tool that can be used to make precise incisions in genetic material, making it possible to easily change the code of life.

Just eight years after their discovery, these genetic scissors have reshaped the life sciences. Biochemists and cell biologists can now easily investigate the functions of different genes and their possible role in the progression of disease. In plant breeding, researchers can give plants specific characteristics, such as the ability to withstand drought in a warmer climate. In medicine, this gene editor is contributing to new cancer therapies and the first studies attempting to cure inherited diseases.

There are almost endless examples of how CRISPR-Cas9 could be used, which also include unethical applications. As with all powerful technology, these genetic scissors need to be regulated.

The passage mainly describes:

- a. The difficulties encountered in scientific research
- b. The collaboration that scientists enter into during an investigation
- c. The astonishing turn an exploration can make
- d. The steps involved in discovering a new drug

Answer - The astonishing turn an exploration can make

Question 24: Read the passage and answer the questions that follow:

Emmanuelle Charpentier and Jennifer Doudna are awarded the Nobel Prize in Chemistry 2020 for discovering one of gene technology's sharpest tools: the CRISPR/Cas9 genetic scissors.

One of the attractions of science is that it is unpredictable – you can never know in advance where an idea or a question may lead. Sometimes a curious mind will meet a dead end, sometimes it will encounter a thorny labyrinth that takes years to navigate. But, now and again, she realises she is the first person ever to gaze upon a horizon of untold possibility.

The gene editor called CRISPR-Cas9 is one such unexpected discovery with breathtaking potential. When Emmanuelle Charpentier and Jennifer Doudna started investigating the immune system of a *Streptococcus* bacterium, one idea was that they could perhaps develop a new form of antibiotic. Instead, they discovered a molecular tool that can be used to make precise incisions in genetic material, making it possible to easily change the code of life.

Just eight years after their discovery, these genetic scissors have reshaped the life sciences. Biochemists and cell biologists can now easily investigate the functions of different genes and their possible role in the progression of disease. In plant breeding, researchers can give plants specific characteristics, such as the ability to withstand drought in a warmer climate. In medicine, this gene editor is contributing to new cancer therapies and the first studies attempting to cure inherited diseases.

There are almost endless examples of how CRISPR-Cas9 could be used, which also include unethical applications. As with all powerful technology, these genetic scissors need to be regulated.

What concern does the writer express about the discovery?

- a. It may not be as effective in the outside world as it is in the laboratory
- b. It may not be as useful as expected in genetic fields
- c. Its use may be limited to plants and animals and not be transferred to humans
- d. It may get misused by dangerous elements for unscrupulous purposes

Answer - It may get misused by dangerous elements for unscrupulous purposes

Logical Ability

Question 1:- Which of the following sets represents the given Venn diagram given ?

- A. Fruits, Clothes, Red
- B. Book, Pen, Chapters
- C. Milk, Sugar, Salt
- D. Deer, Cow, Herbivores

Answer:- Option A

Question 2:- Two statements are given followed by two conclusions I and II. Consider the statement to be true even if they seem to be at variance from commonly known facts and decide which of the following given conclusion (s) logically follow (s) from the given statements.

Statements:-

- A- All carrot are peas
- B- Some radishes are peas.

Conclusion:-

- I. Some peas are radishes.
- II. Some carrots are radishes.

- A. Only conclusion II follows.
- B. Only conclusion I follows**
- C. Neither conclusion I nor II follows
- D. Both conclusion I & II follows

Answer:- Option B

Question 3:- A is grand- daughter of D,C is the only brother of B,E is mother of A, F is the wife of D,B is the daughter of F. If 'I' represents brother,'*' represents aunt , '^'represents father and '?' represents sister then which of the following options represents how B is related to A ?

- A. ?
- B. *
- C. ^
- D. |

Answer:- Option B

Question 4 :- Solve the following problem-
4,5,13,94,1118, ?

- A- 3125
- B- 5120
- C-15625
- D-16743

Answer:- Option D

Question 5 :- choose the pair similar to the following:-

JLHS : LJJQ

- A. NLSQ : PNUS
- B. IENT : KCPR**
- C. TIXM : RMVO
- D. DNRL : FLTN

Answer:- Option B

Question 6:- Two statements are given followed by three conclusions numbered I,II and III.Assuming statements to be true, even if they seem to be at variance with commonly known facts,decide which of the conclusions logically follow(s) from the statements .

Statements:-

All animals are plants.
All plants are shrubs.

Conclusion:-

- I. Some shrubs are plants.
 - II. Some animals are not shrubs
 - III. All animals are shrubs.
-
- A. Only conclusion II follow
 - B. Only conclusion I and III follow**
 - C. None of the conclusion follow
 - D. Only conclusion I and II follow

Answer:- Option B

Question 7 :- Amrita met Rahul who is the only son-in-law of Arjun's mother's father. Arjun is the brother of Amrita. If 'J' represents father, 'Z' represents Uncle ,'K' represents sister and 'C' represents daughter then which of the following options represents how Amrita is related to Rahul ?

- A. C**
- B. J

- C. Z
- D. K

Answer:- Option A

Question 8:- Two statements are given followed by two conclusions I and II. Consider the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the given statements.

Statements:-

- A. Some rats are snakes
- B. All snakes are cats.

Conclusions:-

- I. Some cats are rats.
 - II. Some snakes are rats.
-
- A. **Both conclusion I and II follow.**
 - B. Only conclusion I follow.
 - C. Neither conclusion I nor II follows.
 - D. Only conclusion II follows.

Answer:- Option A

Question 9 :- Two statements are given. Based on the statements, decide whether the data provided in the statement is sufficient to answer the question that follows them.

Choose A- If data in statement I alone is sufficient to answer the question

Choose B- If data in statement II alone is sufficient to answer the question

Choose C- If data of either statement I alone or statement II alone are sufficient to answer the question.

Choose D- If data in both statements I & II together are necessary to answer the question.

Statements:-

- I. Point M is towards south of point P and Point V is 10 metres to east of point p.
- II. Point C is towards north-west of point M and point P is 20 metres from point M.

What is the distance between point V and M ?

- A. D
- B. B
- C. A
- D. C

Answer:- Option A

Question 10 :- Which figure will come in the place of question mark ?

A-

B-

C-

D-

Answer:- Option B

Question 11 - Nehal, Iqbal, Ronit, Malini and Harbhajan participate in any one of the five activities i.e. Quiz, Singing, Dance, Debate and Mimicry. Ronit participates in Singing. Harbhajan does not participate in Debate and Mimicry. Malini does not participate in Mimicry. Iqbal participates in Quiz. Who participates in Debate?

- a. Cannot be determined
- b. Nehal
- c. **Malini**
- d. Nehal or Malini

Answer - Option C

Question 12- Three statements are given followed by three conclusions I, II and III. Consider the statement to be true even if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statement

Statements-

- A. All greens are grasses
- B. Some trees are golds
- C. Some golds are greens

Conclusion

- I. Some greens are trees
 - II. Some grasses are golds
 - III. Some golds are trees.
-
- a. All conclusions I, II and III follows
 - b. Only conclusion I and III follows

- c. Only conclusion I and II follows
- d. **Only conclusion II and III follows**

Answer: Option D

Questions 13- What will come in place of ‘?’

- a. 17
- b. 16
- c. **13**
- d. 15

Answer - Option C

Question 14- Two statements are given based on the statements decide whether the data provided in the statements is sufficient to answer the question that follows them

Choose A - If data in statement I alone is sufficient to answer the question

Choose B - If data in statement II alone is sufficient to answer the question

Choose C - If data of either statement I alone or statement II alone are sufficient to answer the question

Choose D - If data in both statements I and II together are necessary to answer the question

Statements:

- I. L is taller than S but shorter than X. X is shorter than only N
- II. X and L are shorter than N, S is only taller than M

Who is the tallest among L, M, N, S and X ?

- a. C
- b. A
- c. B
- d. **D**

Answer - Option D

Question 15 : How many dots are there opposite to the side having four dots ?

- a. One
- b. **Two**
- c. Six
- d. Five

Answer : Option B

Question 16: Based on the following data answer the following questions

The percentage distribution of expenditure in an office is as follows:

35% on salary, 25% on raw material , 15% on furniture, 10% on electricity charges, 10% on printing and 5% on incentives . The total expenditure is 2,75,500 Rs.

How much money is spent on furniture alone ?

- a. Rs. 41,325
- b. Rs. 27,550
- c. Rs. 33,060
- d. Rs. 68,875

Answer : Option A

Question 17 : Based on the following data answer the following questions

The percentage distribution of expenditure in an office is as follows:

35% on salary, 25% on raw material , 15% on furniture, 10% on electricity charges, 10% on printing and 5% on incentives . The total expenditure is 2,75,500 Rs.

How much money is spent on painting alone ?

- A. Rs. 1,23.975
- B. Rs. 27,550**
- C. Rs. 96.425
- D. Rs. 82,650

Answer : Option B

Question 18- Two statements are given followed by two conclusions I,II and III. Consider the statements to be true events if they seem to be at variance from commonly known facts and decide which of the given conclusion(s) logically follow(s) from the given statements

Statements

- I. Some apples are pears
- II. Some plums are pears

Conclusion

- I. Some apples are plums
- II. Some plums are apples

- a. Only conclusion I follows
- b. Both conclusion I and II follows
- c. Only conclusion II follows
- d. **Neither conclusion I nor II follows**

Answer : Option D

Question 19 - Two statements are given based on the statements decide whether the data provided in the statements is sufficient to answer the question that follows them

Choose A - If data in statement I alone is sufficient to answer the question

Choose B - If data in statement II alone is sufficient to answer the question

Choose C - If data of either statement I alone or statement II alone are sufficient to answer the question

Choose D - If data in both statements I and II together are necessary to answer the question

Statements:

- I. Q is younger than S. S is younger than R
- II. P is older than S, R is older than Q

Who is the oldest among Q, R and S ?

- a. D
- b. B
- c. A
- d. C

Answer : Option C (Only statement I alone is sufficient to answer the question)

Question 20 : Choose the wrong term in the given series :

DAIB, FCKD, IENG, MJRK, ROWP

- a. ROWP
- b. FCKD
- c. IENG
- d. MJRK

Answer - Option C

Question 21 : In the following Venn diagram, bigger circle shows person who likes food, smaller circle shows person who like travelling, triangle represents persons who do not like reading and rectangle represents people who like dancing.

Which number represents people who like reading, fooding and travelling and do not like dancing ?

- a. 2
- b. 5
- c. 4**
- d. 7

Answer:- Option C

Question 22:- A paper is folded and cut as shown below. How will it appear when unfolded ?

A-

B-

C-

D-

Answer:- Option D

Question 23: Based on the following data answer the following questions

The percentage distribution of expenditure in an office is as follows:

35% on salary, 25% on raw material , 15% on furniture, 10% on electricity charges, 10% on printing and 5% on incentives . The total expenditure is 2,75,500 Rs.

How much money is spent on raw material and electricity if total expenditure is increased by Rs. 35,200 (given percentage of expenditure on each category remains the same) ?

- A. Rs. 96,425
- B. Rs. 1,39,815
- C. Rs. 68,875
- D. Rs. 1,08,745**

Answer:- Option D

Question 24:- The two figures on the left of the sign ‘::’ are related a certain way. The same relationship holds good for the second pair of figure on the right of the sign ‘::’ of which ,one is missing .Find the missing figure from the alternatives .

D-

Answer:- Option C

Question 25:- The paper is folded as per the following directions and cut as shown.
How will the unfolded sheet look like ?

Options

Answer: Option A

Question 26: Which option will come in place of question mark ?

Options

Answer: Option D

Question 27: For selection in a university program following condition needs to be fulfilled
The candidate must :

- I. Have at least 85% marks in 10th class.
- II. Possess at least 75% marks in 12th class.
- III. Possess a diploma course in computer programming.

515

- IV. Secure at least 70% marks in entrance written exam
- V. Secure at least 60% marks in interview.

- In case a candidate who fulfilled all conditions except(iii) but have scored more than 85% marks in entrance written exam then the case is to be referred to Dean.

In the question below, details of candidates are given Select the appropriate option accordingly.

Ruhi secured 78% marks in 12th class. She has a diploma course in computer programming. She scored 75% marks in written entrance exam and 63% marks in the interview scored 89% marks in 10th class

- A. If data is insufficient to conclude
- B. If candidate is to be rejected
- C. If candidate is to selected
- D. If case is to referred to Dean

Answer: Option C

Programming Logic

Question 1: What is the name of the method for holding group sessions with users, instead of individually?

- A. Computer Aided Software Engineer (CASE)
- B. Rapid Application Development (RAD)
- C. Entity Relational Development (ERD)
- D. Joint Application Development (JAD)

Answer:

Question 2: Solve the given expression

Assume that the value of $a= 30$, $b= 25$, $c=20$, $d= 10$;

Expression 1: $a * b / c - d$

Expression 2: $a * b / (c - d)$

- A. Expression 1: 27 Expression 2: 85

- B. Expression 1: 27 Expression 2: 75
- C. Expression 1: 27 Expression 2: 82
- D. Expression 1: 82 Expression 2: 27

Answer: Option B- Expression 1: 27 Expression 2: 75

Question 3: Identify Call by value and call by reference from the below statements

- I. Copy of original variable is passed
 - II. Actual and formal arguments will be created in the same memory location.
-
- A. Call by value, Call by value
 - B. Call by value, Call by reference
 - C. Call by reference, Call by reference
 - D. Call by reference, Call by value

Answer: Call by value, Call by reference

Question 4: What will be the output of the given program?

```
#include <stdio.h>
#include<conio.h>
#include<string.h>

void main()
{
    printf("%d\n",strlen("123\0456\0"));

    getch();
}
```

Answer: 5

Question 5: If we do not write main() in a program then what kind of error will be displayed

- A. Linked error
- B. Error at run time
- C. Logical error

D. No error

Answer:

Question 6: Correct the way of defining below expression

- A. 1.38 LD
- B. 1.38DL
- C. 1.38D
- D. 1.38L

Answer: 1.38L

Question 7: Which of the following is not a type of AVL rotation

- A. Left- right rotation
- B. Left rotation
- C. Circular rotation
- D. Right rotation

Answer- Circular rotation

Question 8: What will be the output of the following program?

```
#include <stdio.h>
```

```
int* max(int *p, int *q)
{
    if(*p > *q)
        return p;
    else
        return q;
}
```

```
int main()
{
    int x=10, y=20;
```

Answer: 20

Question 9: What is the output of the snippet given below

```
public class Main
{
    public static void main(String[] args)
    {
        try
        {
            int a= 100;
            a=a/0;
            System.out.println(a);
        }
        catch(Exception e)
        {
            System.out.println("Inside Exception");
        }
        catch(RuntimeException e)
        {
            System.out.println("Inside RunTimeException");
        }
    }
}
```

- A. exception RuntimeException has already been caught.
- B. exception CompileException has already been caught
- C. Inside Exception
- D. Inside RunTime Exception

Answer: exception RuntimeException has already been caught.

Question 10: #define FIRST_PART 7

#define LAST_PART 5

#define ALL_PARTS FIRST_PART + LAST_PART

Consider the above macros and evaluate the result of the following

Res= ALL_PARTS * ALL_PARTS

- A. 47
- B. 35
- C. 144
- D. 49

Answer:

Coding

Question-1

A travel agency is conducting a Survey for two different cities for their favourite travel destinations in Mumbai from 5 Users.

Travel destination of names of 5 countries already given. Find the most preferred favourite destination. Display the report at the end showing the highly ranked Travel destination by the residents as Preferred Travel Destination.

Criteria for deciding a highly ranked destination is by computing the destination being ranked as '1' by most of the residents. Travel Destination already provided are 'Malaysia', 'Australia', 'Germany', 'Dubai', 'France'

Rank 'R', $1 \leq R \leq 5$

Input is integers values from range 1 to 5 representing ranking should be taken from each of 5 residents of each of 5 Travel destinations.

Output should be in format-

<String-Name of Destination>

In case of more than one preferred destinations output should be-

<String-Name of Destination>

<String-Name of Destination>

29th October slot 1

Numerical Ability

Question 1:- There are three buckets X,Y and Z. X contains a mixture of liquids. A and B in the ratio 3:2, Y contains a mixture of liquids B and C in the ratio 5:3 and Z contains a mixture of liquid A and C in the ratio 2:3 Now 2 liters of mixture from X. 4 liters of mixture from Y and 2 liters of mixture from Z are mixed in a new bucket. If one liter of this new mixture is taken out, the amount of A in it will be-

- A- 200 ml
- B- 150 ml
- C- 250 ml
- D- 350ml

Answer:- Option A

Question 2 : The variance of the following data 29, 35, 38, 28, 36, 26, is.....(correct to two decimal places)

- A. 24.54
- B. 20.33
- C. 23.45
- D. 25.65

Answer: Option B

Options are giving wrong for the below question

Question 3 : Two money lenders A and B lent Rajesh an equal amount with rate of interest 6% per annum. But A charges compound interest and B charges simple interest to return the amount. Find the ratio of the amounts Rajesh needs to pay after two years, to B and A respectively.

- A. 110: 100
- B. 101: 100
- C. 103: 100
- D. 107: 100

Answer: Correct answer - 2809: 2800

Question 4 : If $(x + 10)\%$ of 240 is 60% more than $x\%$ of 180, then 15% of $(x + 20)$ is what percent less than 25% of x ?

- A. $19(1/21)$
- B. $15(1/2)$
- C. 16
- D. 15

Solution:- Option C

Question 5: Look at the bar graph below and answer the following question.

In which year was the highest percent increase in the sale of refrigerators recorded in comparison to its previous year?

- A. Same in 2016, 2018 and 2019
- B. 2018
- C. 2016
- D. 2019

Answer: Option C. 2016

Question 6: Find the standard deviation of the following distribution:

Class interval	Frequency
10-20	4
20-30	6

30-40	8
40-50	2

- A. $3\sqrt{17}$
- B. $5\sqrt{19}$
- C. $2\sqrt{21}$
- D. 16

Answer: Option C

Question 7: Three numbers P,Q and R are in the ratio 3:4:5. If 15 is subtracted from P, 5 is added to Q and 10 is added to R, the ratio between new numbers becomes 1:3:4. What is the value of Q?

- A. 40
- B. 30
- C. 25
- D. 20

Answer: Option A

Question 8: A sales representative's commission is 6% on all sales up to Rs. 15000 and 5% on all sales exceeding this. He remits Rs. 47350 to his company after deducting his commission. What were the total sales ?

- A. Rs. 50500
- B. Rs. 50000**
- C. Rs. 49000
- D. Rs. 47500

Answer: Option B

Question 9: There are 96 girls and 120 boys in a sports event. The sports teacher wants to arrange them in rows in such a way that each row contains an equal number of students and each row should have either girls or boys in it, not both. What is the Greatest number of students that can be arranged in each row?

- A. 26

- B. 24
- C. 20
- D. 22

Answer: Option B

Question 10 : The value of $\frac{2.66 * 2.66 * 2.66 - 1.82 * 1.82 * 1.82}{2.66 * 2.66 + 2.66 * 1.82 + 1.82 * 1.82}$ is

- A. 2.03
- B. 0.84
- C. 1.75
- D. 0.68

Answer: Option B

Question 11: A bookseller marks 40% more than the cost price on a copy. If he gives a discount of 25% on this marked price, what will be the loss or profit percent on selling it ?

- A. Loss , 10%
- B. Loss, 2%
- C. Profit, 1.5%
- D. Profit, 5%

Answer: Option D

Question 12: Study the following table to answer the given question:

528

The table depicts the number of students of different classes of a school practicing on different musical instruments:

Class	VI	VII	VIII
Musical Instruments			
Drum	10	13	14
Flute	12	22	11
Piano	15	9	8
Harmonica	25	18	17

By what percent is the total number of students who practice Harmonica in all three classes greater than the total number of students who practice flute in all three classes? (correct to two decimal places)

- A. 45.25%
- B. 15%
- C. 50%
- D. 33.33%**

Answer: Option D

Options provided in the question is wrong

Question 13: In 50 numbers 10 are threes, 15 are fours, 18 are fives and remaining are sixes. If a , b and c respectively represent the mean, mode and median of data, what is the value of $a + 2b - c$?

- a. 9.94
- b. 10.94
- c. 5.56
- d. 12.5

Answer: Answer is 9.44

Question 14 : 8000 tiles of size 15 cm by 15 cm are required to cover the entire floor of a hall length 15m. What is the breadth (in m) of the hall

- a. 15
- b. 10
- c. 20
- d. 12

Answer - Option D

Question 15 : The difference between the simple interest on a sum for four years at the rate of 11 % per annum and the compound interest of the same amount at a different rate in two years is zero, interest compounded yearly. What is the rate of compound interest per annum?

- a. 8%
- b. 6%
- c. 20%
- d. 15%

Answer: Option C

Question 16 : A can do a work in double the time than what B takes to do it and B can do the same work in double the time than what C takes to do it. If A and B together can complete the work in 4 days, then in how many days can C alone complete the same work ?

- a. 7 days
- b. 2 days
- c. 3 days
- d. 5 days

Solution:- Option C

Question 17: Rahul went to meet his sister in a nearby district. While going, he covered one-third of the distance at an average speed of 12 km/h and two-third at an average speed of 18 km/h. During the return

journey his average speed was 36/h. If he spent 10 hour in his total journey, excluding the time of stay, the total distance of his sister's house from the starting point is-

- a. 95km
- b. 103km
- c. **108km**
- d. 115km

Solution:- Option C

Options provided for this question is wrong

Question 18 : A can do 25% of work in 4 days and B can do one-third of the same work in 4 days. C can complete the work in the same time as A and B would take working together, how long will it take to complete the same work?

Options

- a. $\frac{24}{7}$
- b. $\frac{5}{19}$
- c. $\frac{3}{27}$
- d. $\frac{8}{8}$

Answer : Answer will be 48/7

Question 19 : In a competitive exam, 5 marks are awarded for every correct answer and for every wrong answer, 2 marks are deducted. Sathwik scores 32 marks in the examination. If 4 marks had been awarded for each correct answer and 1 mark had been deducted for each incorrect answer, Sathwik would have scored 34 marks. If Sathwik attempted all the questions, how many questions were there in the test ?

- A. 14
- B. 12
- C. 20
- D. **26**

Answer: Option D

Question 20 : If ${}^4\sqrt{2\sqrt{3\sqrt{729}}}=P$, then the value of $\frac{P^{20}}{162} + \frac{5}{2}$ is

- a. 3
- b. 1
- c. 4**
- d. 2

Answer:- Option C

Question 21 : Rahim purchased a used car and sold it on 5% profit to Sarvesh, Sarvesh spent Rs 6500 on repairing it and then sold it on 10% profit to Mohan. Mohan sold it to Rita at 6% loss. Rita spent Rs 1280 on repairing and sold it to her relatives without any profit or loss in Rs 84000. What was the cost price of the car when Rahim bought it?

- a. Rs. 66,000
- b. Rs. 70,000**
- c. Rs. 68,000
- d. Rs. 65,000

Answer:- Option B

Question 22: The surface area of two cubes are in the ratio of 1:9. What will be the ratio of their volumes?

- a. 1:27**
- b. 1:81
- c. 1:9
- d. 1:3

Answer : Option A.

Question 23: Three numbers A, B and C are such that $A : B = 2:3$ and $B : C = 4 : 5$. The ratio between A:B:C is?

- a. **8:12:15**
- b. 5:10:15
- c. 3:5:8
- d. 2:4:15

Answer : Option A.

Question 24 : If mean of a distribution is 10 and the standard deviation is 4. What is the value of the coefficient of variation?

- a. 14%
- b. **40%**
- c. 6%
- d. 10%

Solution:- Option B

Question 25 : The value of $1 + \frac{1}{1 + \frac{1}{3 + \frac{2}{3}}} \div \frac{6}{7} + \frac{1}{3}$ of $\left(\frac{1 + \frac{1}{3 + \frac{3}{5}}}{\frac{2}{3}} \right)$

- a. $5\frac{2}{9}$
- b. $2\frac{5}{9}$
- c. $4\frac{3}{7}$
- d. $3\frac{4}{7}$

Answer: Option B

Question 26: Sarita went to her college by an auto rickshaw and returned by cycle rickshaw and found that it took 20 minutes more than the time taken while going by auto rickshaw, although the distance travelled in both the cases is the same i.e, 5 km. If the ratio of average speed of auto rickshaw and cycle rickshaw is 3:1, the average speed of cycle rickshaw is?

- a. 8 km/h
- b. **10 km/h**
- c. 6 km/h

d. 15 km/h

Answer: **Option B**

Verbal Ability

Question 1:- Read the passage carefully. Then select the words/options listed A to D which best fill in the blanks:

In Summer people _____ to grill meats and vegetables because the sun is high and the days are much longer. Grill safety is a critical element while having a grill party. There are many important _____ to remember. The first is _____ a grill that is safe and long lasting. There are gas grills as well. Since gas grills _____ cost more money over time, you need to buy more gas.

Options:

- b. my grandmother would sit by her wheels
- c. spinning and reciting prayers
- d. No error

Answer: A (from sunrise to sunset)

Question 3: Two sentences have been removed from the text below. Read the text and then match the missing sentences to fill Blank 1 and Blank 2. You will need to choose two options out of four P, Q, R and S provided.

Dolphins are regarded as the friendliest creatures in the sea and stories of them helping drowning sailors have been common since Roman times. The more we learn about dolphins, the more we realize that their society is more complex than previously imagined.

(1)_____ Some scientists have suggested that dolphins have a language but it is much more probable that they communicate with each other without words.

(2)_____ Certainly the most common argument in favor of man's superiority over them that we can kill them more easily than they can kill us is the least satisfactory. On the contrary, the more we discover about these remarkable creatures, the less we appear superior when we destroy them.

Options:

P: Scientists believe that dolphins once walked on Earth.

Q: But man is by far God's most amazing creation, mainly because we can think and speak.

R: They look after other dolphins when they are ill, care for pregnant mothers and protect the weakest in the community, as we do.

S: Could any of these mammals be more intelligent than man?

- a. 1Q, 2P
- b. 1R, 2P
- c. **1R, 2S**
- d. 1P, 2Q

Answer: C

Question 4: Choose the most appropriate word/words to complete the sentence.

I cannot _____ agree with your opinion.

- a. Completing
- b. Complete
- c. **Completely**
- d. Completed

Answer: C

Question 5: Two sentences have been removed from the text below. Read the text and then match the missing sentences to fill Blank 1 and Blank 2. You will need to choose two options out of four P, Q, R and S provided.

In Siberia, the temperature can fall as low as seventy degree centigrade below zero. The intense cold makes it immensely difficult and dangerous for anyone unaccustomed to it.

- 1) _____ When this happens, the topsoil thaws to a depth of about 2 metres and can support rich vegetation.
- 2) _____

Options

P: The Siberian Husky is a hardy and compact dog, and is known to be friendly, fastidious and dignified.

Q: Though parts of the region are colder than the North Pole itself, the temperature in summer may reach 40 degree centigrade.

R: The summer days are so long that the earth stores enough heat to bear a variety of flowers which blossom between the trees.

S: As many as 2,500 inmates considered enemies of the state per executed here during the Soviet Union's political repression campaign of 1937, 1938 and it's believed no one ever escaped.

- 1.P, 2.Q
- **1.Q, 2.R**
- 1.P, 2.S
- 1.Q, 2.S

Answer: B

Question 6: For the four sentences (S1 to S4) paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose appropriate sentences for S2 and S3 respectively.

S1: Naval architects never claim that a ship is unsinkable, but the sinking of the passenger and car ferry, Estonia and the Baltic surely should have never happened.

S2:

S3:

S4: The final death toll amounted to 912 resource

Options

P: Yet hours later, The Estonia rolled over and sank in a cold, stormy night, going down so quickly most of those on board caught the dark, flooding cabins, had no chance to save themselves

Q: It was well-designed, carefully maintained, had requisite lifeboats and had regular inspections

R: Sailing on a ship is one of the most pleasurable activities, yet fraught and risk

- QP
- QR
- PQ
- PR

Answer: A

Question 7: Read the following passage and answer the questions.

The growing chatter about the ill-effects of social media is packaged together, dramatised and heavily underlined in the Social Dilemma, Directed by Jeff Orlowski, the 93 minutes film begins with the sense of ominous statements. A range of technology experts allude to the flip side of social media and the way a tool that was meant to connect people has gradually become a curse akin to an existential threat. The interviewers include former employees of Google, Facebook, Pinterest, Twitter and other internet giants who talk about the monster they helped create.

Together, these experts explain how humans have become a pawn in the game between social media and advertisers. Their dier warning culminates in the lesson that social media companies are in a tussle for the attention of users and ultimately in the business of facilitating behaviour role change to favour advertises.

The film blames the anarchy of technology, but also underlines that it is humans who unknowingly created this monster. It also examines how human vulnerabilities and predispositions are tapped into through the very design of these platforms, which is meant to grab attention and prolong engagement.

The film proves to be an engaging watch because of how it successfully underlines a threat that has been extensively written about. While there are the usual suspects- surveillance, data collection, fake news, the creation of a post truth world-the documentary expands upon the extent to which human psychology is being exploited through algorithms and artificial intelligence.

AI is already running our lives, the film proposes in ways that are subtle and have escaped our attention. Human beings are lab rats and are being moulded, manipulated and indoctrinated everyday in ways that we do not even realise, the documentary warns Compelling and taut. The Social Dilemma ensures that at the very least, viewers won't look at notifications in constantly refreshing news feeds the same way again.

In which way is “free-will” being destroyed by Social Media algorithms?

- Social media does not allow man to think his own thoughts and make his own decisions-----his friends and family and even the government are constantly monitoring his movements.
- Humans waste valuable time on useless social media platforms, without realising that their lives are passing by
- Artificial intelligence is controlling our minds and responses, the data we consume, the things we buy and the thoughts we have----- we are no longer free.
- Social media makes it easy for man to forget the basic principles or exaggerate his worst qualities.

Answer: Artificial intelligence is controlling our minds and responses, the data we consume, the things we buy and the thoughts we have----- we are no longer free.

Question 8: Read the following passage and answer the questions.

The growing chatter about the ill-effects of social media is packaged together, dramatised and heavily underlined in the Social Dilemma, Directed by Jeff Orlowski, the 93 minutes film begins with the sense of ominous statements. A range of technology experts allude to the flip side of social media and the way a tool that was meant to connect people has gradually become a curse akin to an existential threat. The

interviewers include former employees of Google, Facebook, Pinterest, Twitter and other internet giants who talk about the monster they helped create.

Together, these experts explain how humans have become a pawn in the game between social media and advertisers. Their diatribe culminates in the lesson that social media companies are in a tussle for the attention of users and ultimately in the business of facilitating behaviour change to favour advertisers.

The film blames the anarchy of technology, but also underlines that it is humans who unknowingly created this monster. It also examines how human vulnerabilities and predispositions are tapped into through the very design of these platforms, which is meant to grab attention and prolong engagement.

The film proves to be an engaging watch because of how it successfully underlines a threat that has been extensively written about. While there are the usual suspects- surveillance, data collection, fake news, the creation of a post truth world- the documentary expands upon the extent to which human psychology is being exploited through algorithms and artificial intelligence.

AI is already running our lives, the film proposes in ways that are subtle and have escaped our attention. Human beings are lab rats and are being moulded, manipulated and indoctrinated everyday in ways that we do not even realise, the documentary warns compellingly and tautly. The Social Dilemma ensures that at the very least, viewers won't look at notifications in constantly refreshing news feeds the same way again.

What according to the author, will the film “Social Dilemma” help us with?

- It is a warning that we are already behaving like robots and the future looks grim
- It is a wake-up call for people, asking them to reduce use of social media and take control of their lives.
- It will help us to be resigned to the fact that technology is running mankind, and that we must bow to it
- It will start a civil disobedience movement, revolt of people, who want to lead saner lives henceforth.

Answer: It is a wake-up call for people, asking them to reduce use of social media and take control of their lives.

Question 9: Read the following passage and answer the questions.

The growing chatter about the ill-effects of social media is packaged together, dramatised and heavily underlined in the Social Dilemma, Directed by Jeff Orlowski, the 93 minutes film begins with the sense of ominous statements. A range of technology experts allude to the flip side of social media and the way a tool that was meant to connect people has gradually become a curse akin to an existential threat. The interviewers include former employees of Google, Facebook, Pinterest, Twitter and other internet giants who talk about the monster they helped create.

Together, these experts explain how humans have become a pawn in the game between social media and advertisers. Their dire warning culminates in the lesson that social media companies are in a tussle for the attention of users and ultimately in the business of facilitating behaviour role change to favour advertisers.

The film blames the anarchy of technology, but also underlines that it is humans who unknowingly created this monster. It also examines how human vulnerabilities and predispositions are tapped into through the very design of these platforms, which is meant to grab attention and prolong engagement.

The film proves to be an engaging watch because of how it successfully underlines a threat that has been extensively written about. While there are the usual suspects- surveillance, data collection, fake news, the creation of a post truth world-the documentary expands upon the extent to which human psychology is being exploited through algorithms and artificial intelligence.

AI is already running our lives, the film proposes in ways that are subtle and have escaped our attention. Human beings are lab rats and are being moulded, manipulated and indoctrinated everyday in ways that we do not even realise, the documentary warns Compelling and taut. The Social Dilemma ensures that at the very least, viewers won't look at notifications in constantly refreshing news feeds the same way again.

What is the theme of the docu-drama The Social Dilemma?

- That the addiction of social medias is more dangerous than the addiction of narcotics or other substances
- That social media will completely take over the minds and brains of generations born post 1995
- The social media is the only platform on which humans will stay connected with each other and the commercial world from now on

In the phrase, “The film blames this anarchy on technology”, the word opposite to the meaning in ‘anarchy’ is:--

- a. Lawlessness
- b. Leadership
- c. Harmony
- d. Revolt

Answer: Leadership

Question 11:For the four sentences S1 to S4 paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose appropriate sentences for the following

S1. It’s nearly spring and it's time to grow plants

S2.

S3.

S4. It’s true that some plants are picky, but most are super flexible and only require water, dirt and ofcourse sun.

P. Of course, not all plants are currently in season.

Q. The children love to play in the water, dirt and sun.

R. This makes it very difficult to pick the best plants to grow, though plants can grow in nearly every environment.

- a. QP
- b. PR
- c. RQ
- d. PQ

Answer: D

Question 12:For the four sentences S1 to S4 paragraph below, sentences S1 and S4 are given. From the options P Q and R, choose appropriate sentences for the following

S1. You will usually encounter new words when you start reading books

S2.

S3.

S4. You may not even need to use a dictionary because you can guess the meaning from the rest of the text(from the context).

P. But if there are, say a maximum of five new words per page, you will learn this vocabulary easily.

Q. a student's best friend

R. then the level is too high and you should read something simpler

Options

- a. QR
- b. PR
- c. QP
- d. RP

Answer: RP

Question 13: Choose the appropriate pair of options that complete the sentence.

Had I _____ about the plans you are sharing with me now, I would not have come to visit you at this _____ hour.

Blank 1- A: seen. B: known. C: understand. D: know

Blank 2- A: odd. B: middle. C: officious. D: dusk

- A. AB
- B. BA
- C. BB
- D. DC

Answer: Opt B- BA

Question 14 - Read the passage carefully, Then select the words/ options listed A to D which best fill in the blanks.

Opera refers to a _____ art form, originating in Europe, in which the emotional content is conveyed to the audience as much through music, both vocal and _____ as it is through lyrics. By contrast in musical theater an actor's dramatic performance is _____, and the music plays a lesser role. The singers are accompanied by a musical ensemble ranging from a small instrumental ensemble to a full _____ orchestra.

Option:

Blank1 :

- A. dramatic
- B. medical
- C. mysterious
- D. spun

Blank2:

- A. violin
- B. poems
- C. instrumental
- D. action

Blank3:

- A. stylish
- B. primary
- C. supporting
- D. primal

Blank4:

- A. classical
- B. street
- C. banjo
- D. symphonic

Options

- a. ACBD
- b. CDAB
- c. DABC
- d. ADCS

Answer: A

Question 15: Choose the most appropriate word/words to complete the sentence correctly

My sister has _____ the rights to our ancestral property in my favour.

Options

- a. Signed away
- b. Sign into
- c. Sign for
- d. Signed

Answer: Signed

Question 16: One part of the sentence below may contain an error. Identify the part.

Had she become a doctor/ as her mother had wished/ she will have earn/ a lot of money.

Options

- a. as her mother had wished
- b. a lot of money
- c. had she become a doctor
- d. **she will have earn**

Answer: D

Question 17: Read the passage and answer the questions

A great epic book needs to be retold, afresh for each generation. The Mahabharata is one of those books, known as the fifth Veda, it is quite unlike the first four Vedas which are difficult to comprehend. It is an

546

extensive book, seven times longer than the Odyssey and Iliad combined. An epic of ancient India, Mahabharata teaches the most abstract ideas indirectly through stories. It highlights the most complex ethical dilemmas to take the reader to the deepest level of spiritual wisdom.

The underlining contest in the book between the Pandavas and the Kaurvas, who are cousins, is like that between the good and evil. Its Central event is the battle that takes place on the holy ground at Kurukshetra, but this battle also represents the living struggle within each individual's heart. As do the Greek philosophers, Mahabharat extolls examinations of one's life, and it gives us the most uncommon wisdom to do so. The Bhagavad Gita, a jewel of world signature, is a part of it.

The Mahabharata is a living document of Indian and Southeast Asian culture, and beyond that, it has influenced literature. The story continues to be relevant to contemporary issues and concerns, especially in showing the havoc that blind ambition, greed, and hubris can bring upon society. There are those who argue that selfless action and protection of Dharma, the moral law, taught by Krishna to Arjun, should be somehow incorporated in our business environment in the Bhagavad-Gita, Lord Krishna said, "The meaning of Karma is the intention. The intention behind action is what matters, The Mahabharata inspires and provides strength as we go through the tribulations of life to do our duty and not to be attached to the fruits of the labour. It teaches fearlessness and detachment, as in the final analysis, Lord Krishna reminds us that our essence is immortal.

What is the common thread that runs through ancient epics like Odyssey and the Iliad of the Mahabharata?

Options

- a. Humans are frail in their beliefs this is what the epics teach us in no uncertain terms
- b. All the epics reveal eternal truth about existence and in the process gifts as exceptional knowledge about moral dilemmas
- c. All epics extol the necessity of valour, the beauty of woman and the lure of money and property that is the bane of humankind
- d. All epics teach us that the most common man has to learn about the right and wrong of life only through the stories of the rich and famous.

Answer: All the epics reveal eternal truth about existence and in the process gifts as exceptional knowledge about moral dilemmas

A great epic book needs to be retold, afresh for each generation. The Mahabharata is one of those books, known as the fifth Veda, it is quite unlike the first four Vedas which are difficult to comprehend. It is an extensive book, seven times longer than the Odyssey and Iliad combined. An epic of ancient India, Mahabharata teaches the most abstract ideas indirectly through stories. It highlights the most complex ethical dilemmas to take the reader to the deepest level of spiritual wisdom.

The underlining contest in the book between the Pandavas and the Kaurvas, who are cousins, is like that between the good and evil. Its Central event is the battle that takes place on the holy ground at Kurukshetra, but this battle also represents the living struggle within each individual's heart. As do the Greek philosophers, Mahabharat extolls examinations of one's life, and it gives us the most uncommon wisdom to do so. The Bhagavad Gita, a jewel of world signature, is a part of it.

The Mahabharata is a living document of Indian and Southeast Asian culture, and beyond that, it has influenced literature. The story continues to be relevant to contemporary issues and concerns, especially in showing the havoc that blind ambition, greed, and hubris can bring upon society. There are those who argue that selfless action and protection of Dharma, the moral law, taught by Krishna to Arjun, should be somehow incorporated in our business environment in the Bhagavad-Gita, Lord Krishna said, "The meaning of Karma is the intention. It teaches fearlessness and detachment, as in the final analysis, Lord Krishna reminds us that our essence is immortal.

What does the epic text consist of ?

Option

- a. A song of recounting of the life stories of kings, Queens and their children, a folk tale that is set in all South Asian countries and thus popular.
- b. Consists of Greek and Iranian characters from history books who die for their country or kingdom's, often in the pursuit of beautiful women.
- c. It consists of a staged dance drama about fairy tales, where heroes and heroines dance and sing, performed in some villages.
- d. A long dramatic narrative in words from the recounts the heroic and combative journey of legendary characters teaches universal truths.

Answer: A long dramatic narrative in words from the recounts the heroic and combative journey of legendary characters teaches universal truths.

It teaches fearlessness and detachment, as in the final analysis, Lord Krishna reminds us that our essence is immortal.

What is the theme of the passage?

Option

- a. The epic works as a tale of good versus evil in the battle between Pandavas and Kauravas, and also highlights the internal struggle in all of us, which leads to spiritual wisdom.
- b. The Mahabharata is not as powerful or multi-layered an epic as Ramayana, which upholds truth, justice and morally and can be applied to our lives even today.
- c. The Mahabharata teaches readers about the finest aspects of warfare and martial struggle and how man's ambition can make or break him in the final race.
- d. The Mahabharata is simply a history of old, ancient India, where small clans fought amongst each other for land, cattle, women and gold. Thus it reflects old Indian regit traditions

Answer: The epic works as a tale of good versus evil in the battle between Pandavas and Kauravas, and also highlights the internal struggle in all of us, which leads to spiritual wisdom.

Since the early 1900s, many glaciers around the world have been rapidly melting ____1____ Specifically, since the industrial revolution, carbon dioxide, greenhouse gas emissions have raised temperatures, even larger in the poles. _____2_____ Scientists project that if emissions continue to rise unchecked, the Arctic could be ice free in the summer as soon as the year 2040 as ocean and air temperatures continue to rise rapidly.

- A- More than a third of the remaining glaciers of the world would have melted by 2030.
B- As a result, glaciers are rapidly melting, calving off into the sea and retreating on land.
C- Human activities are the root of this phenomenon.

- a. 1C, 2A
b. 1B, 2C
c. 1A, 2B
d. 1C, 2B

Answer: D

Question 22: Select the most appropriate meaning of the phrase underlined below:

After working through the day, and half the night, the doctors decided to call it a day.

- a. Phone their families
b. Check their time
c. **Stop working**
d. Call other doctors for the day.

Answer: C

Question 23: One part of the sentence may contain an error. Identify the part.

My lemon trees are being / destroyed by Aphids / where eggs are burrowed / into the bark of the tree.

- a. destroyed by Aphids
b. where eggs are burrowed
c. My lemon trees are being
d. **into the bark of the tree.**

Answer - D

Question 24: One part of the sentence may contain an error. Identify the part.

My lemon trees are being / destroyed by Aphids / where eggs are burrowed / into the bark of the tree.

- a. destroyed by Aphids
- b. where eggs are burrowed
- c. My lemon trees are being
- d. into the bark of the tree.**

Answer - D

Logical Ability

Question 1: Determine whether the data given in the statements (1) and (2) is sufficient for answering the following question

What is the income from the sale of medicines used for the treatment of cancer in January?

- 1. The number of cancer patients who were being treated at a multispeciality hospital during January 2020 was twice the number of cancer patients treated in December in 2019.
 - 2. The sale of medicines used for the treatment had gone up by 20% in the same period.
- A. Only statement 1 is sufficient
 - B. Only statement 1 is sufficient
 - C. Neither statement 1 nor statement 2 is sufficient
 - D. Both statements 1 and 2 are required.

Answer: Option C

Question 2 :- A boy leaves his east facing home from the front door and reaches a temple from where he turns right. He then walks till the marketplace and turns left. After reaching a flower shop he turns left to return home. In which direction is he facing now ?

- A. West
- B. South
- C. North**
- D. East

Answer:- Option C

Question 3 :- Identify which conclusions definitely follow the given statement disregarding the company known facts.

Statements:

- 1. All jackals are carnivores
- 2. All carnivores are dangerous animal
- 3. All dangerous animals are wild.

Conclusion:

- 1. All dangerous animals are jackals.
- 2. All jackals are wild
- 3. No carnivores are dangerous animals.
- 4. No jackals are carnivores

- A. Only conclusion ii follow**
- B. Only conclusion iv follow
- C. Only conclusion iii follow
- D. Only conclusion i follow

Solution: Option A

Question 4 : Given the first set of alphabet are in reverse alphabetical order and the second in the correct alphabetical order, find the two pairs that are similar in pattern from the following cluster pairs:

- (A) ZXWTR : NPRTV
- (B) MKIGE : ACEGH
- (C) TRPNL : VXZBD
- (D) VTRPN : MOQSU
- (E) FDBZX : RTUWY

- A. C and A
- B. B and C
- C. C and D**

D. D and A

Answer:- Option C

Question 5 :- From the options given below find the pattern that will replace the questions mark in the following:-

A.

B.

C.

D.

Answer:- Option A

Question 6 :- Given below is a statement followed by two assumptions. Identify which assumptions are correct.

Statements:

Students who have passed Class XII must have their college admission application forms by the last date specified.

Assumptions:

- (i) Student who wish to pursue further studies must apply for admission in time
- (ii) Classes will begin after the vacations are over.

- A. Only assumption I is correct
- B. Only assumption II is correct
- C. Both assumption I and II are correct
- D. Neither assumption I nor assumption II is correct.

Answer:- Neither assumption I nor assumption II is correct.

D

Question 7 : Read the given statement(s) and conclusions carefully and select which of the conclusions logically matches from the Statement(s)

Statements:

Lack of educational opportunities in the villages is a major reason for the rural girls not being able to pursue higher studies. The rural boys go out to the cities for higher studies but often drop out for not being to bear the high cost of living in such cities

Conclusions:

- (I) Girls from villages often cannot acquire higher education
 - (ii) Boys from rural areas have the opportunity to acquire higher education in cities
- a. Both conclusions (i) and (ii) follows
 - b. Neither conclusion (i) nor (ii) follows
 - c. Only conclusion (ii) follows
 - d. Only conclusion (i) follows

Answer: Option A

Question 8 : If A+B means 'A' is the mother of 'B', 'A#B' means 'A' is the father of 'B', 'A@B' means 'A' is the sister of 'B' and 'A-B' means 'A' is the brother of 'B' then, which expression in the options given below means 'M' is the grand daughter of 'J'?

- a. J + K # L @ M - N
- b. J @ K # L - M @ N
- c. **J # K - L + M @ N**
- d. J - K # L @ M - N

Answer: Option C

Question 9 : Read the following statements carefully and choose the option which can be definitely concluded from the given statement(s).

Statements:

Some apples are fruit
Some fruits are mangoes
All Mangoes are yellow

- A. Some fruits are yellow
- B. All yellow things are mangoes
- C. Some apples are yellow
- D. No apples are mangoes

Answer : Option A

Question 10 : From the following venn diagram determine how many doctors are either surgeons or radiologists.

- A. 3
- B. 10**
- C. 4
- D. 6

Answer: Option B

Question 11 : The following are the criteria for selecting a Software Engineer for an IT company.

The Candidate must:

- (a) have completed B.C.A with three than 70% marks .
- (b) be more than 25 years and less than 30 years of age as on june 1 2020.
- (c) have secured more than 75% marks in the interview and more than 60% marks in the written test

However,if the candidate fulfils all the above criteria except:

- (d) at(b), but has completed M.C.A with at least 75% marks,his /her case is to be referred to the Managing Director.
- (e) at(c), but has secured more than 85% marks in B.C.A, his/her case is to be referred to the Chief executive officer.

Pranitha has obtained 80% marks in B.C.A and 79% marks in M.C.A She was born on april 12 1989.She has secured 62% marks in the written test and 76% marks in the interview .What decision would be taken in her case ?

- A. She would be selected
- B. Her case is to be referred to the Chief Executive Officer
- C. She would not be selected**
- D. Her case is to be referred to the Managing Director.

Answer: Option C

Question 12 : The time that elapses between the arrival of an aircraft at an airport and its being ready to take off is called 'recovery time'. The recovery time of each aircraft of Air India is 30 minutes of Jet Airways 20 minutes , of Air Canada 60 mins and of Air Italia 40 minutes. Of the total number of aircrafts that lands and take off at Delhi Airport on a particular day in a month, half the number belongs to the airline company Air India. One-fifth of the remaining air crafts that land and take off at Delhi Airport on the same day belongs to Air Italia. Jet Airways and Air Canada both the airlines have the same number of aircrafts that land and take off at the Delhi Airport on the same day. The total number of aircrafts of all the four airlines that land and take off at Delhi Airport on one particular day is 230. What is his total number of Aircrafts of Jet Airways and Air Canada that land and take off one day at Delhi Airport ?

- A. 91
- B. 92**
- C. 69
- D. 46

Answer: Option B

Question 13: Choose the odd term in the following series:

DIM, GLP, JOT, MRV, PUY, SXB

- A. DIM
- B. JOT
- C. GLP
- D. MRV

Answer:B

Question 14: A music band consists of 5 persons P,Q,R,S,T . One of them is a Guitarist. The other is a singer. Another is a Violinist, while one plays the drum and one the trumpet. S does not play any musical instrument. P and T do not play any string instrument. So who plays guitar.

- A. Q or R
- B. P or Q
- C. P or T
- D. R or S

Answer: Option A- Q or R

Question 15: During the covid lockdown period sale of laptops was on the rise. The number of laptops sold in the month of february 2020 was double the number of laptops sold in the month of january 2020. The sale of laptops in december 2019 was double of laptops sold in the month of january 2020. In the month of March 2020 the sale was twice the number of laptops sold in January 2020. The sale of laptops in the month of April 2020 was same as March 2020. The number of laptops in the months of January was 150 as well as in the month of May 2020. What is the percentage of the number of laptops sold in the month of may 2020?

- A. 18
- B. 15
- C. 10
- D. 20

Answer: Option C

Question 16 - An open box that has no lid is to be painted on all the sides, inside as well as on the outside. How many sides will have to be painted in all?

- A. 8
- B. 4
- C. 10
- D. 12

Solution :- Option A

Question 17 - If 'A+B' means 'A is the mother of B', 'A#B' means 'A is the father of B', 'A@B' means 'A is the sister of B' and 'A-B' means 'A is the brother of B' then in the expression 'P@Q#R@S-T' What is the relation that 'P' has to 'T'?

- A. Niece

- B. Mother
- C. Daughter
- D. Aunt**

Solution:- Option B

Question 18- In the following diagram, the triangle stands for 'males', the circle stands for 'doctors', the rectangle stands for 'government employed', the hexagon stands for 'corona warriors'. The numbers in different segments show the number of persons for that segment.

How many government employed doctors are either corona warriors or males or both?

- A. 22
- B. 73**
- C. 38
- D. 35

Answer: Options B

Question 19- Find the value of X in the given diagram?

Question 20 : The average age of the female employees of a retail outlet is 35 years. The total no of employees is 210. The average ratio of female and male staff is 1:2. The total average age of the employees is 40 years. Find the average age of male employees.

- a. 39.5
- b. **42.5**
- c. 45.2
- d. 45.5

Answer: Option B

Question 21: Determine whether the statements given below provide sufficient data to answer the question.

Report of an NGO provided the following data of literacy level of India.

Out of 600 million literates, 150 million have been to school only till the primary level. 50 million have passed middle school. 125 million have passed class X, while 50 million are graduates of these 30 million are girls.

- 1- On the basis of the given data, the percentage of girls who are graduates as compared to the total number of literates in India is 5%.
- 2- The ratio between graduate boys and graduate girls is 2:3.

- a. **Data is sufficient for both Statement 1 and 2**
- b. Data is insufficient for both statements.
- c. Data is sufficient for only statement 2
- d. Data is sufficient for only statement 1

Answer: Option A

Question 22: Determine whether the statements given below provide sufficient data to answer the question.

What is the percentage of Delhi girls who appeared for class X examination?

- 1.No. of boys who appeared for class X examination in delhi is 12 lakhs.
 - 2.Total number of students who appeared for class X examination in delhi is 22 lakhs.
- a. Only statement 1 is sufficient.
 - b. Only statement 2 is sufficient.
 - c. **Both statements 1 and 2 are required.**
 - d. Neither statement 1 nor statement 2 is sufficient.

Answer:- Option C

Question 23: The time that elapses between the arrival of an aircraft at an airport and its being ready to takeoff is called as recovery time.The recovery time of each air craft of Air India is 40 minutes,of jet airways is 20 minutes,of Air Canada is 60 minutes and of Air Italia is 40 minutes.Of the total number of aircrafts that land and takeoff at Delhi Airport on a particular day in a month,half the number belongs to

air line company Air India. One fifth of the airlines land and takeoff at Delhi airport on the same day belong to Air Italia. Jet Airways and Air Canada both Airlines have equal number of aircrafts that land and takeoff at Delhi Airport on the same day. The total number of Aircrafts of all four aircrafts that land and takeoff at Delhi Airport at a particular day is 230. What is the ratio of recovery time among the four Air lines: Air India, Jet Airways, Air Canada and Air Italia respectively?

- a. 2:1:3:2
- b. 2:2:3:4
- c. 4:2:2:3
- d. 4:2:4:6

Answer: Option A

Question 24: Identify which conclusion definitely follows from the four given statements disregarding the commonly known facts.

Statements:

- 1. All sailors are swimmers
- 2. All swimmers are lifeguards
- 3. Some lifeguards are sports person.
- 4. No sports person are sailors

Conclusion:-

- I. All lifeguards are sailors
- II. All sailors are lifeguards
- III. No swimmers are sports person
- IV. Some lifeguards are not sailors.

- A. Only conclusion II and IV follows
- B. Only conclusion II and III follows
- C. Only conclusion III and IV follows
- D. Only conclusion I and II follows

Answer: Option A

Question 25 - A cuboid shaped box has different patterns on all its faces. From the images given below determine which pattern will appear in the face opposite to the face with a diamond on it?

A.

B.

C.

D.

Answer: Option D

Question 26: Choose an option which is valid course of action for the statement given below:

Statement:-

Research has revealed that the use of digital games by students is the main reason for an increase in the sale of Iphones and a drop in the sale of books.

Course of Action:

(i) Iphones must be banned for students.

- (ii) Students must be cautioned on the harmful effects of excessive digital gaming.
- (iii) Students must be encouraged to read books.

- A- Neither Action II not Action III must be taken
- B- Only Action II must be taken
- C- Both Action II and III must be taken

Answer:- C

Question 28:- The diagram below is of an unfolded paper that was folded twice and cut in a particular way. From the options given below choose the pattern that was cut on the folded paper.

a.

b.

Answer: Option A

Question 29: A grey paper has been folded three times (first into half, then again into half, and the quarter is again folded into half). It is then cut on the lines marked on it. What will be the pattern on it look like when it is unfolded?

- A. 
- B. 
- C. 
- D. 

Answer: Option B

Question 30: Select the option that is related to the third fig in the same way that the second figure is related to the first figure

A.

B.

C.

D.

Answer: Option A

Programming Logic

Question 1: What will be the output of the below code ?

```
#include<iostream>
using namespace std;
int main()
{
    int a[]={92,-94,96,-98};
    cout <<-1[a];
    return 0;
}
```

Enter your answer ONLY as NUMERAL in the box

Answer

94

Question 2: What will be the output of the below code ?

```
#include<iostream>
using namespace std;
int main()
{
    int a[]={92,-94,96,-98};
    cout <<-1[a];
    return 0;
}
```

- a. Null Pointer Exception
- b. String matches
- c. Compilation Error
- d. Nothing prints

Answer : Option D

Question 3: Calculate the postfix for the below expression

Infix Expression : $P/Q-(R+S)*(U-V)+2$

Postfix Expression : $-/PQ+*+RS-UVW$

- a. $P/QRS+UV*-+W$
- b. $P/RSQ+UVW+-*-$
- c. $PQ/RS+UV-*--W+$
- d. $QP/SR+UV*---W+$

Answer-

Question 4: An array has five elements as 10, 20, 30, 40, 50. User runs the program to find N . N is found in the first iteration with binary search manner. Find the value of N.

- A. 10
- B. 20
- C. 30
- D. 40

Answer:

Question 5: The following diagram is an example of which tree?

- A. Binary Search Tree
- B. Fibonacci tree
- C. AVL tree
- D. Binary tree.

Answer: Fibonacci Tree

Question 6: If the size of an integer is 4 bytes then what will be the output of the given program ?

```
#include<stdio.h>
int main()
{
    int a[] = {10,20,30,40,50};
    int *p1, *p2;
    p1 = &a[4];
    p2 = &a[2];
    printf("%d%d", p1-p2, *p1-*p2);
    return 0;
}
```

Question 7: What is the output of the following code?

```
Integer num1
Store num1= 3
do
    Print num 1+2
    num1= num1-1
while (num1 is not equal to 0)
End while
```

- A. 6 5 3
- B. 5 4 4
- C. 5 4 3
- D. 4 3 2

Answer:

Question 8: Identify infix based on the given expressions below

Postfix Expressions: $A B C * + D E / - * F G H$

Prefix Expression: $A - * B C + / D E - * F G H$

- 1. $B + C + A - (F * G - H) + (D / E)$
- 2. $A + B * C - D (E / D) + (H * G - F)$
- 3. $A + B * C - (D / E) + F * G - H$
- 4. $(F * G - H) + A + B * C - (D / E)$

Answer: Option C- $A + B * C - (D / E) + F * G - H$

Input

18

Output

1 2 3 6 9 19

Solution in C

```
#include <stdio.h>
int main()
{
    int num, i;
    scanf("%d",&num);
    if(num<0)
    {
        printf("Wrong Input");
    }
    else
    {
        for(i=1; i<=num; i++)
        {
            if(num%i==0)
            {
                printf("%d ",i);
            }
        }
        return 0;
    }
}
```

Solution in Python:

```
n = int(input())
if n < 0:
    print("INVALID INPUT")
    exit()
i = 1
while i <= n :
    if (n % i==0) :
        print(i,end=" ")
    i = i + 1
```

Question 2 : Alex has been preparing a box for handicraft. The box consists of N pieces of stones with each stone having a certain weight assigned to it. Each stone in the box will carry a different weight. This means no two stones can have the same weight

Alex wants to do this by making minimal changes in the original weight at least as much as its original weight

Find the minimum total weight that he can set for the box.

Note: Stone weight are not in float value.

Input

1. First input contains N, the total number of stones in the box
2. Second Input contains N sorted integers separated by newline A1, A2...An, representing the original weights assigned to each stone violation of input criteria: System should display message as "Wrong Input".

Output

The minimum total stone weights Alex can set the box for

Constraints

$1 \leq N \leq 100000$

$1 \leq A[i] \leq 100000$

Example 1:

Input

3
2
2
4

Output

9

Explanation

As two stones have the same weight; the max weight for one of them need to be incremented to 3. Alex can set the box with $2+3+4 = 9$ weights.

Example 2:

Input

2
3
4
5

Output

Wrong Input

Explanation

575

Here $N=2$, so we need to provide weight of only two stones but, we are providing weight of three stones. So result is "Wrong Input"

Solution in C

```
#include <stdio.h>
int main()
{
    int n;
    scanf("%d",&n);
    int weight[n];
    int i, sum = 0, count = 0;
    for(i=0; i<n; i++)
    {
        scanf("%d",&weight[i]);
    }
    for(i=0; i<n; i++)
    {
        if(weight[i]!=0)
            count++;
    }
    if(count==n)
    {
        for(i=0; i<n; i++)
        {
            if(weight[i]==weight[i+1])
            {
                weight[i+1]++;
            }
            sum = sum + weight[i];
        }
        printf("%d",sum);
    }
    else
    {
        printf("Wrong Input");
    }
    return 0;
}
```

Solution in Python

```
n = int(input())
stones=[]
while 1:
    inp = input()
    if inp == "":
        break;
    else:
        stones.append(float(inp))
if len(stones) != n:
    print("INVALID INPUT")
    exit()

if stones != sorted(stones):
    print("WRONG INPUT")
    exit()
for i in range(n-1):
    if stones[i] == stones[i+1]:
        stones[i+1]+=1
print(sum(stones))
```
